ASTRONOMICAL AND OTHER PHENOMENA

AND

A vast Amount of INFORMATION respecting the GOVERNMENT, FINANCES, POPULATION, COMMERCE, and GENERAL STATISTICS of the various Nations of the WORLD

Complete Edition

LONDON

OFFICE: 12, WARWICK LANE, PATERNOSTER ROW

PRICE SIX SHILLINGS NET.

PREFACE TO THE LXIST ANNUAL VOLUME.

(1929.)

THE Index to the 61st Annual Volume of "WHITAKER" is larger than any of its predecessors and extends to 90 columns, providing over 16,000 references to the 932 pages of the book.

Although the work is in its 61st year an erroneous drawing on the Title Page and in the Calendar had remained undiscovered until a short time before the present edition was placed on the press. Happily time permitted the error to be rectified, and Capricornus now appears in his true shape as a marine monster—a *Sea* (not *He*) Goat.

Many additions have been made to the statistical tables in the present issue, and attention may perhaps be directed to the pages in which Moneys of all Nations now appear, while Public Schools are dealt with in tabular form to show numbers and school fees; Questions of the Day are explained in short articles, and these are followed by Annual Summaries of the Year's Weather, Storms and Floods, Science and Invention, Literature, Art, Music, the Drama, Films, Wills proved in 1927–1928, British and Indian Railways, and the World's Shipping.

"WHITAKER" is edited by the public, and the Editor-in-Chief desires once again to express his gratitude for the obliging assistance rendered during the past year from all parts of the civilized world.

In expressing his thanks the Editor-in-Chief wishes also to convey a request that those of his collaborators who have sent criticisms or suggestions will continue their good offices; that those who have not yet done so will resolve during the next twelve months to acquire and develop the excellent habit of communicating their suggestions, thus assisting to make "WHITAKER" better than it is, and of greater benefit to themselves and to the world at large.

Correspondents are earnestly requested to note the first day of October as the latest date when suggestions should reach the Office, at the address given below.

12 WARWICK LANE, E.C. 4,
LONDON.

DIGNITY, COMFORT & POWER

INCREASED power, rapid acceleration and smooth running, combined with more buoyant suspension and low centre of gravity, are the component features that contribute to the wonderfully marked advance in road performance of the new Humber Cars.

Ideally slung coachwork, with low sweeping lines, breathes modernity with dignity to an advanced degree. Upholstery, appointments and coachwork finish convey instantly that impression of solid value for which the Humber has always been famed.

They are cars that *you* should see!

The Nottingham Guardian

THE LEADING BUSINESS MAN'S NEWSPAPER of the NORTH and EAST MIDLANDS, circulating throughout an area containing a population of over

2,500,000

engaged in the Lace, Hosiery, Boot and Shoe, Engineering, Chemical, Tobacco, Motor, Cycle, Coal Mining, Iron and Agricultural Industries.

In the five Counties of *Nottinghamshire, Derbyshire, Leicestershire, Lincolnshire and Rutland,*

The Nottingham Guardian

maintains an active, efficient and thoroughly up-to-date

TRADE INTELLIGENCE BUREAU

the value and practical utility of which, to manufacturers and business men, both at home and overseas, is proved by the thousands of inquiries that are dealt with every year.

Through the "NOTTINGHAM GUARDIAN" TRADE INTELLIGENCE BUREAU inquirers may obtain:

Authentic information and statistics respecting trade all over the world.

Particulars of trade marks, branded goods.

Contact with buyers and distributors anywhere.

Particulars of agents and agencies wanted and vacant.

The Bureau works reciprocally with all the leading trade and Government commercial organisations in all parts of the world. Its services are entirely free.

INQUIRIES should be addressed to the Secretary, "Nottingham Guardian" Trade Intelligence Bureau, Nottingham.

London Office: 59, Fleet Street, E.C. 4.

"A Very Shield of Comfort"

"My Burberry was perfectly drench-proof, never once did it fail me, however heavy the rain.

I have found my coat warm in Winter, not the least uncomfortably so in Summer, and a very shield of comfort on windy days."—R. R.

THE BURBERRY

is the most valuable Overcoat one can possess—the coat that fills every need on every occasion that calls for the use of either Weatherproof or Overcoat.

It keeps its wearer perfectly dry in downpour, drizzle, sleet or snow — snug and warm when it is chilly—comfortable under every conceivable change of weather or temperature.

The Burberry ventilates naturally; is never unpleasantly hot on close days and never cold or clammy on chilly, but delightfully comfortable to wear in every kind of weather.

THE BURBERRY BOOK
containing illustrations of models, patterns of materials and prices, post free on mention of "Whitaker's Almanack."

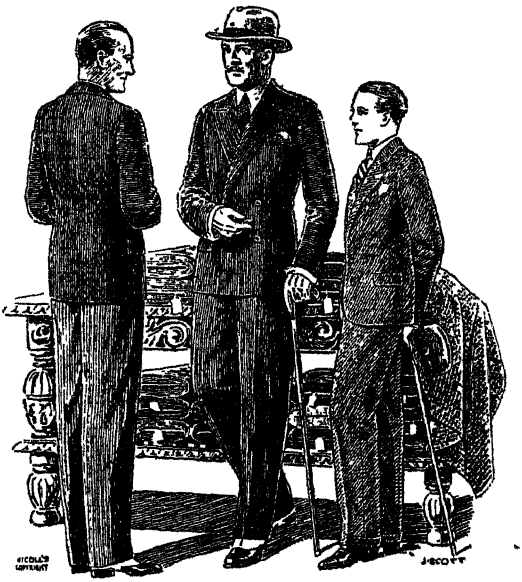
THREE GENERATIONS

ACTUAL HAPPENING

A gentleman asked to see the Manager. He said: "When I was a boy of this youngster's age, my father brought me to Nicoll's, introduced me to the Manager, and added: 'He wants two suits and an overcoat.' Well," he said, "I had them, and I've been faithful to Nicoll's ever since.

"Now, here's my son. I am introducing him to you. He wants two suits and an overcoat. Do your best for him."

Need it be said that we did?



From **6** guineas.

THE UNION JACK CLUB,

Waterloo Road, S.E 1 Tel.: Hop 3511

Patron-in-Chief His Majesty the King
Patroness-in-Chief. Her Majesty the Queen
Patrons H R H The Prince of Wales, K G., H R H The Duke of Connaught, K G.

President Colonel Sir W. R Lawrence, Bt, G C I E., G C V O , C B.
Vice-President Colonel Sir H Streatfeild, G.C.V.O , C B , C M G
Hon. Treasurer Sir G. J. Marjoribanks, K C V O
Comptroller of Club Brig.-General Sir E F. O Gascoigne, K C.V.O., C.M G , D.S O

This is one of our great National Institutions, where Sailors, Soldiers and Airmen can go when on leave or passing through London; a place where they may obtain at moderate charges good meals and comfortable bedrooms and where they find the usual amenities of a club, including Library and Writing Room, Billiard Room, Baths, Barber's Shop, and also a Club Shop in which articles of everyday use and almost everything that Service men require may be purchased. The Club is open throughout the day and night.

The Union Jack Club was erected by public subscription as a National Memorial to those who had fallen in the South African War, and other campaigns, and was opened on July 1st, 1907, by His late Majesty King Edward VII. Membership is limited to those serving on the Active List of the Regular Forces, below the rank of Officer, but Honorary membership is open to those belonging to the Royal Malta Artillery, the West India Regiments and the Colonial Permanent Forces, as well as the Navies and Armies of foreign Powers visiting England The Club is managed by a Council and General Committee, which includes representatives elected by the members

A considerable extension of the Club with funds raised in all parts of the Empire to commemorate the services of our gallant fighting forces in the Great War of 1914–18 and to provide increased accommodation was completed in 1923

In 1926–27 the Council were enabled, through the anonymous gift of one of its members, still further to enlarge the premises, thus bringing the total sleeping accommodation up to 772 beds.

THE UNION JACK HOSTEL,

Exton Street, Waterloo Road, S E. 1.
Tel Hop 2724. Opened June, 1913.
Patron-in-Chief His Majesty the King.
Patroness-in-Chief Her Majesty the Queen.
Patron H.R H the Duke of Connaught, K C.

President Brig.-General Sir E. F. O Gascoigne, K.C V O , C.M.G., D.S O.
Hon. Treasurer Sir G. J Marjoribanks, K.C.V.O.
Secretary: J. R. Hayward, M.B.E.
Warden. Mrs G Myatt

The Hostel provides lodging and accommodation for the wives and children (with or without their husbands and fathers) of members and ex-members of the Naval and Military Forces of the Crown, below the rank of Officer. It is managed by a Council, and though run closely in connexion with the Union Jack Club, the organisation and finances of the two institutions are quite separate from one another.

Abbreviations in Common Use.

A 1, First class.
A.A., Automobile Association.
A A M C, Australian Army Medical Corps
A.B, Able-bodied seaman
A.C. (*Ante Christum*) Before Christ

M.Inst Met, ditto of Metals
Mil., Military, Militia.
Min, Minister, Minv, Ministry
Min Plenip, Minister Plenipotentiary.
M.K.Q.C.P, Member of King and Queen's College of Physicians.
M.L A, Member of Legislative Assembly.
M.L C, ditto Council.
Mme., Madame
M.O H, Medical Officer of Health.
M P, Member of Parliament.
M P.S, Member of Pharmaceutical Society
M.R A.S., Member of Royal Asiatic Society
M.R C P, Member of Royal College of Physicians
M R C S, Member of Royal College of Surgeons.
M R C.V.S., Member of Royal College of Veterinary Surgeons
M R I.A, Member of Royal Irish Academy.
M R.San I, Member of the Royal Sanitary Institute
M S., Master of Surgery.
MSS., Manuscripts.
M.S.A, Member of Society of Architects
Mus. D. [B], Doctor, [Bachelor], of Music.
M V., Motor Vessel.
M.V.O., Member of Royal Victorian Order
M.W B., Metropolitan Water Board.

N, North.
Nat., Nationalist.
Nav., Naval.
N.B. (*Nota bene*), Note well.
N C.O., Non-commissioned Officer.
n.d., no date.
Nem. con. (*Nemine contradicente*), No one contradicting.
N.I., Northern Ireland (Govt., Parlt., and P.C. of).
N L, National Liberal.
No (*Numero*), Number
Non seq (*non sequitur*) It does not follow
N S, New style
N S, Nova Scotia
N S W., New South Wales
N W.P [T], North-West Provinces [Territory].
N Z, New Zealand.

O B E, Officer of British Empire Order
ob, or *obit*, died.
O H M S, On His Majesty's Service
O K, "All correct."
O M., Order of Merit
O P Opposite Prompt side (of Theatre), Out of Print (of books), Old Prices (Club).
O S, Old Style
O S B Order of St. Benedict
O T C, Officers' Training Corps
ord, ordained.
O U.D S, Oxford University Dramatic Society
Oxon., Oxford.
Oz, Ounce

P. (in P R S., &c), President—see F R S, R A., &c
P & O, Peninsular & Oriental.
Paym., Paymaster
P.C., Privy Councillor.
P C. ——, Police-constable ——.
Ph.D., Doctor of Philosophy
P.L A., Port of London Authority.
P M (*post meridiem*), After noon
P M.G., Postmaster-General
P M O., Principal Medical Officer
P P C. (*Pour prendre congé*), To take leave
Preb, Prebendary.
Pres, President
pres., presumptive, or present.
prev., previously.
Priv., Private.
Pro tem. (*pro tempore*), For the time being.
Prox. (*proximo*), Next month
P S. (*Post scriptum*), Postscript.
P.S A., Pleasant Sunday Afternoon
Pte., Private.
P.T.O, Please turn over.
P W D., Public Works Dept.

Q.C., Queen's Counsel.
q. e. d. (*quod erat demonstrandum*), which was to be proved.
Q M.G., Quartermaster-General.
Q S., Quarter Sessions.
Qmr, Quartermaster.
q.v (*quod vide*), "which see."
Qy. (*quaere*), Query.

R A., Royal Artillery or Royal Academy.
R A.C., Royal Automobile Club.
R A F., Royal Air Force; R.F.C. (*late*), Flying Corps.

R.A.M., Royal Academy of Music
R.A.M.C., Royal Army Medical Corps
R.A.N, Royal Australian Navy
R.C.N, Royal Canadian ditto

NOTE.—To ascertain any day of the week, first look in the table for the year required, and under the months are figures which refer to the corresponding figures at the head of the columns of days below. *For Example:*—To know on what day of the week Aug. 4 fell in the year 1914, in the table of years look for 1914, and in a parallel line, under Aug., is fig. 6, which directs to col. 6, in which it will be seen that Aug. 4 fell on Tuesday.

† 1752 same as 1772 from Jan 1 to Sept 2. From Sept 14 to Dec 31 same as 1730 (Sept. 3-13 were omitted).

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA

January 1. Day breaks 6*h* 2*m*. Civil twilight ends 16*h* 52*m*. Night begins 18*h* 5*m*. The length of the Day from Sunrise to Sunset is 7*h* 51*m*.

The ending of Civil twilight is here defined as the time when the Sun's centre is 7½° below the horizon. Day breaks and Night begins when it is 18° below.

Jan 1. Earth at least distance from the Sun. Perihelion 91,342,000 miles.

Jan 1. Occultation and Eclipse of Jupiter's Sat. III.

Jan 8. Occultation and Eclipse of Jupiter's Sat. III.

Jan 8, 21*h*. Saturn in conjunction with ☽. ♄ 3° N.

Jan 12, 6*h*. Mercury in conjunction with ☽. ☿ 3° N.

Jan 14, 20*h*. Venus in conjunction with ☽. ♀ 4° N.

Jan 16, 18*h*. Uranus in conjunction with ☽. ♅ 4° N.

Jan 18, 20*h*. Jupiter in conjunction with ☽. ♃ 1° N.

Jan 18. Occultation and Eclipse of Jupiter's Sat. II.

Jan. 22. Mercury at Greatest Elongation. 19° E.

Jan 22, 8*h*. Mars in conjunction with ☽. ♂ 1° N.

In this month the Mornings increase 25*m*, the Afternoons 46*m*.

Constellations near the South meridian at 22*h*: Perseus, Taurus, Eridanus, Auriga, Orion, Gemini, Canis Minor, Canis Major.

APPARENT RIGHT ASCENSION AND DECLINATION OF THE PLANETS AT NOON.

Notes on Time Numeration: Tables of the Moon, &c.—According to the practice of recent years, the day as treated in this Almanack is divided into 24 hours, numbered from 0 to 23, the hour following the midnight which begins the day being called 0. This system was adopted in the Nautical Almanac in 1925, and the time was, Mean, whereas it had, when used hitherto, been called Civil Time. At the meeting of the International Astronomical Union in 1928, it was recommended that astronomers cease to use the group of letters G.M.T., but that G.M.A. (*astronomical*) T. should be used if it is wished to count from Greenwich noon. It was agreed that G.C.T., U.T. or W.Z. (*Weltzeit*) may be used at discretion for time reckoned from midnight.

On page 3 of each month the position of the Moon, and other details relating thereto, are given for the *midnight which ends the day specified in the first column*. The second column gives the

Morning and Evening Stars.

☿ Mercury is an evening star throughout the month and from about the 20th may be seen at 17*h*. 10 degrees above the horizon S W to W S W

♀ Venus will be seen in the south-west in the early evening Magnitude −4 at the end of the month. It moves from Capricornus through Aquarius into Pisces

♂ Mars is a conspicuous object throughout the night, midway between Betelgeuse and Capella. Magnitude −1 2 to −0 4

♃ Jupiter which is situated between Mars and Venus, is due south about 18*h* and sets after midnight Magnitude −2 1. The presence of the three bright planets will add to the attractiveness of the evening sky in these winter months.

♄ Saturn is a morning star, rising in the dawn S E by E.

time of the rising which happens during that day, and the figures in the two following columns show the time of the southing and of the setting *which next follow that rising*, and these sometimes happen after the midnight which ends the day. In such cases the figures are in heavy type, and it is to be remembered in using this table that these distinctive figures always indicate a time *on the morrow of the day of its line* A similar system is followed in the Tables of the planets. (See pages 5, 9, 13, &c.) In the ephemerides of the planets on page 3 of each month, italic figures are occasionally used (pages 16, 32, 40) to indicate the change of sign of the declination noted in the heading

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

February 1 Day breaks at 5*h* 44*m* Civil twilight ends at 17*h* 36*m* Night begins at 18*h* 45*m* The length of the Day is 9*h* 6*m*

Feb 5, 10*h* Saturn in conjunction with ☽ ♄ 4° N.

Feb 7 Mercury at Inferior conjunction

Feb 7 Venus at Greatest Elongation. 47° E

Feb. 8, 1*h* Venus in conjunction with Uranus. ♀ 2° 0 N

Feb 9, 3*h*. Mercury in conjunction with ☽ ☿ 9° N

Feb. 13, 1*h* Uranus in conjunction with ☽ ♅ 4° N

Feb 13, 10*h*. Venus in conjunction with ☽ ♀ 6° N

Feb. 15, 8*h*. Jupiter in conjunction with ☽ ♃ 0° 8 N

Feb 17 Occultation of 4th Mag. Star τ Tauri See p 59

Feb 18, 20*h* Mars in conjunction with ☽. ♂ 0° 6 N.

Feb. 19. Neptune in Opposition. Least distance from Earth (Feb 21) 2,707,700,000 miles

The Zodiacal Light may be seen after sunset at the end of this month, the Moon being then absent from the sky

In this month the Mornings increase 51*m* , the Afternoons 49*m*.

Constellations near the S. meridian at 22*h* : Auriga, Taurus, Orion, Gemini, Canis Minor, Monoceros, Canis Major, Argo, Cancer, Hydra.

APPARENT RIGHT ASCENSION AND DECLINATION OF THE PLANETS AT NOON.

The Zodiac. The division of the stars into constellations or groups supposed to bear some fanciful resemblance to birds, animals, men, heroes, is the oldest part of astronomy, and, it has been maintained, had its origin nearly five thousand years ago among a people living somewhere between the Aegean and Caspian seas. Some of the constellations are mentioned by Homer and Hesiod, but our knowledge of the location and limits of the groups is derived chiefly from a poem by Aratus (300 B.C.), and from the star-catalogue of Ptolemy of the second century of our era There were 48 early constellations, and of these, the twelve through which the Sun, Moon and planets move during the year were evidently of special importance, for they have come down to us with very little differences from Egyptian, Arabian, Babylonian and Indian sources. These form the Zodiac, a name derived from ζωδίον, the diminutive of ζῶον, an

* The days thus indicated throughout the Almanack are those on which High Tides may be expected Strong northerly winds in the North Sea and a low barometer with heavy rains in the counties drained by the Thames will probably cause a higher rise of the river, and the low lying riverside districts to be flooded.

Morning and Evening Stars

☿ Mercury at Inferior conjunction on the 7th is an evening star at the beginning of the month and a morning star at the end, but is not likely to be visible in either case

♀ Venus glows brighter and sets later. It will be a conspicuous object at a considerable altitude in the south-west sky in the twilight and is moving towards Jupiter somewhat rapidly

♂ Mars was at a stationary point on Jan 27, and consequently has the same position among the stars as last month. Its brightness decreases from magnitude −0·4 to +0·4

♃ Jupiter in the constellation Aries has moved slightly eastward. Magnitude −2·0 to −1·7.

♄ Saturn is to be seen low in the south-east sky before sunrise.

animal, and these constellation figures are found incised on Persian and Babylonian boundary stones and on Egyptian temples Some remarkable sculptures found on the ceiling of the great temple at Denderah, Egypt, in 1798, certainly represent the Signs of the Zodiac. It is said that Albrecht Durer exercised his art in reproducing constellation figures, and that his highly embellished drawings of the sixteenth century are the basis of those seen on many globes and star-maps of to-day. The emblem for the tenth sign Capricornus has been misconceived. The creature is evidently a sea-animal with horns—a *Sea*-goat, not a He-goat as it has been called. An alteration in this sense is made in the present issue of this Almanack.

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

March 1 Day breaks at 4*h* 55*m* Civil twilight ends 18*h* 24*m* Night begins 19*h*. 30*m*. The length of the Day is 10*h* 50*m*

Mar. 1, *morn* Occultation of α and 8 Librae. See page 59

Mar 4 Mercury at Greatest Elongation, 27° W.

Mar 4, 22*h* Saturn in conjunction with ☽. ♄ 4° N.

Mar 9, 1*h* Mercury in conjunction with ☽ ☿ 4° N

Mar 14, 8*h* Venus in conjunction with ☽ ♀ 8° N

Mar. 14, 22*h* Jupiter in conjunction with ☽. ♃ 0 4° N

Mar 15. Venus at Greatest Brilliancy

Mar 16, Occultation of κ Tauri Mag 4·1. See p 59

Mar 18, 17*h* Mars in conjunction with ☽ ♂ 0 8′ S

Mar 21 2·6*h*. Sun enters the Sign Aries (Spring Equinox) Beginning of the Tropical Year.

The Zodiacal Light may be seen in the first part of this month, and at its end, the Moon being then absent from the sky

In this month, the Mornings increase 67*m*., the Afternoons 5*1m*.

Constellations near the ☌ meridian at 22*h* · Gemini," Canis Minor, Monoceros, Argo, Lynx, Cancer, Hydra, Leo, Crater.

Venus at Greatest Brilliancy.—We see Venus as we do all the planets by the light of the Sun that its surface reflects to us, and there are two reasons why the amount of that light, or the brightness of Venus, varies In the first place, the planet is seen in different phases like the Moon; or, in other words, though a hemisphere is always lit up by the Sun, only a part of that bright hemisphere is sometimes presented to us In the present month, since it is approaching Inferior Conjunction, the part of the illuminated region that we see is becoming smaller at a rather rapid rate, and for that reason the brightness would decrease But, on the other hand, the distance of Venus from the Earth is diminishing, and on that account its brightness would increase The combination of these causes brings the brightness of the planet to a maximum 36 days before and after Inferior Conjunction, when it is at an angular distance, about 38° or 39° from the Sun seen from the Earth, and its phase is like that of the Moon five days old. This will happen on March 15 and again on May 26

Morning and Evening Stars.

☿ Mercury, being at western elongation on the 3rd, is a morning star almost throughout the month, but rises scarcely early enough to be visible.

♀ Venus is at Greatest Brilliancy on the 15th. It still moves towards Jupiter but comes to a stationary point on the 29th, when the two planets will be not far apart. The crescent Moon will be near Jupiter on the 14th. Magnitude at maximum brightness—4·3.

♂ Mars is now not as bright as Capella, but is still a conspicuous addition to the group of bright winter stars. Magnitude 0·4 to 1·0.

♃ Jupiter sets nearly with Venus about two hours before midnight. The changes of relative position of the two planets have been mentioned above. Magnitude—1·7.

♄ Saturn is an object of the morning sky to be seen in the south-east between 3 and 4 o'clock. Magnitude 0·7.

The Date of Easter.—On June 15, 1928, the House of Commons agreed to a motion for third reading of the Bill that Easter-day shall, in the calendar year next but one after the commencement of this Act and in all subsequent years, be the first Sunday after the second Saturday in April. At some future time therefore, it seems likely that Easter-day will always fall between April 9 and 15, both inclusive, or either on the second or third Sunday in April. A clause in the Bill provides that before it shall come into operation regard shall be had to any opinion expressed officially by the various churches. (*See* p. 48)

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA

April 1. Day breaks at 3*h*. 38*m* Civil twilight ends 19*h*. 18*m* Night begins 20*h* 32*m* The length of the Day is 12*h* 53*m*

Apr 1, 8*h* Saturn in conjunction with ☽. ♄ 4° N.

Apr 9, 3*h* Mercury in conjunction with ☽. ☿ 2° N

Apr 10, 18*h* Venus in conjunction with ☽. ♀ 9° N

Apr 11, 16*h* Jupiter in conjunction with ☽ ♃ 0·2° S

Apr 12 Neptune in conjunction with Regulus ♆ 9′ N.

Apr 15, 20*h*. Mars in conjunction with ☽. ♂ 2° S

Apr 17 Mercury in superior conjunction ☉

Apr 18 Occultation of η Leonis (Mag 3·6) See p. 59

Apr 20 Venus at inferior conjunction

Apr 21-22. Occultation of γ Virginis (Double star) See p 59

Apr 28, 14*h*. Mercury and Jupiter in conjunction ☿ 2 2° N

Apr 28 15*h* Saturn in conjunction with ☽ ♄ 5° N.

In this month the mornings increase 6*m*.; the afternoons 48*m*

Constellations near the South meridian at 22*h*. Cancer, Hydra, Leo, Leo Minor, Crater, Corvus, Virgo.

APPARENT RIGHT ASCENSION AND DECLINATION OF THE PLANETS AT NOON.

The Financial Year.—In the first half of the eighteenth century September 30 was the first day of the year for the purposes of public accounts, but a change was made in the year 1752, when the Calendar Act of 1751 (24 Geo. II c. 23) ordained that eleven days should be dropped from the month of September in the year 1752, though nothing in the Act should be construed so as to anticipate the time of payments or shorten periods of time in existing contracts. As a consequence of this September 30 was replaced by October 11 in the year 1752 In 1800 a further change was made, and January 6 was adopted as the first day of the financial year, perhaps because that was the twelfth day after Christmas, and the difference between the Old and New Style Calendar then became 12 days. This lasted until 1854, and in 1855 April 1 became the first day of the Government financial year, and so still remains. These dates did not determine the period for the Assessment of Income Tax. A clause in the Act (39 Geo III. c. 13, 1798) runs, "The first assessment to be made by virtue of this Act shall be made for one year at

Morning and Evening Stars.

☿ Mercury is a morning star at the beginning of the month and an evening star at the end, but is not likely to be visible

♀ Venus is an evening star in the first part of the month, but sets earlier and becomes fainter rapidly. It is west of the Sun and rises 50 minutes before sunrise at the end

♂ Mars moves into the constellation Gemini. The changing configuration it forms with the twin stars to which it is about equal in brightness will be noticed Magnitude 1·0 to 1·4.

♃ Jupiter is at the end of its Apparition as an evening star, and sets in the twilight in the latter part of the month in the W.N W.

♄ Saturn rises in the S.E. by E about midnight at the end of the month, and will be a conspicuous object of the morning sky Magnitude 0 5.

the respective rates before mentioned from the fifth day of April, 1799, until the fifth day of April, 1800," and similarly in subsequent Acts. The words "from the fifth of April" evidently imply that the year for Income Tax purposes began then on April 6, as it does to-day.

The Planet Neptune.—This body, the outermost member of the Solar system is of little general interest, for its distance renders it too faint to be seen by the unaided eye. It may be seen by the help of a good field-glass, and since it happens at the present time to be quite near to Regulus, the bright star at the end of the handle of the Sickle, there will be little difficulty in locating the small body. The appearance of the planet is described as a greenish disc with an apparent diameter of about 2½". It will be in conjunction with Regulus, 9′ north of the star, on April 12, being to the left of it before that date. It continues its motion in the same direction through only a small distance, reverses on May 10, and will again be in conjunction with the bright star on June 6.

Jupiter is in conjunction on May 14.

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA

May 1 Day breaks at 2*h* 4*m*. Civil twilight ends at 20*h*. 12*m* Night begins 21*h* 53*m*. The length of the Day is 14*h*. 45*m*.

May 7, 7*h* Venus in conjunction with ☽. ♀ 6° N.

May 9, 6*h* Total eclipse of the Sun Invisible at Greenwich. See p 58

May 9, 13*h* Jupiter in conjunction with ☽. ♃ 0·9° S

May 10, 18*h* Mercury in conjunction with ☽. ☿ 0·7° N.

May 14. Jupiter in conjunction

May 14, 3*h*. Mars in conjunction with ☽ ♂ 3° S.

May 15. Mercury at Greatest Elongation. 22° E

May 25, 19*h*. Saturn in conjunction with ☽ ♄ 4° N

May 26 Venus at Greatest Brilliancy.

May 27. Occultation of τ Sagittarii (Mag. 3 5) See p. 59

A meteor shower, believed to have relation to Halley's comet, diverging from a point in Aquarius, sometimes appears in the mornings from May 2–6

In this month the Mornings increase 43*m*., the Afternoons 44*m*.

Constellations near the S meridian at 22*h* Leo, Leo Minor, Crater, Hydra, Corvus, Virgo, Bootes, Libra

Corpus Christi is a festival of the Roman Catholic Church designed in honour of the doctrine of transubstantiation. It was established in the year 1264 by Pope Urban IV who ordained that it should be held on the Thursday of the week after Pentecost, or in other words, on the Thursday after Trinity Sunday.

The Nebulae.—As seen in a telescope the great nebulae differ enormously in apparent size, shape and brightness. But Hubble has recently shown that differences in size and brightness in nebulae of the same shape are almost entirely due to a distance effect Nebulae of the same shape may thus be thought of as similar manufactured articles, or as astronomical plants belonging to the same species. Hubble further finds that even nebulae of different shape show

Morning and Evening Stars

☿ Mercury, at eastern elongation on the 15th, is an evening star and may be seen ten days earlier at altitude about 10° in the W.N.W.

♀ Venus is now a morning star, rising more than an hour before the Sun throughout the month north of east. Magnitude, at Greatest Brilliancy on the 26th, −4·2

♂ Mars remains an evening star of decreasing brightness Magnitude, 1·4 to 1·7 It moves eastward into the constellation Cancer.

♃ Jupiter being at conjunction on the 14th, rises and sets nearly with the Sun

♄ Saturn rises about two hours before midnight in the latter part of the month, and will be seen to the left of the bright stars of Scorpius. Magnitude 0·5 to 0·3.

only slight differences in intrinsic luminosity, and no great differences in size These circumstances make it possible to estimate the distances of all nebulae, down to the very faintest visible with fair accuracy. The faintest nebulae seen must be at a distance of 140 million light-years, which is the greatest distance with which practical astronomy so far has had to deal It is estimated that within this distance there must be about two million nebulae (*Astronomy and Cosmogony by Sir J H Jeans*)

Nebulae are shreds and balls of faintly shining stuff that are seen in the heavens. A few are visible to the naked eye (*see* p 65). Many were observed by Messier in Paris, and by Sir William Herschel in England at the end of the 18th century. The first successful photographs of a nebula (the Orion) were taken by Dr. Draper (America) and by Dr. Common (England) about the year 1880.

There are columns to show the orbits of the four large satellites of Jupiter with respect to the planet as seen in an inverting telescope. The open circle ○ indicates the planet's disc, the black circle ● shows that a satellite whose number is wanting, is either in eclipse or is occulted, while the sign + shows that it is in transit across the disc.

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA

June 1 Civil twilight ends at 21*h* 8*m* There is no closed night in this month in the latitude of London The length of the Day from Sunrise to Sunset on *June* 1 is 16*h* 14*m* Its length is nearly 16*h* 34*m* from the 20th to the 24th

June 4, *noon* Venus in conjunction with ☽ ♀ 3° S. *Venus occulted*, see p 59

June 6 Neptune in conjunction with Regulus ♆ 8′ N

June 6, 10*h*. Jupiter in conjunction with ☽. ♃ 1° S.

June 7, 19*h* Mercury in conjunction with ☽. ☿ 5° S

June 9 Mercury at Inferior conjunction

June 11, 13*h* Mars in conjunction with ☽ ♂ 4° S.

June 18 Saturn in Opposition Distance from Earth 838,780,000 miles

June 21, 22*h* *oh* Sun enters the sign Cancer (Summer Solstice).

June 21, 22*h* Saturn in conjunction with ☽ ♄ 4° N.

June 29. Venus at Greatest Elongation 46° W

In this month the Morning increase about 7*m* up to the 17th, and then decrease 4*m*. The Afternoons increase about 14½*m* up to the 25th, and then decrease slightly

The Brightness of Saturn.—The plane of the Rings that surround this remarkable member of the solar system is inclined always in the same direction, and we therefore see the Rings in different aspect as it pursues its 30-year journey round the Sun When they are edgewise to the Earth the planet, as a whole, is of less than average brightness; when the Rings are "open" or are looked at from as high an elevation as possible, the brightness should be in excess. The Rings are open at the present time, but the planet is not specially bright because it will be in Aphelion, or at its greatest distance from the Sun in November next. Fifteen years ago when the Rings were last in the "open" phase, the planet was at perihelion and at the Opposition in December

Morning and Evening Stars.

☿ Mercury at Inferior conjunction on June 9 is a morning star in the latter part of the month but is scarcely likely to be visible

♀ Venus in the constellation Aries rises in the east-north-east, an hour or two after midnight. Its occultation by the waning moon in the early afternoon of the 4th is to be noted. Magnitude −4·2 to −3·9.

♂ Mars is approaching the star Regulus, and towards the end of the month its nearness to the Sickle may make that group look unfamiliar. Magnitude 1·8

♃ Jupiter in Taurus in the region between Aldebaran and the Pleiades rises in the north-east by east in the dawn. Magnitude −1·6

♄ Saturn at Opposition on the 18th is above the horizon throughout the short night. Its maximum altitude is about 16 degrees Magnitude 0·2.

1914, the computed magnitude was −0·3 At the Opposition this month it is +0·2, whilst at the Opposition in March 1921, when Saturn was between perihelion and aphelion and its rings were practically invisible, its magnitude was given as +0·8, which indicates a brightness compared with that of 1914, nearly in the ratio of 1 to 3.

The Long Day.—June 21 will be longer than June 22 this year from sunrise to sunset in England by a few seconds only, because the Solstice happens only a hours before midnight. In eastern longitudes June 22 will be the longest day, because the Solstice falls on that date by local time.

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

July 1. Civil twilight ends 21*h* 23*m*. In this month there is no closed night in the latitude of London until after the 21st, when the Sun will be 18° below the horizon at midnight. The length of the Day on July 1 is 16*h*. 29*m*.

July 3. Mercury at Greatest Elongation 21° W.

July 3, 17*h*. Venus in conjunction with ☽ ♀ 4° S

July 4. Earth at greatest distance from the Sun. Aphelion Distance, 94,452,000 miles

July 4, 7*h*. Jupiter in conjunction with ☽ ♃ 2° S

July 5, 10*h*. Mercury in conjunction with ☽ ☿ 5° S

July 10, 1*h*. Mars in conjunction with ☽. ♂ 4° S

July 12. Occultation of the double star γ Virginis by the Moon in early evening. *See* p 59

July 14, 10*h*. Venus and Jupiter in conjunction ♀ 2 3° S

July 14. Occultation of λ Virginis, Mag 4 5. *See* p 59

July 19. Saturn in conjunction with ☽ ♄ 4° N

Meteors of the Perseid stream begin to appear in July.

In this month the Mornings decrease 34*m*, and the Afternoons 30*m*

Constellations near the S meridian at midnight: Hercules, Ophiuchus, Serpens, Lyra, Cygnus, Aquila, Delphinus, Equuleus, Aquarius, Capricornus, Sagittarius.

Conjunction of Venus and Jupiter.—This configuration occurs at intervals of about 400 days in the mean, though the differences from that mean are large Its last occurrence was on April 29, 1928, the next will be on May 27, 1930, the intervals in the two cases being 441 days and 307 days respectively. The conjunction may happen, as last year, when the planets are above the horizon in daylight or nearly so, and the approach is not spectacular. This year the planets were together in the brilliant spring evening sky, and since Jupiter's conjunction with the Sun and Inferior conjunction of Venus were not far apart, they are now again seen together in the morning.

A "conjunction" of two planets implies that they have the same Right Ascension, but they generally differ somewhat in declination, and at this conjunction the bodies will be separated by about four diameters of the Moon. There have been occasions (July 21, 1859, and February 5-6, 1892) when one has passed the other with a space of only a few seconds between the edges, so that the objects appeared as a double star of unusual magnitude or even one star.

Morning and Evening Stars.

☿ Mercury is technically a Morning Star, but the interval between its rising and that of the Sun is not long enough for it to be visible.

♀ Venus rises unusually early. It is again a near neighbour to Jupiter for it moves out of Aries into Taurus and passes that planet in the region between Aldebaran and the Pleiades on the 14th Magnitude − 3.8.

♂ Mars is to be seen in the early evening sky. It moves eastward from Regulus, with which it is in conjunction on the 1st Magnitude 2.0.

♃ Jupiter is a bright object of the morning sky moving above Aldebaran. Venus will be between them about the 15th.

♄ Saturn may be seen low in the south-east as the sky darkens. Sets 2 hours after midnight.

The Milky Way.—Though the strong twilight at this time of year may prevent its observation early in the evening, the Galaxy, or Milky Way, is often visible near midnight in July and August when the Moon is absent, stretching at that hour from Auriga on the north-eastern horizon through Perseus and Cassiopeia to Cygnus in the zenith, and then down through Aquila and Serpens to Sagittarius and Scorpius on the south-western horizon. The Galaxy is to some extent a depth effect (*see* page 62), but beyond this it is a region where some of the remarkable bodies of the Universe are found, and careful watch of this part of the sky may be rewarded by a discovery. With few exceptions all the bright Novae have been found near the boundaries of the Milky Way or within the dark gaps to be found within its confines.

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA

August 1 Day breaks at 1*h* 30*m* Civil twilight ends at 20*h* 43*m* Night begins, 22*h* 42*m* The length of the day is 15*h* 22*m*

Aug 1, 0*h*. Jupiter in conjunction with ☽. ♃ 3° S.

Aug 2 3*h*. Venus in conjunction with ☽. ♀ 5° S

Aug 5, 12*h*. Mercury in conjunction with ☽ ☿ 3° S.

Aug. 7. 17*h* Mars in conjunction with ☽ ♂ 4° S

Aug 15, 5*h*. Saturn in conjunction with ☽ ♄ 4° N.

Aug. 16 *aft* Occultation of τ Sagittarii (Mag 3 5). See p 59.

Aug 28, *morn*. Occultation of υ Tauri (Mag 4·2), and 72 Tauri (Mag 5·4) See p 59

Aug. 28, 14*h* Jupiter in conjunction with ☽. ♃ 3°S

Aug. 31, 16*h* Venus in conjunction with ☽ ♀ 5°S

Meteors of the Perseid stream are expected this month, the nights of most abundance being from the 10th to the 12th During the first fortnight of the month the moon will set before midnight and will interfere but little with their observation.

In this month the Mornings decrease 47*m*, and the Afternoons 59*m*.

Constellations near the S meridian at 22*h* are those which were in that position at midnight in July. (See p 28)

The Rainbow.—A rainbow is caused by sunlight reflected into the eye of an observer with his back to the Sun by drops of water in the air. Considering a single drop somewhere in front of the observer, some of the sunlight from behind him falls on and enters the tiny globe, is reflected at its inner posterior surface and emerges. It emerges as rays which diverge in all directions, but in the particular direction which makes the angle known as minimum deviation with the direction of the Sun, the rays congregate and form a dense pencil of light. This pencil enters an eye which happens to be placed so as to receive it and the eye will see a spot of light. There are many drops round the heavens that will send such a pencil into a particular eye the condition

Morning and Evening Stars

☿ Mercury having been at Superior Conjunction on July 31, is east of the sun during August, but will not be visible as an evening star.

♀ Venus continues to rise early, and will be due east at altitude approximately 30° between 4 and 5 o'clock. It passes through Gemini during the month. Magnitude −3·6

♂ Mars lingers in the early evening sky, but will not be conspicuous.

♃ Jupiter has passed to the left of Aldebaran. It now rises before midnight. Due east between 2 and 3 o'clock. Magnitude −1·7 to −1·9.

♄ Saturn may be seen low in the south after twilight and sets about midnight. Magnitude 0·6.

being that the direction of the entering pencil makes this angle with the line joining the eye to the Sun, and the combined effect is a circle projected on the sky. This refers to light of one colour only, red, let us say. The angle of minimum deviation is different for violet light and there is another assemblage of drops which give the appearance of a violet arc in the sky within the red, and similarly for every colour. The arcs are not distinct but merge one into another because the Sun is not a point. If the observer changes his position it is a different set of drops that will form the bow. Each person, in fact, sees his own rainbow.

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

September 1. Day breaks at 3*h* 7*m* Civil twilight ends at 19*h* 33*m*. Night begins 20*h* 53*m* The length of the Day is 13*h* 33*m*

Sept 5, 7*h* Mercury in conjunction with ☽ ☿ 5° S

Sept 5, 11*h* Mars in conjunction with ☽. ♂ 3° S

Sept. 10, 8*h*. Mercury and Mars in conjunction ☿ 2 9° S

Sept 11, 12*h* Saturn in conjunction with ☽. ♄ 4° N.

Sept. 12 Mercury at Greatest Elongation 27° E.

Sept 16–17 Eclipse and Occultation of Jupiter Satellites I and III See p 58.

Sept 23, 12·9*h*. Sun enters the sign Libra. (Autumnal Equinox)

Sept. 24, *morn.* Eclipse and Occultation of Jupiter Satellites I and III See p 58

Sept 24, 23*h* Jupiter in conjunction with ☽ ♃ 4° S

Sept, 27, 12*h* Venus and Neptune in conjunction ☿ 0 3° N

Sept 30, 10*h*. Venus in conjunction with ☽ ☿ 4° S

In this month the Mornings decrease 47*m*.; the Afternoons, 1*h* 6*m*

Constellations near the ♂ meridian at 22*h* · Lyra, Cygnus, Aquila, Delphinus, Aquarius, Capricornus, Equuleus, Pegasus, Pisces.

The Sun-spot Cycle.—It is not possible to say whether the Sun-spot maximum that might have been expected in the year 1928 has occurred. [See p 68.] The mean area of the Sun covered by spots was about the same in 1927 as in 1926, and there was no appreciable change during the first part of 1928 Some considerable spots appeared from July to September, but larger outbursts may happen in the current year that will make the interval between the expected maximum and the last (1917·7) longer than the mean 11·1 years as it has been before. This cycle and its unknown cause may be considered the greatest problem in nature. The figures which indicate the extent of the range of the magnetic needle day by day (see p. 76), the number of appearances of the Aurora Borealis, and other solar phenomena besides spots, all show periods similar to that of the last named. It is thought not improbable that the ultra-violet radiation of the Sun

Morning and Evening Stars

☿ Mercury sets shortly after sunset and will not be visible

♀ Venus is a morning star rising later day by day rather rapidly. It will be near Regulus on the 24th and 25th. Magnitude − 3·4.

♂ Mars sets in the early twilight and will not be visible

♃ Jupiter rises in the north-east by east in the late evening; its brightness increases from Magnitude − 1·9 to − 2·1. The morning sky is still enriched by the presence of the two bright planets, though they are now somewhat separated.

♄ Saturn will be in the south and south-west in the early evening in the part of Ophiuchus between Sagittarius and Scorpius. Mag. 0·7.

that is now measured day by day will show a similar periodicity. A committee has been formed to investigate Solar and Terrestrial relationships. The view seems to be held that there are areas on the Sun, not necessarily marked by sunspots that emit streams of electrons that may or may not strike the Earth, which is supported by the the tendency of magnetic disturbances to recur at an interval of 27 days the Synodic Solar rotation period. On July 7, 1928, there was a magnetic storm of sufficient intensity to interfere with telegraph working, an Aurora was seen during the night from Greenwich, and several large spots were on the Sun at the time.

Mean Longitude of Asc. Node, October 1, 43° 47'.

RAIN FELL AT GREENWICH IN OCT., 1927, on 12 days; total fall 1·27 inches; *below* the average by 1·26 inch.

MONTHLY NOTES

October 1. Latest day for receiving corrections for next year's "WHITAKER."—Quarter Sessions to be held within the period of 21 days immediately preceding or immediately following Sept. 29 last.—Pheasant shooting begins.—Common Lodging-houses to be whitewashed in the first week.

5. Jewish New Year 5690.
12. Fire Insurances must be paid.
14. Yom Kippur (Day of Atonement)
24 Borough Councillors to be nominated.

October Meteors.—During October, meteors are generally fairly abundant even on nights when no special shower is in activity. In recent years a new display of special kind has added to the importance of the meteoric systems of the month.

The earth passes near or perhaps through the orbit of Giacobini's comet of 1900 which has a period of about 6½ years. In 1926, Oct. 9, a very definite, if not extremely abundant, shower of meteors was directed from the point 262°+ 55° which, as nearly as possible, corresponds, both in date and direction, with that computed for the comet's orbit A few meteors from this radiant were recorded on Oct. 9, 1927, and repetitions of the display may be expected in this and

Morning and Evening Stars.

☿ Mercury is a morning star after the 8th. It will be at western elongation on the 23rd, and may be seen above the east-south-east horizon at 6 o'clock from about the 20th or earlier.

♀ Venus continues to rise later and is to be seen in the east before dawn Magnitude −3.4.

♂ Mars is above the horizon only in daylight hours.

♃ Jupiter which is at a stationary point on the 5th rises at about the end of twilight and throughout the night is a conspicuous object.

♄ Saturn sets S W. by W. soon after twilight and may still be seen as an evening star.

future years These displays should be plentiful in October 1933 and 1934, and in 1939 and 1940.

Another rich shower has long been known to occur in Oct, viz. "The Orionids." This is visible chiefly between the 19th and 24th of the month and the maximum is usually attained on Oct 21 The meteors are swift, with streaks, and diverge from a point in the N.E. region of Orion at 91°+15°.

Halos, Coronae.—The halo or luminous ring of 22° radius sometimes seen surrounding the Sun or Moon, the space within it appearing less bright than the rest of the sky, is produced by *refraction* of the rays of the Sun or Moon through a cloud of ice-crystals in the upper air A corona, or coloured ring usually about 5° radius surrounding the Sun or Moon, bluish-white, immediately adjacent to the luminary and brownish-red on the outside, is produced by *diffraction* or the bending of rays round small water drops. A variety of this called a Bishop's ring of about 20° outer radius is believed to be due to diffraction by very fine particles of dust suspended in the atmosphere.

Lord Mayor's Day.—The date November 9, is in accordance with Act of Parliament (24 Geo. II. c 48). In the earliest times the Lord Mayor was elected on the day of the Feast of St Simon and St. Jude, October 28, and from the time of Edward I at least was presented to the King or to the Barons of the Exchequer on the following day, except that day be a Sunday

The day of election was altered to October 16 in 1346, and after some further changes was finally fixed for Michaelmas Day in 1546, as it now is, but the ceremonies of admittance and swearing-in of the Lord Mayor continued to take place on October 28 and 29 respectively until 1751.

Morning and Evening Stars

☿ Mercury may perhaps be seen in the early days of the month low in the east-south-east at 6 o'clock, but will not otherwise be visible.

♀ Venus rises nearly at daybreak and will probably be seen in the brightening sky, south of east. It passes above Spica Virginis on the 6th Magnitude −3·4

♂ Mars rises later than, and sets only a few minutes after the Sun

♃ Jupiter, which is now moving from left to right towards Aldebaran, is the bright object of the evening sky and is unmistakable It rises N.E. by E in the twilight Magnitude at end of month, −2·4.

♄ Saturn, as last month, is above the horizon during the evening twilight.

The Calendar Act of 1751 (24 Geo. II. c. 23) ordained that Saints' days should be on the same dates in the new calendar as in the old, and consequently the day of St Simon and St. Jude continued to be October 28 But this Act was followed by another (24 Geo II c 48) "for the abbreviation of Michaelmas term," which altered the date of the beginning of that term to November 6, and consequently directed that the presentation of the Lord Mayor, that had been "usually kept and observed by the said City on the twenty-ninth day of October, should, after Michaelmas, 1752, be kept and observed on the ninth day of November" An Act of the next year 1752 (25 Geo. II. c. 30) provided that the admittance at the Guildhall should be as before, on the previous day, i.e November 8.

Fasts and Festivals.

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA

December 1 Day breaks at 5*h* 42*m* Civil twilight ends 16*h* 45*m* Night begins 17*h* 57*m*. The length of the Day is 8*h* 8*m*

From Dec 18 to 25 the length of the Day is about 7*h* 46*m*

Dec 1, 7*h* Mars in conjunction with ☽. ♂ 2° N

Dec 1, 10*h* Mercury in conjunction with ☽ ☿ 2° N

Dec 3 Mars in conjunction

Dec 3 Jupiter in Opposition. Least distance from Earth (Dec 2), 378,170,000 miles

Dec 3, 0*h*. Saturn in conjunction with ☽ ♄ 5° N.

Dec 14, 16*h* Mercury and Saturn in conjunction ☿ 2·8° S

Dec 15, 14*h*. Jupiter in conjunction with ☽. ♃ 3° S

Dec 22, 7 9*h* Sun enters Sign Capricornus (Winter Solstice.)

Dec 25 Saturn in conjunction.

Dec 30, 3*h* Venus in conjunction with ☽. ♀ 4° N.

Dec 30. 7*h*. Mars in conjunction with ☽. ♂ 3° N

Dec 30, 13*h* Saturn in conjunction with ☽. ♄ 5° N.

In this month the Mornings decrease 23*m*, the decrease being continuous throughout the month The Afternoons decrease 4*m* up to the 13th, and then increase 9*m*

Constellations near the S. meridian at 22*h* · Andromeda, Triangulum, Aries, Cetus, Perseus, Taurus, Eridanus, Auriga, Orion

Advent Sunday is the nearest Sunday to St Andrew's Day, November 30, which allows three Sundays between Advent and Christmas Day in all cases. The Sunday preceding Advent is the 27th after Trinity if Easter falls on one of the days, March 22–26 inclusive. It is the 22nd after Trinity when Easter Day is on April 24 or 25 If the date of Easter is determined as proposed (*see* p. 13), there will generally be twenty-four Sundays after Trinity, the number being twenty-five only in the years when Easter falls on April 9. As the rubric ordains that the Epistle and Gospel for the 25th Sunday after Trinity shall always be read upon the Sunday next before Advent, it follows that those offices appointed for the 24th Sunday will be little used. With this new Calendar there will never be a sixth Sunday after Epiphany. There will be a fifth Sunday when Easter Day falls on April 15 or on April 14, the year being a leap year.

Morning and Evening Stars.

☿ Mercury at eastern elongation on January 6 may possibly be seen in the south-west at 16h 30m in the last few days of December

♀ Venus is drawing near the Sun and is only to be seen in the late dawn in the first part of this month

♂ Mars in conjunction with the sun on the 3rd, is not to be seen

♃ Jupiter at Opposition on the 31d will be above the horizon from sunset until dawn, and will be a brilliant object high in the mid-evening sky Still moving from left to right, it passes about 5 degs. north of Aldebaran on the 17th Magnitude −2·4 to −2·3

♄ Saturn at conjunction in the 25th, cannot be seen this month.

The Julian Period.—As this period (*see* p. 82) began on the first day of the year 4713 B.C., the number of its years that have elapsed up to this time is 1928 + 4713 = 6641, these being years in the Julian Calendar, which now differs 13 days from the Gregorian. The year 6642 of the Julian Period therefore begins on 1929 January 14. The scheme is now used mainly for purposes of astronomy, the day being still reckoned from noon, and at noon on 1929 January 14, there will have elapsed since the beginning of the period, 6641 years of 365 days, with 1661 extra days for leap-years, the first year of the period having been a leap-year—this total is 2,425,6x6. Therefore the number of days of the Julian Period *that will have elapsed at mean noon* of January 1 is 2,425,613, as given on p 1 and similarly on p 50.

Jan 3 Earth in Perihelion. Distance 91,346,500 miles

In the year 1930 there will be four eclipses On April 13 and on October 7 there will be a Partial Eclipse of the Moon—both unimportant On April 28 there will be a Central Eclipse of the Sun to be seen from North America both Annular and Total There will be a Total Eclipse of the Sun on October 21, invisible at Greenwich. The path of totality will cross the South Pacific Ocean, the maximum duration on this line being less than two minutes

Venus will be at greatest brilliancy in October (evening), and in December (morning) *Saturn* will be in Opposition on July 1. Neither *Mars* nor *Jupiter* will be in Opposition this year, both being at that configuration early in 1931.

RISING, SOUTHING, and SETTING OF PLANETS at intervals of Seven Days. (Noon = 12*h*.)

THE TIME OF HIGH WATER *at the undermentioned Ports and Places may be* approximately *found by taking the Time of High Water at the* Standard Port *(as shown on pp 5, 9, etc.) and adding to or subtracting therefrom the quantities annexed. The time thus found will be* Greenwich Time *for British, Irish, French and Belgian Ports, and* Amsterdam Time *for Netherlands Ports. The rise of the tide at Springs and Neaps is given in the last two columns.*

EXAMPLE 1.—Required the time of high water at *Aberdeen* on *January 11th*, 1929:—

Time of high water at *Leith*	2*h*	55*m*	Morn
Subtract tide interval	1	33	
Time of high water at *Aberdeen*	1	22	Morn

EXAMPLE 2.—Required the time of high water at Scarborough on *January 11th* —

Time of high water at *Leith*	2*h.*	55*m*	Morn.
Add tide interval	1	32	
Time of high water at Scarborough	4	27	Morn.

It may happen that the "tide interval" to be subtracted is greater than the quantity from which it has to be taken, in which case 24 hours must be added to the Standard Port time; the resulting difference will be the preceding day's afternoon tide where the Leith morning tide was used. Sometimes the sum "high water at the Standard Port" + "tide interval" will exceed 24 hours; in this case the excess will be the time of high water after the midnight following.

EXAMPLE 3.—Required the time of high water at Aberdeen, *January 22nd*, 1929, aft.—

Time of high water at *Leith* on *January 23rd*	0*h*	31*m*.	Morn.
(+ 24 hours =)	24	31	
Subtract tide interval	1	33	
Time of high water at Aberdeen, *Jan 22nd*	22	58	After.

Tables for Finding the Times of Sunrise and Sunset.

THIS double entry table provides the means for finding, with sufficient accuracy for practical purposes, the times of sunrise and sunset at any place situated between latitude 60° N and 60° S.

To use the table. In the horizontal line with the Sun's declination in the first column, and under the required latitude in the heading there will be found figures which added to 12*h* give the *local apparent time* of sunset. Subtracting these quantities from 12*h* will give the *local apparent time* of sunrise. To obtain from this the local *mean* time, the equation of time for the day in question which is given on the second page of each month, must be added to or subtracted from these apparent times of sunrise and sunset, as shown in the heading.

To find the corresponding Greenwich mean time, the difference of longitude of the place from Greenwich must be added if the place be West, subtracted if East.

The table is arranged for northern latitudes, but will serve equally well for places south of the Equator, if the declination North in the first column be considered South, and *vice versâ*.

If the figures are required for a declination or latitude falling between two arguments of the table, they may be found by proportion. The effect of refraction is included.

THE TIME OF SUNSET.

The times of sunrise and sunset given in this Almanack (and similarly of moonrise and moonset) are the times when the centre of the Sun's disc is seen on the horizon from sea-level at Greenwich, computed on the assumption that the horizontal refraction is 34½′. It is doubtful whether there is a precise legal definition of sunrise and sunset. The above has generally been adopted as a correct statement, though in some Tables the instant when the upper limb, or edge,

of the Sun is on the visible horizon is given as the time when the Sun rises and sets The legal question has been more concerned with the distinction between local sunset and Greenwich sunset, rather than with a precise definition. It has been held by a legal tribunal, as would be expected, that the word "sunset" in laws and regulations must be taken to mean the time when the sun sets at the place in question, whether it be stated in local or Greenwich time.

TO FIND THE GREENWICH TIME OF SUNRISE AT CERTAIN PLACES IN THE BRITISH ISLES IN EACH MONTH OF THE YEAR.

The Table gives the number of minutes to be added to or subtracted from the time of sunrise at Greenwich, to find the Greenwich time of sunrise at the place named in the first column, on the first day of each month. The corrections to be applied on other dates and for other places in the neighbourhood of these may be inferred approximately by interpolation.

The sign + means that the time required is later than that at Greenwich The sign −, that it is earlier.

If these Tables be considered in conjunction with a map it will be seen that the places at which the Sun rises at the *same* moment lie in a slightly curved line across the map, the lines for different moments being approximately parallel. The lines change their inclination to the meridian throughout the year. Similarly for the setting.

Tables for Determining the Latitude

FROM THE OBSERVED ALTITUDE OF POLARIS OUT OF THE MERIDIAN.

The times in the headline and penultimate column are *Apparent* By applying the Equation of Time, the Mean Time is found to which the figures are appropriate

Alt.—This is given to tenths of a degree, but there may be small differences between the morning and afternoon hours, and between the like days of the year The effect of Refraction is not applied *Azimuth* (Az) is measured either eastward or westward from the N Az 45° is equivalent to N E or N.W Az 135° to S E. or S W. E S E. or W S W is $112\frac{1}{2}°$

The year is divided into periods of thirty days (with exceptions). The figures for days other than those given can be found by interpolation with approximate accuracy

Solar and Sidereal Time.

TO CHANGE INTERVALS OF MEAN SOLAR TIME INTO THE EQUIVALENT INTERVALS OF SIDEREAL TIME AND *VICE VERSÂ*.

THE length of a Sidereal day is $23^h\ 56^m.\ 4\ 09^s$ of Mean Time. One hour of Sidereal Time is, therefore, equivalent to $59^m\ 50^s.78$. of Mean Time, and one hour of mean solar time is equivalent to $1^h.\ 0^m\ 9\ 86^s$. of Sidereal Time. The multiples and submultiples of the differences from one hour are tabulated below under headings "acceleration" and "retardation"—for the argument (common to both) in the middle columns If the argument be considered as Mean Time its equivalent in Sidereal Time is obtained by adding the acceleration If it is Sidereal Time, its equivalent in Mean Time is found by subtracting the retardation

Acceleration.	Argument	Retardation.	Acceleration	Argument	Retardation.	Acceleration.	Argument	Retardation	Argument	Acceleration or Retardation	Argument	Acceleration or Retardation

Celestial Phenomena for Observation in 1929.

ECLIPSES OF THE SUN AND MOON

IN the year 1929 there will be *two* Eclipses of the *Sun* and *none* of the *Moon*

I. A *Total Eclipse of the Sun* on May 9. Invisible at Greenwich Mid eclipse will occur at 6 o'clock in the morning by Greenwich Time The path of the Moon's shadow from which Total Eclipse may be seen begins its course in the Indian Ocean, south of Madagascar, and travels in a north-easterly direction towards the Equator which it meets almost at the point where it crosses the meridian, 90° East The central line then curves and passes through Sumatra, Malay States, Siam, Cambodia, and the Philippines, where totality will happen in the local afternoon In Sumatra and the Malay States the duration of totality will be slightly more than five minutes The Sun will be seen partially eclipsed from South Africa, Mauritius, India, Further India, and China, the circumstances (G C T) for some places in those countries being as follows :—

	Eclipse begins H M	Greatest Phase H M	Eclipse ends H M	Magnitude
Johannesburg ..		(Sunrise)	5 22	60
Mauritius ..	3 38	4 42	5 54	84
Bombay ...	5 13	5 58	6 46	17
Madras . .	4 51	6 2	7 18	47
Hong Kong	6 5	7 21	8 31	64

II. An *Annular Eclipse of the Sun* about midday at Greenwich of November 1 Visible at Greenwich as a Partial Eclipse The path of the Moon's shadow on the Earth from which the Sun may be seen annularly eclipsed begins in the Atlantic south of Newfoundland. Its course then follows a south-easterly direction, and meets the African coast at a point south of the Canary Islands The central line of the path meets the Greenwich Meridian in latitude about 8° north, and, after crossing the Gulf of Guinea, the Belgian Congo, Tanganyika, comes to an end in the Indian Ocean north of Madagascar, and about 5° south of the Equator The greatest duration of annularity will be seen from the central line as it crosses the Gulf of Guinea, when it will be about 3*m.* 58*s* The times (G C T) when the centre of the shadow passes certain points of its path are—

G C T H. M	Lat ° ′	Long ° ′	Duration of Annular Phase M S
10 30	32 51N	28 29W	3 28
11 0	20 52	12 37W	3 38
12 0	5 26N	2 9E	3 53
13 0	4 51S	17 11	3 56
13 45	6 58S	42 56E	3 36

A *Partial Eclipse* will be seen from Africa, Western Europe, and Arabia, the circumstances for some places being as below —

	Eclipse Begins H M	Greatest Phase H M	Eclipse Ends H M	Mag
Armagh	9 59	10 53	11 50	·25
Liverpool	10 5	10 57	11 52	23

The above is a list of the stars of magnitude 6·5 and brighter that may be seen occulted from Greenwich during the year. The occultations will, *in general*, be seen earlier from a place West, later from a place East of Greenwich, but an occultation visible from one place is not necessarily to be seen from some other. The angle from N. Point, shows the point on the Moon's edge of disappearance or reappearance, and is counted towards the East from 0° to 360°. * Double stars.

ECLIPSES OF JUPITER'S SATELLITES.—The Table gives the Times of Disappearance (D) and of Reappearance (R.) of the Satellites of Jupiter at Eclipse that will happen when Jupiter is above the horizon at Greenwich and the Sun below. The phenomena are seen simultaneously from all places where the planet is above the horizon at the time. From May 14 to the Opposition of Jupiter (December 3) the Eclipses take place on the West side, at other dates on the East Satellites sometimes disappear by Eclipse and reappear as from Occultation at the Eastern edge. The times of such reappearances (Oc. R.) are given, the satellite being that of the *preceding* line. In converse cases, the times of disappearance by occultation (Oc. D.) and of reappearance after Eclipse are given, the satellite being named in the second line.

MEAN RIGHT ASCENSION AND DECLINATION OF BRIGHT STARS, VISIBLE AT GREENWICH, FOR JANUARY 1. 1929, with spectral type, P.M and Parallax.

The position of a star is defined by its Right Ascension and Declination, which are co-ordinates analogous to longitude and latitude on the terrestrial sphere The lines of reference on the celestial sphere depend on the position of the axis of the Earth and since, for reasons known generally by the word Precession, this position has a continual small movement with respect to the stars, Right Ascension and Declination change annually by an amount that can be computed by formula Observation of position of the stars show that they do not conform precisely to this computed precessional change, and the outstanding amount for individual stars known as Proper Motion (*see* page 65), is shown in two columns of the adjoining table The annual precession and Proper Motion combined, or the amount by which each element of a star's position changes in a year, known as the Variation is also shown, this being a different practice to that in some former issues of this Almanack. The angular parallax of a star is the angle that the mean radius of the Earth's orbit would subtend at the distance of the star to which it is inversely proportional Hence parallax is a measure of distance. The parallaxes in the adjoining table are mainly trigonometric and have been taken from the General Catalogue of Parallaxes collected by Dr.

Frank Schlesinger of Yale. The entry 000 indicates that the star is especially distant, and for some few stars no value is available. In the last column shows the distance from the sun corresponding to the parallax in parsecs (*see* p. 65).

Sirius and Procyon have faint companions, Castor, ζ Herculis and α Centauri are also binary stars, of these the Mean place given is that of the centre of the orbit.

These tables give Mean places. The position on any day of the year differs from this because of Precession, Nutation, Aberration and Proper Motion. The Mean place with these effects added is called the Apparent place, and for the purposes of navigation and surveying it is the Apparent place that is required.

For Names *see* p. 74.

THE objects of the sky, Sun, Moon, Planets, Stars, appear to us to be fixed on the interior surface of a hemisphere of which the observer is the centre. Actually the various classes of objects are at very different distances. The Moon, our nearest neighbour, is 240,000 miles from us; a distance which light, travelling at the rate of 186,000 miles a second traverses in less than a second and a half. Of the bodies of the Universe whose distance is known, the farthest is so remote that its light takes over 100,000,000 years to reach us. The nearest star to the Sun is more than eight thousand times as far from it as is the planet Neptune. It is the purpose of modern astronomy to investigate the method of distribution of these bodies in space, their movements and their sizes. Cosmical Physics attempts to deduce their physical nature, and that of cosmical matter in general from the observations of the astronomer, combined with knowledge gained in the laboratory, with the hope of finally elucidating their past and future history. The total number of stars of magnitude 6·0 and brighter, which is sometimes taken as the limit of naked-eye visibility, is about 4,300, of which 3,000 are visible during the year from latitude 60°, but a more generous estimate, formed by including cases when two faint stars close together are seen as one, sets the whole number at 10,000. By the aid of the photographic plate objects are detected and recorded which no eye can see, even with the best optical aid and from counts on such plates estimates have been made of the number of stars in the Universe. 2,000,000,000 was once assigned as a limit to their numbers, but this has been increased later to 30,000 or even 50,000 million. The Yerkes telescope, whose object glass has 40 inches diameter, will just show stars of the 17th visual magnitude. A star of magnitude 21 has been photographed.

THE STRUCTURE OF THE UNIVERSE

The stars are divided according to their apparent brightness into series known as magnitudes (*see* page 74), and down to the 9th or 10th magnitude the number of each magnitude is known, for all to this order have been catalogued. For fainter stars the numbers have been derived from counts in sample areas. On the supposition that the Universe is an aggregation of stars in which the individuals of each of the varying degrees of intrinsic brightness are distributed uniformly throughout an endless space, it is to be expected that the number of stars brighter than the 4th magnitude would be about four times as great as the number brighter than the 3rd; the number brighter than the 5th magnitude greater than the number of those brighter than the 4th in the same ratio, and so on indefinitely. When the numbers of stars of different magnitudes obtained by counts are compared, it is found that this star-ratio, as it is called, in the case of the brighter stars, approaches but does not attain the theoretical value 3·98, and that the ratio decreases continually as the stars are fainter, until at the 16th magnitude it is only about two. The explanation of this observed fact is that the universe of stars accessible to vision is limited; either there are few or no stars beyond a somewhat indefinite boundary, or we are prevented from seeing them by absorbing material distributed throughout interstellar space.

It is established from counts and measured distances that around our Sun the stars are fairly uniformly distributed at the rate of about one per 10 cubic parsecs. It is obvious that a uniform distribution of this nature cannot go on indefinitely, for, if it did, this background of the firmament would be bright, since in whatever direction we looked we should, in time, come to a star.

To a casual glance it is clear that the stars are not uniformly distributed over the sky, but have a tendency to congregate near the great belt of cloud-like forms which encircle the heavens, known as the Milky Way or Galaxy. Applying the method of sounding by "star ratios" above outlined, it is found that the stars appear to thin out less rapidly as we go out in the plane of the Milky Way than they do in the direction of the galactic poles. The deduction is apparent, the boundaries of the stellar system are more distant in the plane of the Galaxy than they are at the poles. In other words, the stellar system is an extremely flattened organisation, whose general form is, roughly, that of a double convex lens or of a watch. Looking along the galactic plane we find the stars crowding together, as we should expect, since this is the direction of greatest extension, and the Milky Way is therefore largely a depth effect. But examination of its prominent features, the great star-clouds, the irregularities in its form, and the deep rifts in its structure, shows that its appearance is not wholly due to depth, and that the region is the home of bodies and masses other than uniformly distributed stars.

Statistical study of the distribution of the brighter stars shows that they form a star-cloud, which surrounds the Sun and appears to have the same shape in general as the main galactic system, but the fundamental planes are slightly inclined one to the other. It was formerly a general belief that the Milky Way surrounded this congregation of bright stars as a girdle, whether continuous with it or not was an open question, but a more modern view pictures the total Universe as a number of clusters, similar to this one of which our Sun is a unit, all lying more or less in the Galactic plane. The greatest condensation of stars as we see them occurs in the bright galactic clouds in Sagittarius, while the opposite portion of the Milky Way is a region of low concentration and brilliancy, from which it is inferred that we are not precisely at the centre of the whole Universe, but that its boundaries are more remote in Sagittarius than elsewhere. The fact that the central line of the Milky Way deviates slightly from a great circle and that the southern Galactic hemisphere is slightly richer in stars than the northern, is generally assumed to indicate that the position of our Sun is a little north of the Galactic plane.

Attempts have been made to estimate the probable dimensions of this Universe of stars. The diameter of our own local system is generally regarded as about 3,000 or 4,000 light years. As to the larger system comprehending all the faint stars we know of, Newcomb derived a diameter of about 30,000 light-years in the Galactic plane, the shorter diameter at right angles to this plane being about 1/5th of this amount, and there have been other estimates of the same order, whilst more recently Shapley, approaching the question from an entirely different point of view, has given 300,000 light-years as the larger diameter of the Stellar Universe, the dimension at right angles to the Galactic plane being one twentieth of this. It

The last columns show the light emitted compared with that by our Sun considered to be of magnitude −26 57 on the stellar scale. A star marked * is the brighter component of a binary system. α^1 Centauri is the brighter of two bright stars seen by naked eye as one. A faint companion to these known as Proxima is the nearest star to us so far as is known.

will be gathered from this that the matter is highly conjectural.

Within these limits of distance there are other bodies besides stars, such, for instance, as irregular nebulae (*see* p. 65) of which the nebula of Orion is one of the most remarkable that are found to be comparatively near objects, and are to be considered as within the Galaxy. But there are nebulae of another type that are not seen about the central Galactic plane, and from various lines of argument are thought to be very distant from our Sun (*see* p. 66). These are supposed by some to be Island Universes, not forming part of the Galactic system, but this again is a point still under discussion. It is recognised that in the space which comprises the Universe of stars there is dark obscuring matter which it is suggested is the cause of some of the dark patches in the Milky Way. As seen in the sky the Galaxy always passes through the same constellations, sharing with them the diurnal motion, but its direction bears no special relation to the direction of the Ecliptic or Equator, for these planes, so far as we know, have no relation to the Cosmos.

STAR SPECTRA.

Most of the bright stars and many of the fainter have been examined with a spectroscope, and have been divided into classes according to their type of spectrum as indicated by the lines which cross them, the spectral types being named by the letters O, B, A, F, G, K, M, N. The stars of the first two classes, O and B, have spectra characteristic of helium and hydrogen. Planetary nebulæ, some stars known as Wolf-Rayet, in whose spectrum the chief lines are bright, and the bright stars of Orion generally are in this group. Stars whose spectra range between A and F—it is to be remarked that there is no rigorous line of division between the classes and that there are subclasses and spectra noted as "peculiar"—are white or blue stars, and in their spectra broad absorption lines of hydrogen are conspicuous. In the next groups—F to G and G to K—lines characteristic of metals appear, fine but numerous, and the stars of this class are yellow. The spectrum of our Sun falls late in the group F to G. The characteristic of the spectra of the remaining classes, M (and N), is the existence of a considerable number of flutings, and the stars are orange and red. Antares, Betelgeuse, and α Herculis are notable stars in sub-classes of this type. (*v. supra*.)

STELLAR EVOLUTION.

The early stellar spectroscopists believed that they were investigating the chemistry of the stars and finding the material of which they are composed—that the hydrogen specially prominent in Sirius as shown by its spectrum would some day change into calcium, which is a leading characteristic of the solar spectrum, and hence that Sirius is in an earlier stage of development than the Sun. The modern view, based on laboratory experiments, is that the spectrum shows the radiative power or, in other words, the surface-temperature of the star, and that the hydrogen lines in the spectrum of Sirius, for instance, do not indicate an excess of that element, but, rather, that the star is at the temperature (10,000° C.) when those lines are prominent. The Sun is at a temperature of 6 000° C., which is favourable for the production of an iron spectrum. At an earlier date stellar evolution seemed very simple. Stars began by being very hot and then cooled down, arriving at a condition that gave a spectrum of type M and then disappeared. But about the year 1913 a hypothesis was propounded to the effect that in the beginning all stars are of Class M. That they are then bodies of gas of extraordinarily low density, and of low temperature and surface brightness, which contract, grow continually hotter, and pass through the successive spectral classes towards B, but only the more massive stars can generate enough heat to reach the white hot

state required to produce spectra of that class, the others reach their critical density at spectral class A, F, G, or even K. After this critical point in their contraction is reached the stars begin to fall off in temperature and in surface brightness, and pass through the spectral classes in the reverse order until they have again become red stars of Class M before they finally sink to invisibility. The stars on the ascending branch are "giants,' those on the descending branch are "dwarfs" The idea of stars increasing in temperature in the course of evolution was originally conceived by Sir Norman Lockyer from general physical considerations, but emerged, as stated, as a deduction from researches by Prof. Hertzsprung and Prof. H. N. Russell tabulating absolute magnitude with spectral type There are, however, now found to be grave difficulties in the way of accepting the "giant" and "dwarf" theory, and to day it is believed that the primary evolutionary change in a star is decrease of mass, that annihilation of matter is the source of stellar energy, and that the older a star grows the less massive it becomes. Tabulation of the determined masses of certain stars with the corresponding absolute magnitude, or luminosity, shows a marked correlation, the more massive stars being the brighter, which is one of the most striking of modern discoveries.

SIZE OF THE STARS.

The stars are too remote for even the largest to show an appreciable disc in any telescope as do the planets, and obviously the size of a star is not proportional to its brightness as we see it, for this depends on its distance, and also on its intrinsic brightness, which depends on its temperature or other physical condition. It is possible to find the surface-brightness of a star, or the light it emits per unit-area by consideration of its spectrum, and hence the diameter of the disc of a star can be found by dividing the total light it emits (*see* Absolute Magnitude, *seq.*) by the same per unit area A more direct way of measuring stellar diameters has lately been found by an instrument known as an "interferometer," with which the angular diameters of several of the largest stars have been measured Since the distances of these stars are known, the following values of their diameters in miles have been deduced, and it is satisfactory that these agree closely with the values derived from consideration of the surface brightness as above outlined —

Betelgeuse	260	million miles
β Pegasi	70	,, ,,
Aldebaran	34	,, ,,
Arcturus	28	,, ,,

Antares has been measured in this way, and is said to be a very large star, but uncertainty in the knowledge of its parallax does not permit a reliable determination of its linear diameter. The angular diameter of α Herculis measured by this instrument also is large From measures of Mira Ceti at maximum it was inferred that this star was then at least as large as Betelgeuse. The measures of Betelgeuse itself have shown some variability which may indicate real changes of diameter.

ABSOLUTE MAGNITUDE.

This phrase which is much in use in the astronomy of the present day, implies the luminosity of a star irrespective of its distance. The precise definition of absolute magnitude is that it is the number that expresses, according to the usual system of stellar magnitude (*see* p 74), the brightness of the star as it would be seen at the distance of 10 parsecs (parallax 0 1″) It is clear that if the distance of a star is known, its absolute magnitude can be computed from its apparent, or by reversing the formula, if the absolute and the apparent magnitudes are known, the distance of the star can be determined, the numerical relation between M the absolute and m the apparent magnitude, being $M = m + 5 + 5 \log \pi$, where π is the decimal fraction indicating the parallax of the star

DISTANCE OF THE STARS

The distance of the stars from us is so immense that its determination is perhaps the most difficult problem of astronomy, and not until comparatively recent years has it been effected in any quantity and with much certainty. The direct method of determination of a star's parallax, as this quantity is called, consists in measuring the minute difference of direction of the star as seen from different points in the Earth's orbit, which is now usually done by photographing the star and its surroundings at appropriate epochs and finding by measurement the change of position of the star with relation to its neighbours. A spectroscopic method of finding parallax through the absolute magnitude has been evolved. It has been found that in the spectra of stars the ratio of the intensity of certain pairs of lines is a function of the absolute magnitude of the star. In stars of great luminosity, for example, a certain Calcium line is very strong, whilst a line due to Iron is weak, but in a star which emits much less light the case is reversed. This principle has been adopted, and knowing the spectra of stars whose distance has been found trigonometrically, a table correlating the above characteristic with absolute magnitude has been formed by help of which it is found possible to infer the actual luminosity of a star from examination of its spectrum, and hence its distance.

The distances of some stars or groups of stars are found by indirect methods such as the following. If by any means it is possible to know the mean parallactic movement (see *Stellar Motion*) of a group of stars the mean parallax or distance of this group follows from a simple computation. In other words, the space through which our Sun travels, which is about twice the diameter of the Earth's orbit in a year, is taken as the base-line with which to measure the distance of the stars. The parallaxes of some binary stars have been found by a computational method assuming a value for their mass (hypothetical parallax)

For some distant objects a method is adopted depending on a peculiar property of a class of stars known as "Cepheid Variables." These stars show very regular fluctuations, coming to maximum at intervals which range from a few hours to several days, and it has been found that the length of this period has a relation to the mean absolute brightness of the star Those stars which have the longest period are the brightest, and a definite law has been evolved connecting the two elements. These Cepheid Variables are very common in globular star-clusters. The peculiarity was, in fact, first suggested by a number seen in the lesser Magellanic cloud, and the law being adopted it is clear that

the great distances of such objects may be known from a simple observation.

To express large distances a large unit is required. One of these is the space that light moves through in one year, which in miles is 6 followed by 12 zeros, another unit is the *parsec*, or the distance at which the mean radius of the Earth's orbit would subtend an angle of 1″ (parallax = one second). This is 3¼ times the light year and is represented roughly by 2 followed by 13 zeros. There is also a unit little used called the *Sirometer*, which is equivalent to a million times the distance of the Earth from the Sun.

Within the sphere of 10 parsecs radius about the Sun as centre, there are rather more than a hundred stars whose distance has been measured. It is estimated from knowledge of the general density of stars in space that there are nearly twice that number. The others remain to be discovered.

STELLAR MOTION.

Many, if not all, of the so-called Fixed Stars are gradually changing their positions relative to one another, the movement of each star being called its Proper Motion. The seven bright stars of the Great Bear would on this account have formed in prehistoric times a rather different configuration from that of to-day. Consideration of these proper motions has led to the conclusion that they are in part due to actual movement in space of the stars themselves, but in part to the movement of our own Sun, which causes an apparent motion of the star in the opposite direction, this latter being called the star's parallactic motion. In this way, it has been found fairly conclusively that the Sun, and with it the Earth and planets is moving through space with a speed of 19·5 kilometres per second towards a point on the celestial sphere not far from the bright star Vega, speaking roughly, for there are differences in the determinations of the position or this point. The Proper Motions of Stars of spectral type K and G are found to be much larger on the whole than those of other types and it is therefore to be supposed that these classes are nearest to us. It has already been mentioned that our Sun is of this spectral type. By an optical principle known as Doppler's it is possible to find from certain peculiarities of the lines in its spectrum the rate at which a star is approaching or receding from us. The "line of sight" or "radial" velocities of many stars have been found in this way but the possibility that such spectral peculiarities may be due to causes other than motion is to be remembered.

THE INTERIOR OF A STAR.

Since stars are self-luminous and not as the Earth, it is evident that their condition is considerably different to that of our globe, though the primal elements of both may be the same. The interior of a star may be described as an accumulation of ether-waves, atoms and electrons in a state of violent motion, and therefore productive of high temperature, forming what is known as a "perfect gas." By using certain laws of physics and making reasonable hypotheses, mathematical physicists deduce the density and temperature at any point within a star, its mass and its radiative quality or luminosity. It is impossible to summarize these deductions here, but it may be mentioned that they account for the mass luminosity relation mentioned (p 64), and that they predict or account for a remarkable class of stars of a density so high as to be almost incredible, known as "White Dwarfs," that are apparently in the last stage of evolution. The best known is the companion to Sirius, whose peculiarity in this respect is shown by other lines or argument. The bright component of 0² Eridani seems to be a White Dwarf and the recently discovered companion of o Ceti, but the known stars of this class are few.

STAR CLUSTERS AND NEBULÆ.

Among the apparently solitary stars there are found groups of stars gathered close together, some of which may be easily separable into individuals, others that can only be separated by the most powerful telescopes, and objects that appear as unresolvable patches of light, the latter are called nebulæ, and were aptly described by Sir William Herschel as "shining fluid." A short list of the more interesting of these various objects is given herewith.

No. in New General Catalogue	Messier's or Herschel's Number	R.A. 1920.	Declination 1920	Constellation.	Appearance.
		h m	° ′		
224	M 31	0 38	+40 50	Andromeda .	Very brilliant oval nebula, visible to naked eye.
598	M 33	1 29	+29 38	Andromeda ..	A large nebula
869 & 884	H VI 33, 34	2 15	+56 45	Perseus	Fine double cluster, visible to naked eye.
1952	M 1	5 30	+22 0	Taurus	The well-known "Crab Nebula" of Lord Rosse.
1976	M 42	5 31	− 5 27	Orion	Large and splendid nebula, visible to naked eye.
2070	.. ...	5 39	−69 19	Dorado	Great "Looped" nebula—visible to naked eye
2099	M 37	5 47	+32 30	Auriga	A fine cluster of stars
2168	M 35	6 4	+24 20	Gemini..... .	Magnificent cluster of stars
2632	M 44	8 35	+20 15	Cancer	Called "Præsepe," or the "Bee Hive"—visible to naked eye.
3372	.. ..	10 42	−59 16	Argo	Great nebula surrounding η Argûs.
5194	M 51	13 26	+47 35	Canes Venatici	Brilliant spiral nebula.
5272	M 3	13 38	+28 45	Canes Venatici	Splendid cluster of stars.
6205	M 13	16 39	+36 35	Hercules	Very fine cluster of stars, visible to naked eye.
6494	M 23	17 52	−19 0	Ophiuchus . ..	Fine cluster of stars.
6543	H IV 37	17 59	+66 35	Draco	Bright planetary nebula.
6720	M 57	18 51	+32 55	Lyra	Beautiful ring of bright nebulosity.
6853	M 27	19 56	+22 30	Aquila	Large nebula formed like a "Dumb-Bell" or "Hour-Glass."
7089	M 2	21 29	− 1 10	Aquarius.....	Splendid globular cluster of stars.
7078	M 15	21 26	+11 49	Pegasus	Magnificent cluster of stars.

There are nebulæ called planetary that are small, regular in outline, and show a uniform disc. Analogous to these are some which are dark in the centre called annular or ring nebulæ. Beyond this the spectroscope divides the nebulæ into two great classes. The first spectroscopic observation of a nebula, made by Huggins in 1864, showed a spectrum of one bright line only, which indicated that these bodies, or at least some of them, are constituted of glowing gas Later investigation showed that the spectra of some nebulæ are continuous The nebulæ with continuous spectrum are called "white" nebulæ, in distinction to those with bright line spectra, which are "green" or gaseous. Photography has brought the means of studying the number and form of these objects in great detail, and it is found that there are many thousands of the white nebulæ, and that a large proportion of them are of spiral form (*see* p. 63) The gaseous green nebulæ are in a small minority, and are generally diffused and irregular in outline and lie mostly in the Milky Way. The smaller, the so-called planetary and stellar nebulæ, do not markedly avoid it as do the spirals which lie in a zone of the sky, roughly at right angles to the Galaxy. Globular star clusters also lie outside the Milky Way, but irregular clusters are within its limits There are also masses of Dark nebulæ in space which may be the earliest form of matter. Though it is not possible to measure their distances directly, several lines of argument lead to the conclusion that the spiral nebulæ are very far away. The nebulæ have been much studied recently as to their form and total brightness, and a system of classification has been proposed. A fact that emerges is that nebulæ of the same class are approximately of the same size, and hence that their relative distances may be inferred. Distance of the order of 250,000 parsecs has been assigned to M 31 and M 33 (see Table). The distance of a faint irregular cluster of stars with several small nebulæ involved, known as N.G.C.6822, has lately been investigated, and estimated to be of the order of 300,000 parsecs.

VARIABLE STARS.

Although the stars generally shine with unchanging brightness, there are some among them which are exceptions to this rule, and of these Algol, the star β of the constellation Perseus, is the best known. In general this star is of about the second magnitude, but at regular intervals of something less than 69 hours it fades away to between third and fourth magnitude, remains so for about 20 minutes, and then regains its light. It is considered certain that this is due to partial eclipse by a dark companion that moves in an orbit round the bright star. The whole eclipse occupies about 9½ hours The approximate times when this star will be at minimum in the months when it is suitably placed for observation are given in the table on page 67. The position of Algol is given by R.A. 3*h.* 4*m.*, Declination 40° 41′ N.

There are variable stars of types other than those like Algol. The Cepheid variables have an average period of about 7 days, and the rise from minimum to maximum takes only about one-third of the whole period, so that the decrease of light is more gradual than the increase. It has been suggested that this may be due to a pulsation or periodic swelling and contraction of the star. A peculiarity of these stars has been mentioned (see page 64). Stars of the β Lyræ type pass from minimum to minimum in about 6½ days, but are not of the same brightness at all minima, the alternate being equal There are variable stars with periods ranging between 30 and 500 days whose difference of brightness during a light-cycle may be as great as 9 or 10 magnitudes. The spectra of most of these long-period variables show bright emission as well as dark absorption lines, and a periodic outflow of incandescent gases and vapours is suggested as the cause of the light variation. Mira Ceti (R.A. 2*h.* 16*m.*, Declination 3° 19′ S.) is the most famous of these. It will probably be at maximum at the end of July, 1929* Its magnitude at maximum may be anything between 2 and 5.

There is a group of 8 or 9 stars of a remarkable type known as the U Geminorum which for most of the time are of uniform or nearly uniform magnitude, but undergo periodic outbursts which generally last a few days. The majority of this group are of 11th or 12th magnitude at maximum, though U Geminorum itself is of the 9th, and the mean range in magnitude is about 4½. The outbursts may be said to happen every 20 or 30 days, but this period is frequently much exceeded. SS Cygni is included in this group, though its variation is very erratic It ranges in brightness between 8th and 12th magnitude, and the interval between consecutive outbursts ranges from 24 to 80 days Also there are a few variable stars whose characteristic is the opposite of that of the class just mentioned; they are ordinarily bright, but sometimes become faint without warning and remain so for a year or more, varying very irregularly until they again attain their normal brightness. The star R Coronæ Borealis, normally of magnitude 6 0, which gives the name to this class, has been observed since the year 1843, and up to the year 1925 forty well-marked minima had been recorded, ranging between magnitudes 7 and 15 in brightness and from 2 months to 12 years in duration.

NEW OR TEMPORARY STARS.

The phenomena known as "Novae" or "New" Stars can scarcely be classed as variable stars, for the rise to maximum, so far as is known, occurs only once in their history. Generally the Nova appears in the place of a star of faint magnitude which may have blazed out into conflagration, but on the other hand the juxta-position may be merely fortuitous and the phenomenon may be the sudden visibility of a mass of dark nebulous gas which by some means has become igneous. The great brilliancy, which occurs very suddenly, is short-lived, for there follows a rapid fall, and in a few months the object emits, perhaps, 1 per cent. of its light, whilst in a decade it falls to 10th or 12th magnitude or fainter. About thirty bright stars of this kind visible since the time of Hipparchus 134 B.C. are on record. A list of 13 that have been seen since 1848 will be found in previous issues of this Almanack, together with an account of the changes in the spectrum that have been generally observed.

The latest of these, Nova Pictoris that appeared in 1925, attracted attention last year, for it was seen as an elongated nebulosity divided into two or more parts. This at first was taken as suggesting that collision was the cause of the outburst in 1925, but the hypothesis has not been supported.

MINIMA OF ALGOL (β PERSEI) IN 1929.

These are *approximate* times of the middle of minimum phase.

DOUBLE AND BINARY STARS.

The large majority of stars when looked at through a telescope appear as single points of light of different degrees of brightness and perhaps differing slightly in colour. Some, however, are seen to consist of two points, so close together that the duplicity is shown only by telescopic examination and the measurement of the relative position of the components forms a branch of observational astronomy. This duplicity would happen if one star lay in space immediately behind the other, but there are more double stars than would accrue if this were the only reason, and it is evident that the greater number of double stars are formed by components actually near together which, it is likely, have a gravitational connection. This idea of connection was not held in early days and Sir W. Herschel who, in 1779, was the first to begin their systematic observation, was careful to call these pairs Double Stars, not wishing to imply anything more than nearness, though by that date it had already been suggested that two stars seen near together were actually contiguous and formed a physical system. Twenty years later observed changes in the relative position of the components of some double stars led Herschel to adopt this idea, and he used the word Binary as the name for those known to have physical connection. It is clear that limits of distance must be set, and, in general, a separation between the components of less than about 30 seconds of arc defines a double star. As to the lower limit it is found possible with a large telescope to measure distances between two stars as small as a fifth of a second. There are in the sky 15,000 to 20,000 stars between these limits that have been measured and catalogued. The number is given vaguely for it is being added to continually, a certain private observatory in the North of England, for example, contributing a hundred or more to the list annually. ζ Ursae Majoris (Mizar) the middle of the three stars that form the tail of the Great Bear is considered to be the first double star discovered (1650). Its components of 2nd and 4th magnitude are separated by 15 seconds, and it has a companion, Alcor, of 5th magnitude 11 minutes distant that can be seen separately by the naked eye, but this does not come within the definition. Castor and γ Virginis are other bright stars that consist of two components of about the same brightness separated by a few seconds. Sirius and Procyon are very bright stars that each have a very faint star as companion, and between these types there are many other and various combinations of magnitude. Observations of Mizar extending over 150 years do not show any change in the relative position of the components, but from similar measures of the other stars mentioned, it is deduced that the twin components are moving round one another in elliptic orbits. In the case of γ Virginis the orbit is completed in about 180 years. Other visual binaries have periods that range from 10 to 250 years, but there is a method other than direct visual observation that reveals the existence of binary stars revolving in orbits in periods that may be a few days or only a few hours.

SPECTROSCOPIC BINARIES.

As mentioned on p. 65, it is possible, from certain peculiarities in a star's spectrum to deduce the speed with which any star is advancing towards or receding from, the earth. As a result of their motion around one another the two components of a binary star will be generally respectively advancing towards and receding from, the earth at different rates, and when both components are bright enough for their spectra to be visible, the spectrum of a binary star shows two distinct sets of lines, which oscillate about their mean position in a period equal to the period of the star. There are many stars of this kind with components so close together that they cannot be seen as two visually, but whose orbit may be determined from observations of their spectrum. Such stars are called Spectroscopic Binaries. One recently discovered known as Plaskett's star, B.D. 0 1309, has a period of 14·41 days, and is the most massive and absolutely brightest star whose elements are known.

Colours of Double Stars.—The components of close double stars that differ little in brightness show little or no contrast in colour. The components of Castor are said to be both yellowish-green by one observer, and by another bright-white and pale-white. The components of γ Virginis are both pale-yellow according to one or otherwise, silvery white and pale yellow. The components of o² Eridani of magnitude 9·2 and 10 2 are both blue. Following are some examples in the opposite sense. The stars named are all physically connected and have had their orbits computed—the magnitudes of their components are shown by the figures.—η Cassiop, 4·0, 7·6, yellow, purple; ε Hydrae, 3 0, 6 0, yellow, blue; 20 Opiuchi, 4 5, 6·0, yellow, purple; Procyon, 1, 12, yellow, green; 25 Canum Ven, 5 0, 8·5, white, blue; Sirius, 1, 10, white, yellow.

THE Sun is one of the millions of stars that make up the Universe, and, so far as human knowledge goes, in magnitude and constitution, is not unlike the stars of the night sky. It is surrounded by a family of smaller bodies of which our Earth is one, and the Solar system, which is only a minute detail in the structure of the Universe, is the observing station from which we look out in all directions across the great distances which separate us from the other members of the stellar system.

The Solar or Planetary system consists of the Sun, with eight major planets, and minor planets or asteroids, that may be counted by thousands, circulating round it at varying distances in oval-shaped orbits. Six of the major planets have smaller bodies circulating around them, so that each forms a separate system, but all the bodies receive their light and heat from the Sun.

The periodic comets which return to perihelion at regular intervals may be considered to be members of the Solar system, since they move in elongated elliptical orbits of which the Sun is at a focus. It is likely that their light is reflected sunlight, since they become brighter as they approach the Sun, but it is probable also that they are visible partly by their own light.

The plane of the Ecliptic in which the Earth moves round the Sun (*see* p. 75) is used as a fundamental plane of reference. The other planets move in planes inclined but little to the plane of the Ecliptic, at varying distances from the Sun, and describe orbits in periodic times which are connected with the distances by a certain relation known as Kepler's 3rd law. The squares of the periodic times vary as the cubes of the semi-major axes. Following are given brief notes on each of the bodies which make up the Solar system, with details of their sizes, distances from their primary, and periodic times in tabular form (pp. 73, 74). The time of rotation about the axis, or the length of the day of the planet, is added when this is known.

THE SUN.

The surface of the Sun, seen in a telescope, presents a mottled appearance formed by a darkish background on which small brilliant patches are scattered, the shape of these being such that they have been called alternatively rice-grains or willow leaves. On this surface, or amid the material forming it, black spots appear sporadically, and around them are brilliant streaks called faculae, which are conspicuous when the spots are near the edge of the Sun. The bright streaks are also seen unassociated with spots, and by a special device may be seen in the central parts of the disc when they are generally called flocculi. There are also brilliant clouds of calcium vapour pervading the solar surface that are revealed by this device called a spectrohelograph, by which the whole of the Sun's disc may be photographed by the light of any element, and of that element only. Modern views describe the spots as columnar vortices which have a deep-seated origin far below the photosphere, and assume that a sun-spot is a vast tornado in which electrified particles are rapidly whirled, as is proved by the presence of a magnetic field. The spots vary in size and number, and increase and decrease somewhat uniformly in both respects, passing through a maximum about every eleven years. They increase at a rather more rapid rate than they decrease. From measures of their position on the disc and by help of the elements given on page 2 of each month the latitude and longitude (heliographic) of the spots can be computed. It is seldom that spots appear in latitudes greater than 30° from the solar equator, but about the time of spot minimum or rather earlier small spots appear in even more extreme latitudes, and during the succeeding eleven years the spot regions converge towards the solar equator (*Spörer's Law of Zones*), and at time of maximum the spots are largely in solar latitude 12° to 14° N. and S. The fluctuation was first noted by Schwabe, of Dessau, in the year 1843 from a comparatively few years' observations, but records of earlier years and a continuous and complete record made subsequently prove the existence of a period of average length of 11⅛ years from maximum to maximum, though there are large variations from this mean as shown by the table below. The prominences (*v. infra*) also show a fluctuation in their activity in a period of the same length, and the form of the solar corona changes with the Sun-spot cycle in a most marked way. Not only this, but there are some terrestrial occurrences that vary in like phase with these solar, which seems to show convincingly a connection, or at any rate a relation, between Sun and Earth (see page 37). The Sun rotates on its axis in about 25¼ days, which is shown by the movement of the spots across the visible disc, but because the Earth has moved in its orbit in that time the period of rotation with respect to the Earth, the Synodic period, as it is called, is 27⅓ days, and a spot may therefore be on the visible disc for 13 or 14 days. These are approximate mean values, for the Sun does not rotate as a whole solid body, and the rate of rotation is not the same in all latitudes. A formula derived from the Greenwich record of spots during the period 1878–1923 gives for the time of sidereal rotation in different latitudes:—

	d. h.		d. h.
Equator	25 1	Lat 15°	...25 8
Lat 5° . ..	25 2	,, 20°	. 25 14
,, 10°	25 5	,, 30° ...	. 26 6

These figures refer to both hemispheres of the Sun. The addition of 2 days gives approximately the period of rotation with respect to the Earth.

DATES OF SUN-SPOT MAXIMA AND MINIMA.

Maxima		Minima.	
1805·2	1870·6	1810·6	1878·9
1816·4	1883 9	1823·3	1889·6
1829 9	1894 1	1833·9	1901·6
1837·2	1906 4	1843 5	1913·1
1848·1	1917 7	1856·0	1923·6
1860·1		1867·2	

Assuming a period from maximum to maximum of an average length, it is evident that a maximum should have happened in the latter part of 1928. Though there have been some large groups on the Sun during the year it is not possible at time of writing to say that this happened.

When the intense light of the Sun is shut off by the interposition of the dark body of the Moon in a total solar eclipse, appendages called prominences that are generally described as

reddish coloured, but appeared white from aeroplanes on the occasion of the eclipse of 1927, June 29, are seen projecting from the Sun's edge. These consist of masses of glowing hydrogen gas arising from the chromosphere, and are sometimes of remarkable shape and extend to enormous heights, being occasionally detached from the body of the Sun. It is possible to observe these at times other than when the Sun is eclipsed. In the lower strata of the Sun's envelope are found the vapours of many metals, known by their characteristic lines shown in the spectroscope. Another appendage to the Sun outside the chromosphere, called the Corona, can only be seen during total eclipses. The lower portion of the corona consists of a pale green light containing hydrogen, the upper is a beautiful mass of silvery white light in form of feather-like plumes, with dark spaces between, which have been traced from the sun's edge to a distance as great as twice the Sun's diameter. The corona appears to vary in shape and extension according as the eclipse occurs at the period of maximum or minimum of Sun-spots. Solar eclipses are total only when seen from places on which the shadow of the Moon falls, and an eclipse is seen partial from localities not far from this path of totality, because the change in the observer's position places him out of the cone which envelops both Sun and Moon. There are more solar eclipses than lunar in the proportion of four to three taking the whole earth into account, for any given station the proportion is more than reversed.

MERCURY.

Mercury is the nearest planet to the Sun, and the smallest in the system. Because it moves in an orbit between the Sun and the Earth this planet can never be seen far from the former body, and is sometimes to the West, sometimes to the East of the Sun. In the former case Mercury appears as a morning star and in the latter as an evening star. The extremes of these apparent excursions are technically known as Elongations, and their times and the distances, measured by the angle included between the lines which join the Earth to the Sun and the planet respectively, are given in the third page of each month. The great ellipticity of the orbit of Mercury causes the amount of these Elongations to vary considerably, and they may be as small as 16° or as large as 28°. Eastern elongations, when the planet is seen as an evening star, occur at intervals of about 116 days, as do Western, and the best opportunities of seeing the planet are *before* the Eastern elongations in the spring and after Western elongations in the autumn. This year Mercury may be visible as an evening star in January and in May, and as a morning star in October and perhaps November. Mercury shows phases to the Earth—like the Moon in her first quarter if the elongation be in the East, and like her last quarter if in the West. (*See* p. 73.)

VENUS.

Venus, which is nearly twice as far from the Sun as Mercury, its distance from the central body being rather more than two-thirds that of the Earth, is almost exactly the same size as our globe. Her apparent movement with respect to the Sun is similar to that of Mercury, except that, being farther from the Sun, and nearer to the Earth than her smaller neighbour, the angles of Elongation exceed those of Mercury, and extend to 47°. Writing generally, it is believed that the planets rotate on axes as does the Earth, but this is not known to be the case for the inferior planets Mercury and Venus, because of the difficulty in seeing any markings on their surfaces that may be considered permanent. Attempts to discover the rotation period of Venus have shown that it may be about 23 or 24 hours, or 24 days, or 225 days which is the period in which it completes its orbit round the Sun. With this divergence it can scarcely be said that any period is proved. Lately because certain markings have been seen to move in a North and South direction, rather than from East to West, it has been suggested that Venus rotates on an axis that lies in the plane of her orbit, and on this assumption periods of 68 hours and 8 days have been deduced, but these again show divergence that renders either doubtful. This planet will be visible to advantage as an evening star in the first four months of the year, and as a morning star in the summer and early autumn. Her conjunction with Jupiter on July 14 and her appearance with that planet in the evening sky in the early months of this year are to be noted.

MARS.

Mars, the first planet whose orbit is exterior to that of the Earth, is a little larger than Mercury and considerably smaller than Venus and the Earth. Details of its distance and period will be found in the table. Mars is in opposition at intervals of about two years, because it moves at a rate not greatly different from that of the Earth, and having been in opposition in December 1928, will be a bright object in January 1929 and visible in the evening sky in the first part of the year. Mars, like Mercury and Venus exhibits phases, but in a much less degree than those planets. Its disc departs from exact circular form, or is gibbous, only to the extent of one-eighth of its diameter. The other superior planets are too far away to show very appreciable phase though traces of it are sometimes to be detected in the disc of Jupiter.

Unlike Mercury and Venus, Mars exhibits many well-defined markings, which enable its rotation period to be well ascertained. There are white spots at the poles of rotation that appear to be snow, or some material that melts, since they dwindle, or even disappear in the Martian summers. The remainder of the surface of the disc is made up of dark bluish-grey areas that were at one time thought to be water but are now regarded as regions covered with vegetation and extensive areas of ruddy or orange hue, largely in the northern hemisphere, that may be of the nature of sand or rock. These markings may be considered permanent, though they suffer small changes apparently due to cloud formation above them. Among these markings are some of such dimensions that they may be properly called "canals," but certain fine, straight markings seen by some observers, but not by others, have received this name, which is certainly unfortunate, as it has been taken to imply that they are of manual construction, though for this there is no sufficient evidence or proof. The possibility of communication with Mars, which in some minds has been strengthened by the advent of wireless telegraphy, is fantastic.

A method of investigating the surfaces of the planets has recently been evolved by photographing through "colour filters." The light before it reaches the plate, which is of suitable sensibility, passes through a coloured screen which absorbs the component rays of certain wave-length so that one colour only affects the plate. The moon, the planets and terrestrial landscapes have been photographed in this way, and comparison of the various results has suggested an interpretation. In the case of Mars the telescopic features as described above come out very strongly in red light, but fade away as the colours approach the violet end of the spectrum except that the white polar cap increases in strength, all of which is interpreted as showing that Mars has an atmosphere of considerable depth and obscuring power, sporadically cloud-bearing, and that the white polar spot is an atmospheric phenomenon. The question of an atmosphere on Mars has for long been a matter of discussion, and to this these experiments form a valuable contribution, though they may not supply a final answer.

MINOR PLANETS

Between the orbits of Mars and Jupiter there are a large number of small planets, and every year considerable additions are made to the list, ninety-three having been discovered in the year 1927. At present the total number known approaches two thousand, and there may still be thousands awaiting detection. The four largest, found in the early years of the 19th century, are—Ceres, 485 miles, Pallas, 304 miles, Juno, 118 miles; and Vesta, 243 miles in diameter. Vesta is the brightest though not the largest. In recent years the discoveries have been of much smaller objects, and it is probable that some of them are not more than from 10 to 20 miles in diameter, and are perhaps nothing more than great masses of rock flying round the Sun.

The periodic times of their revolutions vary considerably, and an average may be taken as 1,600 days, or 4½ years. Some of the orbits are very oval, and the inclination of their planes to the Ecliptic has considerably different values. The inclination of Pallas is 35°, whilst that of Juno is only 13°. One of these small bodies, Eros, approaches very near to the Earth at some oppositions, which affords a good opportunity for determining the solar parallax. There will be an opposition of this kind early in the year 1931, when the minimum distance will be about 16 million miles.

JUPITER.

The next planet in order from the Sun, Jupiter, is the largest in the system, and has a diameter eleven times that of the Earth. Its density, however, is only 1/4th that of the latter. On viewing Jupiter through a telescope it will be seen that the disc is not circular, but its form, an oblate spheroid, is believed to be due to the rapid axial rotation, which causes a flattening at the poles and bulging outwards at the equator. The same effect is produced on all the planets in more or less degree.

Jupiter has four principal satellites about the same size as our moon, which were the first celestial objects discovered with the telescope, Galileo having observed them in the year 1610 (*see* pp. 20 and 24). It has also five much fainter satellites which are far beyond the powers of small telescopes. One of them was discovered with the 36 inch refractor at the Lick Observatory in 1892. The remaining four, which are extremely faint, were detected by means of photography and may be regarded as among the most difficult to see of celestial objects.

The characteristic surface features of Jupiter are the bright zones separated by dark belts to which the names Equatorial, Tropical and Temperate have been given in analogy with the zones on the Earth. Examined by telescope these are found to be full of detail and markings which, though they may be atmospheric, are largely permanent but undergo changes. Of these the best known is the Great Red Spot and its surroundings situated on the southern edge of the south Equatorial Belt. There are records of an observation of a spot by Hooke in 1664 which may have been an early appearance of this; the Rev. W. R. Dawes figured it in the form of an ellipse resting on the south equatorial belt of Jupiter on Nov. 27, 1857, and in 1878 it came under general observation. A curious bay or hollow in the above-named belt was seen by Schwabe in 1831, and it may be concluded that the mean rotation of the object and of the red spot near it has been $9^h\ 55^m\ 37^s$ during the last 97 years.

The Red Spot and its surroundings have undergone various changes in appearance and relative position during this period, particular aspects apparently recurring at intervals, though no regularity is suggested. In 1919, for example, the south part of the S. Equatorial Belt, the S. Tropical disturbance and the Red Spot Hollow disappeared, but the Red Spot itself was very pronounced, and all reappeared in 1920. The disappearance of these features was repeated in 1926 and they were still invisible at the end of the 1927 Apparition when the Red Spot had regained something of its former redness. An outburst in that region observed in August, 1928, was followed by considerable activity. Observers of the planet fifty years ago recall the similarity of its aspect in 1879 to that of 1927.

The motion of the red spot varies in its rate in an irregular manner, and renders the prediction of its exact place somewhat uncertain. During the last few years the velocity of the object has been accelerated, and in view of the uncertainty attached to predictions of its place it does not seem desirable to give the probable times of transit across the central meridian in 1929. By noting the times of a number of its transits across the central meridian of the disc the irregularities of its motion may be ascertained. In May the longitude of the spot will probably not differ greatly from 250°, so that it may be expected to precede the zero meridian of Jupiter (System II.) by about 3 hours of time.

Like the Sun, the surface of Jupiter does not rotate as a whole, but individual zones of latitude appear to move at different rates. Two systems are in use for defining the positions of markings on Jupiter. In System I, which pertains to the rapidly moving Equatorial Zone of the planet, the period of rotation is taken as $9^h\ 50^m.\ 30^s$. System II. applies to the Temperate Zones, and in this the time of rotation is $9^h.\ 55^m.\ 40{\cdot}63^s$.

SATURN.

The sixth major planet in order from the Sun is unique in appearance because of its encircling ring-system, which renders it magnificent as a spectacle and an interesting object for telescopic observation. The system consists of two bright

rings and an inner dusky ring through which the body of the planet can be seen. A marking on the outer ring known as Encke's division is sometimes seen, but it is doubtful whether this is a real separation. The rings appear to be flat annular discs of extreme thinness, inclined at an angle of 28° to the plane of the Ecliptic, and it is shown that neither of them can be a coherent mass or in one piece, either solid or liquid, as in that case it would be difficult to account for their stability. They probably consist of an immense number of minute bodies revolving like satellites round the body of the planet. Belts like those on Jupiter, but of not so pronounced a character, are seen on Saturn. Photographs of this planet, taken in ultra-violet light by the method mentioned in a previous paragraph, show a wide dark belt near the equator which, it is suggested, may be an extension of the dusky ring. Saturn shows a bulging at his equator, the ratio of the polar to the equatorial diameter being as $13\frac{1}{2}$ to 15.

Saturn has ten satellites, situated outside the rings; some of the former are visible in telescopes of low power. Titan, the largest, is about one and a half times the size of our moon, whilst Iapetus is nearly the same size as our satellite. Titan was discovered by Huyghens in 1655, Tethys, Dione, Rhea and Iapetus (*see* table p. 73) by J. D. Cassini towards the end of the 17th century. Sir Wm. Herschel discovered Mimas and Enceladus in 1789, and Hyperion was observed for the first time, almost simultaneously by Bond and Lassell, in September 1848. The most distant, Phœbe which was first seen in 1898 (photographically by W. H. Pickering), moves in its orbit in retrograde direction like the two exterior satellites of Jupiter, VIII and IX. Themis which is called the tenth satellite though it appears not to be the farthest from Saturn, has been observed once only since its discovery in 1900, and its reality is doubtful.

URANUS.

This planet, discovered by William Herschel at Bath in 1781, is only just visible to the naked eye. It will be in the evening sky in the early months of 1929 and again at the end, being in opposition on Oct. 3. In a telescope Uranus is distinguished from the stars around by its disc, which is obvious though less than 4″ in diameter, and by the quality of its light, which is less piercing than that of the stars. The two outer and brighter of its four satellites were discovered by Wm. Herschel in 1787; the two inner by Lassell in 1851. All four move in a plane which is inclined 82° to the plane of the ecliptic and in that plane they move retrograde, or in the opposite sense to the revolution of the planets round the Sun. If, however, the plane of their movement is regarded as inclined 98° to the plane of the ecliptic, then revolution may be considered direct. It is generally supposed that the plane in which the satellites move is that of the planet's Equator. A period of rotation has been determined both by spectroscopic observation and from variations of light of the planet, the value, 10·¾ hours, being sensibly the same in the two cases.

NEPTUNE.

This planet, placed on the confines of the Solar system, is a small telescopic object of about the 8th magnitude. Its single satellite which was discovered by Lassell in 1846 moves in a plane inclined 35° to the plane of the Ecliptic in a retrograde direction like the satellites of Uranus. A period of axial rotation of the planet of 7¾ hours has been inferred from variability of its light, but lately a period of 19 hours has been found from dynamical considerations. Neither is to be considered conclusive, but it is possible that the two determinations may be reconciled. Triton has been suggested as the name of Neptune's satellite, but is not generally used. This distant planet will be near to the star Regulus from April to June of this year (*see* p. 17) and will make a near approach to Mars on July 3 and hence may be readily identified.

THE MOON.

Neither Mercury nor Venus so far as is known, has a satellite, the one satellite of the Earth is the Moon, which is quite familiar to us. The mean distance of the Moon from the Earth is about 239,000 miles—near enough for us to get a more complete knowledge of its surface conditions than we can of any other member of the Solar system. Only one side of the Moon is seen from the earth, but every region of the Moon is presented to the Sun in turn, and as there is no sign of water or vapour on the disc, and consequently no atmosphere, the surface must be exposed to the most violent changes of temperature. In the lunar day of half a month it must be heated to an extreme degree and in the other half subjected to cold equal to that of interstellar space. Her diameter is rather more than 2 160 miles. Her rate of motion through the firmament is 13° 10′ 35″ per day, which implies that she travels over a space slightly exceeding her own diameter in one hour. The average time from a New Moon to the next is *29d. 12h. 44m. 3s.*, but individual cases may range 6 hours and more on either side of this (see also p. 74). When seen through a telescope the surface of the Moon presents many objects of great beauty and interest. A small instrument will show the chief "seas," plains, mountain ranges, ring-plains, and crater-pits. The question as to the origin of these formations, whether they may have been caused by volcanic action, or, on the other hand, by the impact of meteors, forms an interesting subject for discussion.

When the Earth passes between the Sun and Moon, the Earth's shadow sweeps across the Moon and causes a lunar eclipse, which may be either total or partial as in the case of solar eclipses, but there is the difference that the phase of a lunar eclipse is seen the same from all places where the Moon is above the horizon at the time. Solar eclipses can take place only at New Moon, and lunar eclipses only at Full Moon.

The Full Moon which occurs near the Autumnal Equinox rises at nearly the same time, about sunset, on several consecutive evenings. Because in earlier times it was thought that this was specially ordained to facilitate the ingathering of the crops the phenomenon was called the Harvest Moon. The Full Moon which follows is called the Hunter's Moon.

A FEW OF THE CHIEF LUNAR FORMATIONS.

Wedge-shaped Valley of the Alps.—Near the central line of disc, towards the north, a cleft 83 miles long and 3¼-5¾ miles broad.

Apennines.—An extensive mountain range somewhat similar to terrestrial features. Visible

to naked eye when projecting into the dark part of the disc Length, 460 miles, highest summit (Huyghens) reaches 18,000 feet

Aristarchus —A lunar crater in N E quadrant The brightest object on the Moon. This crater is visible as a luminous spot when all the surrounding region is involved in shadow

Mare Crisium —A dark grey oval plain visible to naked eye near W N.W. limb of Moon Extends 280 miles N to S and 354 miles E to W. Well seen five days after new or a few days after full.

Mare Serenitatis —Lies S of the Moon's centre, and extends over 428 miles A nearly circular dark plain Contains a crater, Linne, formerly suspected of change This *mare* is visible to naked eye.

Clavius.—One of the finest craters on the Moon and about 142 miles in diameter. Situated on S limb

Tycho.—Towards S limb Has been called "the metropolitan crater of the Moon" A fine crater 54 miles in diameter and 16,600 feet deep. Central hill nearly a mile high. Tycho is the centre of a remarkable system of bright rays radiating from it, and they are very conspicuous at the time of full moon. In its region (S limb) the Moon's surface is so studded with craters that it resembles an immense honeycomb

COMETS

Comets that revolve in elliptical orbits round the Sun as focus, and return to view at periodic intervals, may be considered members of the Solar system The periods that have been confirmed by returns range from $3\frac{1}{3}$ to nearly 80 years, whilst a few other computed orbits show periods as large as a million years. Other comets move in parabolic courses and apparently do not repeat their visits to the Sun

Those that revolve in periods from 3^{y}, to 9 years are specially numerous Their paths extend outward to the region of Jupiter's orbit, and from this circumstance they are termed Jovian comets.

Encke's comet, which returns unfailingly every $3\frac{1}{4}$ years and was due at perihelion in February, 1928, was detected on November 13, 1927, and observed from that date until April. The periodic comets, Holmes and Taylor, that were expected to return in 1928 were not observed (up to October 1). Two unexpected comets were discovered in the early part of the year (*see* p 74, Skjellerup)

Daniel's Comet 1909 IV is expected to return to perihelion in the spring, and Metcalf's 1906 VI. in November The periods of these comets were computed to be about $6\frac{1}{2}$ years and 8 years respectively, but neither has been seen since its year of discovery Perrine's comet, discovered in 1896, seen again in 1909, returns to perihelion, according to computation, in July. The perihelion passage of a comet discovered by Spitaler in 1890, believed to have a period of 6 4 years, also falls in this year.

There are other families of comets, none so numerous as the Jovian, named respectively from the planets Saturn, Uranus and Neptune, for a reason similar to that given above. Halley's comet belongs to the Neptunian family, while the comet of the November meteors (Leonids) belongs to the Uranian family.

METEORS.

Another class of objects belonging to the Solar system are the meteoric streams, which give rise to occasional showers of meteors, falling stars, or fire-balls, and are all the same class of object, the distinction being only one of size. They are visible in varying number on every night of the year, and are sometimes so abundant as to form striking phenomena The year 1916 was notable because of a remarkably abundant and previously unknown stream on June 28, which had a distinct connexion with Pons-Winnecke's periodical comet, the orbits being nearly the same This comet returned to perihelion on June 12, 1921, and on June 21, 1927, but the expectation of a fine meteoric shower was not realized A considerable display occurred on October 9, 1926, from a radiant at 262° + 55° in Draco which appears to have been derived from Giacobini's comet of 1900, which passed its perihelion on December 11, 1921, and has a period of revolution of about $6\frac{1}{2}$ years This shower returned on October 9, 1927, and should be looked for every year as the meteors like those of Pons-Winnecke's Comet appear to be distributed over a considerable arc of the orbit Meteorites are composed of terrestrial elements, iron, chromium, magnesium, and nickel being in large proportion

THE AURORA BOREALIS.

This phenomenon may be considered more terrestrial than celestial. It sometimes happens that an unusual luminosity is seen in the northern sky in the form of streamers, arches, and condensations. This is regarded as showing the outer limit of our atmosphere, and its height has been determined by means of simultaneous photographs taken from two or more stations 20 to 60 miles apart. It is found that very few auroræ are below 50 miles high, and above that level the number increases rapidly, the most frequent height being at about 63 and 66 miles. Above 66 miles the number gradually diminishes, but some have been measured as high as 400 miles. It is believed that the aurora is due to electrical discharge caused by charged particles shot into the earth's atmosphere from the Sun. An auroral display generally happens about the time of the occurrence of a terrestrial magnetic storm (*see* p. 37). There is a definite tendency for an auroral display to be repeated after an interval of 27 days which is the period of rotation of the Sun with respect to the earth, and they are more frequent at times of sun-spot maximum. A prominent line in the green in the spectrum of the aurora has given rise to much study and has lately been shown by laboratory experiment to be due to a mixture of oxygen and helium bombarded by high-speed electrified particles, but as this line has been found to be present in the light from the night-sky in non polar regions when no aurora is visible it may be that this line is not directly connected with the phenomenon.

THE ZODIACAL LIGHT

This is an appearance whose cause is not completely understood, and is to be seen from places distant from towns and cities where the air is free from smoke and the darkness of the sky is not affected by the glare from artificial lights. At such places in northern latitudes it shows, when the moon is absent, as a band of faint light stretching up slantingly from the sun before sunrise in the autumn months and after sunset in Spring. From high elevations in the tropics it may be seen throughout the year and is said to extend entirely across the sky forming a complete ring, and there is at the point exactly opposite to the Sun a patch a few degrees in diameter, of slightly brighter luminosity called the "Gegenschein" or "counter glow." It has been asserted that it is a mere atmospheric effect, but this is not consistent with some of the chief features of its appearance. It may be the manifestation of a widely scattered appendage of the Sun or a vast concourse of slightly reflective meteoric systems for it may be readily concluded that we should see a decided shimmering E. and W. of the Sun resulting from the reflected light upon a host of such bodies or cometary debris revolving around him, chiefly in orbits of little inclination.

The brighest comet of recent years was discovered by Mr Skjellerup of Melbourne in the morning of December 4, 1927. At time of discovery it was estimated to be of 3rd magnitude and is said to have had a tail 3 degrees long. Independent discovery was made by various persons in the southern hemisphere, it being so bright that it was visible in daylight, and on December 15 when it was seen very near the Sun it must have been considerably brighter than Venus. The first computation of its orbit showed that the comet would have been visible from England, but this did not happen.

Large Telescopes.—The following have been mounted in various parts of the world recently.

Refractors.—Simeis, Crimea (Branch of Nat. Observatory, Pulkovo), 41 in.; Bloemfontein (Michigan University), 27 in.; Johannesburg (Union Observatory), 26½ in., Johannesburg (Yale University), 26 in., Mazelspoort near Bloemfontein (Harvard College), 24 in.

Reflectors.—The Perkins Observatory, Delaware, Ohio, 60 in.; Mazelspoort (Harvard College), 60 in.; Simeis, Crimea, 41 in., Geneva, Switzerland, 1 metre; Royal Observatory, Edinburgh, 36 ins.

The largest instruments in the world now in use are the Hooker Telescope at the Mount Wilson Observatory, California, which has a mirror 100 ins. in diameter, mounted equatorially, and the 72-in. Equatorial Reflector of the Dominion Astrophysical Observatory, Victoria, B.C. Experiments are in progress in Paris with a view to making astronomical mirrors of a new type called cellular. They are to be built up of glass plates, and it is anticipated that in the future reflecting telescopes may be made with mirrors even fifty feet in diameter.

Alternative names of stars (see pages 60, 61)—Polaris = *α* Ursae Minoris; Aldebaran = *α* Tauri; Rigel = *β* Orionis; Capella = *α* Aurigae; Betelgeuse = *α* Orionis; Sirius = *α* Canis Majoris; Castor = *α* Geminorum; Procyon = *α* Canis Minoris, Pollux = *β* Gemmorum, Regulus = *α* Leonis; Spica = *α* Virginis; Arcturus = *α* Bootis; Antares = *α* Scorpii; Vega = *α* Lyrae; Fomalhaut = *α* Piscis Australis; Altair = *α* Aquilae; Markab = *α* Pegasi; Achernar = *α* Eridani; Canopus = *α* Argûs; Mizar = *ζ* Ursae Majoris.

Stellar Magnitude.—The numerical magnitude of a star shows its order in a scale of brightness, the terms of which are in geometrical progression. Stars just visible to the naked eye are of magnitude 6. A 5th magnitude is about 2½ times as bright as a 6th, a 4th magnitude the same multiple of a 5th, so that a 1st magnitude star is about 100 times as bright as a 6th. Since the faint stars have larger numerical magnitudes, it follows that a star 2½ times as bright as a 1st should be of magnitude 0, and an object 2½ times as bright as that should be of negative magnitude, *i.e.*, −1 and so on. Fractional magnitudes are included in the scheme. Capella and Vega, which are nearly but not quite 2½ times as bright as a star of magnitude 1·0, are of about zero magnitude, or 0·2 and 0·1 respectively.

Duration of Light and Darkness.—The second column of the first page of Calendar for every month contains a small diagram showing the amount of Darkness, or the period of moonlight and sunlight during the twelve hours from 18*h.* to 6*h.* These small diagrams have four divisions, each representing three hours, and a division is left unblacked if the moon or the sun is above the horizon for at least half of the period it represents. The diagrams for the greater part of the year are 18 to 21 | 18 to 24 | 18 to 3 | 18 to 6: which reduce to in the summer.

THE shape of our Earth is that of an oblate spheroid, or a solid of revolution whose meridian sections are ellipses not differing much from circles, whilst the sections at right angles to these are circles. The length of the Polar axis according to a recently accepted determination (Hayford) is 7,900·0 miles and the diameter of the Equatorial circle 7 926 7 miles. The suggestion has been made that the Equator is not an exact circle, but the supposed deviation from circularity was small, and the fact has not been proved. The mean density of the Earth is 5 5 times that of water. The Earth moves round the Sun in a plane which passes through the Sun's centre, or, to write with more precision, the centre of gravity of the Earth and Moon moves in this plane, and both revolve round the centre of gravity but not precisely in the plane. The plane is called the plane of the Ecliptic. The Earth's Equator is inclined to this plane at an angle of 23½°, and it is this tilt which causes the seasons. At some time of the year the Sun is high above the Equator and in mid-latitudes both north and south not only does the high altitude make the days longer, but the Sun's rays fall more directly on the Earth's surface and make it hotter. The periods of Summer and Winter are opposed in the two hemispheres, the time of Summer in the Northern coinciding with Winter in the Southern, and *vice versâ*. Since the axis of the Earth is inclined always in the same direction the line of intersection of the Equator with the Ecliptic moves parallel to itself as the Earth travels round the Sun (approximately). The instants when this line passes through the Sun are called the Equinoxes. The Sun and Earth are surrounded on all sides by the stars and because the Earth moves round the Sun, the latter changes its position with respect to the stars during the year, and different sets of stars are seen in the sky at midnight in Summer and Winter. The average velocity of the Earth in its orbit is 18½ miles a second, and it moves more slowly in July than in January. It makes a complete rotation on its axis in about 23 hours 56 minutes of mean time which is the sidereal day. Because of the movement of the Earth in its orbit the length of the solar day is more than this by about four minutes (*see* pp. 57, 77). It has been shown almost conclusively in recent years that the axis of rotation is not a fixed line in the Earth, but that its extremity, or the North Pole of the Earth, moves in a curve, roughly spiral, about the pole of figure as centre at a distance of a few feet from it.

THE TIDES.

The Tides of the Ocean are rightly attributed to the attractive influence of the Moon on the Oceans, modified by a similar influence of the Sun, which is less in amount because of the much greater distance of the attracting body. If the Earth were a globe uniformly covered with water it would be possible to account for the observed phenomena and predict them by simple mathematical consideration of these attractive influences, but these are very greatly modified by the land formations of our globe, and the prediction of the tides for any port depends mainly on the results of observation. A series of observed times and heights of the tide having been compiled and analysed, the analysis will show that the complete tidal movement can be represented by the combination of a series of periodic terms, and if these terms are each carried forward to some future date their recombination will give the predicted tide. Taking the mean sea-level as datum, writing generally, at any place high water occurs twice in every 24 hours, the interval between successive happenings being 12 hrs. 25 mins. High water is at its highest (springs) at or near New and Full Moon, whilst low water falls an equal amount below at those times. At or near the time of the first and last quarters of the Moon (neaps) the high water rises only about half as much above the mean level as it does at springs, and the low water falls about half as little below it. These phenomena do not usually coincide exactly with the times of these phases of the Moon, but occur later, the interval being known as the *age* of the tide—thus, at London Bridge the highest or spring tide occurs 2½ days after New or Full Moon, and the neap tide is similarly delayed. The difference of height of spring and neap tides is the most apparent of the periodic differences which make up the whole tidal variation. Besides this there are differences due to the varying distance of the Moon from the Earth, and when the Moon is at or near perigee at New or Full the tide is specially high. There is a slight difference in the heights of the spring tide at New and Full Moon, and also in the height of the neap tide at the respective quarters, but these and other small peculiarities are not appreciably noticeable at some ports. The mean level of the sea remains practically constant, but small changes have been detected which may be assigned to various causes.

TERRESTRIAL MAGNETISM.

The best known manifestation of this phenomenon is its effect on the needle of a mariner's compass, which, except for the variations to be immediately described, points continually northward. The north point indicated by a compass needle is not, except in particular cases, the north point shown by astronomical observations, in other words, the needle does not point to the North Pole of the axis of rotation of the Earth, but makes an angle with the terrestrial meridian. This angle is called the Magnetic Variation or, more generally, Magnetic Declination, and differs in different parts of the world and even over limited tracts of country. Lines of equal magnetic declination run across the British Isles in directions approximately parallel to that of a line from Land's End to Edinburgh. Along a line joining Cambridge to Littlehampton, the declination (West) is, approximately, the same as at Abinger. At Dover it is now rather more than a degree less, from Newcastle to Plymouth it is nearly 1½° greater, whilst in the south-west of Ireland and along a slightly curved line to the island of Lewis the west declination is 5° greater than at Abinger. Observations of magnetic declination are made and charted to show the amount of this magnetic element over our globe, and from such charts it appears that there are two points or regions which may be considered as directive centres, and are known as the Magnetic Poles. At these places a freely suspended magnetised needle would stand vertically. They do not coincide with the terrestrial Poles, nor are they exactly antipodal. Their positions apparently undergo secular change, and for the epoch 1922 the position of the North Magnetic Pole was about lat. 72°, long. 96° W., that of the South, lat. 73°, long. 156° E. The magnetic declination at any place changes

gradually year by year That the compass needle does not in general point true north and south, but that it is inclined a certain amount east or west, and that the amount varies with the locality, was recognised among western nations by the end of the 15th century Columbus being credited with the discovery. The Dip or inclination to the horizon was first noticed by Hartmann, of Nuremberg, in 1544, and was measured by Norman, of London, in 1576. That there is a continual change in the magnetic declination was discovered by Gellibrand in 1634.

Magnetic Declination at London.

Year	° ′	
1580	11 15	East.
1665	1 30	West
1765 . . .	20 0	West
1800	24 0	West

In 1819 the westerly declination at Greenwich was about 24° 25′, which was probably its maximum The needle has been since moving slowly eastward at that place, and in the year 1925 the declination (mean) was observed to be 13° 10 0′ west The work of recording earth-magnetism was then transferred from the Royal Observatory, Greenwich, to Abinger near Dorking in Surrey The values of the elements there found in successive years are given in the following table :—

Year	Dec	H F	V F	Dip.
	° ′			° ′
1925	13 22 7 W.	18600	42946	66 35 1
1926	13 10'4	18578	42947	66 36 3
1927	12 58 4	18575	42932	66 36 2
1928	12 46 8	18575	42935	66 37
1929	12 35	...	.	..

The values for 1928 are to be taken as provisional, and the declination given for 1929 is inferred only V F signifies vertical force

The mean difference, Abinger *minus* Greenwich, for the several elements is found to be—

+ 12 8 + 0018 − 0013 − 16 2′

The daily movement in declination of the needle at Abinger is 2 or 3 per cent. less in amount than that at Greenwich

The declination varies during the 24 hours, for the needle makes a small excursion in the morning from East to West, and returns, the range at Greenwich being about 12′ in summer and 7′ in winter. The needle occupies its mean position in the morning about 10*h*., and again about 18*h*, throughout the year. It reaches its most westerly position about 14*h*, and its most easterly position during the night or early morning at a time which varies during the year. The inclination or dip also varies in a similar manner to the declination. Since these changes of the magnetic elements are greater during the hours of daylight than during the night, are much greater in summer than in winter, and are evidently affected by changes in the solar activity—for the daily range is larger at times of Sun-spot maximum than at minimum—it is to be concluded that they are dependent on solar radiation.

MAGNETIC STORMS.

Besides these diurnal movements and their periodic variations, the magnets recording the three elements sometimes make sudden and violent oscillations which may continue for several hours. Such an occurrence is known as a Magnetic Storm, and is accompanied by spontaneous electric earth-currents, which may, if violent, interfere with telegraph working, and, as has been said, is often synchronous with a manifestation of the Aurora Borealis. (*See* pp. 36, 73.)

EARTHQUAKES

Earthquakes, or earth tremors are believed to be due to some form of fracture caused by the breakage of the Earth's substance under a growing strain, when the strain has passed the breaking point This gives rise to waves which are propagated through the solid substance to distant parts of the Earth, and vertically upwards to the surface sometimes with disastrous effects The point where the fracture occurs and the earthquake originates is called the seismic centre, or origin, or focus That part of the Earth which is vertically above this centre is called the epicentre The waves transmitted through the Earth may come to the surface hundreds, or even thousands of miles from the epicentre, and the times of arrival are recorded The first indications on the seismograph are made by longitudinal waves (P), which are followed after an interval by direct transverse waves (S) in approximately the same path, but which travel at a different rate From the length of the interval of time between the arrival of the (P) and the (S) waves the distance of the epicentre from the recording station may be inferred, and from three or more such distances it is possible to make an estimate of the position of the epicentre on the earth's surface There is no very certain method for determining the depth of the focus, but it seems that this may range from 50 to 450 km.

THE INTERIOR OF THE EARTH

The material of which the crust or exterior shell of the Earth is composed is known from geological investigation and from the facts which emerge in mining operations, but this direct examination extends at most for little more than a mile downwards from the Earth's surface The depth of the Morro Velho mine in Brazil is 6,426 feet, and there it has been found that the rock temperature increases only 1°F. in 205 feet Knowledge of the terrestrial material inside such an outer shell is necessarily derived from inference. The high mean density of the earth in comparison with that of surface rocks has been held to imply that the earth has a dense metallic core, probably of iron, and from consideration of its tidal properties it was shown by the late Lord Kelvin that as a whole the earth was of about the rigidity of steel. A recent investigation opens the way to the suggestion of a spherical core of liquid iron whose bounding radius may be about half that of the earth, which would account for some earthquake records that require explanation. The suggestion has some credibility though it is not to be yet accepted as actual fact

The Heaviside Layer.—To account for long distance ranges attainable by radio transmission, it is generally accepted that there exists in the upper atmosphere a comparatively sharply defined region, strongly ionized and therefore electrically conducting, from which the ether waves are reflected This region, known as the Heaviside Layer, owes its properties, it is thought, to the action of the Sun's ultra-violet radiation, and it has been suggested that it is a factor in the changes in the earth's magnetic field.

Greenwich Mean Time.

APART from abstract and philosophical considerations, Time, in actual practice, is measured by the rotation of the Earth, and a solar day is the duration of a complete rotation of our sphere round its axis with respect to the Sun, which is rather longer than a rotation with respect to the stars. The speed of the Earth's rotation is itself uniform, but the length of the solar day is affected, first by the movement of the Earth in its orbit round the Sun which is not constant because of the ellipticity of the orbit, and also by the circumstance that the axis about which the Earth rotates is not perpendicular to the plane of its orbit. Clocks are adjusted to an average or mean solar day which is of uniform length and is divided into 24 equal hours. This is the basis of Mean Solar Time. The length of the Mean Solar day is constant, but that of the apparent, or the interval from one transit of the Sun across the meridian to the next, varies for the reasons above given, and it happens that the longest apparent solar day is about December 22, and the shortest about September 16.

A unit and method of measurement having been established, it is necessary to choose a zero. The zero adopted is the instant when a fictitious body known as the Mean Sun, which is sometimes before, sometimes behind the real Sun in its apparent annual journey round the Earth, is on some chosen meridian. The time is called the Local Mean Time of any place through which that meridian passes. Usually some standard meridian such as that of Greenwich, is chosen, and the time of that meridian is used throughout a whole country, and hence the expression Greenwich Mean Solar Time, or, more usually, Greenwich Mean Time, arises (*see* Zone Standard Time p. 78).

Apparent Solar Time.

The time shown by a sundial is called Apparent Solar Time, and is affected by the two causes mentioned, which make the length of a solar day not uniform. It differs from Mean Solar Time by the Equation of Time which is given in the second column of page 2 for each month, with a precept for its use.

The Astronomical Day.

For purposes of Astronomy the day formerly began at noon, and the hours following noon were numbered successively from 0 to 23. A change was made in 1925, and the Astronomical Day now begins at midnight, the hours being numbered in this way as has been the practice in this Almanack since 1921. (*See* Note, p. 4.)

The Modern Clock.

The astronomical time keeper of to-day is not a train of moving wheels controlled by a pendulum, but is a "free" pendulum swinging in a vacuum chamber, subject to no control except that its swing is maintained by an impulse delivered at an appropriate instant by a falling gravity lever. This gravity arm, by electrical connection, causes to swing synchronously with the "free," the pendulum of a "slave" clock which does the work of moving hands on dials, or otherwise marking the progress of time. It has been suggested that these accurate clocks might show possible irregularities in the rotation of the Earth, but this is held to be not feasible.

Sidereal Time.

A sidereal day is the duration of a complete rotation of the Earth round its axis with reference to the stars and begins at any place when the First Point of Aries is on that meridian. In observatory practice time is measured, and the standard clock is regulated, by this rotation of the Earth with respect to the stars and Mean Solar Time is derived from Sidereal Time by computation. The error and rate of the sidereal clock are found by observing the instant it shows when certain stars, known as Clock Stars, cross the meridian, and comparison of this with the known time of transit (star's R.A.) will give the error of the sidereal clock. Comparison of the mean solar clock with the sidereal clock will show the error of the former.

The rule for finding the Mean Time of transit of any object from its Right Ascension, or, what is the same thing of converting sidereal into Mean Time may be stated thus:—*From the given Right Ascension or Sidereal Time subtract the Sidereal Time at the preceding Noon and further diminish the result at the rate of 10 secs. per hour, or by the* Table on p. 57. If the R.A. should be smaller than the S.T. at noon, 24*h.* must be added. The final result will be the mean time reckoned from noon, to which 12*h.* must be added to convert into G.C.T. as now used.

Ex.—At what time will Sirius cross the meridian on March 14?

	H.	M.	S.
R.A. of Sirius + 24*h.*	30	42	1
Sid. Time at Mean Noon (subt.) .	23	26	28
Interval of Sidereal T. from noon	7	15	33
Retardation from p. 57 (subt.) .		1	11
Interval of Mean Time from noon	7	14	22
G.C.T. (U.T.) of Sirius	19	14	22

It will be noted that for some stars it would have been necessary to use the Sidereal Time at Noon for March 13.

Mean Time may be converted into Sidereal Time by reversing this process, or otherwise by taking out the G.C.T. of the zero of the sidereal clock *which precedes* the Time to be converted, making use of col. 9 on page 2 of the month, *e.g.*—

	H.	M.	S.
G.C.T. (U.T.) March 14	19	14	22
From Col. 9, p. 11	12	33	27
Interval of Mean T. from 0*h.* Sid.	6	40	55
Acceleration from p. 57 (add) . . .	0	1	6
Corresponding Sidereal Time	6	42	1

Summer Time.

In 1916 an Act dated May 17 ordained that during a defined period of that year the legal time for general purposes in Great Britain should be one hour in advance of Greenwich Mean Time. An Act of 1922 (July 20), specified that the period should begin at 2 o'clock G.M.T. in the morning of the day following the third Saturday in April, or if that day is Easter-Day, the day following the second Saturday, and should end at 2 o'clock G.C.T. in the morning of the day next following the third Saturday in September. The Act, renewed in 1924 and 1925, was made permanent (August 7, 1925) and modified by substituting the first Saturday in October for third Saturday in September. The Act applies to Great Britain, Northern Ireland, the Channel Islands, and the Isle of Man. A list of the periods in each year during which Summer Time has been used since its adoption will be found in this Almanack for 1926.

In France and Belgium Summer Time is now in use during the same period as it is in England. The periods in which it has been used in France since 1916 were also noted in the issue for 1926.

IN the year 1880 it was enacted by statute that the word "time," when it occurred in any legal document relating to Great Britain, was to be interpreted, unless otherwise specifically stated, as the Mean Time of the Greenwich meridian * Other nations similarly used the time of their own capital, but since the year 1883 the system of Standard Time by Zones has been gradually accepted, and now almost throughout the world a Standard Time which differs from that of Greenwich by an integral number of hours, either fast or slow, is used. In a few cases the difference includes a half hour

The Standard Time adopted in various countries is given below In the United States and Canada five standard times are used, these large territories being divided into zones approximately 7½° on either side of five central meridians. Brazil is divided into three zones in which the times 3, 4, and 5 hours slow on Greenwich are standard respectively, and a similar system has been arranged by the Soviet Government for Russian Territory in Europe and Asia

Fast or Slow on Greenwich Time			
12	hrs	F	...Fiji Islands.
11½	,,	F.	..New Zealand, Chatham I
11	,,	F	New Caledonia, New Hebrides, Caroline Is. (east), Santa Cruz, Marshall Is., Nauru
10	,,	F	...Victoria New South Wales, Queensland, Tasmania, New Guinea, Lord Howe Is, Caroline Is, west of 154° E., Marianne Is
9½	,,	F	.South Australia, Northern Territory of Australia, part of N S W
9	,,	F.	..Japan, Corea, Yap (Caroline Is)
8	,,	F.	...Port Arthur. East China, Hong Kong, Philippine Is, Formosa and Pescadores Is, North Borneo and Labuan, Macao, Portuguese Timor, West Australia
7½	,,	F.	..Sarawak.
7	,,	F.	.French Indo-China, Hoihau and Pakhoi, Siam, Federated Malay States, Straits Settlements
6½	,,	F.	Burma, Andaman & Nicobar Is.
5½	,,	F.	India (except Calcutta and Portuguese India), Ceylon, Laccadive Is
5	,,	F.	..Chagos Archipelago, Portuguese India.
4	,,	F	...Mauritius, Seychelles, Réunion.
3	,,	F.	.French Somaliland, Madagascar, Italian Somaliland, Eritrea, Russia, Iraq, Tanganyika.
2½	,,	F.	...Kenya, Uganda.
2	,,	F.	...Turkey, Greece, Bulgaria, Rumania, Western Russia, Estonia (except Reval), Latvia, Finland, Egypt, Palestine, Syria, Cyprus, Rhodesia and Union of South Africa, Portuguese East Africa, Sudan.
1	hr.	F.	...Sweden, Norway, Denmark, Germany, Luxemboug, Poland, Lithuania, Austria, Hungary, Switzerland, Italy, Czecho-Slovakia, Yugo Slavia, Albania, Tunis, Nigeria, Sardinia, Malta, Sicily French Equatorial Africa, Cameroons, Belgian Congo, Portuguese West Africa, South West Africa, Angola, Libya.

* Summer Time is the "legal" time during the period in which its use is ordained. (*See* pp 14, 38 and 77)

Greenwich Time			
Greenwich ..			Great Britain, Ireland, France, Channel Is, Belgium, Spain, Portugal, Faroe Is, Gibraltar, Algeria, Balearic Is, Corsica, St. Thomas and Princes Is, Ivory
Fast or Slow on Greenwich Time.			Coast, Dahomey, Morocco, Gold Coast (Jan -Aug), Togoland
1	hr.	S	..Iceland, Madeira, French Guinea, Senegal, Portuguese Guinea, Liberia, Sierra Leone, Ascension Is, Canary Is, Mauritania
2	hrs	S	Azores, Cape Verde Is., Fernando and Trinidad Is (Brazil)
3	,,	S	Eastern Brazil.
3½	,,	S	Uruguay
4	,,	S.	Canada East of 67° long, Nova Scotia, Prince Edward Is, Porto Rico, Trinidad, the Leeward Is
Atlantic			Grenada, Guadeloupe, Tobago, Martinique, St Lucia, St Vincent, St Pierre, Barbados, Central Brazil, the Argentine, French Guiana.
4½	,,	S.	.Venezuela.
5	,,	S	Canada from 67th to 89th meridian Eastern States of U S A, Jamaica,
Eastern			Bahama Is, Cuba, Haiti, Peru, Panama, Western Brazil, Chile
6	,,	S.	. Central parts of Canada and U S A,
Central			with Florida, Costa Rica, Salvador, Honduras, part of Mexico
7	,,	S	. Canada west of the 103rd meridian
Mountain			Mountain States of U S A. Mexico.
8	,,	S	.British Columbia, California,
Pacific.			Nevada, Oregon, Washington
9	,,	S	..Yukon, Sitka
10	,,	S.	. Low Archipelago, Marquesas, Austral and Society Is, Alaska
10½	,,	S	.Hawaiian or Sandwich Is.
11½	,,	S	.Western Samoa

In the Tonga or Friendly Islands the time 12h. 20m fast on Greenwich is used · though the longitude of these islands is about 11*h* 40*m* West of Greenwich, the Date line (*see* below) passes to the East of them The time of Aden 2*h* 59*m*. 54*s* fast on Greenwich is standard in Aden and British Somaliland The time of Calcutta is 5*h* 53*m*. 20·8*s*. fast, Reval, 1*h* 38*m* 57*s*. fast; Holland, 0*h* 19*m* 32 1*s* fast

The time 2 hours fast on Greenwich is called East-European, that 1 hour fast is called Mid-European The time, 4 hours slow on Greenwich, has been called Maritime, Inter-Colonial, or Atlantic Time The times used in the other zones of the North American continent are named as shown.

THE DATE OR CALENDAR LINE.

The line where the change of date occurs as adopted by the British Admiralty is a modification of the 180th meridian, and is drawn so as to include islands of any one group on the same side of the line, or for political reasons. The line is indicated by joining up the following eight points —

(1) Lat 60° S, long. 180°
(2) ,, 51½° S., long. 180°
(3) ,, 45½° S., long. 172½° W.
(4) ,, 15½° S, long. 172½° W.
(5) ,, 5° S, long. 180°.
(6) ,, 48° N., long 180°.
(7) ,, 52½° N., long. 170° E.
(8) ,, 65° N, long. 169° W.

Then through the centre of Bering Strait to a point lat. 70° N, long. 180°.

THE AGE OF THE EARTH

In the view of science, any date for the "Creation of the World," such as the year 4004 B.C., as adopted by Archbishop Ussher from scriptural chronology, is quite untenable. From the assumption that its heat is sustained solely by contraction of its bulk Lord Kelvin deduced 20,000,000 years as the time that the Sun has existed, but this is too short to be accepted by geologists whose researches require a considerably longer time for the formation of terrestrial strata. The age of the Earth has been deduced astronomically from the eccentricity of Mercury's orbit, and from the tidal theory of the origin of the Moon. Geologically by various methods, and, since the discovery of radio-activity, from the ratio of the quantities of lead and of radio-active elements in rocks in the Earth's surface which are held to result from the transmutation of uranium. All the evidence is more or less consistent with the conclusion that the Earth has existed as a planet for a period between 1,500 and 3,000 million years.

GEOLOGICAL PERIODS

I. AZOIC ("Without Life"), containing no trace of life in any form. The duration of this period probably far exceeded that of all the remaining divisions together.

II. EOZOIC ("Dawn of Life"), characterized by the first appearance of animal life.

III PALÆOZOIC ("Old Life") or PRIMARY, containing traces of extinct animal life:—

i. *Cambrian*, exemplified in Wales (Cambria, Cumberland, etc.—the earliest group which possesses a connected suite of fossils.

ii. *Ordovician*, exemplified in North Wales and named after the ancient British tribe (Ordovices) inhabiting the region.

iii. *Silurian*, named after the ancient British inhabitants (Silures) of S.E. Wales.

iv. *Devonian* or *Old Red Sandstone*, from the prevalence of the system as a marine formation in Devonshire.

v. *Carboniferous*, including *Coal Measures*, Millstone Grit and Mountain Limestone.

vi *Permian*, from the Russian province of *Perm* where these strata are widespread.

IV. MESOZOIC ("Middle Life") or SECONDARY, with intermediate forms of animal life —

i. *Triassic*, from the *three* (tri-) divisions of the type formation in Germany.

ii. *Jurassic*, typically displayed in the *Jura Mountains*.

iii *Cretaceous*, from the *chalky* nature of its representatives where first studied.

V CAINOZOIC ("New Life") or TERTIARY, containing forms of existing life —

i. *Eocene*, the *dawn* or beginning of *new* forms of life, *i.e.*, existing species.

ii *Oligocene*, containing *a few* still existing species.

iii. *Miocene*, containing a *minority* of existing species—less than 50 per cent.

iv. *Pliocene*, the fossil remains show a *majority* of still existing species.

VI. QUATERNARY ("Fourth in Order") or POST-TERTIARY —

i. *Pleistocene* or *Glacial*, the *greatest number* of the remains are those of still existing species. Period of last Great *Ice* Age

ii. *Recent* or *Post-Glacial*.

Definite dates cannot be assigned to most periods, but G. de Geer has shown that scarcely 9,000 years ago the site of Stockholm was beneath the ice-sheet (VI. i.). Traces of *human* life are first found in V. iv. (*See also* col. ii.)

THE ANTIQUITY OF MAN.

Pithecanthropos erectus (Erect Ape-man) — Remains or a skull and of a thigh bone were found in 1891 and 1892 by Professor Dubois, at Trinil, Java. These are held to be remains of a creature of Pliocene times (*see* Geological Period, col. i.), about midway between the Orang-utan and Man in development.

Australopithecus Africanus (Erect Man-ape) — A skull was discovered in a limestone deposit at Taungs (Western Cape Colony) in 1925, by Professors Dart and Young of Witwatersrand University. In connexion with this discovery, Sir A. Keith, F.R.S., has declared that traces of *human* life may yet be discovered in *Miocene* times (*see* col. i., v., iii.)

Homo Heidelbergensis (The Heidelberg Man) — A lower jaw was discovered near Mauer, Heidelberg, in 1907. This is held to be that of a primitive man of the earliest Pliocene Period. The difficulty of assigning dates to the Heidelberg or Trinil remains is shown in the conflict of authority as one estimate gives 140,000 years (Rutot) for the whole, and another gives 700,000 years (Sturge) for a portion only of the Pliocene Period.

The Piltdown Skull (Eoanthropos, or Primitive Man) —Discovered in 1912 at Piltdown, Sussex and ascribed to primitive man of early Paleolithic times.

Neanderthal Man —Remains of a skull and parts of a skeleton found in 1859 in the Neanderthal Ravine, near Düsseldorf, Rhenish Prussia, and others found at *Spy*, Belgium in 1884, are held to represent the oldest known dolichocephalic (long-headed) race in Europe, living about 50,000 years before the Christian Era. In 1925 a similar skull was found near *Tagha*, Palestine.

Homo Prunigenius —Discoveries of interred human remains at Combe Capelle, Dordogne, France (1909), at Brux and Brunn, Moravia, and at Galley Hill, Northfleet, Kent (1895) are held to be those of human beings of late Paleolithic times, from 35,000 to 15,000 B.C.

STAGES OF CIVILIZATION.

The terms employed by ethnologists refer to periods, not of time, but of culture, and are of local application only, there being no universal synchronous sequence in all parts of the world. Races of Europe, Asia and America had reached the Iron Age of development long before the 18th century, A.D., while races in Oceania were still in the Paleolithic (or at least Neolithic) stage at the time of Cook's voyages.

The Stone Age.—The ancestors of primitive man are held to have adopted the use of stones of a suitable size for defence, while primitive man made such instruments more effective by sharpening them to a rough point. The earliest period is known as *Eolithic* (or Dawn of the Stone Age), and this period may have extended to 600,000 years B.C. Weapons of a later period, known as *Paleolithic* (or Old Stone Age), show gradual developments, from the chipped, leaf-shape forms, known as *Chellean* (from Chelles, Seine et Marne, France), and employed, perhaps, from 400,000 to 100,000 B.C., to later and more effective flint points, arrow-heads and spear-heads, flat on one side, known as *Mousterian* (from Le Moustier, where many such implements and other remains were

found) The Mousterian period is held to have lasted until about 10,000 B C, when *Neolithic* (or New Stone Age) weapons, polished and less crudely fashioned, were brought into use for a further period of about 5,000 years In the Stone Age the burial of the dead was influenced by the primitive nature of the implements available for digging the graves being only large enough to contain a body huddled together in a cramped position

Cultivation of the Soil —Cultivation is believed to have followed the interment of the dead about 10,000 B C, and rendered possible the political (*polis* = city) organisation of mankind There appears to have been a definite centre of Western Civilization at *Nippur* (and elsewhere in Iraq) no later than 6,000 B C, and in *Egypt*, under the first of the Pharaohs (Menes), about 5,000 B C It is not yet known if a similar degree of Eastern civilization had been reached in China, or elsewhere, during (or before) that of Iraq and Egypt.

The Bronze Age —Intercommunication of races introduced a knowledge of the malleable properties of copper, while the spread of commerce distributed tin from Saxony and Cornwall among the races of Europe and Asia Implements and utensils of cast bronze superseded those of stone, wood, horn or bone The designs and decorations suggest that this stage of culture was introduced into Europe from Asia and it must therefore be dated for the East far earlier than for the West, over a period ranging from 5,000 to 2,000 B C The Bronze Age appears to have been marked by the cremation of human remains, in place of mere burial in a constructed position.

The Iron Age.—Implements of cast bronze were in turn superseded by those of hammered iron at varying dates—in China Chaldaea, Assyria and Egypt about 4000 B C., in South-Eastern Europe about 2000 B C, spreading over the rest of Europe from 1000 B C to 100 A D, by which time the use of hammered iron was known throughout Scandinavia and in Ireland. It is possible that the Eastern civilization discarded the use of bronze and adopted that of iron even before the West had reached the Bronze Age, and while the remoter parts were still in the Palaeolithic Age With the Iron Age was reintroduced interment of human remains, in place of Bronze Age cremation, but the bodies were laid at full length in the ground and not huddled up as in the Stone Age.

EPOCHS AND CALENDARS.

Abyssinian — The Ethiopians have a chronological system which starts from the first day of the reign of the Roman Emperor Diocletian and proceeds in cycles of 532 years, the numeration beginning again on the completion of a cycle. The first year began on 29th August, 284 A D. (See also "Coptic," *post.*)

Armenian.—The Armenians marked their secession from the Greek Church by adopting it as their epoch. This corresponds to 9th July, 552 A.D.

Babylonian —In the eighth century B C. the Babylonians began a chronology with the era of the accession of the founder of their Empire, Nabonassar, 26th February, 747 B C.

Biblical.—The Christians of Western Europe made many calculations concerning the date of the Creation of the World, based upon the genealogical tables in the Old Testament In the seventeenth century (1650) James Ussher, Archbishop of Armagh, published his *Annales Veteris Testamenti*, and *Ussher's Notation* was afterwards printed in marginal notes to the Authorised Version of the English Bible Ussher's Notation placed the Creation of the World in 4004 B C

Christian —In the chronological system known as the Christian, now in use, the years are distinguished by cardinal numbers before or after the Incarnation, the period being denoted by the letters B C (Before Christ) or, more rarely, A C (*Ante Christum*), and A D (*Annus Domini*), the conventional abbreviation A D signifying *Anno Domini*, "in the year of the Lord" The correlative dates of the epoch are the 4th year of the 194th Olympiad, the 753rd year from the Foundation of Rome, 3761 A M (Jewish Chronology), and the 4714th year of the Julian Period This was introduced into Italy in the sixth century, and though first used in France in the seventh it was not universally established there until about the eighth century It has been said that the system was introduced into England by St Augustine (A D. 596), but was probably not generally used until some centuries later It was ordered to be used by the Bishops at the Council of Chelsea, A D 816 The actual date of the birth of Christ is uncertain December 25, B C 4, and other dates have been assigned

Coptic —In the Coptic Calendar, which is used by part of the population of Egypt and Ethiopia, the year is made up of 12 months of 30 days each, followed, in general, by 5 complementary days. Every fourth year is an Intercalary or Leap-year and in these years there are 6 complementary days The Intercalary year of the Coptic Calendar immediately precedes the Leap-year of the Julian Calendar The Era is that of Diocletian or the Martyrs, the origin of which is fixed at A D. 284, August 29 (Julian date) A Coptic Calendar for the year 1645 and part of 1646 is appended —

Year 1645.	A D. 1928	Year 1645.	A.D 1929
Tūt ..	Sept. 11	Būnah	June 8
Bābah . .	Oct. 11	Abīb	July 8
Hātur	Nov. 10	Masrī .	August 7
Kihak . .	Dec. 10	Complementary days	Sept 6-10

Amshīr ..	Feb. 8	Bābah ...	Oct. 11
Barmahāt	March 10	Hātur	Nov. 10
Barmūdah . .	April 9	Kihak ..	Dec. 10
Bashuns	May 9		

Hindu.—In addition to the Muhammadan reckoning there are four eras used in India The principal astronomical system was the *Kaliyuga Era*, which appears to have been adopted in the fourth century A D It began on 18 February, 3102 B.C. The chronological system of Northern India, known as the *Vikrama Samvat Era*, prevalent in Western India, began on 23 February, 57 B C The year 1929 A.D. is, therefore, the year 1986 of the Vikrama Era. In Southern India, the *Saka Era*, with its epoch of 3 March, A.D 78, was probably founded by Kanishka (whose sway was widely extended), and is in general use. The year 1929 A.D. is 1851 of the Saka Era. In the Hills, the *Saptarshi Era* dates from the moment when the Saptarshi, or saints, were translated and became the stars of the Great Bear in 3076 B.C.

There are many obsolete eras in the history of the Indian Peninsula. The principal religious systems of chronology were those of the Buddhists and the Jains. The *Buddhists* reckoned from the death of Buddha in 543 B.C. (the actual date being 487 B.C.), and the epoch of the *Jains* was the death of Vardhamana, the founder of their faith, in 527 B.C.

Jewish.—The Jews hold that the world was created at the time of the Autumnal Equinox in the year 3760 B.C. or year 954 of the Julian Period, and the epoch of starting point of Jewish Chronology corresponds to October 7 B.C. 3761. Thus the year 1929 A.D. is *Annus Mundi* 5689–90 in the Jewish Calendar. A calendar for 5689–5690 is appended:—

(A.M. 5689 and part of A.M. 5690.)

A.M. 5689			A.D. 1928
Tishri	1	Rosh Hashanah (New Year)	Sept. 15

,,	25	Hanucah, Dedication of the Temple	,, 27

* The previous day is also observed as the New Moon.

Note.—Jewish days begin at sunset on the dates previous to those given.

Muhammadan.—The Muhammadan Epoch is based on the Hegira or Flight of Muhammad from Mecca to Medina. The first day of the Era is not the actual day of the Flight but is 16th July, 622 A.D. This Calendar is purely lunar. The year consists of 12 months of 30 or 29 days alternately, the last being sometimes 30 and is therefore either 354 or 355 days in length. It follows that the Muhammadan year begins earlier each year, according to Gregorian dates, by 10 or 11 days. The year 1929 is 1347–8 of the Hegira, as shown by the calendar below:—

Year of Hegira 1347		A.D. 1928
Muharram		June 20
Saphar		July 20
Rabia I		August 18
Rabia II		September 17
Jomada I		October 16
Jomada II		November 15
Rajab		December 14
		A.D. 1929
Shaaban		January 13
Ramadan		February 11
Shawall		March 13
Dulkaada		April 11
Dulhegria		May 11
1348		
Muharram		June 9
Saphar		July 9
Rabia I		August 7
Rabia II		September 6
Jomada I		October 5
Jomada II		November 4
Rajab		December 3

Olympiads.—Greek chronology was reckoned in cycles of four years corresponding with the periodic Olympic Games held on the plain of Olympia in Elis once in four years, the intervening years being the first second, &c., of the Olympiad, which received the name of the victor at the Games. The first recorded Olympiad is that of Chorœbus, 776 B.C.

Persian.—The chronology of Persia which is still followed by the Parsees of India, dates from the accession of Yazdegerd III to the throne on 16th June, 632 A.D. The year 1929 is, therefore, 1298 of the Parsees. The New Year begins on 21st March.

Roman.—Roman historians adopted as an epoch the Foundation of Rome, which is believed to have happened in the year 753 B.C., and the ordinal number of the year in Roman reckoning followed by the letters A.U.C. (*Anno Urbis Condite*). The Calendar as we know it is a Roman institution, established by Romulus, who is said to have used a year of ten months of varying length, which developed into the famous Julian Calendar, and by a slight alteration became the Gregorian now in general use. In the Roman (Julian) Calendar the days of the month were not counted onward from the beginning, as with us, but three fixed points were taken and the intervening days were said to be so many days *before* the next coming points the first *and* last being counted. These three points were (1) the Kalends, by which name the first of each month was known; (2) the Nones (*nine* days before the Ides) which fell on the seventh day of the month in March, May, July, and October, and on the fifth day in each of the other months; and (3) the Ides, which fell either on the 15th or 13th, and thus divided the month nearly equally. The Latin equivalent of Dec. 31, for example, was *Pridie Kalendas Januarias*, and the day before that *ante diem tertium Kalendas*.

CHRONOLOGICAL TERMS.

The *Day, Week and Month*.—Measurements of time are based on the times taken by the earth to rotate on its axis; by the moon to revolve round the earth; and by the earth to revolve round the sun. From these which are not commensurable, certain average or mean intervals have been adopted for ordinary use. Of these the first is the *Day*, which begins at midnight and is divided into 24 hours of 60 minutes, each of 60 seconds. The hours are counted from midnight up to 12 at noon and again from noon up to 12 at midnight, except when the *Twenty-four Hour* reckoning is employed. The 24-hour reckoning ignores A.M. and P.M., and the hours are numbered 0 to 23 from midnight to midnight.

For the *Astronomical Day*, *see* p. 77.

The *Week* is a period of 7 days.

The *Month* in the ordinary calendar is approximately the twelfth part of a year, but the lengths of the different months vary.

The *Equinoctial or Tropical Year* is the time that the earth takes to revolve round the sun from equinox to equinox, which is 365·2422 mean days. The *Calendar Year* consists of 365 days, but a year the date of which is divisible by 4, without remainder, is called *Leap Year* and consists of 366 days. The last year of a century is not leap year unless its number is divisible by 400 (*e.g.* the years 1800 and 1900 had only 365 days).

Old and New Style.—In the Julian Calendar the centennial years were all leap years, and for this reason towards the close of the sixteenth century there was a difference of 10 days between the tropical and calendar years (*see above*). In 1582 Pope Gregory ordained that Oct. 5th should be called Oct. 15th, and that every fourth end-century year only should be a leap year (*see above*). This change was adopted by Italy, France, Spain, and Portugal in 1582; by Prussia, the German Roman Catholic States, Switzerland, Holland, and Flanders on Jan. 1, 1583, Poland 1586, Hungary 1587, the German and Netherland Protestant States and Denmark 1700, Sweden (gradually) by the omission of eleven leap days 1700–1740, the British Dominions (which included the then North American Colonies) in 1752, by the omission of eleven days (Sept. 3 being reckoned as Sept. 14). This "Gregorian" Calendar was adopted by Japan in 1872, China in 1912, Bulgaria in 1915, Turkey and Soviet Russia in 1917, by Yugoslavia and Rumania in 1919, and by Greece in February, 1923. The Russian, Greek, Serbian and Rumanian Churches did not abandon the Julian Calendar until May, 1923, when the Gregorian, slightly modified, was adopted. The *difference* between the Old and New Styles was 11 days after 1700, 12 days after 1800, and has been 13 days since 1900.

New Year's Day.—In England in the seventh century, and as late as the thirteenth, the year was reckoned from Christmas Day, but in the twelfth century the Anglican Church began the year on the 25th March, which practice was also adopted generally in the fourteenth century. The Civil year in the British Dominions (exclusive of Scotland) began with "Lady Day" until 1751. But in and since 1752 the civil year has begun with Jan. 1. Dividends are paid by the Bank of England, however, on the last day of Quarters according to a reckoning based on Old Style and the Income Tax year begins on April 6 (see page 16). New Year's Day had been changed in *Scotland* from Mar. 25 to Jan. 1 in 1600. On the Continent, Jan. 1 was adopted as the first day of the year by Venice in 1522. Germany in 1544, Spain, Portugal and the Roman Catholic Netherlands in 1556, Prussia, Denmark and Sweden in 1559, France 1564, Lorraine 1579, Protestant Netherlands 1583, Russia 1725, Tuscany 1751.

Golden Number.—In the year 432 B.C. Meton, an Athenian astronomer, found that 235 Lunations are very nearly, though not exactly, equal in duration to 19 Solar Years, and hence, considering the mean motion only, after 19 years the Phases of the Moon recur on the same days of the month. This discovery was held to be of so great importance that the dates of Full Moon in a cycle of nineteen years were inscribed in *figures of gold* on public monuments in Athens. The Cycle of nineteen years is called the *Metonic Lunar Cycle*, and the number showing the position of a year in the Cycle is called the Golden Number of that Year.

Easter-Day is the first Sunday after the full moon which happens upon, or next after the 21st day of March, and if the full moon happens upon a Sunday, Easter-day is the Sunday after. This definition is contained in an Act of Parliament (24 Geo. II., cap. 23), and explanation is given in the preamble to the Act that the day of Full Moon depends on certain tables that have been prepared. These are the tables whose essential points are given in the early pages of the Book of Common Prayer. The Moon referred to is not the real moon of the heavens, but a hypothetical Moon on whose "Full" the date of Easter depends, and the lunations of this "Calendar" Moon consist of twenty-nine and thirty days alternately with certain necessary modifications to make the date of its Full agree as nearly as possible with that of the Moon's origin given. The artificial Moon is accounted 29 (the) full on the fourteenth day, i.e., thirteen days after the New Moon, in order to be consistent with an early Jewish practice, but this point is immaterial. The Full Moon of the Calendar on which Easter depends is called the *Paschal Full Moon*.

By the above ordinance Easter falls on one of 35 days. A proposed reform that would limit it to one of 7 days has received Parliamentary support. (*See* p. 13.)

Epact.—The age of the calendar Moon on Jan. 1 in each year, formerly used in determining the date of Easter.

Solar Cycle.—A period of twenty-eight years, in any corresponding year of which the days of the week recur on the same days of the month.

Julian Period.—Proposed by Joseph Scaliger in 1582. The period is 7980 Julian years, and its first year coincides with the year 4713 B.C. 7980 is the product of the number of years in the Solar Cycle, the Metonic Cycle and the cycle of the Roman Indiction (28 × 19 × 15). The Julian Day, as used in astronomy, begins at noon. (*See* p. 49.)

Roman Indiction.—A period of fifteen years, instituted by the Emperor Constantine in A.D. 313 for fiscal purposes.

The Dominical Letter is one of the letters A–G which are used to denote the Sundays (Lord's Day) in successive years. If the first day of the year is a Sunday the letter is A; if the second, B; the third, C; and so on. Leap year requires two letters, the first for Jan. 1–Feb. 29, the second from March 1–Dec. 31.

THE *Superficial Area* of the Earth is estimated to be 196,550,000 square miles, of which 55,500,000 square miles are Land and 141,050,000 square miles Water. The *Diameter* of the Earth at the Equator is 7,926½ English miles, and at the Poles 7,900 English miles. The Equatorial *Circumference* is 24,901·8 English miles, divided into 360 Degrees of Longitude, each of 69·17 English (or 60 Geographical) miles: these Degrees are measured from the Meridian of Greenwich, and numbered East and West of that point to meet in the Antipodes at the 180th Degree. Distance North and South of the Equator is marked by Parallels of Latitude, which proceed from zero (at the Equator) to 90° at the Poles.

AREA AND POPULATION

Continent	Area in Square Miles	Estimated Population
Europe ..	3,750,000	475,000,000
Asia ...	17,000,000	1,013,000,000
Africa	11,500,000	143,000,000
North America .	8,000,000	146,000,000
South America	6,800,000	64,000,000
Oceania ...	3,450,000	8,500,000
Polar Regions .	5,000,000	
	55,500,000	1,849,500,000

The British Dominions extend over the largest area (14,220,000 sq. miles), the Russian Union is second (9,250,000 sq miles); France is third, with 4,336,000 sq miles; the United States, with its Insular Jurisdiction, &c., covers 3,750,000 sq miles; Brazil 3,220,000 sq miles, and China 3,000,000 sq miles.

THE CONTINENTS

Europe forms about one-fourteenth of the land surface of the globe. Its length from the North Cape, 71° 12′ N., and Cape Matapan, in the south of Greece, 36° 23′ N., is about 2,400 miles, and its breadth from Cape St Vincent to the Urals is about 3,300 miles. The political boundary between Europe and Asia extends some distance beyond the Urals, to include the mining regions: in the south-east it follows the valley of the Manych, north of the Caucasus.

Asia extends over nearly one-third of the land surface of the globe. The distance between its extreme longitudes, the west coast of Asia Minor (26° E.) and the East Cape (170° W.), is 6,000 miles. The extreme latitudes, Cape Chelyuskin (78° 30″ N.) and Cape Buru (90 miles north of the Equator), are 5,350 miles apart. Asia is bounded by the ocean on all sides except the west. The Isthmus of Suez connects it with Africa. The land boundary between Europe and Asia is formed on the west mainly by the Ural Mountains and the Ural River. In the south-west the valley of the Manych, which stretches from the Caspian Sea to the mouth of the Don, is now taken as the line between the two continents, although the Caucasus was formerly considered as belonging to Europe. The islands of the archipelago which lies in the south-east between the continents of Asia and Australia may be divided into two groups by a line passing east of Timor, Timor Laut, the Kei Islands and the Moluccas.

Africa is about three times the area of Europe. Its extreme longitudes are 17° W. at Cape Verde and 51° E. at Cape Guardafui. The extreme latitudes are Cape Blanco in 37° N. and Cape Agulhas in 35° S., at a distance of about 5,000 miles. It is surrounded by seas on all sides, except in the narrow isthmus through which is cut the Suez Canal and may be considered as a great peninsula of the Eurasian continent.

North America, including Mexico, is a little less than twice the size of Europe. Its extreme longitudes extend from a little west of 170° W. to 52½° W. in the east of Newfoundland, and its extreme latitudes from about 80° N. lat. to 15° N. lat. in the south of Mexico. It is surrounded by seas on all sides except in the south, where it joins the Isthmian States of *Central America*, which have an area of about 200,000 square miles. The area of the *West Indies* is about 65,000 square miles, a little more than half that of the United Kingdom. They extend from about 27° N. latitude to 10° N. latitude.

South America is a little more than 1½ times the size of Europe. The extreme longitudes are Cape Branco 35° W. and Punta Parina 81° W., and the extreme latitudes, Punta Gallinas, 12½° N. and Cape Horn 56° S. South America is surrounded by the ocean, except where it is joined to Central America by the narrow isthmus through which is cut the Panama Canal.

THE RACES OF MANKIND.†

The Races of Mankind are divisible according to Stock or, less scientifically, according to Colour. The Dominant Colour is Yellow—the numerical order being (1) Yellow, (2) White, (3) Black, (4) Brown, (5) Red. The main Divisions of the Races are as follows:—

Division.	Area	Estimated Number
Mongolian .. .	Asia	680,000,000
Caucasian	Europe & Orient	725,000,000
Negro	Africa ...	210,000,000
Semitic	North Africa ...	100,000,000
Malayan	Oceania, &c. . .	104,500,000
Red Indian, &c.	America	30,000,000
		1,849,500,000

* The Earth is a *Sphere*, with a Northern and Southern *Hemisphere*; the Ocean surface is the *Hydrosphere*, and the gaseous envelope the *Atmosphere*, of which the lower layers are the *Troposphere* and the upper the *Stratosphere*. The science concerned with the study of the Earth's crust is *Geology* with the measurement or its surface *Geodesy*, the study of its surface is *Geography*, and of its superficial features *Physiography*. The study of the hydrosphere is *Oceanography*, of the lakes *Limnology*, and of the mountains *Orography*, of the Races of Mankind *Ethnology*, of their location *Ethnography* of extinct organic life *Palæontology*, and of existing life *Biology*.

An airship with a constant speed of 100 miles an hour would take nearly 105 years to reach the Sun. The velocity of a given point of the Earth's surface at the Equator exceeds 2,000 miles an hour (24,902 miles in 24 hours); the Earth's velocity in its orbit round the Sun is about 66,600 miles an hour (584,000,000 miles in 365 days, 6 hours, 9 minutes).

† It has been estimated that the Earth can maintain a population of 6,000,000,000, a total which will be reached about A.D. 2200, at the present rate of increase.

Area and Population of the World by Continents.

Continent	Form of Government	Square Miles	Population	Per Sq Mile	Capital	Population of Capital
Europe						
Albania	Kingdom	20,000	1,000,000	50	Tirana	14,000

OCEAN AREAS AND DEPTHS.

The greatest known Ocean Depth (in the Pacific, off Mindanao, 32,089 feet) is not much greater than the greatest land height (in the Himalayas), but the mean depth of the Ocean floor exceeds 12,000 feet while the mean height of the surface of the land area of the Earth above sea level is only 2,300 feet The following table gives the areas of the principal oceans and seas, with the greatest known depth of each.—

Name	Area of Basin (sq miles)	Greatest Depth (feet)
Oceans		
Pacific	63,986,000	Off Mindanao, 32,089
Atlantic	31,530,000	Porto Rico Trench, 31,366
Indian	28,350,000	Sunda Trench, 22,968
Arctic	5,541,600	North Polar, 13,200
Seas		
Malay	3 137 000	Kei Trench, 21,342
Central American	1,770,170	Caribbean, 20,568
Mediterranean	1,145,000	*Pola* Deep, 12,276
Behring	878,000	Buldu Trough, 13,422
Okhotsk	582,000	Kurile Trough, 10,554
East China	480,000	*about* 10,500
Hudson Bay	472,000	*about* 1,500
Japan	405,000	*about* 10,200
Andaman	305,000	*about* 12,000
North Sea	221,000	Skaggerak, 1,998
Red Sea	178,000	20° N, 7,254
Baltic	158,000	*about* 1,200

THE HIGHEST MOUNTAINS

The following list contains the principal peaks of such ranges as the Himalayas and the Andes, and the highest mountains in other ranges

Name	Range	Height in Feet
Everest	Himalayas	29,141
Godwin-Austen (K 2)	,,	28,250
Kanchanganga I	,,	28,146
,, II.	,,	27,803

Rio del Norte	Gulf of Mexico	1,800
Sao Francisco	Atlantic	1,800
Danube	Black Sea	1,725
Euphrates	Persian Gulf	1,700
Indus	Arabian Sea	1,700
Brahmaputra	Bay of Bengal	1,680
Zambesi	Moçambique	1,600
Ganges	Bay of Bengal	1,500

† The most famous river falls are *Niagara*, between the Province of Ontario and New York State, on the Niagara River, the *Victoria Falls* on the Zambesi River, *Iguassu*, between Argentina and Brazil; and the series of falls in the *Yosemite Valley* in California

THE LARGEST SHIPS.

Ship	Tons	Dimensions ft
(*a*) Majestic (Brit.)	56,621	915×100×58
(*a*) Leviathan (U.S.)	59,957	907×100×58
Berengaria (Brit.)	52,226	883× 98×57
Olympic (Brit.)	46,439	852× 92×59
Aquitania (Brit.)	45,647	868× 97×49
Ile de France (French)	43,500	757× 91×61
Paris (French)	34,569	735× 85×59
Homeric (Brit.)	34,351	751× 83×48
Augustus (Ital.)	33,000	666× 82×47
Roma (Ital.)	32,583	705× 82×47
Columbus (Germ.)	32,354	749× 83×49
Mauretania (Brit.)	30,696	762× 88×57
Statendam (Neth.)	28,150	670× 81×49
Belgenland (Brit.)	27,132	670× 78×44
Empress of Scotland (Brit.)	25,128	677× 77×50
Saturnia (Ital.)	25,000	599× 79×46
Vulcania (Ital.)	25,000	599× 79×46
Adriatic (Brit.)	24,563	709× 75×52
Conte Biancamano (Ital.)	24,416	650× 76×27
Duilio (Ital.)	24,281	602× 76×46
Rotterdam (Neth.)	24,149	650× 77×43
Baltic (Brit.)	23,884	709× 75×52
George Washington (U.S.)	23,788	699× 78×50
France (French)	23,769	690× 75×48
Alcantara (Brit.)	22,181	630× 78×40
Asturias (Brit.)	22,071	630× 78×40
Minnetonka (Brit.)	21,998	600× 80×49
Empress of Australia (Br.)	21 861	589× 75×41
Minnewaska (Brit.)	21 716	600× 80×49
Giulio Cesare (Ital.)	21,657	602× 76×46
Empress of Canada (Brit.)	21,517	627× 77×42
New York (Ger.)	21,455	602× 79×42

NOTE (*a*) The *Leviathan* is 8 ft shorter than the *Majestic*, and if measured according to the rules adopted by British Lines her tonnage would be 54,282, the *Majestic*, measured according to the rules adopted by the U.S. Shipping Board would be 61 206 tons

THE LONGEST BRIDGES.

THE SEVEN WONDERS OF THE WORLD.

These are generally enumerated as follows:—

The Pyramids
The Hanging Gardens of Babylon.
The Tomb of Mausolus
The Temple or Diana at Ephesus.
The Colossus of Rhodes
The Statue of Jupiter by Phidias.
The Pharos (lighthouse) of Alexandria.

LANGUAGES OF THE WORLD

† Reconstructed 1914. § At the bottom.

TEMPERATURE AND RAINFALL RECORDS.

GENERAL. The *maximum temperature* on record in the shade is 134° Fahr., observed at Greenland Ranch, California, on July 10, 1913.

The *wettest station* in the world is generally allowed to be Cherrapoonjee in Assam, where the total fall for the year has exceeded 550 inches. From June 12 to 16, 1876 it fell 74 inches was collected, of an average daily fall of 22·83 inches. On one of these days, June 14, 40·80 inches fell in 24 hours.

BRITISH ISLANDS. The *maximum temperature* of the air recorded in the shade at 4 feet above the ground is 100° Fahr. This was observed at Wilton House, Salisbury, on July 15, 1881, and at Greenwich Observatory on Aug. 9, 1911.

The *lowest temperature* of the air recorded in the shade at 4 feet above the ground is −23° Fahr., or 55° below freezing point, at Blackadder, Berwickshire, on Dec. 4, 1879.

The *greatest rainfall* in a day was at Bruton, Somerset, when 9·56 inches fell in the 24 hours ended 9 a.m., June 29, 1917. This rainfall is equal to 965 tons of water per acre.

The *total rainfall* for a year at Stations in the British Islands during the 55 years 1870 to 1924 ranged from 246·92 inches at Llyn Llydaw (Copper Mill), Carnarvon, and 247·30 inches at the Stye, Cumberland, in 1923, to 9·29 inches at Margate in 1921.

The *maximum wind-velocity* on record in the British Islands was recorded at Quilty, west coast of Ireland, on Jan. 27, 1920, when a gust exceeded the rate of 110 miles per hour.

THE UNION JACK.

Flying the Union Jack.—Although there is no definite list of days on which the Union Jack should be hoisted, the rules suggested by the London County Council appear to meet with general approval. The Union Jack is flown, from 8 a.m. until sunset, on the following days:—

April 23.—St. George's Day.
May 6.—Anniversary of the King's Accession.
May 24.—Empire Day.
May 26.—The Queen's Birthday.
June 3.—The King's Birthday.
June 4.— Do., Official celebration.
June 23.—The Prince of Wales's Birthday.
October 21.—Anniversary of Trafalgar.

And on the occasion of the opening and closing of Parliament by the King.

The League of Nations.

THE League of Nations came into being when the Treaty of Peace with Germany was ratified on January 10, 1920 Its Charter, containing 26 Articles, is known as the *Covenant*, which begins with the following words —

"The High Contracting Parties, in order to promote international co-operation and to achieve international peace and security by the acceptance of obligations not to resort to war, by the prescription of open, just and honourable relations between nations, by the firm establishment of the understanding of international law as the actual rule of conduct among Governments, and by the maintenance of justice and a scrupulous respect for all treaty obligations in the dealings of organised peoples with one another, agree to this Covenant of the League of Nations"

The Covenant of the League contains fundamental clauses on the prevention and settlement of disputes These clauses bind nations who are members of the League not to employ force for the settlement of a dispute until they have first submitted it to the League of Nations (or to arbitrators or to judges), waited at least six months for the award or decision, and then allowed at least three more months to elapse. "They are debarred," said the Right Hon. Herbert Fisher "from the tiger's spring"

The *Membership* of the League comprises at present 54 nations, or three-quarters of the whole World, the British Empire and the Dominions (including the Irish Free State, together with India) being each an independent member, with separate voting power and representation The only two great countries which hold aloof are America and Russia; and they, particularly America, are co-operating with the League in a number of beneficent activities.

ORGANISATION OF THE LEAGUE.

The Assembly meets annually at Geneva on the first Monday in September, and consists of 3 representatives from every Member State, each State having one vote.

The Council meets at least four times a year Great Britain, France, Italy, Germany and Japan are permanent members, and at present 9 other States are annually elected as temporary members. These are Poland, Rumania, Chile, Canada, Finland, Cuba, Spain, Venezuela, Persia.

The Secretariat is the permanent Civil Service of the League, at Geneva, and is composed of nationals of nearly all Member States.

Secretary-General, Hon. Sir Eric Drummond, K.C.M.G., C.B. (*British*).

Deputy Secretary-General, J. Avenol (*French*).

Under Secretaries-General Marquis Paulucci di Calboli (*Italian*), M. Dufour.

Féronce (*German*) M Y. Sugimura (*Japanese*).

Political Section, M. Y. Sugimura (*Japanese*), *Director*.

Information Section, Pierre Comert (*French*), *Director*; Arthur Sweetzer (*American*), *Assistant Director*.

The Technical Organisations and Commissions, which act as expert advisers to the Council and Assembly, are continually handling questions concerning International Communication and Transit, Economics and Finance, Health, Mandates, and the Reduction of Armaments. No week passes without these bodies discussing international questions of wide interest, or without some conference being held at Geneva and achieving constructive work in international co-operation.

The Permanent Court of International Justice, consisting of eleven Judges and four Deputy Judges, chosen for their high legal and moral authority, sits at the Hague and deals by means of opinions and judgments with all disputes regarding International Law, breaches of International obligations, and the interpretation of treaties It has already dealt with 22 disputes, some of which might have led to an open breach between the States concerned It has already won a great reputation both in the Foreign Offices and in the legal professions of the world. The usual annual session begins on June 15.

The International Labour Office is closely connected with the League, but has a parallel organisation of its own at Geneva, which was also set up by the Peace Treaty. The International Labour Organisation contains delegates from employers and workers as well as from Governments. The Governing body represents twelve States, of which eight (including Great Britain, Canada and India) are chosen as being of chief industrial importance in the world. The main object in view is to bring up the standard of labour in the less advanced States to the level of the standard in countries where greater progress has been made. It is being attained by means of Conventions and Recommendations. There have already been over 300 ratifications by Governments of these labour Conventions. The Director of the International Labour Office is Albert Thomas (*French*), the Deputy-Director H B. Butler (*British*) There is a London office at 12 Victoria Street, S W 1.

Cost —The cost of the League, 1928-9, will be about £1,080,000, to which Great Britain contributes some £108,000

WHAT THE LEAGUE HAS DONE.

The work of the League is many-sided, and is constantly growing. It includes the prevention of a number of wars, the creation of the Permanent Court at the Hague as an alternative for war, positive reconstruction as in the case of the financial restoration of Austria, Hungary, and Northern Greece, the outlining of an important new policy of "freer" trade, improvements in international traffic and health, progress in real control of the traffic in drugs and in women, and child welfare. After eight years' continuous study of the problem of the Reduction of Armaments the League has reduced it to three bedrock principles--Arbitration, Security and Disarmament. The purely technical study of Disarmament is now sufficiently advanced for the first general World Conference to be held, it is hoped, before the Tenth Assembly meets in Sept. 1929.

LEAGUE OF NATIONS UNION.

LEAGUE OF NATIONS UNION, 15, Grosvenor Crescent, S.W. 1.*—*Joint Presidents*, Viscount Grey of Fallodon, K.G., and Viscount Cecil of Chelwood, K.C.; *Chairman of Executive Committee*, Prof. Gilbert Murray, LL.D.; *General Sec.*, J C. Maxwell Garnett, C.B.E., Sc.D.

* Any information about the League and its work can be obtained by application at this address.

THE BELGIAN CONGO.

The Independent State of the Congo became a Belgian Colony by a law of Oct. 18, 1908.

The total area amounts to 909,654 sq. miles, with a native population estimated (1924) at 12,000,000. The total European population (Jan., 1926) was 15,236

By the *Anglo-Belgian Agreement* of July, 1919, the districts of Ruanda and Urundi, portions of the former territory of German East Africa which adjoin the Belgian Congo on the E, were assigned by Great Britain to Belgium. *Ruanda* and *Urundi* formed the N.W. corner of German East Africa from 5° S lat. to the S. borders of (British) Uganda and have an area of about 15,000 sq. miles, with an estimated population of 3,000,000.

NETHERLANDS' COLONIES.

Colony and Capital	Sq Miles	Population.

The House of Windsor is in direct descent from (*inter alios*) Egbert, King of Wessex, Alfred the Great and William the Conqueror, also from the Emperor Charlemagne (*b.* 742, *d* 814), Rodrigo the Cid (*b* 1030, *d* 1099), the Emperor Barbarossa (*b.* 1123, *d* 1190) and St Louis, King of France (*b.* 1215, *d.* 1270).

WELSH SOVEREIGNS AND PRINCES.

WALES was ruled by Sovereign Princes from the "earliest times" until the death of Llewellyn in 1282. The first English Prince of Wales was the son of Edward I., and was born in Carnarvon town on April 25, 1284. According to a discredited legend, he was presented to the Welsh chieftains as their Prince, in fulfilment of a promise that they should have a Prince who "could not speak a word of English" and should be native born. This son, who afterwards became Edward II., was created "Prince of Wales and Earl of Chester" at the famous Lincoln Parliament on February 7, 1301. The present Prince was installed in Carnarvon Castle on July 13, 1911.

INDEPENDENT PRINCES, A.D. 844 to 1282.	
Rhodri the Great	844–878

Physician in Ordinary, Charles Gordon Moore, M.B., B.Ch., M.R.C.S., L.R.C.P.
Surgeon in Ordinary, D. C. Rice Oxley, M.C., M.B.

In a broad sense this heading is commonly taken as identical with that of the House of Lords, although there are close upon 130 holders of titles of long-standing nobility who are not members of the Upper House or Parliament, their peerages being those of Scotland or Ireland. But there are about an equal number of Peers of Scotland and Ireland who possess additional titles which constitute them members of the House of Lords, these titles being in a majority of instances, though very far from all, inferior to those by which they are generally known The full details as to each are given under his leading title, and a reference is in every case supplied under any other that he may hold, so that the table of equivalent titles formerly given in this work is no longer needed · a double index will be found in "WHITAKER'S PEERAGE, BARONETAGE, KNIGHTAGE AND COMPANIONAGE"

Contractions—*S* or *I* appended to the date of creation denotes a *Scottish* or *Irish* title; the further addition of a * implies that the Peer in question holds also an Imperial title, which is specified (after the name) by its more definite description as *Engl*, *Brit.*, or *U K.* When both titles are alike, as in the case of Argyll, this star is appended to the conjoined date below, and it then denotes that such date is that of the Imperial creation A † appended to *S.* or *I.* implies that the Peer is an elected Representative to the House of Lords For the mark ~ see heading to Marquesses, *b*, signifies born; *s*, succeeded; *m*, married, *w*, widower or widow; *M.*, minor.

COMPLETE LIST OF THE PEERS.

ROYAL DUKES (4)—*Style*, His Royal Highness the Duke of ——. *Addressed as*, Sir, or more formally, May it please your Royal Highness

1337 *Cornwall*, Edward, Prince of Wales, Duke of Cornwall (1337), Scottish Duke of Rothesay (1398), K.G., P.C., *b* 1894, *s* 1910.

Deputy Clerk, Colin Smith, *Registrar*, Sir Chas H. Lawrence Nolsh, K B E , C.B.

"Right Honourable."—Members of His Majesty's Most Honourable Privy Council are entitled to be designated "The Right Honourable," but, in practice, this prefix is sometimes absorbed in other designations; for example, a Prince of the Blood admitted a Privy Counsellor remains "His Royal Highness"; a Duke remains "His Grace"; a Marquess is still styled "Most Honourable" In the case of Earls, Viscounts and Barons a question has lately been raised whether peers of these three degrees are entitled to be called "Right Honourable" if not Privy Counsellors While not presuming to make a statement in settlement of the question, the Editor feels bound to direct attention to the recital of *Modes of Address of Peers of these three degrees* (on pages 113, 117 and 120 of present Edition) The *Style* appearing in these headings has been recited in this manner for sixty years in WHITAKER, and appears to be evidence of a long-standing custom; moreover, it is borne out in each instance, in *A Manual of Dignities*, by C R Dodd (Whittaker & Co., 1842), and in *The Book of the Court*, by W J Thoms, F S A, "Dedicated by Command to the Queen" (H.G. Bohn, 1844). Earlier evidence of the courtesy could no doubt be produced

England, Great Britain, U K, and 57 Ireland (marked I)

Eldest Sons of younger Sons of Peers
Baronets' eldest Sons
Eldest Sons of Knights in the same order as their Fathers
M V O (5th), M B E
Younger Sons of the younger Sons of Peers
Baronets' younger Sons
Younger Sons of Knights in the same order as their Fathers
Naval, Military, and other Esquires by Office

Women take the same rank as their husbands or as their eldest brothers, but the daughter of a Peer marrying a Commoner retains her title as Lady or Honourable Daughters of Peers rank next immediately after the wives of their elder brothers, and before their younger brothers wives Daughters of Peers marrying Peers of lower degree take the same order of precedence as that of their husbands, thus the daughter of a Duke marrying a Baron degrades to the rank of Baroness only, while her sisters married to commoners retain their rank and take precedence of the Baroness Merely official rank on the husband's part does not give any similar precedence to the wife *

Dames Grand Cross of the British Empire rank after wives of Baronets and before wives of Knights Grand Cross, after the latter coming Dames Commanders, before the wives of Knights Commanders

LOCAL PRECEDENCY.—No written code of county or city order of precedence has been promulgated, but naturally in the county the Lord Lieutenant stands first, and secondly the Sheriff In London and other Corporations the Mayor stands first, after him the Aldermen, Sheriffs, Chief Officers, and Livery At Oxford and Cambridge the High Sheriff takes precedence of the Vice Chancellor.

* For fuller tables (and for *Scottish and Irish Precedency*) see Introduction to "WHITAKER'S PEERAGE, BARONETAGE, KNIGHTAGE AND COMPANIONAGE," a companion volume, price 25s net
§ A complete list, in *Alphabetical Order* (the only list so published), of all holders of these decorations will be found in "WHITAKER'S PEERAGE"

THE ORDER OF MERIT (1902)—O M

Ribbon, Blue and Crimson

O.M. Civ.

This Order confers no precedence. It is designed as a special distinction for eminent men and women—without conferring a knighthood upon them. The Order is limited in numbers to 24, with the addition of foreign honorary members. Membership is of two kinds, Military and Civil, the badge of the former having crossed swords, and the latter oak leaves. Membership is designated by the suffix O.M., which is authorised to follow the first class of the Order of the Bath and to precede the letters designating membership of the inferior classes of the Bath and all classes of the remaining Orders of Knighthood.

O.M. Mil.

Military Members.

Admiral of the Fleet Rt. Hon. Sir Edward Hobart Seymour, G.C.B., G.C.V.O.

The Order was divided into *Military* and *Civil* divisions in Dec., 1918.

THE KNIGHTS BACHELOR

The Knights Bachelor do not constitute a Royal Order, but comprise the surviving representation of the ancient State Orders of Knighthood. The Register of Knights Bachelor, instituted by James I in the 17th century, lapsed, and in 1908 a voluntary association under the title of "The Society of Knights" (now "The Imperial Society of Knights Bachelor" by Royal command) was formed with the primary objects of continuing the various registers dating from 1257 and obtaining the uniform registration of every created Knight. In 1926 a design for a badge to be worn by Knights Bachelor was approved and adopted, a miniature reproduction being shown at the head of this paragraph. An annual Knightage is published from information supplied by the authorities, and can be obtained on application. The Officers of the Society are:—*Principal*, Rt Hon Sir William Bull, Bt., M P; *Vice-Principal*, Commander Sir Trevor Dawson, Bt., R N; *Hon Registrar*, Sir Park Goff, M.P.; *Clerk*, Hubert Whelbourn; *Registry and Library*, 21 Old Buildings, Lincoln's Inn, W C 2.

ORDER OF THE COMPANIONS OF HONOUR (1917)—C H.

Ribbon, Carmine, with Gold Edges

This Order consists of one Class only and carries with it no title or precedence, but ranks after the 2nd Class of the Order of the British Empire, i.e., Kts. and Dames Grand Cross (Mil. and Civ. Div.). The number of awards is limited and is open to both sexes.

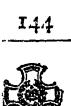
THE DISTINGUISHED SERVICE ORDER (1886)—D.S.O.

Ribbon, Red, with Blue Edges



Bestowed in recognition of especial services in action of commissioned officers in the Navy, Army and Royal Air Force The members are Companions only and rank immediately before the 4th Class of the Royal Victorian Order A Bar may be awarded for any additional act of service.

THE IMPERIAL SERVICE ORDER (1902, enlarged 1912)—I.S O

Ribbon, Crimson, with Blue Centre.

Restricted to members of the administrative or clerical (clerk) branches of the Civil Service, and consists of the SOVEREIGN, the Prince of Wales, and Companions (not exclusively male) to a number not exceeding 700, of whom 250 may belong to the Home Services, 200 to the Indian (100 European and 100 Indian) and 250 to the services of Dominions, Colonies and Protectorates

THE ROYAL ORDER OF VICTORIA AND ALBERT (for Ladies)—V.A.

Ribbon, White Moiré

Instituted in 1862, and enlarged in 1864, 1865, and 1880, but no fresh conferments are now made

THE IMPERIAL ORDER OF THE CROWN OF INDIA (for Ladies)—C.I.

Instituted 1897 *Ribbon*, Light Blue, with White Edges.

OTHER DECORATIONS AND MEDALS.

Regulations regarding the wearing of Orders, Decorations and Medals will be found in WHITAKER'S PEERAGE

The Distinguished Service Cross—1914—D S C—In substitution for the Conspicuous Service Cross, 1901 is designed for bestowal on all officers of the R N below the rank of Lieutenant Commander, and on Warrant Officers

The Military Cross—1915—M C—Awarded to Captains, Lieutenants, and 1st class Warrant Officers in the Army and Indian and Colonial Forces

The Distinguished Flying Cross.—1918—D F C—Designed for bestowal upon Officers and Warrant Officers in the Royal Air Force for acts of gallantry when flying in active operations against the enemy

The Air Force Cross.—1918.—A F C—Instituted as preceding, but for acts of courage or devotion to duty when flying, although not in active operations against the enemy

The Military Medal.—1916—M M.—Awarded to non-commissioned officers and men for individual or associated acts of bravery in the Field. In exceptional circumstances the Medal may be awarded to women of all nations

The Distinguished Service Medal—1914—D.S M—Is designed for chief petty officers, petty officers, men, and boys of all branches of the R N , to non-commissioned officers and men of the R M A , and to all other persons holding corresponding positions in His Majesty's Service afloat, for distinguished conduct in war

The Distinguished Flying Medal.—1918—D F M—and the **Air Force Medal**—A F M—for warrant and non-commissioned officers and men for equivalent services as for D F C and A F C

The Conspicuous Gallantry Medal. — C G M — Is bestowed upon warrant officers and men of the R N.

The Distinguished Conduct Medal—D C M—Awarded to warrant officers, non commissioned officers, and men of the Army.

The Meritorious Service Medal — M S M.—Since Sept , 1928, granted only to recipients of the Meritorious Service Annuity

The Volunteer Officers' Decoration. — V.D —Was an honour for rewarding the meritorious services of officers of the Force in question, who must have been in commission and have served twenty years

The Territorial Decoration —T D —Established in 1908, is restricted to commissioned officers of twenty years' good service in the Territorial Army Similarly a **Territorial Long Service Medal** has been substituted for that formerly awarded to Volunteers

The Royal Red Cross—R R C—For ladies, founded 1883, is a distinction conferred upon ladies of any rank or nation who may be brought to the Sovereign's notice for acts of mercy in attending to the sick or wounded in time of war

The Order of Mercy — Both sexes, was established in 1899 in connexion with the **League of Mercy**, an institution also founded in 1899 to promote the welfare of hospitals by obtaining small subscriptions for King Edward's Hospital Fund for London, &c

The Indian Order of Merit.— Instituted in 1837, as a reward for personal bravery, to Indian officers and men

The Kaisar-i-Hind Medal —(1st Class, gold, and Class, silver). Was founded in 1900, and is a reward for any person, of either sex, who shall have rendered useful service in or for India

The Albert Medal — A M.—Dates from 1866, with extensions in 1867 and 1877, and is a recognition of acts of gallantry performed by any person whatever—"For Gallantry in Saving Life at Sea" or "on land"

The Edward Medal —Established by King Edward VII. in 1907, is a recognition of heroic acts performed by miners and quarrymen, or of others who have endangered their lives in rescuing those so employed.

The King's Police Medal — Instituted in 1909 as a reward "only for acts of exceptional courage and skill or conspicuous devotion to duty" to officers and men of any recognised Police Force or organised Fire Brigade in the United Kingdom, India, and His Majesty's Dominions beyond the Seas The number of medals awarded in any one year shall not exceed 120.

The Royal Naval Reserve and Royal Naval Volunteer Reserve Decoration—R D.—and **Medal** - Instituted in 1910 to reward good and long service by officers and men of these Services.

THE VICTORIA CROSS. V.C.

Ribbon, Crimson for all Services.

FOR CONSPICUOUS BRAVERY INSTITUTED *January 29th*, 1856.

The Victoria Cross was instituted in 1856, on the close of the Crimean War, and extended in 1911 and 1920. The decoration is worn before all others, on the left breast, and consists of a bronze Maltese Cross, 1½ inches in diameter, with the Royal Crown surmounted by a lion in the centre, and beneath there is the inscription "For Valour." A special annuity of £10 a year is granted to every recipient below Commissioned Rank, with an additional £5 a year for every bar, such bar being added for additional acts of bravery which would have entitled the recipient to the Victoria Cross if he or she had not already received it. In the event of an annuitant being unable to obtain a livelihood on leaving the service, the amount of the annuity may be increased to £50. In 1911, the right to receive the Cross was extended to Indian soldiers, and in 1920 a Royal Warrant extended the right to Matrons, Sisters and Nurses, and the Staff of the Nursing Services and other services pertaining to Hospitals and Nursing, and to Civilians of either sex regularly or temporarily under the orders, direction or supervision of the Naval, Military or Air Forces of the Empire.

A LIST OF SURVIVING RECIPIENTS.

Ribbon, Crimson: FOR CONSPICUOUS BRAVERY: INSTITUTED 10 March, 1869

Biddle, Benjamin....10 *March*, 1869 | Lingard, William 10 *March*, 1869 | Roberts, J. Mackintosh 10 *March*, 1869
Hill, George .... 10 *April*, 1869

THE GRAND PRIORY IN THE BRITISH REALM OF THE VENERABLE ORDER OF THE HOSPITAL OF ST. JOHN OF JERUSALEM.

(INCORPORATED BY ROYAL CHARTER)

THE Order had its origin in Jerusalem as an International lay confraternity for the relief of Christian pilgrims to the Holy Land, and was later sovereign in Rhodes and Malta, where its Knights kept galleys and galleons to attack the Barbary Corsairs and to prevent the spread of Turkish rule in the Mediterranean, from 1530 to 1798. The work of the British Order is the control of the St. John's Association Ambulance and Brigade, and of the Ophthalmic Hospital, Jerusalem, and the London Clinic for poor people. The Order is conferred for services in the cause of humanity throughout the Empire, and is open to both men and women. There are 5 classes Bailiffs and Dames Grand Cross; Knights and Dames of Justice and of Grace; Commanders, of both sexes, Officers of both sexes; Serving Brothers and Sisters. These distinctions are notified in the *London Gazette*, but do not confer any rank or title. The ribbon of the decorations of the Order is black (watered)

Sovereign Head ..... THE KING-EMPEROR.
Grand Prior ..... H.R.H. The Duke of Connaught, K.G.
Sub-Prior ..... Maj.-Gen. The Earl of Scarbrough, G.B.E., K.C.B., T.D., A.D.C.

Pensions were granted to the following Ministers, but have been resigned by them:—Rt. Hon J A Pease, now Lord Gainford (£2,200 *per annum*), Rt. Hon G. W Balfour (£2,200 *per annum*)

Prime Ministers, Secretaries,

Prime Ministers and Secretaries.—The inability of George I to understand the English language made his attendance at meetings of the Cabinet "useless and irksome, and allowed the appearance of a Prime Minister, for his example has been so consistently followed as to have become a settled custom." In 1905 the office of Prime Minister was officially recognised. The first mention of a King's Secretary of State is under Henry III. In 1433, owing to press of work in France, two Secretaries were appointed, and until 1704 two seems to have been the normal number. From 1688 to 1782 one of the two dealt with matters pertaining to the Northern States of Europe, the other with matters pertaining to the Southern States, Home, Irish, and Colonial business. In 1782 the former became Foreign and the latter Home Secretary, still retaining Irish and Colonial business.

and other Officers of State.

The Home Secretary was also responsible for the Secretary at War, who, though not a Secretary of State directed the movements, payment, and civil control of the Army. In 1794 a Secretary of State for War was appointed to manage all military business, and in 1801 he was given the control of the Colonies. In 1854 the War Secretary was relieved of Colonial business, and a fourth Secretary of State was appointed for the Colonies. In 1858 the Secretary of State for India was appointed, and in 1918 the Royal Air Force was constituted, with a Secretary of State as President of the Air Council. In 1925 a Secretary of State for the Dominions was appointed the office being conjoined to that of Secretary of State for the Colonies.

NEW UNEMPLOYMENT INSURANCE SYSTEM.—The most important measure dealt with in the autumn sitting of 1927 was a Government Bill remodelling the whole system of unemployment insurance, founded partly upon the recommendations of the Blanesburgh Committee Explaining the proposals in moving the second reading in the Commons on *Nov* 9, Sir Arthur Steel-Maitland said the Bill established a single scheme based upon a statutory right to benefit subject to two qualifying conditions—an applicant must have made at least 30 contributions in the preceding two years and must be genuinely seeking work A new class was set up of young persons from 18 to 21, with proportionate contributions, but the Government could not make an immediate reduction in the contributions as proposed by the Committee The Bill was read a second time on the following day after the defeat of a Labour motion for rejection by 296 to 143 During the Committee stage on *Nov* 21, the Minister of Labour said it was estimated that the total number of men who would be taken off the unemployment pay roll because of the measure was 30,000, but it would only take effect gradually A concession made by the Government fixed a ten-stamp qualification for disabled ex-Service men in the qualifying period for men incapacitated by sickness A timetable for the remaining stages was imposed, and under this better progress was made A new clause was agreed to enabling grants to be made from the Unemployment Fund towards the cost of approved courses of instruction for boys and girls between 16 and 18 at juvenile unemployment centres. A Government concession extended to ten weeks the period during which a person might work in unsuitable employment without subsequently losing the right to benefit without a waiting period The Committee stage was concluded on *Dec* 6, when new rates of benefit were laid down for young men and women between 20 and 21 of 14*s.* and 12*s* respectively, and between 19 and 20 of 12*s* and 10*s*. respectively. The Bill was read a third time on *Dec.* 9 after an amendment for rejection had been defeated by 233 to 124. The House of Lords gave a second reading on *Dec.* 15 by 64 to 27, and the Royal Assent was accorded on *Dec.* 22, when Parliament was prorogued

LEASEHOLD REFORM.—The Landlord and Tenant Bill, which was considered by a Standing Committee earlier in the year, passed its report stage on *Nov.* 8, the day Parliament resumed The Bill provided for the payment of compensation for improvements and goodwill to tenants of premises used for business purposes, or the grant of a new lease instead of compensation Goodwill was defined by the Home Secretary as increased letting value, and landlords were protected against having to pay compensation for anything else The third reading was carried on *Nov.* 18 In the House of Lords, after the second reading on *Dec* 1, a suggestion by Lord Harris that the measure should be referred to a Select Committee was defeated by 109 to 37. In Committee an amendment by the Lord Chancellor was accepted, providing that all cases in dispute should be referred to a referee, and either settled upon his award, or, if still disputed, upon the award of the County Court Judge, cases involving over £500 going to the High Court. The third reading was agreed to on *Dec.* 19, and two days later the Commons considered the Peers' amendments. They disagreed with one excluding tenants in possession of premises under the Rent Restrictions Acts from the provisions of the Bill in respect of compensation for improvements or goodwill. Another, making all contracts outside the Act entered into after *March* 30 null and void, was altered to make the date *Feb* 8. The date on which the Bill was to come into operation was fixed at *March* 25, 1928. The Lords did not insist on their amendments, and the Royal Assent was given on *Dec.* 22

HELP FOR BRITISH FILMS.—The Government Bill to give some security to the British film industry, introduced as a result of the recommendation of the last Imperial Conference, was on *Nov* 14 considered on report as amended in Standing Committee before the adjournment. Sir Philip Cunliffe-Lister said the industry had asked for the Bill in order to protect it from foreign exploitation He must adhere to its principles, but would make certain modifications, including a reduction in the penalty for illegal advance booking from £100 to £50 and the postponement of the full restrictions on such booking for 10 years. Sir Philip also consented to make the Bill valid for 10 years only, making it of a temporary character and to reduce the operation of the quota from 12 to 10 years. These amendments were agreed to on *Nov.* 15, and two days later the third reading was carried by 223 to 125 In the House of Lords the second reading was agreed to on *Nov.* 28 by 68 to 20, Lord Peel stating during the debate that the Bill would not be renewed when it came up for revision if it had proved detrimental to the interests or pocket of the public The third reading was granted on *Dec* 12, and the Bill was given the Royal Assent on *Dec.* 22.

THE NEW PRAYER BOOK.—The best debates of the Session took place shortly before the prorogation when the revised Prayer Book was brought before both Houses to obtain their sanction to the presentation of the Measure to the King for his assent. In the Upper Chamber, on *Dec.* 12, the Archbishop of Canterbury claimed that the Measure was the answer of the Churches to charges of indiscipline extending over 21 years He declared that the proposals contained no vestige of a departure from the principles of the Reformation. The proposed changes had been passed by an overwhelming majority in the Church Assembly, and that verdict had been confirmed by 80 per cent. of the diocesan conferences Lord Hanworth, Master of the Rolls, led the opposition, and suggested that the controversial portions should be erased and the remainder kept as an agreed Measure. After three days' debate the Primate's motion to present the Measure for the Royal Assent was carried by 241 to 88 on *Dec.* 14, both Archbishops and 20 Bishops voting for the proposals and two Bishops against. On the following day, the Commons, after one of the finest debates for many years, rejected a similar motion by 238 to 205. It was introduced by Mr Bridgeman and was opposed by the Home Secretary, the other leading speakers for the Measure being the Prime Minister, Lord Hugh Cecil and Sir Henry Slesser, and its opponents Sir John Simon, Sir Douglas Hogg and Sir Thomas Inskip. The same fate awaited the Measure in the subsequent Session, the rejection being carried by 265 to 220 on *June* 14 after a two days' debate.

THE KING'S SPEECH.—Owing to a cold, the Queen was unable to accompany the King when he opened the new Session on *Feb* 7. In the Speech from the Throne, it was declared that there were many encouraging signs of progressive improvement in both home and external trade which justified the hope that with co-operation and good-will steady progress would be made in the coming year Enquiries were being made as to the possibility of affording some relief to the producing community from the burdens of local rates. Only a few Bills of importance were mentioned, including that to amend the law relating to the franchise and others for giving effect to certain recommendations of the National Health Insurance Commission and for increasing the credit facilities of persons engaged in agriculture In the Lords, the Duke of Montrose moved and Lord Cranworth seconded the Address, which was agreed to after a brief debate. Lt -Col Lambert Ward moved and Mr. Templeton seconded the Address in the Commons, and Mr. MacDonald, referring to "the most meagre King's Speech" he had ever heard, said the programme was a record for sins of omission and the absence at least of virtues of commission The Prime Minister said there would be a clause in the new Franchise Bill to ensure that all who were enfranchised by it should vote at the next election. The Government, he said, had decided to prorogue the Session in the summer, and to begin a new Session in November, when a new Factory Bill would be taken The reform of the Health Insurance system would relate only to its machinery, and there would be a Rating Bill only if the final balancing of the national accounts showed that the money was available On the following day, Sir Austen Chamberlain reviewed the foreign situation and referred to negotiations for an Anglo-American Arbitration Treaty similar to the Franco-American draft, explaining that it was confined to justiciable disputes The Labour amendment was moved by Mr. Arthur Henderson on *Feb.* 9 It dealt with the unemployment question and condemned the Mining Industry Act and the Eight Hours Act, the latter of which, Mr. Henderson said, had thrown 100,000 miners out of work. Mr. Neville Chamberlain, on the other hand, claimed that that Act had resulted in more coal being sold and more men being employed. The amendment was rejected on *Feb.* 13 by 293 to 137; another, urging economy in expenditure and relief to the taxpayers' burdens, introduced by Col. Gretton, was defeated by 189 to 84 on the same day; and a Liberal amendment on the condition of the poor and the need for amelioration, moved by Mr Harney, was beaten by 320 to 140 on *Feb.* 14, when the Address was agreed to.

TRIBUTES TO TWO GREAT FIGURES.—Tributes to "a great Parliamentarian" were paid in both Houses on *Feb.* 16, the day following the death of the Earl of Oxford, and motions for adjournment were agreed to as a mark of respect. In the House of Lords, Lord Salisbury, Lord Haldane, Viscount Grey, the Archbishop of Canterbury and Lord Gainford expressed their high regard and esteem for the Prime Minister who took the Empire into the Great War The Prime Minister in the Commons spoke eloquently of Lord Oxford's many qualities, emphasising especially his unfailing loyalty—"a loyalty deep set that wrought no evil and that thought no evil" "When our time comes," Mr. Baldwin said, "may it be our lot to leave behind to our friends as fragrant a memory as Lord Oxford's, and to our country a light, however faint, to lighten the steps of those who come after." Mr MacDonald and Mr Lloyd George expressed the feelings of their followers, and Mr. T P. O'Connor, as the last remaining member of the Irish Party, added the tribute of his country. Only a week earlier, Lord Salisbury in the Upper Chamber and the Prime Minister and Mr MacDonald in the Commons had expressed the nation's grief at the death of Earl Haig, and an Address was presented to the King for the erection of a monument to the memory of the Field-Marshal By common consent, said Mr Baldwin, Earl Haig was one of the great figures of the war, but the ultimate place of any soldier, as of any statesman, could never be decided in the lifetime of the generation to which he belonged. The fame of Lord Haig would grow as the years went by Associating himself with the Prime Minister's tribute, Mr. MacDonald urged that instead of a memorial in marble it should take the form of funds to carry out his work for ex-Service men, but this suggestion was rejected by 220 to 103

THE NEW SPEAKER.—After seven years in the Chair, Mr J. H. Whitley, on *June* 18, announced his retirement on the ground of health, and on the following day he bade farewell to the House. The Prime Minister, moving a resolution according thanks to Mr. Whitley during a period of unusual labour, difficulty and anxiety, happily expressed members' appreciation of his "wide humanity," and warm tributes were also paid by Mr MacDonald, Mr Lloyd George and Mr. T P O'Connor, the "Father" of the House. The motion having been carried, Mr. Whitley expressed his thanks, and at the close of the sitting shook hands with every member present. The House assembled with an empty Chair on *June* 20, when Sir Robert Sanders moved and Mr C. W Bowerman seconded the election of Captain the Hon Edward Algernon FitzRoy as Speaker. His prayer for strength to uphold his determination to maintain the rights, privileges, traditions, and independence of the House produced an ovation. Mr. Baldwin, Mr. MacDonald and Mr. Lloyd George welcomed Captain FitzRoy's election, and on the following day the King's approval of the choice was announced. For personal reasons, Mr. Whitley declined the viscounty usually conferred upon a retiring Speaker, and on *June* 27 the House of Commons, on the Prime Minister's motion, voted him a pension of £4,000, a Labour amendment to reduce the sum to £1,000 being negatived by 224 to 103.

EQUAL FRANCHISE.—With comparatively little opposition, the Bill placing the two sexes on an equality with regard to the Parliamentary vote was passed. The measure was, as the Home Secretary expressed it, "the inevitable last chapter of a political history which began with the change from the representation of interests to the representation of the people in 1832." Read a first time in the Commons on *March* 12, the Bill provided that men and women should vote on exactly the same terms on reaching the age of 21. A person would be entitled to be registered for the Parliamentary franchise if he

or she were the husband or wife of a person possessing a business premises qualification, both husband and wife being entitled to use two votes at a general election if the residential and business qualifications were in respect of different constituencies The new register incorporating the additional 5¾ million voters would come into force on *May* 1 1929 The second reading was carried on *March* 29, after the defeat by 387 to 10 of a motion for rejection Sir William Joynson-Hicks said that the Bill fulfilled the long-standing ambition of all parties There was the soundest authority for putting the two sexes upon complete electoral equality A male majority of three millions would be turned into a female majority of two millions The Bill would enfranchise 1,800,000 women over 30 and 2,200,000 women under 30 who had the responsibility of marriage or of earning their own living, as well as 226,000 unoccupied spinsters. Mr Snowdon said that the Bill would be the charter of a truer comradeship between the sexes in dealing with the grave difficulties of the time. Mr Baldwin intimated that the Government would agree to some limitation of the resultant increase in expenditure at elections In Committee on *April* 18 an amendment to raise the voting age to 25 was defeated by 359 to 16, and a Labour motion to prevent the extension of plural voting by 208 to 138 Before the Committee stage ended on *April* 23, the House on a free vote adopted by 220 to 71 a clause moved by Mr. Arthur Henderson to reduce the maximum scale of election expenses from 7*d*. to 6*d*. for each elector in counties and from 5*d*. to 4*d*. in boroughs Sir John Simon then moved that the reduction in counties should be 2*d* instead of 1*d*, but this was defeated by 215 to 111, and an amendment to retain the present maximum of 5*d* for boroughs was agreed to by 181 to 173 The third reading was agreed to on *May* 7, after the defeat by 216 to 78 of an amendment to abolish plural voting at a general election except in regard to the University franchise, and by 214 to 100 of another to reduce the permitted expenditure in boroughs from 5*d*. to 4½*d*. The House of Lords gave the Bill a second reading on *May* 22 after a two days' debate, an amendment for rejection being defeated by 114 to 35. An effort to raise the electoral age to 25 for both men and women was negatived by 87 to 41 in Committee on *June* 12, the third reading was secured on *June* 18, and on *July* 2 the Royal Assent was given.

THE BUDGET.—In a speech of such length that an adjournment was arranged in its course, Mr. Churchill, on *April* 24, outlined a Budget notable for an ambitious scheme of rating reform designed to assist in the revival of industry He claimed that hard work and ceaseless scraping had produced the surplus of £4,250,000, as he had had to face nearly £25,000,000 of shortfalls or additional expense, met partly by an increase in the death duties and partly by economies, including reductions in the personnel of the Civil Service Towards the reduction of debt £80,000,000 had been paid; the dead-weight debt had been reduced to £7,527,000,000, the external debt to £1,095,000,000, and the floating debt to £688,750,000, the lowest figure since the war The Chancellor said that he proposed to establish a new fixed debt charge of £355,000,000 a year, which would extinguish the country's entire debt, both internal and external, including the debt to the United States, in fifty years. Savings in interest, he added, would go to the relief of the income-tax payer. On the average for a six-year period the new charge would produce £71,750,000 for the Sinking Fund and the liability on Savings Certificates. The Bank of England would take over the issue of currency notes, and the reserve accumulated by the Treasury, amounting to £13,200,000, would, with £800,000 from the general resources of the Budget and £51,000,000 provided by the debt charge to meet specific sinking funds on certain Government stocks, carry the Sinking Fund to £65,000,000. The estimated expenditure of 1928 was £806,195,000, or, under a simpler system of accounts, which omitted the Post Office, the Road Fund and the Sinking Fund, to £676,500,000. Turning to revenue, Mr Churchill said that the betting tax would not be altered, and he expected to receive £3,250,000 He proposed to raise the Excise Duty on British wines from 1*s*. to 1*s* 6*d*. a gallon, and to impose a duty of 6*d*. upon mechanical lighters with the object of preserving the match duty and an *ad valorem* duty of 33⅓ per cent upon imported buttons Receipts from the settlement of Allied debts and the repayment of reparations under the Dawes Scheme almost reached the amount to be paid to the United States Adopting the new form of accounting, he had to meet an expenditure, including the Sinking Fund, of £727,381,000, and had available revenue of £733,683,000, the provisional prospective surplus after deducting £800,000 for the new Sinking Fund being £5,502,000. Coming to "the most important and controversial part" of his task, the Chancellor justified his intention to assist producers by reforming a rating system which dated from the sixteenth century. He proposed to accumulate £20,000,000 to £30,000,000 a year for a great operation upon the rates. A Valuation Ascertainment Bill was to be introduced immediately, a new valuation would be made, and later another Bill dealing with the reimbursement of the local authorities would be brought forward The first relief to rates would begin in *Oct*, 1929 The necessary money was to be raised by a tax of 4*d* a gallon upon certain kinds of imported oil, including kerosene, which would yield £14,000,000 in 1928 and £17,800,000 in 1929, the revenue being estimated to rise year by year. To balance the tax on kerosene lamps, the sugar duty would be reduced by amounts equivalent to ½*d*. per lb in the retail prices Licence duties upon lighter goods vehicles and hackney vehicles were to be slightly reduced. The net revenue from the oil tax, together with the surplus of the year, would supply means for the rating relief to productive industries. This would be afforded directly by reduction of rates upon premises used for the purpose of production and indirectly by reduction of the rate burden upon the freight carrying railways, canals, harbours, and docks. In the latter case the relief would only be given conditionally on those undertakings making equivalent reductions in their transport charges Gas, electricity and water would be outside the scheme, but the local rates on property used for production by means of manual labour would be reduced by three-quarters at *Oct.*, 1929. Farm lands and buildings, but not residences, would be completely

relieved of all rates The relief accorded to railways and canals would amount to £4,000,000 a year and would be concentrated on heavy traffics, one-fifth being given to agriculture, and the remainder on traffics of industries, including coal, employing the largest proportion of manual wage-earners to their business turnover. The total amount to be found by the Exchequer would be £29,000,000 Finally, Mr Churchill announced an increase of the children's allowance for income-tax relief to £60 for the first child and £50 for each subsequent child. Balancing his Budget, he placed the expenditure at £727,381,000 and the revenue at £761,083,000, giving a prospective surplus of £33,702,000. From this he took £14,000,000 to raise the Sinking Fund to £65,000,000, and after allowing for the reliefs he had mentioned he had left £14,502,000, to which he added £4,239,000, last year's surplus, to be carried forward in the Suspensory Fund In conclusion, Mr Churchill hinted that if 1928 were a year of real advance towards prosperity there might possibly be the means of making some further relief in taxation for the benefit of all classes In the general debate Mr. Snowden described the rating scheme as a fantastic half-baked monstrosity, but Sir Robert Horne considered that the stimulus to industry would not be postponed until the autumn of 1929, for strengthened industries could immediately borrow and plan further ahead Mr Churchill withdrew the kerosene duty as a result of representations made, and the Finance Bill was brought in and read a first time on *May* 3. The second reading was carried on *June* 5 after a motion for rejection had been defeated by 322 to 135. The Committee stage opened on *June* 25 and concluded on *July* 3, the chief features being the loss by 237 to 115 of Mr Snowden's amendment to reduce the petrol tax from 4*d* to 2*d*, and by 182 to 128 of a clause to repeal the Betting Duty. When the Bill was considered on report on *July* 23 the Chancellor moved a new clause to reduce the rate of duty on betting on the course from 2 per cent. to 1 per cent, and on office betting from 3½ per cent to 2 per cent from *Oct.* 1 He said that he desired to mitigate the temptation to evasion The yield of the tax would be reduced this year from £3,250,000 to £2,000,000, but the actual net reduction of revenue would only be about £600,000. The clause was accepted by 199 to 11. The third reading of the Bill was carried by 249 to 84 on *July* 27, and the Royal Assent was given on *Aug.* 3, when Parliament was prorogued until *Nov* 6 A separate Bill permitting the Bank of England to issue £1 and 10*s* bank-notes was passed, and received the Royal Assent on *July* 2.

RATING REFORM.—Moving the second reading of the Rating and Valuation (Apportionment) Bill, which was based on the Budget proposals, Mr. Neville Chamberlain on *June* 6 said that the rating authorities would invite applications for relief and check the applications, and probably by *July*, 1929, assessment committees would issue demands for the amounts ascertained to be due. The loss of revenue to local authorities would be made good by block grants designed both to cover the deficiency and to replace the existing percentage grants, assigned revenues and certain road grants. The three beneficiaries would be agriculture, industry and transport The second reading was carried on the following day by 308 to 140, Mr Snowden's motion for rejection being negatived The Committee stage ended on *July* 9 with the help of a time-table, and the third reading was secured on *July* 17 after a motion for rejection had been lost by 326 against 128. The Upper Chamber gave the Bill a second reading on *July* 24 by 80 to 15, and a third reading on *Aug* 1, the Royal Assent being accorded on the day the Session closed The Government had previously secured the passage of another Bill extending to London the relief in regard to the rating machinery given to the rest of the country in 1925. Mr Chamberlain said that he was obliged to defer his attempt to establish a common system of rating and valuation for the whole country, because agreement on outstanding administrative details between the London County Council and the metropolitan boroughs had not been reached

HEALTH INSURANCE.—In the early part of the Session, a Bill to simplify the administration of the Health Insurance system, based on the recommendations of the Royal Commission appointed three years earlier, was passed. The second reading was carried on *April* 3 by 206 to 99 on the motion of Mr. Neville Chamberlain, who explained that it abolished all penalties in respect of benefits on the genuinely unemployed who could not keep up their contributions Insured persons ceasing to be employed would remain in full benefit for 21 months, and afterwards in full benefit less 50 per cent. of their cash benefit for another year, provided they could prove that no work was available. The Bill provided that no person who had had any substantial period in regular employment should be disqualified for an old age pension by the fact of having been out of work for some time before attaining the statutory age. The Royal Assent was given on *July* 2.

THE TOTALISATOR.—By a majority of 15 the House of Commons on *March* 16 gave a second reading to a private member's Bill, introduced by Major Glyn, to legalise the totalisator and to control bookmakers at racecourses where the rules of the Jockey Club and the National Hunt Committee prevailed. The Bill was changed in Standing Committee, a Control Board being set up. The Government gave facilities to the Bill, and the third reading was carried by 218 to 122 on *July* 19. The Peers also passed the Measure, and it received the Royal Assent on *Aug.* 3.

OTHER LEGISLATION.—A second private member's Bill placed on the Statute Book was that introduced by Sir Park Goff to make the early closing of shops permanent and to remove some of the anomalies of the war-time legislation. A Bill was passed to make the provisions of the Act setting up a Court of Criminal Appeal for Scotland retrospective, so as to enable Oscar Slater, who had been released, to appeal against his conviction for murder, which he did successfully. Bills promoted by the four great railway companies to empower them to run road transport were passed after careful consideration before a Joint Committee. A Government Bill to assist the credit of persons engaged in agriculture in England and Wales was also passed.

PARLIAMENTARY MAJORITIES.

MINISTRY OF AGRICULTURE AND FISHERIES.

Whitehall Place, S W 1 43 Parliament Street, S W 1; 7, Old Bailey, E C 4

THE MINISTRY OF AGRICULTURE AND FISHERIES was constituted pursuant to the Ministry of Agriculture and Fisheries Act, 1919 (9 and 10 Geo V Ch 91) which amended the Board of Agriculture and Fisheries Acts, 1889 to 1909. The Board of Agriculture for Great Britain was established in 1889. By the Board of Agriculture and Fisheries Act of 1903, the duties of the Fisheries Department of the Board of Trade were transferred to the Board of Agriculture, the designation of which was at the same time altered. The expression "agriculture" is defined to include "horticulture".

The administration of the *Ordnance Survey* and of *Kew Gardens* is under the control of the Ministry.

Estimates, 1927, £2,018 231

Minister of Agriculture and Fisheries, Rt Hon Walter Guinness, D S O, M P. £2,000

General Manager, Jas Macfarlane
Secretary, Harold M. Ford.
Engineer, (vacant)
Treasurer, Wm Conochie

DOMINIONS AND COLONIAL OFFICES,

Downing Street, S.W. 1.

The business of the Colonies was, until 1801, included in the functions of the Home Secretary, to be transferred in that year to the newly-created "Secretary for War." In 1854 the outbreak of the Russian War led to the appointment of a Secretary of State for the Colonies (to relieve the War Secretary of Colonial business) In July, 1925, a new Secretaryship of State for Dominion Affairs was created, and as a result the Dominions Office was set up, to take over, from the Colonial Office, business connected with the self-governing Dominions (including the Irish Free State), the self-governing Colony of Southern Rhodesia and the South African territories (Bawutoland, Bechuanaland Prot and Swaziland) and business relating to the Imperial Conference. The salaries, &c., of the Dominions Office are estimated at £49,123, and of the Colonial Office £144,849 for 1928-29.

* At Custom House Branch.

Principal Secretary of State for Dominion Affairs and for the Colonies, Rt Hon L C M S. Amery, MP . . . £5,000

THE DUCHY OF CORNWALL,

Buckingham Gate, S.W. 1.

Cornwall was created a Duchy by Edward III for the support of his eldest son (afterwards created Prince of Wales), and the eldest son of the Sovereign has since that time been born Duke of Cornwall.

The Revenue of the Duchy of Cornwall in the year ended December 31, 1926, was £246,125, and was derived principally from Rents and Profits of Courts, £205,827. The Payments include £48,957, Outlay for the benefit of the Estate; £39,304, Deductions under various Acts; £14,963, Allowances, Donations, and Charities, and £19,745, Expenses of Management. The sum of £66,723 was paid on account of His Royal Highness the Prince of Wales.

Prince of Wales's Council.

The Lord Clinton (*Lord Warden of the Stannaries and Keeper of Privy Seal*); The Lord Revelstoke, GCVO (*Receiver-General*); The Earl Fortescue, KCB; The Viscount Folkestone; Vice-Adm. Sir Lionel Halsey, GCMG, GCVO, KCIE, CB; Hon. Geoffrey Lawrence, DSO, KC. (*Attorney-General*); Sir Godfrey Thomas, Bt., KCVO, CIE; Sir Walter Peacock, KCVO (*See and Keeper of Records*).

Officers of the Duchy of Cornwall.

Auditor, Sir Laurence E Halsey, KBE.
Solicitor, R. E. Tucker.
Assistant Secretary, C Liddell.
Clerk Surveyor, H. Kirk.
Deputy Receiver, A. E. Gillett.
Sheriff (1927-8), John Williams.

THE DUCHY OF LANCASTER,

Office, Lancaster Place, Strand, W C. 2

The County of Lancaster was erected into a Duchy or County Palatine Duchy by Edward III for his son John of Gaunt in 1377, but in 1399 it became merged in the Crown through the accession of John of Gaunt's son as Henry IV

The Revenue of the Duchy of Lancaster was £29,000 in 1847 and amounted to £130 000 in the year ended December 31, 1927 The contributory items are Rents and Profits of Courts, £69,822, Royalties and Dues, £29,890 Expenditure £10,519, Outlay for the benefit of the Estate, £23,743, deducted under various Acts of Parliament, £4,992, Allowances, Donations, and Charities, £2,000, Salary of the Chancellor of the Duchy, and £11,291, Expenses of Management The sum of £68 000 was paid (for His Majesty's use) to the Keeper of His Majesty's Privy Purse

Chief Clerk, Norman R C Warwick, O B E
Registrar, Preston District, J M Worthington
Do Manchester District, Harold Roberts
Do Liverpool Dist, R W Lowden
Constable of Lancaster Castle, Lord Ashton

THE COUNTY PALATINE OF DURHAM.

It is uncertain when "Palatine" privileges were first exercised in the County of Durham as no formal creation of the Palatinate by charter or deed appears to have ever been made From the founding of the See of Lindisfarne out of which the bishopric and palatinate of Durham arose, the Bishops received large grants of lands, with extensive immunities, and Guthred, king of Northumbria, and Alfred the Great appear to have confirmed the grant to the See of the whole of the land between the rivers Tyne and Wear There is no evidence of the exercise of *palatine* privileges by the Bishops prior to the Norman Conquest, but it is probable that these were acquired in the reign of the Conqueror, and they were exercised by the Prelates until resumed by the Crown in 1836 Palatine counties are understood to have been erected for the defence of neighbouring kingdoms against the Welsh and Scots, and were in reality self-contained kingdoms in alliance with their creator The ancient customs of the County Palatine of Durham are in some measure retained, the administrative authority being exercised on behalf of the Crown

Chancellor, Sir Edward Tindal Atkinson, K C
Attorney-General, Herbert F Manisty, K C
Solicitor-General, Sir Henry Arthur Colefax, K B E, K C

FOREIGN OFFICE, Downing Street, S.W.1.

The Secretaryship of State for Foreign Affairs was created in 1782, superseding the ancient Secretary for the Northern Department of Europe (as the Officer had been called since 1689). He is assisted by two Under Secretaries (one Parliamentary, the other Permanent), one Deputy Under-Secretary, and two Assistant Under Secretaries, Legal Advisers, a Finance Officer, twelve Counsellors, a Librarian, and a staff of Clerks. The chief functions, in addition to the formal duties, are receiving and answering communications from individuals or other Government Departments, from Diplomatic and Consular Agents of this country or others, and in determining the policy of the country towards Foreign Powers. The administrative expenses of the Foreign Office were estimated at £206,700 in 1928–29.

GENERAL REGISTER OFFICE
(ENGLAND AND WALES),
Somerset House, W C. 2

The Registration of Births, Marriages, and Deaths is believed to have been inaugurated by Thomas Cromwell in 1522, but the Statutes concerning registration are of a comparatively modern date, and were consolidated by 37 & 38 Vict c 88. The first Registrar-General was appointed in 1836, his work being enormously increased by the Act of 1874, which made registration compulsory in England and Wales, and also by the Births and Deaths Registration Act, 1926, the Legitimacy Act, 1926, and the Adoption of Children Act, 1926 The Registrar General is responsible for the taking of the Census and the preparation of the Census Returns He also undertakes the verification of claims by applicants for Old Age, Widows, &c, and War Pensions. The expenses of the Office for the 28-29 were estimated at £127,367. The estimate of receipts from fees for the same period is £24,500

Quarterly Statistics.—In the Registrar General's report for the June quarter of 1928, the estimated birth rate is given as 17 5 per 1,000, which is the same as that recorded in the corresponding quarter of 1927, this being the lowest birth rate recorded in any second quarter except during the year 1919 The estimated death rate was 11 7 per 1,000, this being 0 7 per 1,000 above the rate recorded during the second quarter of last year The natural increase of population for the June quarter, 1928, by excess of births over deaths was 56,493, as against 73,646, 67,523 and 63 472 in the second quarters of 1925 1926 and 1927 respectively The number of persons married in the March quarter of 1928 was 90,414, a decrease of 5,890 compared with the number of the corresponding quarter of 1927 The number corresponds to an annual rate of 9 3 per 1,000 of the estimated mid year population

HOME OFFICE, Whitehall, S W 1.

The Secretaryship of State for Home Affairs was created in 1782, the duties having previously been assigned to the "Southern" Secretaryship, which embraced the affairs of Great Britain, Ireland, and the Colonies, and also Southern Europe By the appointment of the "Home" and "Foreign" Secretaries the duties were divided in accordance with the names of the Offices, the former retaining Irish and Colonial business, and until 1794 War business also In 1801 the Colonial business was also removed The Home Secretary is the medium by which the Sovereign acquaints his people of his pleasure, and a channel of communication with the Sovereign, and his main functions are the maintenance of the King's peace, the enforcement of rules made for the internal well-being of the community, and the exercise of the prerogative of mercy.

POLITICAL HONOURS SCRUTINY COMMITTEE

The Royal Commission on Honours, 1922, recommended that a Committee should be appointed to consider before they are submitted to the King, the names and particulars of persons recommended for appointment to any dignity or honour on account of political services, and after such enquiry as they think fit to report to the Prime Minister whether, so far as they believe, such persons in the whole circumstances are fit and proper persons to be recommended. Constitution of the Committee appointed to serve for the period of office of the present Government —

Chairman, Rt Hon Viscount Novar, G C M G
Other Members, Rt Hon Lord Merrivale, Rt Hon W G Nicholson, M P
Secretary, James Rae (Treasury, S W 1)

IMPERIAL ECONOMIC COMMITTEE,

2 Queen Anne's Gate Buildings, S W 1

This Committee was established in 1925, following on proposals of the Imperial Economic Conference, 1923 for the purpose of considering the possibility of improving the methods of preparing for market and marketing within the United Kingdom, the products of the Overseas parts of the Empire, with a view to increasing the consumption of such products in the United Kingdom in preference to imports from foreign countries, and to promote the interests both of producers and consumers. The Imperial Conference of 1926 widened the reference to the Committee by instructing it to put forward for the consideration of the various Governments concerned (*a*) a list of raw materials for possible further marketing enquiries, and (*b*) suggestions for the preparation and circulation of brief preliminary surveys of any branch of Empire trade and marketing, such preliminary surveys, if the Governments concerned so desire, to be followed up by further enquiries. The Committee has produced so far, ten reports viz :—(1) a general interim report, (2) on meat, (3) on fruit, (4) on dairy produce, (5) on fish, (6) and (7) on poultry, eggs and honey, (8) on the functions and work of the Committee, (9) on tobacco, and (10) on timber

Chairman, Rt Hon Sir Halford Mackinder
Secretary, Sir David Chadwick, C.S.I., C.I.E

IMPERIAL SHIPPING COMMITTEE,

Great George Street, S W 1

Set up in 1920 (1) To enquire into complaints from persons and bodies interested with regard to ocean freights, facilities and conditions in the inter-Imperial trade or questions of a similar nature referred to them by any of the nominating authorities and to report their conclusions to the Governments concerned (2) To survey the facilities for maritime transport on such routes as appear to them to be necessary for trade within the Empire, and to make recommendations to the proper authority for the co-ordination and improvement of such facilities with regard to the type, size and speed of ships, depth of water in docks and channels, construction of harbour works and similar matters. Like the Imperial Economic Committee, it derives authority from and reports to all the Governments represented at the Imperial Conference

Chairman, Rt Hon Sir Halford Mackinder.
Secretary, R. D Fennelly.

INDIA OFFICE, Whitehall, S W 1.

Prior to 1858 Indian affairs were conducted by the East India Company, under the supervision of a Government Board of Control, whose President was responsible for Indian affairs in Parliament. On the transfer of India to the Crown in 1858 a Secretary of State, assisted by a Council, was entrusted with the administrative duties formerly discharged by the Company and Board

H.M. LAND REGISTRY,

Lincoln's Inn Fields, W C 2, and 18 Portugal Street, W C 2

H.M Land Registry was established in pursuance of a recommendation of a Royal Commission by the Land Registry Act 1862 The aim of the Act was to render dealings with land more simple and economical by establishing a State register of landowners who voluntarily submitted the titles to their land for examination and approval by the Registrar on behalf of the State The Registry was reformed by the Land Transfer Act 1875, which, while making many changes in the system, continued its voluntary basis In 1897 the Land Transfer Act introduced the principle of compulsory registration, and four Orders in Council under that Act between 1898 and 1902 make the system compulsory on sale in the administrative county of London. An Order in Council made in 1925 also made registration of title compulsory on sale in Eastbourne The Land Registration Act 1925 consolidated the previous Acts, and made such changes in the system as the experience of a generation had shown to be necessary The keynote of the system is that the machinery for the purchase and sale of land is assimilated to that for Stocks and Shares Absolute titles granted by the Land Registry are guaranteed by the State Simple forms, analogous to those used on transfers of Stocks and Shares, are provided The cost of buying, selling or mortgaging registered land is much less than the cost in the case of unregistered land It is open to any County Council or Council of a County Borough to apply to the Privy Council for an order making registration of title compulsory in its area The Land Registry is administered under the Lord Chancellor by the Chief Land Registrar, who also controls the Middlesex Deeds Registry and the Land Charges Department under the Land Charges Act 1925

Office Hours —Registration, 11 to 3, Searching and other business, 10 to 4 SATURDAYS closed at 1

NATIONAL DEBT OFFICE,

19 Old Jewry, E.C. 2

The National Debt Commissioners were appointed under 26 Geo III., c 31 (1786), by which a permanent Sinking Fund was to be established, and a sum of £250,000 issued quarterly to be applied towards the reduction of the National Debt, being commonly spoken of as "Mr Pitt's Sinking Fund" In 1829 this was superseded by appropriating the surplus income of the year as the Sinking Fund, and this was commonly known as "The Old Sinking Fund" In 1875 "The New Sinking Fund" was set up by Sir Stafford Northcote, and in 1923 another "New" Sinking Fund was set up by Mr Baldwin These, with other funds detailed on p 523, now mainly operate in reducing the Debt The Commissioners are at the present time the Speaker, the Chancellor of the Exchequer, the Master of the Rolls, the Lord Chief Justice, the Accountant General of the Supreme Court, and the Governor and Deputy Governor of the Bank of England The administrative expenses of the Board were estimated at £15,769 in 1928–29

(Joint Department of the Foreign Office and the Board of Trade).

35 Old Queen Street, S W 1 (Victoria 9040)
City Branch Office, 73 Basinghall Street, E C 2 (London Wall 4713)

For H M Trade Commissioners, *see* p 99

For Commercial Diplomatic Officers, *see* pp. 735 to 826 (Complete Edition).

This Department was formed during the autumn of 1917 as a joint Department under the Foreign Office and Board of Trade, and is represented in Parliament by a Parliamentary Secretary, who occupies the position both of Additional Parliamentary Under-Secretary of State for Foreign Affairs and of Additional Parliamentary Secretary for the Board of Trade. The Department is concerned mainly with the promotion and development of Overseas Trade and comprises the former Department of Commercial Intelligence of the Board of Trade and a part of the Foreign Trade Department of the Foreign Office. It has, in addition, taken over certain functions formerly performed by the Foreign Office in connexion with Commercial Intelligence and with the Commercial Diplomatic and Consular Services. The cost of administration was estimated at £320,973 in 1928–29.

IMPERIAL INSTITUTE.
South Kensington, S W. 7.

The Imperial Institute was erected as a memorial of the Jubilee of Queen Victoria (1837–1887) By the Imperial Institute Management Act of 1916 it was placed under the control of the Secretary of State for the Colonies, assisted by an Executive Council composed of twenty-five members As a result of resolutions passed at the Imperial Economic Conference held in London in 1923, it was decided to amalgamate the Institute and the Imperial Mineral Resources Bureau and in accordance with this decision, a new Act entitled "The Imperial Institute Act, 1925," was passed in that year to give effect to the amalgamation The management of the Institute, as thus reconstructed, was transferred to the control of the Parliamentary Secretary of the Department of Overseas Trade, who, as the responsible Minister, is assisted by a Board of Governors, of which particulars are given below The principal work of the Imperial Institute is the promotion of interimperial trade in raw materials (1) by investigations with a view to utilisation, (2) by supplying information as to sources, quality and uses, and (3) by exhibitions illustrative of the resources of the Empire The principal departments of the Institute are —(1) Permanent Empire Exhibition The Exhibition Galleries are open to the public free from 10 a.m to 5 p.m (Sundays 2.30 p.m to 5 p.m.) After a complete reorganisation of the exhibits and their disposition in the various Courts, the collections illustrate the products and also the scenery and life of the different countries of the British Empire There is a Central Stand for distribution of literature and for dealing with enquiries. Lecture demonstrations are given to parties from the schools and to members of the public at stated times A Cinema has been installed in which films are shown daily free depicting the life, sports and industries of the countries of the British Empire (2) Plant and Animal Products Department This department deals with all investigations and enquiries relating to Foodstuffs, Oil seeds, Essential Oils, Rubber, Fibres, Tobacco, Timbers, Gums and Resins, and such-like products An Advisory Council has been appointed, and technical advisory committees, including representatives of the trades or industries concerned, co-operate in the work on Rubber, Timber, Silk, Vegetable Fibres, Animal Fibres, Tanning Materials, Hides and Skins, Essential Oils and Resins, and Oils and Oil seeds (3) Mineral Resources Department This department is responsible for dealing with all enquiries and investigations of a mineral nature An Advisory Council on Minerals has been appointed and there are 25 advisory technical committees, each dealing with a special group of minerals and metals

Solicitor and Secretary, J D Ritchie, M.C.

POST OFFICE.

Chief Office, St Martin-le-Grand, E.C 1

A House of Commons report in 1844 states "It is uncertain at what precise period the Crown undertook to be the regular carrier of letters for its subjects" The first "Master of the Posts" was appointed in 1516, but the duty was not then undertaken as a remunerative department of the Government. The Post Office is now one of the three great revenue collecting departments, and while efficiently discharging its multifarious duties, shows a large annual profit It also receives large sums for duties and taxes on behalf of the Inland Revenue Department, for certain licences for the Customs and Excise Department and the Board of Trade The Post Office also pays Widows', Orphans' and Old Age Pensions, and Naval Military and Air Force Pensions and Allowances The Penny Post was inaugurated in 1840 the Book Post in 1835, the Post Office Savings Bank in 1861, the Post Office Telegraphs in 1870, the Money Order Office in 1792, Postal Orders in 1881, the Parcel Post in 1883, and the Telephone Service in 1892. The expenses of the Post Office (salaries, Wages, etc., only) were estimated at £36,932,800 in 1928-29.

Postmaster-General, The Right Hon Sir William Lowson Mitchell-Thomson, Bt., K.B.E., M.P. £2,500

PRIVY COUNCIL OFFICE, Whitehall, S.W. 1.

The Privy Council is of very ancient origin A Council, the number of which was about twelve, was instituted by Alfred, 895, and it discharged the functions of State now confined to members of the Cabinet In the Middle Ages the Chief Advisers of the King who were permanently about him formed the Privy Council Having become unwieldy, it was reconstituted in 1679 At present it consists of certain eminent persons, whose names are given on pp 333-4 Members of the Cabinet must be Privy Councillors, and they principally form the acting Privy Council The Council is summoned as such to act "with others" upon the demise of the Crown, and many matters are referred by the Sovereign to Committees of the Council, some of which are standing Committees, and others constituted to deal with particular cases, *e.g.*, the Judicial Committee, the Board of Trade, *q.v.* The Lord President of the Council is the Fifth Great Officer of State, and as such is always a prominent member of the Cabinet.

QUEEN ANNE'S BOUNTY,

3 Dean's Yard, S.W. 1.

Incorporated in 1704, when Queen Anne, with the consent of Parliament, transferred to the Governors the annual income of the "first fruits" and "tenths" derived from the sees, dignities, and benefices, with a view to the augmentation of insufficiently endowed livings By the *First Fruits and Tenths Measure*, 1926, these payments have been extinguished with a few exceptions The surplus income from capital held by the Governors is distributed in grants towards the relief of dilapidation assessments on benefices not exceeding £250 in net annual value, the total amount so available for the year ended Dec 31, 1927, was £21,823 They are the Central Authority under the *Ecclesiastical Dilapidations Measure*, 1923, and important duties have been laid upon them in connection with ecclesiastical tithe rentcharge under the *Tithe Act*, 1925 The Governors act as trustees for endowments and many descriptions of Church fund They are also empowered to lend money upon mortgage of benefices, for improvements to parsonage houses and farm buildings, and for dilapidations

DEPARTMENT OF SCIENTIFIC AND INDUSTRIAL RESEARCH.

16 Old Queen Street, Westminster, S.W. 1.

The Committee of the Privy Council for Scientific and Industrial Research was appointed by Order in Council dated July 28, 1915, to advise, subject to such conditions as the Treasury may from time to time prescribe the application of any sums of money provided by Parliament for the organisation and development of Scientific and Industrial Research. The Order in Council also appointed an Advisory Council to whom all proposals for researches stand referred By Charter dated November 23, 1916, the official members of the Committee of the Privy Council were created a Body Corporate under the name of "The Imperial Trust for the Encouragement of Scientific and Industrial Research" to hold and dispose of money and other property for the purposes of the Committee. On December 15, 1916, a separate Department having its own Parliamentary Vote, was created for the service of the Committee

By Order in Council dated February 6, 1918, the Committee of the Privy Council was reconstituted so as to consist of Ministers only, and by a Supplemental Charter dated April 27, 1918, the membership of the Imperial Trust was made to coincide with that of the Committee

The aggregate net estimate for the Department in 1928 9 amounts to £446,220 a decrease of £5,710 on the same estimate for 1927 8 The Gross estimate amounts to £630,274 Headquarters administration, £31,583; Grants for Research, £33,500 Research Work and Research Establishments (except Geological Survey and Museum), £496,501; Geological Survey of Great Britain and Museum of Practical Geology, £68,530.

President of the Committee of the Privy Council, The Lord President of the Council.
Advisory Council, Sir William McCormick, LL.D., F.R.S. (*Administrative Chairman*), Prof. V. H. Blackman, sc.d., f.r.s.; Prof. H. C. H. Carpenter, f.r.s.; Dr G C Clayton, C.B.E., M.P.; Prof F G. Donnan, C.B.E., D.SC., LL.D., F.R.S.; Sir Richard T Glazebrook, K.C.B., F.R.S., Sir James H Jeans, D.SC., LL.D., Sc.D., F.R.S., Sir William J Larke, K.B.E., Prof F A. Lindemann, F.R.S., Sir David Milne Watson, LL.D., D.C.L.; R W Reid, C.B.E., M.I.MECH.E. *Secretary to the Council*, H T. Tizard, C.B., F.R.S.

Headquarters Staff.

Secretary, H T Tizard, C.B., F.R.S. £2,200
Private Secretary, G E D Hogg.
Assistant Secs, L. S Lloyd, C.B., £1,300; A. L. Hetherington . . . £1,000 to £1,200
Controller of Records, C R Young, O.B.E., B.SC. £700 to £900
Principals, E Barnard, B.S.O., L. C. Bromilow, O F Brown, W. A M Murray, R O'F Oakley, P J. Wheeldon, O.B.E. (*Establishment Officer*) £700 to £900
Assistant Principals, A. F Barnes (*Acting Principal*); I. G Evans, G E D Hogg, A. H Poynton £200 to £500
Accountant, A R H Cox. . . . £500 to £600
Records Officer C A Spencer . . . £500
Asst Records Officer, H J Dowden . £250 to £350
Staff Officer, C D James . . . £400 to £500
Higher Grade Clerks, W. F Law, F W Smith, J. Williamson, £300 to £400, Miss M Robb £230 to £300

Building Research.

Chairman of Board, Sir G W. Humphreys, K.B.E., M.INST.C.E.
Building Research Station
Bucknalls, Garston, near Watford
Director of Research, R E Stradling, M.C., PH.D., D.SC., A.M.INST.C.E. . . . £1,000 to £1,200
Senior Assistants, B Bakewell, P W Barnett (*acting principal assistant*), A Zipman . £500 to £600
Assistants, A D Cowper, A. F Dufton, W H Glanville £350 to £450, R L Ancoats, J F Baker, D G R Bonnell, F L. Brady, N. Davey, R Fitzmaurice, F. M Lea, F T Meehan, PH.D., R. J. Schaller, F. L Shipman, C M Watkins, PH.D. £150 to £350
Assistant Accountant, Miss E A. Leighton £300 to £400

Chemical Research.

Chairman of Board, Sir Richard Pluttfall, C.B.E., F.R.S.
Chemical Research Laboratory.
Teddington, Middlesex
Director of Research, Prof G T Morgan, O.B.E., D.SC., F.R.S. . . . . £2,000 to £2,200
Principal Assistant, G D Bengough, D.SC. £600 to £750
Senior Assistant, R Taylor (*acting*) £500 to £600
Assistants, J G Mitchell, PH.D., H D Pfaff, PH.D; J. M. Stuart, £258 to £450, J W Cook, H Inglesent £250 to £350

Food Investigation.

Chairman of Board, Sir Joseph C. Broodbank.
Director of Food Investigation, Sir William B Hardy, M.D., F.R.S.
Low Temperature Research Station.
Downing Street, Cambridge
Superintendent, Sir William B Hardy, M.D., F.R.S. (*inclusive*) £1,500
Principal Assistant, F. Kidd, D.SC. . . . £650 to £750
Senior Assistant, C. Weal, D.SC. . . . £500 to £600
Assistants, R H Callow, PH.D., G. Mann, PH.D.; T. N. Morris; J. J. Pigg, A. J. Smith, PH.D., £380 to £450, J Barker, PH.D., J. Brooks, PH.D., J M Bryan; G. A. Reid, PH.D., E. C. Smith, PH.D. £250 to £350

Forest Products Research.

Chairman of Board, Principal Sir James C. Irving, C.B.E., D.SC., M.I.MECH.E., F.R.S.
Forest Products Research Laboratory
Princes Risborough, Bucks.
Director of Research, R S. Pearson, C.B.E., F.R.S. £1,000 to £1,200
Assistant Director, F M. Oliphant..... £650 to £750

Timber Mechanics Officer, C J Chaplin (*inclusive*) £1,000 to £1,100
Timber Utilization Officer Major J R Cosgrove, D S O , M C (*inclusive*) £1,000 to £1,100
Senior Assistant, S. T C Stillwell . . £500 to £600
Assistants, F. M Mooney, £350 to £450, W. G. Campbell; K St G Cartwright, R C Fisher, ph D £250 to £350
Temporary Assistants, A N. David, W. H Lovegrove

Fuel Research.

Chairman of Board, Sir Richard Threlfall, C B E , F R S
Director of Research, C H Lander, C B E , D S C £1,200
Assistant Director and Superintendent of Survey, F S Sinnatt, M B E , D.SC. . . . £1,000
Assistant to the Director, Maj. E. O Henrici . . £700 to £900
Intelligence Officer, Sir Frederic L Nathan, K B E (*part time*)
Registrar of Surveys, Miss N Renouf £250 to £350

Fuel Research Station

Blackwall Lane, East Greenwich, S E 10

Chief Engineer, Eng.-Capt J Fraser Shaw, R.N £1,100
Chief Chemist, J G King, ph D . . . £650 to £750
Senior Assistants, A. T Barber, A Blackie . . £500 to £600
Assistants, T F Hunley, D McDougall; A B Manning, £350 to £450, W. E Bakes, D. T Davies, ph.D.; L. Horton, J H. Jones, ph.D.; M A Matthews, D.SC., ph D., R A. A Taylor, F A. Williams . . . . £250 to £350
Staff Officer, C B. Fitzgerald . . . . £400 to £500

Physical and Chemical Survey of National Coal Resources

Assistants, L Slater, ph D. (*South Yorks area*); W J. Skilling (*Scotland*), £350 to £450, A. Dawe (*Notts and Derby*), C. Tasker (*North Staffs*), A. Crawford (*Durham and Northumberland*) .....£250 to £350

Water Pollution Research.

Chairman of Board, Sir R Robertson, K.B E., D.SC., LL.D , F R S.
Director of Research, H T. Calvert, M.B E , ph.D., F I C (*part time*)
Assistant do, A Parker, D SC . . . . £800 to £900

British Museum Laboratory.

Director, Alexander Scott, SC.D , D SC , F R.S. (*part time*).
Assistant, H. J Plenderleith, M C , ph.D £250 to £350

Radio Research Station.

Slough, Bucks

Principal Assistant, R A Watson Watt £650 to £750
Assistants, R H Barfield, J. F. Herd; J Hollingworth, £350 to £450, L. H. B. Boll; S. R Chapman £250 to £350

Geological Survey of Great Britain and Museum of Practical Geology.

Head Offices: Jermyn Street, London, S.W. 7, and Southpark, 29, Grange Terrace, Edinburgh (Branch Offices at Manchester, Newcastle-on-Tyne, and York

The Geological Survey and Museum was commenced in 1832, it was under the Science and Art Department from 1853 till 1900 when that Department became merged in the Board of Education On Nov. 1, 1919, the administrative control of the Survey and Museum was transferred to the Committee of the Privy Council for Scientific and Industrial Research The normal work of the Survey includes the preparation of geological maps and memoirs dealing with the general survey of the country and with various economic aspects of that survey The Museum of Practical Geology conserves and exhibits rocks, minerals and fossils which afford evidence for the published records of the survey or illustrate that survey. It is also a function of the Museum to exhibit economic minerals from all parts of the world, and especially Great Britain.

Chairman of Geological Survey Board, Sir Francis G. Ogilvie, C B , L L D.
Director of Survey and Museum, Sir John S. Flett, K.B E , D SC., LL.D., F.R S £2,200
Assistants to Director, J. A Howe, O.B E. (*England*); M. Macgregor (*Scotland*) .... £800 to £900
District Geologists, E. B. Bailey, M C ; C E. N Bromehead, R G. Carruthers; H. Dewey, C H Dunham, E. L Kitchin, SC D., PH.D. (*Paleontologist*); J E. Richey, M.C , B Smith, C B , H H Thomas, SC D , F.R.S. (*Petrographer*), G V Wilson, W. B Wright . . . . £750 to £750
Senior Geologists, C. P. Chatwin, E E L. Dixon, T Eastwood; G W Lee, D.SC., J Phemister, D SC , R. W Pocock; J Pringle, H. H. Read, D SC , T Robertson, PH.D ; R L. Sherlock, D.SC., C B Wedd, T. H Whitehead, D A Wray, PH D . . . . £450 to £650
Geologists, J K Allan, W Anderson, G A Burnett; R Crookall, PH D , H G Dines; F H Edmunds, W N Edwards, V A Eyles, A. Fowler, D. Haldane, S E Hollingworth, E C. B. Jones, M.C ; W Q Kennedy, J Knox; W Lloyd, A G Mac Gregor, M C , G Rose, J. B Simpson, J. V. Stephens; C. J Stubblefield; L H Tonk; E. M. Trotter . . . . . £250 to £450
Staff Officer, E G. W Elliott . . . . £400 to £500
Superintendents of Maps, A E. N Hayne, C G. Torkington . . . . . £200 to £350

Museum of Practical Geology

Jermyn Street, London, S.W. 1.

Curator and Librarian, W F P. McLintock, B.SC. . . . £650 to £750
Assist Librarian C V. Crook . . . . £450 to £650
Asst Curator, A. F Hallimond. . . . . £450 to £650

The National Physical Laboratory.

Teddington, Middlesex

The National Physical Laboratory was founded in the year 1900 as a public institution for standardising and verifying instruments, for testing materials, and for the determination of physical constants. The Laboratory comprises eight main sections: (1) *Physics*, (2) *Electricity*; (3) *Metrology*, (4) *Engineering*; (5) *Aerodynamics*, (6) *Metallurgy and Metallurgical Chemistry*; (7) *The William Froude National Tank*; (8) *Secretarial*.

Chairman of the General Board and Executive Committee, The President of the Royal Society.
Vice Chairman of General Board and Executive Committee, Sir Richard Glazebrook, K C B , F.R.S.
Director, Sir Joseph Petavel, K.B E , D SC., F.R.S. (*and has personal use £1,800*)
Secretary to the Director, G. P. Saxon . . £400 to £500
Secretary, F. J Selby, C B E . . . . £800 to £1 000
Assistant to the Secretary, J W Cherridow £250 to £350
Finance and Establishment Officer, A. Lumley . . £600 to £800
Accountant, G. E Bailey £675
Higher Grade Clerks, P. H. Durham; W. J. Glover, A May, H. Shepherd . . . . . £700 to £800

Physics Department.

Superintendent, C W. C. Kaye, O B E , D.SC. £800 to £1,000
Principal Assistants, E. Griffiths, D.SC., F.R.S., W. F. Higgins; T. Smith . . . . . £650 to £750
Senior Assistants, J S Anderson, D.SC.; A. H. Davis, D.SC., J. Guild; F. H. Schofield; C. Shearer, D.SC. . . . £500 to £600
Assistants, I. H. Awbery; I. Buckhurst; N. Hunting; J. A. Hall; D. S. Porter . . . . £250 to £350
Principal Observers, G. Baddeley; A. C Cooper; A. G. Williams, M.B.E. . . . . £305 to £350

Electricity Department.

Principal Assistants, D. W. Dye, F R.S ; E. H. Raynor, SC.D. . . . . £650 to £750
Senior Assistants, L. Hartshorn; R L. Smith Rose, PH.D., D.SC.; J. W. T. Walsh, D.SC. . . . £500 to £600
Assistants, H. G. Booth; H. Buckley; F. M. Colebrook; R. S. J. Spilsbury, £350 to £450; L. J. Collier; R. Davis; P. J. Higgs; T. H. Harrison; T I Jones; H. A. Thomas; G E. Webb; R. M. Wilmotte. . . . . £250 to £350
Principal Observers, W. H. H. Brooker; W. H. Rowland . . . . £305 to £350

Metrology Department.

Superintendent, J. E. Sears, C.B.E £1,000
Principal Assistant, S W Aldwell, M.B.E. £650 to £750
Senior Assistants, F. A. Gould, F. H. Rolt, M.B.E.; V. Stott; G. A. Tomlinson . . . . £500 to £600

Assistants, H. P. Bloxam; J. S. Clark, W. H. Johnson, W. G. Ridge, £350 to £450, H. Barrell £250 to £350
Principal Observer, H. A. Dear £305 to £350
Higher Grade Clerk, E. C. Cook . £300 to £400

Engineering Department

Superintendent, Sir T. E. Stanton, C.B.E., D.Sc., I.R.S. £1,300
Principal Assistants, R. G. C. Ratson, C. Jakeman £650 to £750
Senior Assistants, A. Bailey, H. J. Gough, M.B.E., J. H. Hyde . £500 to £600
Assistants, R. W. Fenning, M.B.E., G. A. Hankins, Miss D. B. L. Marshall, H. E. Smith, H. J. Tapsell, £350 to £450, J. Bradley £250 to £350

Aerodynamics Department

Superintendent, E. F. Relf £800 to £1,000
Principal Assistants, A. Fage, J. L. Naylor £650 to £750
Senior Assistants, L. W. Bryant; R. A. Frazer, H. B. Irving, T. Lavender £500 to £600
Assistants, H. Bateman, A. S. Batson, W. L. Cowley, R. Jones, D.Sc., C. N. H. Lock, E. Owen, L. F. G. Simmons, D. H. Williams, £350 to £450; F. C. Johansen, H. C. H. Townend . £250 to £350
Principal Observer, T. H. Fewster .... £305 to £350

Department of Metallurgy and Metallurgical Chemistry.

Superintendent, W. Rosenhain, D.Sc., I.R.S. £1,300
Principal Assistant, S. L. Archbutt . £650 to £750
Senior Assistants, G. Bain, D.Sc., J. L. Haughton, D.Sc., C. H. M. Jenkins, W. H. Withey £500 to £600
Assistants, F. Adcock, M.B.E., L. L. Bircumshaw, Miss M. L. V. Gayler, D.Sc., J. D. Grogan, Miss I. H. Hadfield C.B. Married T. E. Rooney, V. H. Stott, N. P. Tucker, P. G. Ward, £350 to £450, A. J. Murphy, G. D. Preston, W. E. Pritchett, H. A. Sloman, D. Turner . . £250 to £350

The William Froude National Tank.

Superintendent, G. S. Baker, O.B.E., M.Inst.N.A. £800 to £1,000
Principal Assistant, J. L. P. Kent, M.Inst.N.A. £650 to £750
Assistants, Miss E. M. L. Keary, W. C. S. Wigley, £350 to £450, G. H. Bottomley . £250 to £350

Co-ordinating Research Boards.

These Boards were established in 1920 *(a)* to provide for interchange of information between the various Government technical establishments concerning the special work which they undertake and the results achieved, so as to prevent duplication of work, though the Boards should have no executive function as regards the work of these establishments, *(b)* to arrange for the communication of such information to interested persons outside the Government service when this can be done without detriment to the public interest; and *(c)* in the case of researches not otherwise adequately provided for to make the necessary arrangements to meet the requirements of Government departments and others.

Chemistry Research Board
Chairman, Sir Richard Threlfall, C.B.E., F.R.S.

Engineering Research Board.
Chairman, Sir Joseph E. Petavel, K.B.E., D.Sc., F.R.S.

Physics Research Board
Chairman, Sir J. J. Thomson, O.M., F.R.S.

Radio Research Board
Chairman, Admiral of the Fleet Sir Henry B. Jackson, G.C.B., K.C.V.O., F.R.S.

ROYAL COMMISSION FOR THE EXHIBITION OF 1851.

Offices, 1 Lowther Gardens, Exhibition Rd., S.W.7.

[Incorporated by Supplemental Charter as a permanent Commission after winding up the affairs of the Great Exhibition, in 1851. It has for its object the promotion of scientific and artistic education by means of funds derived from its Kensington Estate, purchased with the surplus left over from the Great Exhibition.]

President of the Royal Commission, H.R.H. the Prince of Wales, K.G.
Chairman, Board of Management, Viscount Esher, G.C.B., G.C.V.O.
Chairman, Science Scholarships Committee, Sir Richard Glazebrook, K.C.B., F.R.S.
Secretary to Commissioners, Evelyn Shaw, M.V.O.

THE NATIONAL SAVINGS COMMITTEE,

Sanctuary Buildings, Westminster, S.W. 1.

SAVINGS CERTIFICATES.—The total number of Savings Certificates sold from their first issue in Feb. 1916 to Aug. 31, 1928, was 873,330,820, their cash value being £684,274,398. The amount including accrued interest, remaining to the credit of investors in Savings Certificates on that date was approximately £482,000,000. On April 1, 1922, the price of the Savings Certificate was raised from 15s. 6d. to 16s., the maturity value remaining 20s. On Oct. 1, 1923, the maturity value was reduced to 24s.

President, Sir Robert M. Kindersley, C.B.E.
Chairman, Maj.-Gen. Rt. Hon. J. E. B. Seely, C.B., C.M.G., D.S.O., T.D.
Vice-Chairman, Sir T. G. Chambers, K.B.E., Sir W. Schooling, K.B.E.
Members of Committee, G. Anderson, M.B.E. (*Trustee Savings Banks*), J. W. Barnett, A. E. Baxter (*National Union of Teachers*), Sir Joseph Burn, K.B.E., Arthur Collins (*Municipal Treasurers and Accountants*), W. Davies, C.B.E., J. Bevan Evans; T. L. Gilmour, R. M. Holland-Martin, C.B.E. (*Joint Stock Banks*), A. Hemstock (*Post Office*), J. C. Innes, G. Lacy, T. G. James, M.B.E., Rt. Hon. Sir H. J. Mackinder, Sir A. H. Marshall, K.B.E., J. Parker, C.B.E., E. Potts, O.B.E., H. M. Richards, C.B. (*Board of Education*), Mrs. Ritchie, O.B.E.; G. Stuart Robertson, K.C., W. H. Routly, C.B.E., A.A., Sir George Royle, C.B.E., J. Scott, C.B.E., Sir Ernest J. Stuhlmenger, K.B.E., C.B. (*Ministry of Health*), Sir Wm. G. Tarpin, K.C.B. (*Trustee Savings Banks Inspection Committee*), J. Holland Walker, M.B.E., Rt. Hon. Stephen Walsh, M.P., F. J. Webb, O.B.E.
Secretary, Sir Lawrence Magenson, C.B.E.
Accounting Officer, J. R. Phillips, O.B.E.
Director of Organisation, Evan Hughes, C.B.E.
Senior Clerks, A. McMillan, R. D. Ingham, O.B.E.
Commissioners, P. F. Howe, D.S.O., M.C., S. G. Jones, O.B.E.; E. W. Stanger, O.B.E., L. H. Beesley, H. J. Clare, G. G. L. Cruickshank; Miss D. Deane, E. G. H. Jones, W. F. Macdonald; Miss E. N. Marrian, M.B.E., J. E. Thomas, D. T. Evans, M.C., J. F. Woolley.
Executive Officers (Higher Grade), W. H. Hare, M.B.E. (*Establishment Officer*), W. C. H. Crosby, G. W. Largo; S. D. Charles, M.C., J. O. Francis (*Publicity Officer*), Miss E. G. D. Looker

SCOTTISH SAVINGS COMMITTEE.

122 George Street, Edinburgh

President, (vacant)
Chairman, The Duke of Atholl, K.T., G.C.V.O., C.B., D.S.O.
Deputy Chairman, Sir Alexander K. Wright, K.B.E., D.L.
Secretary, J. L. Wells, O.B.E.

SCOTTISH OFFICE,

Dover House, Whitehall, S.W.1; and 9 Parliament Square, Edinburgh.

Secretary of State, Rt. Hon. Sir John Gilmour, Bt., D.S.O., M.P. £2,000
Private Sec., T. D. Faigrieve, M.C. £300
Do (Public), C. M. Barclay Harvey, M.B. . . . . *(Hon.)*
Under-Secretary of State, Sir John Lamb, K.C.B. £2,200
Private Sec., D. Milne £150
Parliamentary Under-Secretary of State, Major W. E. Elliot, M.C., M.P. £1,200
Private Sec., H. Crow. £250
Asst. Under-Secretary of State, P. J. G. Rose, C.B. £1,200 to £1,500
Assistant Secretaries, P. R. Laird, W. Hogg; R. N. Duke, D.S.O., M.C. . . . . £1,000 to £1,200
Principals, A. S. Cotton; G. W. Milroy; J. E. de Watteville, F. O. Stewart, T. F. Maclean, M.B.E. £700 to £900
Assistant Principals, T. D. Faigrieve, M.C., H. Crow; D. Milne . . . . . £200 to £500
Staff Clerks, H. J. Cheale; P. J. Spratt; W. Hansford. . . . . £400 to £500

Counsel to the Secretary of State, P. F. Wood, C.B., K.C.; C. Milne, Advr.
Inspector of Anatomy, Sir Norman Walker, K.B.E. £100
Do., Constabulary, Major W. D. Allan, C.B.E. £750 to £850
Assessor of Railways & Canals in Scotland, John Alex. King.

H.M. STATIONERY OFFICE,

Prince's Street, Stonev's Gate, S.W. 1; Gorse Street, *Hollinwood*, Lancs.; 47A George Street, *Edinburgh*, 1 St. Andrew's Crescent, *Cardiff*, Murray Street, *Belfast*

THAMES CONSERVANCY,

2 Norfolk Street, Strand, W.C. 2

The Conservation of the River Thame s was granted to the Lord Mayor of London in 1857, and the Act to 1. Conservators in 1857, the power being limited in 1894. The Port of London Act, 1908, took over as from March 31, 1909, all rights, powers and duties of the Conservators in respect of the river below Teddington.

Chairman, Rt. Hon. Lord Desborough, K.C.M.G., D.S.O.
Vice Chairman, Charles G. Field, J.P.
Secretary, F. W. Geary.

BOARD OF TRADE,

Great George Street, S.W. 1

Headquarters, Great George Street, S.W. 1; *Mercantile Marine Dept. (including Navy Department and Consultative Depts.)*, 80, Gt. Smith Street, S.W. 1, *General Register and Record Office of Shipping and Seamen*, Tower Hill, E. 1, *Standards Dept.*, 6 & 7, Old Palace Yard, S.W. 1.

(See also *Dept of Overseas Trade*, and *Patent Office*.)

A Council for Trade and Plantations was instituted by King Charles II. in 1660. This Council was abolished in 1782, and in 1786 a Committee of the Council on Trade which, unlike the other Council Committees had a President of its own was appointed. The President of the Board of Trade, as at present constituted, control, the Department generally is responsible for matters relating to trade and industry. The Board deals with commercial policy generally, commercial treaties and negotiations and international question affecting British trade. It administers statutes concerning merchant shipping and seamen, bankruptcy, joint stock companies, etc., also industries (including dyes), merchandise marks, emendations, false weights and measures, patents, designs, trade mark, and copyright, and mines and quarries. It administers the Coastguard and also exercises control over the principal lighthouse authorities of the country, and, in the interests of navigation, over the construction of works on tidal lands, protects Crown and public rights in foreshores, and collects and publishes statistics of the trade and industry, shipping and navigation of this country, its Dominions and Protectorates, and foreign countries, as well as particulars of customs tariffs, regulations, &c. The *Board Gazette* is attached to this department. The Department arranges the provision of all sea transport required for the conveyance of personnel and stores by the fighting services and other Government Departments, deals with questions relating to petroleum, and publishes a weekly journal of commercial information. In addition it undertakes duties arising out of the War, *e.g.*, the liquidation of commitments entered into during Government control of food, shipping, timber, &c., and also out of the various Treaties of Peace, *e.g.*, the settlement of certain claims of debts between British and ex-enemy nationals, and of claims by British nationals for the restitution of and/or compensation for damage to British property, rights and interests in ex-enemy countries. Jointly with the Foreign Office it controls the Overseas Trade Department.

Asst. to Sec., L. C. Jackson ... £400 to £500

TREASURY, Whitehall, S.W. 1.

The Lord High Treasurer of England is the Third Great Officer of State, the office having been "in commission" (with certain intervals since 1612. The Commissioners of the Treasury of the United Kingdom of Great Britain and Ireland consist of the First Lord, who is usually Prime Minister, the Chancellor of the Exchequer, and some Junior Lords, with certain Secretaries and a staff of officials. The duties of the First Lord are mainly political, as also are those of the Parliamentary Secretary and the Junior Lords; the duties of the Chancellor of the Exchequer are mainly financial, in that he performs the ancient duties of the Under Treasurer and, after agreement with the heads of the great spending departments, arranges for the great collecting departments to provide sufficient moneys to meet the needs of the year. The papers are laid before Parliament in the form of a Budget, which the Chancellor opens and expounds to the House, these plans being accepted, modified, or rejected by the House.

PRIME MINISTER AND FIRST LORD OF THE TREASURY
The Rt. Hon. Stanley Baldwin, M.P. ... £5,000

APPELLATE TRIBUNALS.

THE JUDICIAL COMMITTEE OF THE PRIVY COUNCIL

Office, Downing Street, Whitehall, S.W. 1.

THE Supreme Judicial Authority of the Empire is the Judicial Committee of the Privy Council, before which appeals may be brought (in the form of a petition to the Crown) from Consular Courts and Courts of Vice-Admiralty, and from the Courts of India and every British Dominion. The Judicial Committee of the Privy Council consists of the Lord Chancellor, Lord President, ex Lords President, the Lords of Appeal in Ordinary (*see* col. 2), and such other members of the Privy Council as shall from time to time hold or have held "high Judicial Office" within the meaning of the Appellate Jurisdiction Acts, 1876 and 1887. Among the last are included Viscount Finlay, G.C.M.G., Lord Buckmaster, Lord Wrenbury, Lord Phillimore, G.B.E., Lord Darling, Lord Warrington of Clyffe, and Lord Salvesen. Sir John Wallis is a member by virtue of section 30 of the Judicial Committee Act, 1833. By virtue of the Judicial Committee Amendment Act, 1895, as amended by the Appellate Jurisdiction Acts, 1908 and 1913, and the Administration of Justice Act, 1928, the following Judges from the Dominions beyond the Seas are members:—Sir Charles Fitzpatrick, G.C.M.G. (*Canada*), Sir James Rose Innes, K.C.M.G. (*S. Africa*), Mr. Justice Lyman Poore Duff (*Canada—Supreme Court*), Chief Justice Sir Adrian Knox, K.C.M.G. (*Australia—High Court*), Sir Robert Stout, K.C.M.G. (*New Zealand*), Mr. Justice Sir Isaac Alfred Isaacs, K.C.M.G. (*Australia—High Court*). Chief Justice Francis Alexander Anglin (*Canada—Supreme Court*), Chief Justice Sir William Mulock, K.C.M.G. (*Ontario*), Sir Lancelot Sanderson (*Bengal*) and Chief Justice Sir William H. Solomon, K.C.S.I., K.C.M.G. (*S. Africa*).

Registrar of the Privy Council (and Registrar of Ecclesiastical Causes), Sir Charles Nash, K.B.E., C.B., Barrister-at-Law £1,500
Ch. Clerk (Jud.), W. Reeve Wallace, C.B.E. £800
Second Clerk, D. G. Lys £450

VOTES CAST AT THE GENERAL ELECTION, 1924.

THE total number of Voters on the Register at the date of the General Election of 1924 was:

England	17,516,155
Wales and Monmouthshire	1,289,797
Scotland	2,311,870
Northern Ireland	613,168
Total	21,730,988

The votes polled represented 76 per cent. of the total electorate, but 31 seats (representing 1,070,446 votes) were uncontested, so that the 16,640,279 votes recorded in the remaining constituencies with 10,654,542 voters represented 85 per cent. of those entitled to record their votes. The following table shows how the votes were cast:

In Scotland the principal local court is the Sheriff Court. The Sheriff is the Appeal Judge, but the Judge Ordinary is the Sheriff-Substitute. The jurisdiction of the Sheriff Court is both civil and criminal. In civil questions the jurisdiction is unlimited in regard to the money value of the cause. On the criminal side the Court has cognizance of all serious crime with the exception of murder and three other charges, but the power of punishment is limited to fine and imprisonment; it does not extend to penal servitude.

The Sheriff Clerk is the Clerk of the Sheriff Court, and his duties correspond nearly to those of a Registrar in the English Courts.

Prosecutions are conducted by Crown officials at the public expense; the Lord Advocate and his deputes prosecute in the High Court; the Procurators-Fiscal in the Sheriff Court.

The *Convener* of the Sheriffs is Sheriff Alexander L. M'Clure, Aberdeen.

The Address of the *Secretary of the Sheriffs-Substitute Assoc.* is County Buildings, Ayr.

ADOPTION OF CHILDREN.

THE Adoption of Children Act, 1926, which came into force on Jan 1, 1927, provides for the legal adoption of children The court may, at the instance of a person called "an adopter" (who must reside and be domiciled in England or Wales) authorise the adoption of a child (*i.e.*, an unmarried person under the age of twenty-one) being a British subject resident in England or Wales. An adopter must be at least twenty-five and must (generally) be more than twenty-one years older than the adopted child. Man and wife may jointly apply to adopt a child Except in special circumstances, an order will not be made appointing a man as *sole* adopter of a girl. An adoption order will not be made except with the consent of (*a*) a parent or existing guardian, or (*b*) of the person who has the actual custody of the child, or (*c*) of a person who is liable to contribute to its support, but these consents may be dispensed with in certain cases An order will not generally be made on the application of one of two spouses without the consent of the other Before making the order, the court will have to be satisfied (*a*) that every person being a parent who consents to its being made realises that he surrenders parental control, (*b*) that the order will be for the welfare of the infant—regard being had to its own wishes, and (*c*) that no reward has been promised or paid to the adopter other than that sanctioned by the court. The adopter may be required to give a bond to make such provision for the adopted child as the court shall think just *The effect of an adoption order is practically to put an adopted child into the position of a child born to the adopter or adopters in lawful wedlock in all matters of custody, maintenance and education, but does not affect the child's rights in property, e.g., on intestacy of his real parent, or give the child any rights in respect of property of the adopter* A probationary adoption order may be made for the maintenance, etc , of an infant for a period not exceeding two years The Act enables those who had adopted children more than two years before Jan. 1, 1927, to apply to the court for an adoption order, and in such cases orders may be made without the "consents" which must generally be obtained The Act also provides for the establishment of a register of adopted children. The administration of the Act is vested in the High Court (Chancery Division), or *at* applicant's option, the County Court or Magisterial Bench.

BIRTHS (REGISTRATION).

(For Certificates, see p 253).

WHEN a birth takes place, personal information of it must be given to the local Registrar of Births and Deaths, and the register signed in his presence, by one of the following persons:—1. The father or mother of the child. If they fail, 2. The occupier of the house in which the birth happened; 3. A person present at the birth; or, 4. The person having charge of the child. The duty of attending to the registration therefore rests firstly on the parents. The registration must be made within 42 days of the birth. Failure to do this without reasonable cause, involves liability to a penalty of forty shillings. If at the end of 42 days the birth is not registered, the Registrar may require any one of the above-mentioned persons to attend to register at a stated time and place. Failure to comply involves a penalty of forty shillings. The registration of a birth will be free when it takes place within 42 days (in *Scotland* 21 days), unless the Registrar is requested to attend at a residence or at the house where the child was born, when he may claim a fee of one shilling. After three months a birth cannot be registered except in the presence of the Superintendent Registrar, and on payment of fees, amounting to five shillings, to him and the Registrar. After twelve months no birth can be registered without the Registrar-General's consent, and on payment of further fees, amounting to ten shillings. In *Scotland*, after the lapse of three months, it can only be registered on the authority of the County Sheriff. The regulation that no birth in *England* and *Wales* could be registered after seven years was revoked in 1922, but late registration cannot be allowed unless satisfactory evidence is supplied to the Registrar-General. The only legal proof of age and place of birth is afforded by the civil registers, which the law now requires to be made as above described. In districts under the Notification of Births Act, 1907 (as extended by an Act of 1915), notice of every birth must be given by the father, or person in attendance on the mother, to the district medical officer of health by post within 36 hours of the birth. *This is in addition to the registration already mentioned*

A "Stillbirth" must be registered, accompanied by either a certificate of doctor or midwife, or a declaration that no doctor or midwife was present at the birth, and that the child was not born alive (*Births and Deaths Registration Act*, 1926)

The re-registration of the birth of a person "legitimated" under the *Legitimacy Act*, 1926, is provided for in that Act (see p 258).

Birth at Sea The master of a British ship must record any birth on board and send particulars to the Registrar General of Shipping.

Birth Abroad: Consular Officers are authorised to register births of British subjects occurring in their districts.

BRITISH NATIONALITY.

The law as to British Nationality is mainly to be found in the British Nationality and Status of Aliens Act, 1914, as amended by certain Acts passed in 1918 and 1922. It is important to notice, however, that the first section of the Act of 1914—which defines a natural-born British Subject—does not affect the status of any person born *before* Jan. 1, 1915.

The following are deemed to be British Subjects, namely:

1. Any person born within His Majesty's dominions and allegiance.

2. Any person born out of His Majesty's Dominions, *before Jan* 1, 1915, whose *father's father* was born within His Majesty's Dominions, provided that the grandfather was, at the time of the father's birth, a British subject.

3. Any person to whom a Certificate of Naturalization has been granted, or who has acquired British nationality by reason of annexation of territory, or by special Act of Parliament.

4. The wives (whatever their nationality of origin) of British subjects, save in certain cases where the man changes his nationality after marriage.

5. The children of naturalized British subjects born out of His Majesty's Dominions, provided that they comply with one of the following conditions.—

(*a*) in the case of a child born *before* January 1st, 1915,

(i) if a Certificate of Naturalization has been granted to his father or his mother (being a widow) before January 1, 1915, and he has become resident with such father or mother (being a widow) in the United Kingdom before that date while under age, or

(ii) if a Certificate of Naturalization is granted to his father or his mother (being a widow) after January 1, 1915, and his name is included therein.

(*b*) in the case of a child born *after* January 1, 1915,

(i) if before his birth a Certificate of Naturalization had been granted to his father or his mother, or

(ii) if a Certificate of Naturalization is granted to his father or his mother (being a widow) after January 1, 1915, and his name is included therein.

6. Any person born out of His Majesty's dominions whose father was at the date of the birth a British subject, and who fulfils any of the following conditions *e.g.*, it either

(i) his father was born within His Majesty's allegiance, or

(ii) his father had a certificate of Naturalization; or

(iii) his father had become a British subject by reason of any annexation of territory, or

(iv) his father was, at the date of the birth, in the service of the Crown, or

(v) his birth was registered at the British Consulate within one year or, in special cases, two years or, in the case of a person born on or after January 1, 1915 who would have been a British subject if born before that date, within 12 months after August 2, 1920.

A child of a British Subject is deemed to have been born within the allegiance if born anywhere where by treaty, &c., His Majesty exercises jurisdiction over British subjects.

A person whose British nationality depends upon his registration at a Consulate ceases to be a British Subject unless he asserts his nationality by declaration within a year after attaining 21, and abandons any of her nationality he may have acquired.

7. A person born on a British ship.

Loss of British Nationality. A British subject loses his British nationality:—

(*a*) if by any voluntary or formal act he becomes naturalized in a foreign country,

(*b*) if, in certain cases, he makes a declaration of alienage. These cases are:

(i) where a person is a British subject by reason of birth in His Majesty's Dominions and allegiance or on board a British ship *and* is also by birth or becomes during minority a subject of any foreign State,

(ii) where a person is a British subject, but was born out of His Majesty's Dominions, and

(iii) where a Convention has been made between this country and any foreign State, to the effect that any subject of that state who has been naturalized as a British subject may divest himself of that Status;

(*c*) if during his minority his father loses British nationality in circumstances which involve the acquisition by the child of a new nationality,

(*d*) in the case of a woman if she marries an alien,

(N B A woman who was originally a British subject and loses British nationality by marriage with an alien does not regain British nationality on the death of husband or the dissolution of her marriage. If in such a case she desires to resume British nationality she must apply for a Certificate of Naturalization.)

(*e*) in the case of a person to whom a Certificate of Naturalization has been granted if the Secretary of State revokes the Certificate;

(*f*) if the territory of which he is an inhabitant is severed from the Crown; *e.g.*, the cases of the inhabitants of Hanover and Heligoland.

Acquisition of British Nationality. An alien may acquire British nationality:

(*a*) by special Act of Parliament,

(*b*) by the conquest, annexation, or cession of the territory of which he is an inhabitant;

(*c*) in the case of a woman, by marriage with a British subject, and

(*d*) by naturalization.

Naturalization. All Certificates of Naturalization granted in the United Kingdom between May 13, 1870, and December 31, 1914 were granted in accordance with the provisions of the Naturalization Act, 1870. And the Act did not secure that a Certificate granted in any part of the Empire should be valid throughout the Empire.

Under the British Nationality and Status of Aliens Act, 1914, every person to whom a Certificate of Naturalization is granted in accordance with its provisions after January 1, 1915, is a British subject, not only in that part of the British Empire where the Certificate is granted, but also in the United Kingdom and in any Dominion which has adopted the Act, and in any other British Possession.

Persons naturalized prior to January 1, 1915, may, after that date, apply for a fresh Certificate of Naturalization under the new conditions.

In order to be eligible for the grant of such a Certificate in the United Kingdom, an alien must:

(*a*) during the eight years preceding his application have resided for not less than five years in His Majesty's Dominions (of which not less than one year *immediately preceding* the application must have been spent in the United Kingdom) or have been for not less than five years in the service of the Crown;

(*b*) be of good character and have an adequate knowledge of the English language; and

(*c*) intend to reside in His Majesty's Dominions or to enter or continue in the service of the Crown.

Instructions for the guidance of persons desiring to apply for a Certificate of Naturalization may be obtained free on application to the Home Office, Whitehall, London, S.W.

The fee payable to the Home Office in respect of the grant of a Certificate of Naturalization is

fixed by the Government of the day, and is at present £10, of which £1 is payable on submission of the application and the remainder on the grant of the Certificate. The £1 payable on submission of the application *is not returnable*, whether or not a Certificate is granted.

N.B.—In the case of a woman who was a British subject previously to her marriage to an alien, and whose husband has died or whose marriage has been dissolved, the above requirements, both as to residence and as to fee, are relaxed.

STATUS OF ALIENS.—Property may be held by an alien in the same manner as by a natural-born British subject, but the title to such property does not confer any right on an alien to hold real property out of the United Kingdom, or qualify him for any franchise.

Aliens are not entitled to be tried by a jury *de medietate linguæ*, but are triable in the same manner as if they were natural-born subjects.

ADMISSION, SUPERVISION AND DEPORTATION OF ALIENS.—Under the Aliens Order, 1920, any alien coming from outside the United Kingdom must obtain the leave of an Immigration Officer to land in the United Kingdom, and such leave is refused in many cases *e.g.*, where the alien is without means, or (if he is seeking employment) is unable to produce a Permit issued by the Minister of Labour. Provision is also made (Article 6 of the Order) for the registration of resident aliens and (Article 12) for the deportation of aliens by order of the Secretary of State, which can be made on various grounds. The Aliens Order, 1920, was made under the Aliens Restriction Act, 1914, as amended and extended by the Aliens Restriction (Amendment) Act, 1919.

BUSINESS NAMES REGISTRATION.

REGISTRATION OF BUSINESS NAMES ACT, 1916

This Act received the Royal Assent on 22 Dec., 1916, and its provisions were explained on pp. 414-415 of the 1921 "WHITAKER." The *Office* of the Registrar of Business Names is at Somerset House, W.C. 2.

CERTIFICATES

OF BIRTHS, MARRIAGES, OR DEATHS

England and Wales.—Certificates of Births, Deaths, or Marriages can be obtained at the General Register Office, Somerset House, on payment of fees amounting to 3s. 7d., viz., 2s. for search, 2s. 6d. for the certificate, and 1d. for the stamp affixed thereto. (When application is made by *post* the charges are 5s. 1d.) They can also be obtained from the registration officer having the legal custody of the register book containing the entry of which a certificate is required. Certificates of marriages in churches of the Church of England can also be obtained from the incumbent of the church in which the marriage took place.

Certificates at reduced rates can be obtained for the purposes of certain Acts of Parliament: Friendly Societies Act, 1896, Birth or Death, 1s.; Factory and Workshop Act, 1901, and for purposes of Elementary Education, Birth, 6d.; Savings Banks Act, 1887, Birth, Death, or Marriage, 2s.; National Insurance Acts, 1911 and 1913, Birth, 6d., Marriage, 2s.; Industrial Assurance Companies Act, 1896, and Trade Unions Amendment Act, 1876, death of child under 10 years of age, 2s., but only from the local Registrar.

English Registers.—Birth registration exists at Somerset House from 1837. An index to 2,000,000 earlier entries can be consulted at the *Society of Genealogists* at 5 Bloomsbury Square, London, W.C. 1.

Scottish Registers of Births, Marriages, and Deaths.—Parish registers were instituted for these in 1551, but until the Registration of Births, &c. (Scotland), Act, 1854, they were not properly kept in many cases. Extracts may, however, be obtained from them on payment of 2s. 2d. for each entry, but to be valid evidence it must be shown that the registers from which the entries are taken were regularly kept. Lists of the old parish registers may be consulted in the offices of the Registrar-General, 11 M General Register House, Edinburgh, or of local Registrars. These old registers are in the charge of the Registrar-General, and since 1854 local registers have been transmitted to him at stated periods. Registers up to the end of 1919 are now in his possession. There is a general index to the registers which may be searched on payment of 2s. A search of the index of a particular parish is 1s. A fee of 2os. is payable for a search of all the Scottish registers, and 1s. is payable for a search of a particular parish. An extract of an entry may be obtained on payment of 2s. 1d. The office of the Registrar-General is open on weekdays between 10 a.m. and 4 p.m.

COPYRIGHT.

The law of copyright is contained in the Copyright Act, 1911, under which copyright subsists automatically, without registration, in every original literary, dramatic, musical and artistic work. The provisions of the Act were explained on pp. 425-426 of the 1921 "WHITAKER."

Registration at Stationers' Hall under the Copyright Act of 1842 terminated on Dec. 31, 1923, and in the following year the Stationers' Company established a *new* Register in which Books and Fine Arts can be registered. A copy has to be filed at Stationers' Hall and certified copies of the entries are issued, the fees being 5s. for a Book, and 2s. 6d. for Fine Art, certified copies 5s. in either case. Such entries are of value in proving the existence of a work on a given date in the case of infringement.

DAYS OF GRACE.

Bills of Exchange or Promissory Notes, payable at any time after date, have *three days of grace* allowed, thus, a bill dated 1 Jan. at two months' date is not due until March 4. If a bill or note is payable by instalments to be paid "punctually," this does not exclude the days of grace (*Schuren ien* v. *Morres*, 37 T. L. R. 366). Bills drawn *at sight*, or *on demand*, must be paid on presentation without days of grace. In the United Kingdom, bills falling due on Sunday are payable the previous Saturday, and in England and Wales and in Ireland bills falling due on Good Friday or Christmas Day are similarly payable on the previous day. Bills falling due on Bank Holidays are payable the day after.

DEATHS.

(For Certificates, *see previous col.*)

In England and Wales.—When a death takes place, personal information of it must be given to the local Registrar of Births and Deaths,

and the register signed in his presence, by one of the following persons:—1 A relative of the deceased present at the death, or in attendance during the last illness. If they fail, 2. Some other relative of the deceased. In default of any relatives, 3 A person present at the death, or, the occupier of the house in which the death happened If all the above-named fail, 4. An inmate of the house, or, the person causing the body to be buried Relatives present or in attendance are first required to attend to the registration The registration must be made within five days of the death, or within the same time written notice of the death sent to the Registrar, accompanied by a certificate of the cause of death, signed by a registered medical practitioner, if any such attended the deceased during his last illness The written notice will be useless without a legal medical certificate If notice is sent, information must nevertheless be given and the register signed within fourteen days from the death Failure without reasonable cause to carry out these provisions involves liability to a penalty of forty shillings. It is important that every death should be registered and a certificate obtained before the funeral. This certificate should be delivered to the clergyman or other person who performs the funeral or religious service. Failure to obtain this certificate need not, however, delay the funeral, as it is the duty of the clergyman, if the certificate is not produced to him at the burial, to notify the Registrar thereof within seven days. If at the end of fourteen days the *death is not registered*, the Registrar may require any one of the above-mentioned persons to attend to register at a stated time and place Failure to comply involves a penalty of forty shillings. Whenever the deceased has been attended during his last illness by a registered medical practitioner, a certificate of the cause of death, signed by him, must be delivered to the Registrar. Any person receiving such a certificate from the practitioner and not so delivering it will incur a penalty of forty shillings. The registration of a death is free of charge when it takes place within the above-mentioned periods, unless the Registrar is requested to attend at a residence, when a fee of one shilling is payable. After twelve months no death can be registered without the Registrar-General's consent and on payment of fees amounting to ten shillings.

A body must not be disposed of until (1) either the Registrar has given a certificate to the effect that he has registered the death, or (2) until the Coroner has made a disposal order. (*Births and Deaths Registration Act*, 1926, ss. 1, 2).

A person disposing of a body must within ninety-six hours deliver to the Registrar a notification as to the date, place, and means of the disposal of the body (*ib.* s. 3).

"Still-born" child. (*See* under Births (Registration) p. 251.

Death at Sea.—The master of a British ship must record any death on board and send particulars to the Registrar-General of Shipping.

Death Abroad.—Consular Officers are authorised to register deaths of British subjects occurring in their districts.

In *Scotland*, the rules of registration are similar, but (1) the death must be registered within 8 days; (2) the medical man concerned must give a certificate of death to the Registrar in terms of the Registration of Births, &c. (Scotland) Act, 1854, within 7 days; (3) the informant of a death receives from the Registrar a certificate that the death has been registered. This is given to the undertaker, who delivers it to the keeper of the cemetery. Failure to comply is under penalty in all cases.

CORONERS' INQUESTS.—Coroners' inquests are held in cases of violent and unnatural deaths, such as the case of a person slain or drowned, or dying suddenly, and of any person dying in prison Coroners do not obtrude into the houses of persons for the purpose of holding inquests, but are sent for by the peace officers, to whom it is the duty of those in whose houses violent or unnatural deaths occur to make immediate communication, whilst the body remains in the same situation as when the death occurred. Inquests are not to be held on Sunday. A jury is only essential in the five cases specified in the Coroners (Amendment) Act, 1926, but *may* be summoned in any other case if the Coroner thinks fit. The jury is to be composed of not more than 11 nor less than 7 "good and lawful men" (sex disqualification now removed). If the minority is not more than two the Coroner *may* accept the verdict of the majority of the Jury. The jury is usually summoned from the householders residing in the neighbourhood in which the death took place. Any person summoned as a *witness* is bound to attend. The fine for defaulting *juryman* or *witness* is any sum not exceeding £5. (*See*, generally, the *Coroners Act*, 1887, and the *Coroners (Amendment) Act*, 1926).

In *Scotland* there is no Coroner. In ordinary cases of sudden death a private inquiry is held by the Procurator Fiscal (a Crown official who is the Public Prosecutor in criminal cases in every County, *see* p. 256). The result of such inquiry is reported to the Lord Advocate. In the case of a death occurring in the course of an industrial employment, and in every case in which the Lord Advocate may so order, a public inquiry is held before the Sheriff and a jury

DIVORCE.

Preliminary. Matrimonial suits may be conveniently divided into three classes, viz. (1) those in which a declaration against marriage is sought; (2) those in which the marriage is sought to be upheld; and (3) those in which the marriage being admitted, partial or complete divorce is sought.

(1) *Nullity of Marriage.* Marriage is void *ab initio* if the parties were in the prohibited degrees of affinity, if it was bigamous, if there was no consent, or if one of the parties was insane; but it is only voidable if one of the parties was under the age of consent (14 in the case of males and 12 in the case of females). Inability to consummate a marriage may also be a ground for avoiding it. In such a case a decree of nullity may be obtained.

(2) *Restitution of Conjugal Rights* This is a form of relief generally sought by a spouse who has been deserted. Disobedience to a decree of restitution of conjugal rights, although two years have not elapsed, at once constitutes desertion (as to the significance of which see paragraph (6) *infra*); and such desertion, if coupled with the husband's adultery, whether committed before or after the decree of restitution, is a ground for granting to the wife a decree of dissolution of marriage.

(3) *Judicial Separation and Divorce.*—The third class of suit mentioned in paragraph (1) *supra* includes the suit for judicial separation (which does not dissolve a marriage), and the suit for divorce proper (which, if successful, dissolves the marriage contract altogether and leaves the parties at liberty to marry again). Either spouse may petition for judicial separation on the ground of adultery, or cruelty, or of desertion without cause for two years or upwards. In such a petition a husband may claim damages from the co-respondent. A decree of judicial separation is often made the ground of a petition for divorce. A petitioner who has committed adultery which has not been condoned cannot obtain a judicial separation or a decree of restitution of conjugal rights unless there has been condonation. The fact that a petitioner has been guilty of cruelty or desertion does not, however, debar him from a decree of judicial separation on the ground of adultery unless his conduct has conduced to the adultery.

Divorce.—Where partial or complete divorce is sought, relief can only be obtained upon proof of certain offences which fall under two heads, namely (1) those which are offences under ecclesiastical law, *e.g.*, cruelty, adultery, and unnatural offences; (2) those which are offences by statute, *e.g.*, incestuous adultery, bigamy with adultery, rape, and desertion.

If a husband seeks divorce, it is sufficient for him to prove the wife's adultery, in which case he may obtain damages from the adulterer. If a wife seeks divorce it was formerly not sufficient that she prove mere adultery. But now by an Act which came into force on July 18, 1923, a wife may petition for divorce on the ground that, since the marriage and the passing of the Act, her husband has been guilty of adultery. A wife can also obtain divorce if the husband has been guilty of bigamy with adultery, or rape or certain other criminal offences, or of adultery coupled with such cruelty as without adultery would have entitled her to a divorce *a mensa et thoro* or of adultery coupled with desertion. "Cruelty" is conduct of such a character as to have caused damage to life, limb, or health (bodily or mental), or as to give rise to a reasonable apprehension of such danger. It is cruelty to wilfully and recklessly communicate a venereal disease; and a course of conduct calculated to break the spirit of the sufferer (generally the wife), continued until health breaks down or is likely to break down under the strain, is also a ground for relief.

If a wife gives birth to a child of which her husband could not possibly be the father, that is sufficient proof of adultery.

It is desertion in the legal sense if one party to a marriage, without the consent or against the will of the other, wilfully without cause or reasonable excuse makes the other live apart for two years or more. It is, however, a question of intention. *Powell* v. *Powell* (1922) para. 278. Formerly the only remedy for desertion was a suit for the restitution of conjugal rights; but now desertion without cause may enable the deserted spouse to obtain a degree of judicial separation. If coupled with adultery, it enables a wife to obtain a divorce.

When the decree will be refused.—A decree must be refused, even if the suit is undefended, if the allegations in the petition for divorce are not proved. There is no such thing in the Divorce Court as judgment by default. Other absolute bars to relief are (i) connivance at the adultery of the respondent; (ii) collusion, as where the initiation of the suit is procured by agreement or bargain (but this does not prevent a fresh suit being brought free from collusion); (iii) condonation, *i.e.* complete forgiveness which restores the *status quo*. Forgiveness, without restoration of the wife to her former position, cannot amount to condonation. (*Crocker* v *Crocker* (1921), P. 15.) There are also certain discretionary bars, as, *e.g.* where the petitioner has been guilty of unreasonable delay or has been guilty of such wilful neglect or misconduct as has conduced to the adultery.

Intervention by King's Proctor.—At any time during the progress of a suit for dissolution or nullity of marriage, and before the decree *nisi* is made absolute, the King's Proctor may intervene to show cause against making a decree absolute.

Decree Absolute.—Every decree of dissolution or nullity is in the first instance a decree *nisi*, and is not made absolute until the expiration of six calendar months. The marriage subsists until the decree is made absolute. After that date either spouse may marry again, but a man may not marry the sister of his divorced wife whilst the divorced wife is alive. A divorced wife may call herself by her late husband's name. Persons who have been divorced may re-marry.

Children.—When a suit has been commenced, the children should not be removed from the person in whose custody they are *de facto*. Until a suit for judicial separation, nullity, or dissolution of marriage has been dismissed, the Court may make orders for the custody, maintenance, and education of children. Either spouse may make applications for access to the children.

Alimony.—A wife may in any cause file a petition for alimony (*i.e.*, means of support) pending suit, provided *prima facie* evidence of the marriage is adduced. The right to alimony continues until there is a decision against the wife in the court of first instance. The amount may be agreed between the parties, otherwise one-fifth of the joint incomes is generally allowed. An order for *permanent* alimony may be obtained by a wife who has obtained a final decree of judicial separation.

Protection Orders.—A deserted wife may apply to a court of petty sessions or to the Divorce Division for an order to protect any money which has come to her after such desertion against her husband and his creditors. Disobedience to the order renders a party retaining the property liable to restore it and to pay twice the value thereof.

Costs.—Where a suit is about to be set down for hearing, the wife, if she has not sufficient separate estate, may obtain payment from her husband of a sum sufficient to cover her costs to date; and where a decree has been obtained against her for judicial separation on the ground of adultery, she may defend herself at his expense should he afterwards bring a suit for dissolution of marriage. If a suit be decided against a wife who has separate estate, she may be condemned in costs. A co-respondent may be ordered to pay the whole or any part of the costs of the proceedings.

SEPARATION BY AGREEMENT.

Husband and wife may agree, with or without consideration, to separate and live apart, but the agreement, to be valid, must be followed by an immediate separation Although usually made by deed, a mere oral agreement is binding If made, however, with a view to facilitating divorce proceedings it is void A wife is not bound by a separation agreement if she was forced to make it by threats of violence A clause which binds the husband to give up the custody of the children will be enforced, unless the Court is of opinion that it is not for their benefit The agreement usually contains mutual covenants not to sue for the restitution of conjugal rights a covenant by the husband not to molest the wife, and a covenant by the wife or her trustee to indemnify the husband against debts contracted by her during the separation. The remedy for a breach of the agreement is specific performance.

SUMMARY JURISDICTION.

When a husband has been guilty of assault or has deserted his wife, or has been guilty of persistent cruelty, or of wilful neglect to maintain her or her infant children, or where he is an habitual drunkard, the wife may obtain relief from a Court of Summary Jurisdiction. By an Act which came into force on Sept. 30, 1925, the following grounds for an application were added to those already existing (*a*) cruelty to her children, (*b*) that her husband insists on having marital relations while suffering from a venereal disease, (*c*) that he has compelled her to submit herself to prostitution. A husband may apply on the ground that the wife has been cruel to his children Relief may also be obtained by a husband whose wife is an habitual drunkard. The Court may declare that the applicant is no longer bound to cohabit with the other spouse. Where a wife is the applicant, the legal custody of children under sixteen may be given to her, and the husband may be ordered to pay a weekly sum not exceeding £2 Where the husband applies, the custody of all the children of the marriage may be given to him, and the wife may be committed to an inebriates home. If the wife has been guilty of adultery, no order will be made on her application unless there was condonation, and if, having obtained an order, she commits adultery, the order may be discharged, but not if the court is of opinion that the husband conduced to the adultery by failing to make payment of the separation allowances. An order may be altered, varied or discharged at any time on cause being shown. All applications for relief must be made within six months of the ground of complaint.

DIVORCE FOR THE POOR.

England and Wales.—A special department in the High Court of Justice for the assistance of poor persons in litigation, including divorce, was established in 1914. The official name of the department is "London Prescribed Officers (Poor Persons)"

Under the procedure of this department, Solicitor and Counsel are provided for a litigant who is not possessed of the means to employ legal assistance.

Although no fees are payable for the help given by the department, the applicants must find the solicitor's out-of-pocket expenses, and those incidental to witnesses—a point which has been criticised by the adherents of divorce law reform. However, if witnesses are not brought from a long distance, the whole proceedings need not cost more than £10, and can in some cases be completed for less, compared with from £50 to £60 necessitated by the normal procedure Before a case is taken up, the applicant has to satisfy the department that he or she is really poor not possessed of more than £50, exclusive of wearing apparel and trade tools She must also show that her own income does not exceed £2 a week, or in special cases, £4 If this condition is fulfilled, and if he has reasonable grounds for bringing or defending a suit in the Divorce Court, he may apply to the Court for leave to do so. An application for leave is submitted to and is reported on by counsel and solicitor, who give their services voluntarily. If the report is favourable the Court may give the necessary leave, and thereupon another solicitor and counsel are assigned to the poor person to act for him Such a litigant is not liable for Court fees, nor (generally) is he liable to pay costs to any other party. Counsel acting for him must charge him no fee, while the solicitor assigned to him generally gets nothing but his out-of-pocket expenses. Where, however, property of value is recovered for such litigant, the solicitor may (under the rules) get his usual costs. Numbers of persons take advantage of this procedure *in forma pauperis*. This explains the very large number of cases in the Divorce Court.

Scotland. In every town there are Solicitors for the Poor, and in the Court of Session there are Counsel for the Poor, all of whom act gratuitously. Any class of litigation may be undertaken for poor persons, but the operation of the "Poor's Roll" is chiefly important in matrimonial and bastardy cases. Legal services are rendered free of charge, and no Court dues are payable. In cases of divorce application must be made to the Court of Session. In cases of separation simply, application may be made to the Sheriff Court. The means that preclude a person from the benefit of the Poor's Roll are not fixed, and each application depends on its own circumstances. The Poor's Roll was established in 1424.

THE FRANCHISE.

The Representation of the People (Equal Franchise) Act, 1928, has considerably amended both the qualifications for the franchise and the mode of registration of electors. It assimilates the franchises for men and women both for Parliamentary and Local Government elections and contains special provisions with regard to the register of electors to be made in the year 1929. The qualifying period of three months ends on Dec. 1, 1928 in Scotland on Dec. 15, 1928.

PARLIAMENTARY.

The qualifications for the franchise are now the same for men and women. A person is entitled to be registered as a Parliamentary elector who is 21 years of age, and not subject to any legal incapacity; and

(*a*) Has the requisite residence qualification; or (*b*) has the requisite business premises qualification; or (*c*) is the husband or wife of a person having a business premises qualification.

Residence is the actual inhabitancy of premises, *i.e.*, where a person's home is and where he

sleeps. The residence must have been during the whole of the qualifying period, *i.e.*, three months, in the constituency or in another constituency in the same Parliamentary borough or Parliamentary county If not, it is essential that the residence should have been successive from a Parliamentary borough or Parliamentary county contiguous to that borough or county. The Administrative County of London is treated as a Parliamentary borough.

Business premises means land or other premises of at least £10 yearly value. The business premises must be occupied for the purpose of the business, profession, or trade of the person to be registered.

Universities.—A person of full age, and not subject to any legal incapacity, who has received a degree, is entitled to be registered as a Parliamentary elector for a University constituency, also a woman who has passed the final examination and fulfilled the conditions required of women by a University which did not at the time the examination was passed admit women to degrees

LOCAL GOVERNMENT.

The qualifications for the Local Government franchise are now the same for men and women A person is entitled to be registered as a Local Government elector who is 21 years of age, and not subject to any legal incapacity; and (*a*) is on the last day of the qualifying period occupying as *owner or tenant* land or premises in the electoral area, and (*b*) has during the whole of the qualifying period occupied as *owner or tenant* any land or premises in that area, if that area is not an administrative County or a County borough, then in any administrative County or County borough in which the area is situate; or (*c*) is the husband or wife of a person who is entitled to be registered in respect of premises in which the person entitled, and the husband or wife reside There is also a *service qualification* for the Local Government franchise. A person (man or woman) who inhabits any dwelling-house by virtue of any office, service or employment is deemed to occupy the dwelling house as *tenant* and so obtains the Local Government franchise provided the dwelling house is not inhabited by the employer.

REGISTRATION.

Each parliamentary borough and Parliamentary county is an electoral registration area, and for each registration area there is a Registration Officer. It is the duty of the Registration Officer to compile the register of all persons entitled to vote as parliamentary electors or local government electors in his area. It is also his duty to comply with any directions given by the Secretary of State as to the arrangements to be made by the Registration Officer in carrying out the registration.

Under the new Act amendments have been made in the Representation of the People Order and registration forms Two new forms have been prescribed, viz.. Form A for returns by the occupiers of dwelling houses, tenements and lodgings let unfurnished; and Form D for use in the case of business or other premises on which the occupier does not reside, institutions, hotels, and premises occupied by Companies. The Secretary of State has especially directed that, on the present occasion (December, 1928) when the franchise is being extended to so large a number of persons, all occupiers shall be required to complete the appropriate form of return. It should be noted that in respect of age the question put is—whether aged 21 years or over on Dec 1, 1928 (the last day of the qualifying period) —and the answer required is "yes" or "no." The actual age need not be stated Persons who fail to give the required information or who give false information are liable to a statutory penalty.

The electoral lists when prepared are published by the Registration Officer. A copy can always be inspected at his office, and generally at the chief post office and other convenient places in the area The lists should be examined to see if the entries have been correctly made If not, claims and objections may be made as by notice directed.

The register will come into force on May 1, 1929, and continue in force in the case of Northern Ireland until Dec 15, 1930, and in any other case until Oct. 15, 1930 By Order in Council, dated Aug 14, 1928, registration dates have been altered for the purpose of the preparation of the register in 1929

The Index letters showing the nature of the qualifications of an elector are —

FOR MEN.

R = Residence qualification
B = Business premises qualification
O = Occupation qualification.
D = Qualification through wife's occupation.
NM = Naval or military voter

FOR WOMEN

Rw = Residence qualification
Bw = Business premises qualification.
Ow = Occupation qualification.
Dw = Qualification through husband's occupation.

INCREASE IN ELECTORATE.

From a Return presented to Parliament in June, 1928, showing in respect of each Parliamentary Constituency in England, Wales and Scotland, the estimated increase in the electorate under the Provisions of the Representation of the People (Equal Franchise) Bill, 1928, it appears that probably about 5,000,000 new voters will be added to the Register in 1929.

RIGHT TO VOTE

The right of persons registered to vote has been amended by the Act of 1928. Every person registered as a parliamentary elector is entitled to vote at an election of a member to serve in Parliament But at a *General Election* a person shall not vote for more than one constituency for which he or she is registered by virtue of a residence qualification, or for more than one constituency for which he or she is registered by virtue of other qualifications of any kind; which means that a person (man or woman) may, if qualified, lawfully vote twice at a General Election, but one vote must be in respect of a residence qualification, and each vote must be recorded in a different constituency.

ILLEGITIMACY AND LEGITIMATION.

ENGLAND AND WALES.

A man may be summoned to petty sessions on the application of the mother of a bastard child, or by the Guardians of the Poor where the child becomes chargeable to the Union or Parish; and the Justices, on his being proved to be the father of the child, may make an order requiring him to pay for its maintenance and education a

sum not exceeding 20s. a week. The mother has the custody of her bastard children. No person is required as father of an illegitimate child to give information concerning the birth of such child, and the registrar is forbidden to enter in the register the name of any person as father of the child unless at the joint request of the mother and father. Such person is in that case required to sign the register, together with the mother. An unmarried domestic servant found to be *enceinte* may be peremptorily dismissed without notice, but any attempt to examine without her consent a servant supposed to be *enceinte* renders the employer liable to an action.

LEGITIMATION.—By the *Legitimacy Act*, 1926, which came into force on Jan. 1, 1927, where the parents of an illegitimate person marry or have married whether before or after that date, the marriage, if the father is at the date thereof domiciled in England or Wales, renders that person legitimate as from Jan. 1, 1927, or from the date of the marriage, which ever last happens. This does not legitimate a person whose father or mother was married to a third person at the time when the illegitimate person was born.

How to Secure Legitimacy. A person claiming that he, his parent, or any remoter ancestor has become legitimated, may petition the High Court under the *Legitimacy Declaration Act*, 1858, or the County Court for the necessary declaration.

Rights of Legitimated Persons to take Interest in Property.—These are set out in ss. 3 and 4 of the Act. A legitimated person may take property under an intestacy occurring after the date of legitimation, or under any disposition (e.g. a will) coming into operation after such date, as if he had been legitimate.

Rights and Duties of Legitimated Person. He must maintain all persons whom he would be bound to maintain had he been born legitimate, and he is entitled to the benefit of any Act of Parliament which confers rights on legitimate persons to recover damages or compensation. The Act specially provides that nothing therein contained is to render any person capable of succeeding to or transmitting a right to any dignity or title.

Persons Legitimated by Extraneous Law.—Broadly speaking, s. 8 of the Act provides that persons properly legitimated abroad shall be recognized as legitimated in England and Wales.

SCOTLAND.

The mother of an illegitimate child may obtain a decree of affiliation and aliment against the father. The process may be raised either in the Court of Session or the Sheriff Court, but usually is in the Sheriff Court. The father pays half of the inlying expenses, the amount usually decreed being £2 2s. The rate of aliment varies, but in 1919 it was settled by a decision of the Court of Session that £11 14s per annum was a proper amount. The mother has the custody of the child until the age of 7 if a male and 10 if a female.

By Scots Law an illegitimate child is legitimated by the subsequent marriage of its parents provided there was no impediment to the marriage of the parents at the time of the conception of the child. Such legitimation is recognised by International Law so far as the laws of particular countries allow it. It is valid in England except that such a child cannot succeed to real estate in England on intestacy. After the marriage of the parents such a child may be registered as legitimate by warrant of the Sheriff.

JURY SERVICE.

Preliminary. The juries with which the public are most concerned are the grand juries; juries summoned to try causes in the High Court, at assizes and county courts; and those summoned to try criminal cases at assizes, the Old Bailey, and courts of Quarter Sessions, and coroners' juries.

Qualifications. All natural-born subjects of the king and aliens domiciled for ten years or more, being men or women between 21 and 60, are liable to serve as jurors.

Although women could not formerly serve, the sex disqualification was removed in 1919, and women are now liable to serve, but a judge may order that the jury shall be composed of men only or of women only, or may, on an application made by a woman grant her exemption in respect of any case by reason of the nature of the evidence to be given or of the issues to be tried.

The qualification of a juror is a *property* one—that is to say, he or she must be a person who owns property or pays rates. A householder or shopkeeper in the City of London who owns personal estate worth £1000; a resident in a county or borough owning £10 a year in real estate or rent charge, or £30 in leaseholds; or a householder in a county or borough assessed to the poor rate at not less than £30 a year in Middlesex and the County of London, or £20 in other counties, and occupiers of houses with not less than fifteen windows, are all compellable to serve as jurors unless exempted or disqualified.

Exemptions and Disqualifications. Aliens (subject as above), felons, lunatics, imbeciles, deaf or blind persons are disqualified from serving on juries, while the following classes of persons (amongst others) are exempt: peers, members and officers of both Houses of Parliament, clergymen and priests, ministers of any congregation of protestant dissenters and Jews, whose meeting place is duly registered, judges, barristers, solicitors (if practising), officers of the supreme court, magistrates, clerks of the peace, sheriffs' officers and servants of such officers, justices of the peace, members of local bodies, governors of prisons and gaolers, superintendents, &c., of lunatic asylums, doctors and chemists (if actually practising), dentists, officers and men in Army, Navy, and Territorial Forces, licensed pilots, postal, custom and inland revenue servants.

Special exemption.—A judge, and, by virtue of S. 3 of the Juries Act, 1922, the sheriff, may for good reason excuse attendance on any particular jury.

Jury Lists. Lists of juries are now prepared in accordance with the Juries Act, 1922. Persons who deem themselves to be entitled to be exempted should communicate with the registration officer, for all whose names appear on the lists are liable to serve.

Grand Juries.—The function of the grand jury is to make presentments on oath to judicial bodies or personages, mainly of accusation against persons against whom criminal proceedings are pending. The jurors have to say in effect whether there is a *prima facie* case against the

accused, against whom an indictment has been prepared, and if they are satisfied of this they find "a true bill"; if not, they "ignore the bill" and the accused is discharged

Juries in Criminal and Civil cases.—An accused person against whom a true bill has been found is tried by a "jury sworn" A "panel" of jurors are summoned to attend the court on a particular day, and it is from amongst them that the jury who are to try the prisoners are selected at random (an interesting note on the selection of jurors will be found in *Halsbury's Laws of England*, Vol 18, p 246) In a criminal case the prisoner has a right of challenge which is of two kinds—a challenge to the array—*i e*, the whole number of jurors summoned (which is so rare that it need not be further considered) and a challenge to the poll, *i.e.*, to individual jurors, which may be peremptory or for cause. Peremptory challenge, or challenge without cause, exists only as of right in treason and felony, and the prisoner can only challenge a limited number without reason. In the exercise of this right prisoners frequently object to the women on the jury. "Challenge for cause" sometimes takes place on the ground that the proposed juror is a peer or is alleged to have committed some crime which makes him infamous.

Except upon trials for murder, treason, and treason felony juries after being sworn may separate, *e g.*, for lunch and at night. The verdict must be given in open court in the presence of all the jurors, and in cases of treason and felony in the presence of the defendant. It must be unanimous, except that in civil cases the parties may agree to take a majority verdict.

Special Juries —Special Jurors are selected from persons having larger property qualifications, *e g.*, the occupier of dwelling house in a large town rated at not less than £100 Trial is generally by Common Jury, but in any cause or matter at Assizes or in the High Court an order for a Special Jury may be obtained in certain cases.

Payment of Jurors.—A Special Juror is entitled to a fee of one guinea for each case in which he is sworn to act, whereas a Common Jury is only entitled to 1s. on each cause tried in the High Court or a County Court; and on Circuit, 8d In Criminal Cases the jury is entitled to and, in fact, receives nothing. At Inquests, held before Coroners, the jurors are entitled to such fee as the local authority may permit the coroner to pay.

A juror is not accountable for, nor will any action lie against him, in respect of anything said or done by him in discharge of his office. If he fail to appear in the High Court or at assizes when duly summoned he may have to pay a fine of £10, while non-appearance at a county court may involve a fine of £5

Coroners' Juries.—(*See* Deaths — Coroner's Inquests, page 254.)

MARRIAGES.

BY BANNS OR LICENCE.

BANNS OF MARRIAGE.—"Banns" formerly applied to any public kind of proclamation, and now refer only to marriages, so that the word signifies the public announcement in the parish church, the object being to ensure notoriety, and exclude clandestine marriages. The Marriage Act, 26 Geo. II. c. 33, prescribes audible publication according to the rubric, on three Sundays preceding the ceremony, after the Second Lesson. The law is now chiefly contained in the Marriage Act, 4 Geo IV c 76, which repealed most of the laws then in force (see also 6 & 7 Will IV c 85, and 1 Vict c. 22) Where the parties reside in different parishes, the banns must be published in both, the minister giving his certificate of the same to be handed to the minister of the parish where the marriage takes place The law provides specially for the case where one of the parties resides in Scotland, the publication being then in the parish church. In like manner in Scotland the publication takes place in the parish church, in whatever church the parties are married It may be noted that, by Scottish law only, omission to publish the banns does not invalidate the marriage, because it would still stand as an irregular marriage carried out by consent before witnesses (see sub-tit, "Marriages in Scotland," *post*). The names by which the parties are known are sufficient for publication of banns, so that a variance from the strict baptismal name is not important. But where wrong names are designedly given, for the purpose of concealment or otherwise, the case is different, and the marriage may be null and void (*Midgeley* v *Wood*, 4 Sw & Tr. 267). Where a wrong and fraudulent name is given by one party only, and the other party is innocent, the validity of the marriage is not affected

The Bishop may license a Chapel of Ease for the celebration of marriages, but where a district has been assigned to a chapel, and it becomes a vicarage, or "ecclesiastical parish," the option ceases, and the banns must be proclaimed and marriage celebrated therein, and not in the "mother church" or that of the civil parish

If three months be permitted to elapse from the last time of publication, the banns become useless, and the parties must either obtain a licence, or submit to the republication of banns The minister ought to satisfy himself that the parties are of full age, or that the consent of parents is obtained, and it is usually on the score of insufficiency of age that banns are "forbidden." By the Act 6 & 7 Will. IV c 85, a marriage may be performed in church on the superintendent registrar's certificate without banns, provided that the incumbent's consent is obtained One of the parties must be resident within the *Ecclesiastical* parish of the church in which the marriage is to take place.

Marriage licences are of two kinds—(1) the Common or Ordinary Licence granted by the Archbishops and Bishops, through their Surrogates, for marriage in any church or chapel duly licensed for marriages; (2) the Special Licence granted by the Archbishop of Canterbury for marriage at any time or in any place on good reason being shown (see below). The Act of 1823 is severe on the clergy, making it a felony for any clergyman to marry the parties in the absence of banns or licence; and every Registrar or other person who knowingly unduly solemnizes a marriage is also guilty of felony. By a subsequent alteration in the law, the hours for marriage were extended, and they are now from 8 a m. to 3 p.m.

The minister should be careful that there are two or more witnesses present, and that two witnesses attest the entries in the register books, which are kept in duplicate.

All civil jurisdiction over marriage was taken

away from the Ecclesiastical Courts by the Divorce Act of 1857. An incumbent may, under Section 56 of this Act, refuse to marry a divorced person whose marriage has been dissolved for his or her adultery, but must allow another clergyman of the diocese to perform the service

Marriage with a deceased wife's sister—including a sister of half blood—was legalised in 1907. No clergyman, however, can be compelled to solemnize such a marriage, but he can allow his church to be used for the purpose by another minister.

Marriage with deceased brother's widow This was legalised in 1921 by the statute 11 and 12 Geo. 5, c. 24

A marriage certificate is nothing more than a copy of the entry in the church register; and the customary fee is 2*s.* 6*d.*, and a stamp duty of 1*d.* Searches in the register-books may be made on payment of small fees, viz., 1*s* for a single year, and 6*d.* additional for every other year There are small fees, regulated by custom, on the certificate given of banns in one parish for marriage in another Marriage fees are not uniform, and if excessive there is power with the Diocesan Chancellor to moderate them. With those who are in a position to afford it, it is usual to pay a guinea to the clergyman, and 5*s* to the clerk, and the usual fees are paid although a stranger-clergyman be invited to perform the service.

Marriage of Infants.

Infants cannot be lawfully married without the consent of certain persons. The law on the subject is to be found in the Guardianship of Infants' Act which came into force on Sept. 30, 1925. Where both parents are living both must consent; where one is dead, the survivor, or if there is a guardian appointed by the deceased, the guardian and the survivor.

Marriage Licences for Established Church.

Marriage Licences can be obtained in London by application at the *Faculty Office* (23 Knightrider St., Doctors' Commons, E.C.4), at the *Vicar-General's Office* (1 The Sanctuary, Westminster, S.W.1), and at the *Bishop of London's Diocesan Registry* (1 Dean's Court, Doctors' Commons, E.C.4), by *one of the parties* about to be married. In the country they may be obtained at the offices of the Bishops' Registrars, but licences obtained at the Bishop's Diocesan Registry only enable the parties to be married in the diocese in which they are issued; those procured at the Faculty Office are available for London and all England and Wales; those procured at the Vicar-General's Office (hours in both offices 10 to 4; Saturdays 10 to 1) are available for London and all England, except the Province of York. No instructions, either verbal or in writing, can be received, except from one of the parties. Affidavits are prepared from the personal instructions of one of the parties about to be married, and the licence is delivered to the party upon payment of fees amounting to thirty shillings, in addition to the cost of stamp, 10*s.* 6*d.* *No previous notice is required and the licence is available as soon as it is issued.* The cost of licences through a clerical surrogate in the country varies, according to the diocese, from £1 15*s.* to £2 12*s.* 6*d.* By the 4th George IV. c. 76, it is enacted, in order to avoid fraud and *collusion* in obtaining licences for marriage, that before any such licence be granted one of the parties shall make a declaration, on oath, that there is no legal impediment to the intended marriage; and also that one of *such parties hath had* his or her usual place of abode for the space of fifteen days immediately preceding the issuing of the licence within the boundary of the parish church, or the district parish in the church of which the marriage is to be solemnized.

It may be added that in the country there may generally be found a parochial clergyman who is also a surrogate, before whom the above mentioned affidavit may be taken, and whose office it is to deliver the licence personally to the applicant. (In some parts of the country it is necessary for the surrogate to procure the licence from the Bishop's registry.)

Special Marriage Licences (for Established Church).

Special Licences are granted by the Archbishop of Canterbury, under special circumstances, for marriage at any place with or without previous residence in the district, or at any time, &c.; but the reasons assigned must meet with his Grace's approval. Application must be made to The Faculty Office, 23 Knightrider Street, Doctors' Commons, E.C. 4 (*Tel.*, 6834 Central). Fees for licence stamp, &c., £25.

Before a Registrar and in Non-Conformist Buildings.

Marriages can take place in a District Register Office or in a Nonconformist building registered for marriages, (1) by Certificate, (2) by Licence. Notice of such marriages must be given personally to the Superintendent Registrar, a Registrar of Births and Deaths, a Registrar of Marriages, or the deputy of such officer. A marriage at a register office takes place in the presence of the Registrar of Marriages and the Superintendent Registrar; a marriage at a registered building takes place in the presence of the Registrar of Marriages, unless it is had under the provisions of the Marriage Act, 1898, respecting which see below. In each case the presence of at least two witnesses is necessary.

Notice of Marriage by Certificate.

If both parties reside in the same registration district, they must both have resided there for seven days before the notice can be given. It may then be given by either party.

If the parties reside in different registration districts, notice must be given by each to a registration officer in the district in which he or she resides, and the preliminary residential qualification of seven days must be fulfilled by each before the notice can be given.

Notice of Marriage by Licence.

One notice only is necessary, whether the parties live in the same or in different registration districts, and either party may give the notice.

If both live in the same district, one of them must have lived there for fifteen days before the notice can be given.

If they live in different districts, and both have fulfilled the necessary residential qualification, notice may be given in either district. If one only has fulfilled the qualification, the notice must be given in the district in which the residence has been fulfilled, and the other party must be resident in England or Wales when the notice is given.

The notice contains particulars as to names, ages, residence, length of residence, and the building in which the marriage is to take place. It also contains a declaration that there is no

legal impediment to the marriage, and, in the case of minors, that the consent of the person whose consent to the marriage is required by law, has been duly given A person making a false declaration renders himself or herself liable to prosecution for perjury.

Issue of Certificate (without Licence) for Marriage

After the lapse of twenty-one clear days from the date of the entry of the notice in the notice-book, the Superintendent Registrar may, provided no impediment is shown, issue his certificate for the marriage, which can then take place at any time within three calendar months from the date of the entry of the notice.

Issue of Certificate and Licence for Marriage.

After the lapse of one week-day (not Christmas Day or Good Friday) from the date of entry of the notice, the Superintendent Registrar may, provided no impediment is shown, issue his certificate and licence for the marriage, which can then take place on any day within three calendar months from the date of entry of the notice.

Documents to be Produced at the Marriage

(1) *Marriage by Certificate* :—

a If both parties live in the same district :—The certificate of the Superintendent Registrar of that district.

b. If they live in different districts :—A certificate from the Superintendent Registrar of *each* district

(2) *Marriage by Licence* —The certificate and licence of the Superintendent Registrar of the district in which the notice is given.

Place of Marriage

The marriage must generally take place at a building within the district of residence of one of the parties, but there are exceptions, as follows.—

a Section 14 of 19 & 20 Vict. cap 119, provides that, if the usual place of worship of either of the parties is outside the district of his or her residence, the marriage may take place in such usual place of worship, provided that it is not more than two miles distant from the boundary of the district in which the notice is given

b. The Act 3 and 4 Vict. cap. 72, provides that, if there is not within the district of residence of either party a registered building within which marriages are solemnized according to the rites and ceremonies of the religious denomination to which the parties belong, the marriage may take place in a registered building of the required denomination in the nearest district.

A marriage which has been duly celebrated in a register office in Ireland may be proved by the certificate of such marriage (*Gaillet* v. *Gaillet*, 27 T.L.R. 416)

Marriage Ceremony.

The marriage must be solemnized between the hours of 8 a.m. and 3 p.m., with open doors. Each of the parties must declare as follows — "I do solemnly declare that I know not of any lawful impediment why I, *A. B.*, may not be joined in matrimony to *C. D*"; and each of the parties must say to the other, "I call upon these persons here present to witness that I, *A B.*, do take thee, *C. D.*, to be my lawful wedded wife [*or* husband]." A wedding-ring may be, and is generally, used at a marriage at a register office.

Marriage Act, 1898

The presence of a Registrar of Marriages is not necessary at marriages at Nonconformist registered buildings which have adopted the provisions of this Act The Act (which does not apply to Scotland or Ireland, or to marriages according to the usages of the Jews or of the Society of Friends) provides for the appointment of an "authorised person" (a person, usually the minister or an official of the building certified by the trustees or governing body as having been duly authorised for the purpose) who must be present at and must register the marriage. If the presence of a Registrar is required at a marriage at a building at which the provisions of the Act have been adopted, the fact must be stated when notice of the marriage is given, and the consent of the minister or trustees to the Registrar's attendance must be obtained

The parties must at some time during the ceremony make the following declarations —

"I do solemnly declare that I know not of any lawful impediment why I, *A. B.*, may not be joined in matrimony to *C. D*"

Also each of the parties must say to the other :—

"I call upon these persons here present to witness that I, *A B*, do take thee, *C. D.*, to be my lawful wedded wife [*or* husband]";

or, in lieu thereof :—

"I, *A B.*, do take thee, *C. D*, to be my wedded wife [*or* husband]"

Rules and Regulations relating to this Act were published in October, 1909 (See *Statutory Rules and Orders*, 1909, No 1332.)

Naval Marriages Act, 1908

This Act, which came into force on January 1, 1909, was framed with the object of relieving sailors of the Royal Navy of the difficulties under which they laboured as regards fulfilling the necessary residential qualification for the purpose of marriage

It provides that any officer, seaman, or marine borne on the books of one of His Majesty's ships who wishes to marry may, if the marriage is to take place at a register office or a Nonconformist registered building, give notice to his commanding officer, who, after the lapse of twenty-one clear days, can issue a certificate for the marriage. The other party must give notice in the usual way to a registration officer in the district in which she resides

If the marriage is to take place at a church of the Church of England, the chaplain or commanding officer must publish the banns on board the ship on three successive Sundays: he can then issue a certificate of publication of banns. The banns must also be published in the church in which the marriage is to take place.

No marriage by licence can take place under this Act

Fees.

	s.	*d.*
For entering notice of a marriage by certificate in the marriage notice-book	1	0
For entering notice of a marriage by licence in the marriage notice-book	1	0
For a certificate for marriage without licence	1	0
For a certificate for marriage by licence	1	0
For a licence for marriage	30	0
Stamp duty on a licence for marriage	10	0
For a marriage by certificate in the presence of a Registrar	5	0
For a marriage by licence in the presence of a Registrar	10	0

Exclusive of the fee for a certificate of the marriage (marriage fines), the total fees for a marriage by certificate, when the parties live in the same district, amount to 7*s*, if they live in different districts, to 9*s*

For a marriage by licence the total fees are £2 12*s* 0*d*.

MISCELLANEOUS INFORMATION RESPECTING MARRIAGES

Parties should be married in the name in which they are generally known

A marriage may take place at a registered building before a Registrar without religious ceremony if the consent of the trustees is obtained

If parties who have been married at a register office desire to go through a religious ceremony at a church, they may do so on production to the incumbent of a certificate of the register office marriage, but this ceremony is not recorded as a marriage in the register books.

A divorced person desiring to marry again in a register office or registered building must give notice to the Superintendent Registrar, to whom a copy of the divorce decree must be produced.

In Wales, and in places where the Welsh tongue is used, the declaration and contracting words may be said in Welsh, as provided by Section 23 of the Marriages and Registration Act, 1837

If both parties are Jews, they must give notice to a registration officer in the usual way, and may marry according to their usages in a synagogue or private dwelling-house at any hour; the marriage must be registered by the secretary of the synagogue of which the man is a member

If both parties are members of the Society of Friends (Quakers), or if, not being in membership, they have been authorised by the Society of Friends to solemnize their marriage in accordance with its usages, they must give notice to a registration officer, and may be married in a Friends' meeting-house, the marriage must be registered by the registering officer of the Society appointed to act for the district in which the meeting-house is situated. The presence of a Registrar of Marriages is not necessary at such marriages of Jews or members of the Society of Friends.

Marriage with a deceased wife's sister was rendered legal by the Deceased Wife's Sister Act, 1907, the Act forbids the marriage of a man with the sister of his *divorced* wife during the wife's lifetime. The marriage of a woman with her deceased husband's brother was rendered legal in 1921.

MARRIAGE IN ENGLAND OR WALES WHEN ONE PARTY LIVES IN SCOTLAND OR IRELAND.

Notice for a marriage by a Superintendent Registrar's certificate in a register office or registered building may be given in the usual way by the party resident in England. As regards Scotland, the party there, after a residence of fifteen days, should apply to the session clerk to publish banns; as regards Ireland, the party there, after a residence of seven days, must give notice to the District Registrar of Marriages. Notice cannot be given for such marriages to take place by the licence of the Superintendent Registrar.

Marriage of such parties may take place in a church of the Church of England after the publication of banns, or by Ecclesiastical licence.

MARRIAGES OF BRITISH SUBJECTS ABROAD.

Act passed June 27, 1892, came in to force Jan. 1, 1893. Order in Council dated Nov. 22, 1913, whereby previous Orders are repealed and regulations for marriages under the Act are laid down

British subjects may contract a valid marriage in a foreign country provided they conform to the provisions of the Foreign Marriages Act, 1892. One of the parties to the marriage only need be a British subject.

Where a marriage according to the local law of a foreign country is valid by English law, then, before the marriage is solemnized in that country under the Act, the marriage officer as defined by the Act must be satisfied

(*a*) That both the parties are British subjects; or,

(*b*) If only one of the parties is a British subject, that the other is not a subject or citizen of the country; or,

(*c*) If only one of the parties is a British subject and the other a subject or citizen of the country, that sufficient facilities do not exist for the solemnization of the marriage in the foreign country in accordance with the law of that country; or,

(*d*) If the man is a British subject and the woman a subject or citizen of the country, that no objection will be taken by the authorities of the country to the solemnization of the marriage under the Act.

In the case of any marriage under the Act, where the woman is a British subject and the man a foreigner, the marriage officer must be satisfied—

(*a*) That the marriage will be recognized by the law of the country to which the foreigner belongs; or,

(*b*) That some other marriage ceremony in addition to that under this Act has taken place, or is about to take place, between the parties, and that such other ceremony is recognized by the law of the country to which the foreigner belongs, or,

(*c*) That the leave of the Secretary of State has been obtained.

The marriage must be solemnized by or before a marriage officer as defined by the above-named Act.

It is necessary for one of the parties to the intending marriage to sign a notice stating the name, surname, profession, condition, and residence of each of the parties, and whether each of the parties is or is not a minor, and to give the notice to the marriage officer within whose district both of the parties have had their residence not less than one week then next preceding, and the notice must state that they have so resided.

If the parties reside in different districts, such notice must be given to the marriage officer of the district before whom the intended marriage is to be solemnized, by the party who has resided for a period of not less than one week within the district of such marriage officer.

If one of the parties resides (*a*) in the United Kingdom, or (*b*) in a Colony or India (*a*) notice must be given in like manner as if the party so resident were about to be married in that part of the United Kingdom in which he or she resides, and in England or Ireland must be given to the superintendent registrar or registrars,

and in Scotland must be given by proclamation of banns, and (*b*) such notice must be given by the party dwelling in such Colony or in India as may be provided by any law of that Colony or of the Governor-General of India in Council, or in like manner as if the party were about to be married in that place

If the non-resident party has dwelt in the district of a marriage officer in a foreign country notice must be given by that party in like manner as if the marriage were to be solemnized by or before such marriage officer, or if the place in a foreign country at which the non-resident party has dwelt is not within the district of a marriage officer the notice may be given to any person authorised by the Secretary of State to receive such notices Where neither party has resided for a period of not less than one week within the district of the marriage officer before whom the intended marriage is to be solemnized, and (*a*) the marriage cannot conveniently be solemnized at the place where either of the parties has had his or her usual place of abode, or (*b*) the permission of the Secretary of State has been obtained, notice must be given by each of the parties in the place where he or she has had his or her usual place of abode for a period of not less than one week immediately preceding the giving of such notice in the prescribed manner, and a certificate of the giving of such notice obtained.

If the Secretary of State is satisfied that for some good reason the party has not been able to give the required notice and that the marriage is not clandestine and that adequate notice has been given he may permit the marriage to be solemnized

Before the marriage is solemnized each of the parties must make on oath

(*a*) That he or she believes that there is no impediment

(*b*) that both the parties have had their usual place of residence in the district of the consular marriage officer for three weeks immediately preceding, or if they have not both resided there during three weeks then that one of them has so resided, and stating the place where the party who has not so resided has within three months immediately preceding had for three consecutive weeks his or her usual place of abode, and the notice that has been given in that place, or, if neither party has resided there, stating the place or places where each party has within three months immediately preceding had for three weeks his or her usual place of abode, and the notices that have been given in those places.

After the expiration of 14 days after the notice of an intended marriage has been entered, then if no lawful impediment to the marriage is shown, and the marriage has not been forbidden in manner provided by the Act, the marriage may be solemnized A consular officer holding a warrant for a district can only solemnize a marriage at his own official house. Parties residing within a consular district who may wish to be married under the Act must go to the consular officer provided with a warrant for that district, two or more witnesses are required to be present.

The following fees for marriages under the Foreign Marriage Act are leviable under the Consular Fees Order in Council of August 18, 1892, and are payable to His Majesty's Government:—

	£	s.	d.
For receiving notice of an intended marriage	0	10	0
For receiving notice of a caveat.	1	0	0
For every marriage solemnized by or in the presence of a Marriage Officer and registered by him	0	10	0
For certificate by a Marriage Officer of notice having been given and posted up, in case of one of the parties residing outside the consular district in which the marriage is to take place	0	5	0
For attendance by consular officer at a marriage solemnized in accordance with the local law and for registration of the same	1	0	0

Marriages may be solemnized 8 a m to 3 p m

No religious ceremony is required, but any form according to the creed of the contracting parties may be used. The presence of the duly authorised Marriage Officer is, however, necessary to render the marriage valid If the ceremonial be that of the Church of England, it can only be performed by a clergyman of that Church.

Marriages solemnized under the Foreign Marriage Acts are legal by English law when both parties are British subjects, and also when only one of them is a British subject, but such marriages are not necessarily valid out of His Majesty's dominions In cases where one of the parties is a subject of the country where the marriage is proposed to take place, or of a third country, the party in question must previously comply with the requirements of the marriage law of the country to which he or she belongs, so far as it may be possible to do so, in order to render such marriage also valid by the law of that country.

An Englishwoman married to a foreigner follows the nationality of her husband.

In Germany and Switzerland marriages by any foreign consular officer are, in the absence of any treaty stipulations, strictly prohibited.

A marriage which would not be valid in England would be equally invalid if solemnized in an embassy, legation, or consulate abroad. For instance, marriages within the prohibited degrees of consanguinity or affinity would not be valid

A marriage between Christians in India may be proved in England by an India Office certificate (*Brand* v. *Brand*, 1909, 25 T.L R. 646).

Marriages may also be solemnized under the "Foreign Marriages Act, 1892," before the commanding officer of any of His Majesty's ships on a foreign station provided he be of such rank and of such vessel as is for the time being authorised for that purpose by Admiralty instructions.

MARRIAGES ABROAD WITH FOREIGNERS ACCORDING TO FOREIGN LAW

ACT OF 1906.—Under the *Marriage with Foreigners Act*, 1906, any British subject desiring to be married in a foreign country to a foreigner according to the law of the country may, after giving notice of the marriage, obtain a certificate from the registrar that there is no legal impediment to the marriage. In order to obtain the certificate, the rules set out in the schedule to the Act must be complied with. Any persons may enter an objection to a certificate, the validity of which will be decided by the Registrar-General.

A marriage by repute which is valid by the law of the domicile in a foreign country will be recognised as valid by the English courts (*re Green Noyes* v *Putkin*, 1909, 25 T.L R. 222).

MARRIAGES IN SCOTLAND.

According to the law of Scotland marriage is a contract which is completed by the mutual consent of parties. No formalities are required and no consent of parents or guardians is necessary. It can be contracted by a male over 14 years of age and a female over 12. Marriages may be "regular" or "irregular."

A regular marriage is one which is celebrated by a Minister of religion after due notice by the publication of banns or publication by the Registrar. Any Minister of any denomination (including a person officiating at a Quaker wedding) who performs the ceremony is reckoned to be a minister of religion. It must be performed before two witnesses and one of the parties must have resided in Scotland for at least 15 days before the ceremony. Public proclamation is made by (*a*) banns or (*b*) notice by the Registrar. Banns must be proclaimed in the parish church of both parties. It is ordered that the proclamation of banns should be made three times, but by immemorial practice proclamation on one Sunday is sufficient. The Clerk of the Kirk Session of the Parish takes in notices of banns and issues certificates of proclamation. The fee for proclamation may not exceed 2*s.* 6*d.* A certificate of proclamation of banns is only valid for three months.

Under the Marriage Notices (Scotland) Act, 1878, a notice posted up in a conspicuous or accessible place on the board or outer wall of the Registrar's office is equivalent to the proclamation of banns. Exhibition is made for seven consecutive days. Objection may be made within other seven days. If no objections are lodged the Registrar issues a certificate: fee, 2*s.* 6*d.* Such certificate of publication is only valid for three months. Under the Naval Marriages Act, 1908, banns may be published on board one of His Majesty's ships where an officer, seaman or Marine on the ship's books wishes to contract a marriage in Scotland. A declaration under the Marriage Notices (Scotland) Act already referred to may also be filled up and the officer commanding the ship may grant a certificate.

Irregular Marriages are survivals of modes of marriage which were general throughout Europe in mediæval times, Scotland having disregarded the decrees of the Council of Trent invalidating irregular marriages; Scotland following the ancient Canon law. These marriages may be contracted in three ways: (1) by exchange of consent before two witnesses (called in legal language *per verba de præsenti*); (2) by promise of marriage followed by intercourse on the faith of the promise (called marriage by promise, *subsequente copula*); the promise, however, can only be proved by the writing or the oath of the party when action is brought; (3) by constant living together as husband and wife (called marriage by *habit and repute*), *i.e.*, the general repute of the neighbourhood supported by consistent conduct. Marriage by the first mode is only valid if one of the parties has been resident in Scotland for 21 days before the contract is entered into. (This is the result of legislation and not part of the common law of Scotland.) "Gretna Green" marriages were abolished in 1856 by the Act 19 and 20 Victoria, Chap. 96. Marriages thus contracted may be registered if the parties appear before the Sheriff with their witnesses and petition for registration within three months. On the Sheriff granting warrant the Registrar registers the marriage for a fee of 5*s.* 1*d.* The other two forms of marriage before they are held to be valid must be declared by a decree in the Court of Session.

Marriage with a foreigner may be solemnized regularly if one of the parties has a residential qualification and provided that one party has resided in Scotland for 21 days and the minister agrees to dispense with the proclamation of banns in the case of the foreigner. Marriage of a Scottish person with a foreigner, or marriage of two foreigners, may be contracted irregularly if one or other of the parties has resided in Scotland for 21 days.

PASSPORTS.

Applications for Foreign Office Passports must be made in the form printed on the back of the Regulations (to be had on application), and enclosed in a cover addressed to "The Passport Office, 1 Queen Anne's Gate Buildings, Dartmouth Street, Westminster, S.W. 1," or to "The Branch Passport Office, 36 Dale Street, Liverpool." The charge for a Passport is 7*s.* 6*d.* Passports are issued in London between the hours of 10 and 4 (Saturdays, 10 to 1), and in Liverpool, 9.30 to 4 (Saturdays, 9.30 to 1). The Passport Offices are *closed* on Sundays and Public Holidays (except in London between the hours of 10 a.m. and noon for cases of *special emergency only*). Passports may be obtained through the post if a Postal Order for 7*s.* 6*d.*, which should be crossed, *made payable to the Passport Office*, is forwarded with the application. Cheques, treasury notes or postage stamps should not be sent in payment. Application should, if possible, reach the Passport Office not less than four days before that on which the Passport is required.

Foreign Office Passports are granted (1) to natural-born British subjects; (2) to the wives and widows of such persons; and (3) to persons naturalised in the United Kingdom, in the British Dominions or Colonies, or in India.

The wife of an alien is deemed to be an alien.

Passports are granted (1) in the case of natural-born British subjects and persons naturalised in the United Kingdom, upon the production of a Declaration by the applicant in the form printed at the back of the Regulations, verified by a Declaration made by a member or official of any *Banking Firm* established in the United Kingdom, or by any *Mayor, Magistrate, Provost, Justice of the Peace, Minister of Religion, Barrister-at-law, Physician, Surgeon, Solicitor, or Notary Public*, resident in the United Kingdom and being himself a British subject. The applicant's Certificate of Birth and other evidence may also be required. Applicants serving in His Majesty's Forces may have their declarations verified by their Commanding Officers; (2) in the case of children under the age of 16 years requiring a separate Passport, upon production of a Declaration made by the child's parent or guardian in a Form (B), to be obtained upon application to the Passport Office; (3) in the case of persons naturalised in any of the British self-governing Dominions, upon production of a letter of recommendation from the High Commissioner or Agent-General in London of the State concerned. Persons naturalised or ordinarily resident in any of the Crown Colonies must obtain a letter of recommendation from the Colonial Office.

If the applicant for a Passport be a British sub-

ject by naturalisation, the Certificate of Naturalisation must be forwarded to the Passport Office with the Declaration or letter of recommendation British subjects by naturalisation will be described as such in their Passports, which will be issued subject to the necessary qualifications.

British Passports are only available for travel to the countries named thereon, but may be endorsed for additional countries The possession of a Passport so endorsed does not, however, exempt the holder from compliance with any *Immigration Regulations* in force in British or foreign countries, or from the necessity of obtaining a *visa* where required

Passports endorsed as valid for the British Empire are also available for travelling to territory under British protection or mandate, not, however, including Palestine or Iraq, for which countries special endorsements must be obtained.

Foreign Office Passports are available for five years from the date of issue, unless otherwise stated. On the expiration of their period of validity they may be renewed for further consecutive periods of one to five years. In no circumstances are they available beyond ten years from the date of issue Thereafter, or if at any time the Passport contains no further space for visas, application must be made for the issue of a new Passport.

A Passport cannot be issued or renewed by the Foreign Office on behalf of a person already abroad, such person should apply, in a foreign country, to the nearest British Mission or Consulate, or, within the British Empire, to the nearest Passport issuing authority

Persons resident in the Irish Free State should make application for their Passports to the Passport Department, Ministry of External Affairs, Dublin.

CERTIFICATION OF PHOTOGRAPHS

Note.—It is essential that one of the two photographs of the applicant (and wife, if to be included on the Passport) should be certified on the back as follows: -

"I certify this to be a true photograph
Mr
of *Mrs* ...."
Miss

Signature and Qualification of Recommender

Date.... .. ..

PAWNBROKERS' REGULATIONS.

For the TICKET on goods pledged for 10*s.* or less . ... ½*d.*
On goods pledged for more than 10*s.*.... ... . 1*d.*
For INTEREST on pledges not exceeding 40*s.*, for every 2*s.* or part of 2*s.*, per month . ½*d.*
And after the first month any time not exceeding 14 days to be charged as half a month.

Note.—In addition to the above charge, an additional charge of ½*d* for each 5*s* or part of 5*s.* lent is authorized (*Pawnbrokers' Act*, 1922).
On pledges exceeding 40*s*, for every half-crown or part of half a crown per month 1½*d.*

FORFEITURE.—Pledges for 10*s.* and under must be redeemed within twelve calendar months and seven days from the date of pledging. After that they become the property of the pawnbroker

Pledges above 10*s.*, if not redeemed within twelve calendar months and seven days from the day of pledging, may be sold by auction by the pawnbroker, but may be redeemed at any time before the day of sale.

Within three years after sale the pawner may inspect the account of the sale in the pawnbroker's books on payment of one penny, and receive any surplus produced by the sale Should there be a deficit, the pawner, or the person producing the ticket, is liable to pay the deficiency. Any deficit on sale of one pledge may be set off by the pawnbroker against surplus on another

If any pledge is destroyed or damaged by fire, the pawnbroker will be bound to pay the value of the pledge after deducting the amount of the loan and profit—*i e*, the loan and profit and 25 per cent. on the amount of the loan.

If any ticket is lost, mislaid, or stolen, the pawner should at once apply to the pawnbroker for a form of declaration to be made before a magistrate, or the pawnbroker will be bound to deliver the pledge to any person who produces the ticket to him and claims to redeem the same

When the loan is 5*s* or under, the charge on form of declaration is one halfpenny, when the loan is above 5*s.*, one penny

SPECIAL CONTRACTS.—A pawnbroker may make a special contract with a pawner in respect of a pledge on which the pawnbroker makes a loan of above 40*s*, provided always that -

(1) The pawnbroker at the time of the pawning shall deliver to the pawner a special contract pawn-ticket, signed by the pawnbroker

(2) The duplicate of the special contract pawn-ticket shall be signed by the pawner.

The pawnbroker may also charge . -For ticket, profit per calendar month, for storage of the pledge, and payment to inspect account of sale, such sums and rates as may be agreed upon at the time of making the contract

After the first calendar month any time not exceeding fourteen days will be charged as half a month, and any time exceeding fourteen days and not more than one month as one month.

The charge for storage of the pledge will be per calendar month, or any part of a month, in addition to the charges above mentioned.

Pledges may be pawned under special contract for a period of not less than three months

In all other respects pledges under special contract are subjected to the same rules as to sale by auction, inspection of account of sale, payment of surplus produced by sale, and loss of ticket, as are set forth above in the case of ordinary pledges for more than 10*s.*

WILLS.

REASONS FOR MAKING A WILL. Every man having a wife and family should make his will. However small his estate, it is an imperative duty in most cases, and is safer in every case, to protect the interest of the survivors by a will, and by the appointment of one or more trustworthy persons to carry his wishes into effect When persons die intestate, having foolishly put off making a will until it is too late, their negligence may deprive those for whom they were most anxious to provide. The help of a lawyer in making a will is not in every case essential, but it is always advisable, particularly where there is a desire on a testator's part to provide for his property being "settled" as it is called *e.g.*, the income being paid to his widow and the capital being ultimately divided among his children, for this requires the skill of a practised lawyer. Assuming a lawyer is not employed, a person having resolved to make a will must not regard it as a light matter, to be got rid of in a few minutes, but one demanding the most serious

attention. It is only after a person is dead, and cannot explain his meaning, that his will can be open to dispute It is the more necessary, therefore, to express what is meant in language of the utmost clearness, avoiding the use of any word or expression that admits of another meaning than the one intended It is better to be prolix than to leave the smallest room for doubt or uncertainty, although the same name or word be often repeated. Sounding phrases are entirely out of place Avoid the use of "legal terms," such as "heirs" and "issue," when the same thing may be expressed in plain language. If in writing the will a mistake be made, it is better to rewrite the whole Before a will is executed, that is, *signed by the testator in presence of two witnesses*, an alteration may be made by striking through the words with a pen, but opposite to such alteration the testator and witnesses should write their names or place their initials Never scratch out a word with a knife or other instrument, and no alteration *of any kind whatever* must be made after the will is executed. If the testator afterwards wishes to change the disposition of his estate, it is better to make a new will, revoking the old one, or to add a codicil to the first, which must be duly executed and attested in the same manner as the original will. *A will should be written in ink and very legibly on a single sheet of paper* Although, of course, forms of wills must vary to suit different cases, the following directions may be found useful to those who, in cases of emergency, are called upon to draw up wills, either for themselves or others :—

TESTATOR OR TESTATRIX —The person who makes the will is the testator, or if the willmaker be a woman, the testatrix

ESTATE —By this word is to be understood property of all kinds, both real and personal Real property includes tithes and advowsons, as well as freehold land and houses; while personal property includes debts due, arrears of rents, money, leasehold property, house furniture, goods, assurance policies, stocks and shares in companies, and the like

RESIDUARY LEGATEES —It is well in all cases to leave to some person or persons "the residue of my estate and effects," although it may be thought that the whole of the property has been disposed of in legacies already mentioned in the will. *It should be remembered that a will operates on property acquired after it has been made*

TO BEGIN A WILL.—A form in which a will may be commenced is :—"This is the last will of me, Thomas Smith, of Vine Cottage, Silver Street, Reading, in the county of Berks"

TO END A WILL —After disposing of the property, the will may be ended as follows —"And I hereby appoint the said —— sole (or joint) executor(s) of this my Will, and I revoke all former wills and codicils. Dated this —— day of ——, 19—"

EXECUTION OF A WILL AND WITNESSES —The testator should sign his name at the foot or end of the will, in presence of two witnesses, who will immediately sign their names in his and in each other's presence. A person who has been left a legacy or share of residue in the will, or whose wife or husband has been left a legacy, should not be an attesting witness. Their attestation would be good, but they would forfeit the legacy. It is better that a person named as executor should not be a witness Husband and wife may both be witnesses, provided neither is a legatee. If a solicitor be appointed executor, it is lawful to direct that his ordinary fees and charges shall be paid, but in this case he (as an interested party) must not be a witness to the will.

Opposite to or beneath the testator's signature should be written the attestation clause. The following form of attestation will be found sufficient –

Signed by the testator [or testatrix, as the case may be], in the presence of us, both present at the same time who in his [or her] presence and in the presence of each other have hereunto set our names as witnesses	THOMAS SMITH [Signature of Testator]
William Jones, of Vine Cottage, Silver Street, Reading, Tailor	Henry Morgan, of North Street, Reading, Esq.

It is desirable that the witnesses should be fully described, as they may possibly be wanted at some future time. If the testator should be too ill to sign, even by a mark, another person may sign the testator's name to the will for him, in his presence and by his direction, and in this case it should be shown that the testator knew the contents of the document The attestation clause should therefore be worded. "Signed by Thomas Brown, by the direction and in the presence of the testator, Thomas Smith, in the joint presence of us, who thereupon signed our names in his presence and in the presence of each other, the will having been first read over to the testator, who appeared fully to understand the same" If the testator be blind the will should be read aloud to him in the presence of the witnesses, and the fact mentioned in the attestation clause. If by inadvertence the testator should have signed his will without the witnesses being present, then the attestation should be : "The testator acknowledged his signature already made as his signature to his last will and testament, in the joint presence," &c. Any omission in the observance of these details causes delay and expense, and sometimes great difficulty is experienced in procuring an affidavit by one of the attesting witnesses before the will can be admitted to Probate The stringency of the law as to signature and witnessing of a will is only relaxed in favour of soldiers and sailors on Active Service

CODICIL. - When any change is required to be made in the disposition of property as stated in the will the change should be embodied in a codicil. A codicil should begin : - "This is a codicil to the will of me, Thomas Smith, of Vine Cottage, Silver Street, Reading, in the county of Berks, the said will bearing date," &c. A codicil must be dated at the end, and signed and witnessed with exactly the same formalities as the will.

EXECUTORS. -It is usual to appoint two executors, although one is sufficient. The name and address of each executor should be given in full, as follows :—"I appoint John Jones, of number twenty-one, London Street, Ipswich, and Edward Matthews, of number seventeen, Market Street, Lincoln, executors of this my will." An executor may be a legatee. Thus a child or wife to whom the whole or a portion of the estate is left may be appointed sole executor, or one of two executors. The addresses of the executors are not necessary; but it is desirable, here as elsewhere, to avoid ambiguity or vagueness.

APPOINTMENT OF TRUSTEES.—The form of appointment of executors will also serve when the estate is left in care of trustees, except that the persons should be designated "executors and

trustees" The Public Trustee may be appointed executor or trustee of a will. *See* PUBLIC TRUSTEE, *post*

TRUSTS OF THE WILL —When the estate is wholly for the children, the will may read, after the appointment of the executors and trustees — "I give and devise all my estate and effects, real and personal, of which I may die possessed or entitled to, unto the said John Jones and Edward Matthews, upon trust in equal shares for all or any my children or child living at my death who being sons or a son attain the age of 21 years or being daughters or a daughter attain that age or marry And for all or any the children or child living at my death, who being male attain the age of 21 years or being female attain that age or marry of any child of mine who dies in my lifetime leaving children or a child living at my death, such last-mentioned children or child to take the share or shares which their parent would have taken if living at my death, and so that no grandchild of mine shall take whose parent is living and capable of taking." Where the widow is to have a life-interest use the following words: "upon trust for my wife during her life [or during her widowhood], and after her death [or second marriage, which first happens] upon trust in equal shares for all or any my children or child" &c. as before The words in square brackets will only be used where the widow is to lose her interest if she marries again.

TESTAMENTARY CAPACITY —A minor cannot make a will A married woman (married since January 1, 1883) may dispose by will of any real or personal property as her separate property as if she were a *feme sole* (Married Women's Property Act, 1882, s 1 (1)) As to the powers of a woman married before that date it is advisable to consult a solicitor

REVOCATION.—A will is revoked by a subsequent will (but only so far as such subsequent will operates as a virtual revocation, as by making other provisions inconsistent with the previous will; for this reason a will should always have a clause revoking previous testamentary dispositions), or by burning, tearing, or otherwise destroying the same It is not sufficient to obliterate the will with a pen. Marriage in every case acts as the revocation of a will, unless, in the case of a will made on or after Jan. 1, 1926, it is expressed to have been made in contemplation of marriage (Law of Property Act, 1925, s 177); so that after marriage the old will should be re-acknowledged, or a new one made.

LAPSED LEGACIES.—If a legatee die in the lifetime of the testator, the legacy or share of residue lapses and falls into the residue, excepting only in cases where the legatee is a child or "other issue" of the testator and leaves issue living at the testator's death, and the will does not provide for the class of children or issue being ascertained at some period other than the death of the testator. For instance, if a share of residue is left to "all my children living at my wife's death," the share of a child who died in the wife's lifetime would lapse even though the child should leave issue.

TO ONE PERSON ABSOLUTELY.—When it is the intention to leave all the property to one person, as for instance a wife or child, the will may read:—"I devise and bequeath all my estate and effects, real and personal, which I may die possessed of or entitled to, unto my wife Mary Smith, absolutely."

TO CHILDREN UNDER AGE.—When estates are left wholly or in part to children under the age of 21 years, trustees should be appointed to hold the property in trust for those to whom it will ultimately belong The trustees will have power to apply the annual income for their maintenance. A wife may be appointed a trustee, or may be sole trustee. It is also usual to appoint the executors or some near relative, guardians of children under age By the Guardianship of Infants Act, 1886, the mother of a child, if she survives the father, becomes the guardian of such child, either alone, if no guardian is appointed, or jointly with any guardian appointed by the father

ALL PROPERTY TO BE INVESTED —Executors and trustees may be empowered to sell and dispose of an estate, and after the payment of all just debts and expenses to invest the remainder. For this purpose the section headed "Trust Investments" should be consulted

DUTIES OF EXECUTORS.—After the death of the testator, the duties of the executor are briefly as follows —The first duty of the executors, or of one of them, is to see that the funeral takes place in a suitable and becoming way; then to make lists of the debts and the assets or property. For purposes of duty it is necessary to estimate the value of the real and personal property left, or get it valued (For scale of duty see "Estate Duty," page 513) Under the Finance Act, 1894, duties are charged on *all* property in which the testator had a life interest, even though the property may not have been under his personal control. The executor must take the will to the Principal Probate Registry, Somerset House, or to the local District Probate Registry, or to a solicitor, and prove the will. Collect all the property of the deceased and pay all his just debts, and before distributing the estate, if it be a large one, it is necessary in order to relieve the executors from personal liability to advertise in certain London and local newspapers for all claims against the estate to be sent in before a specified date Pay the legacy or succession duty Dispose of the residue of the property as directed in the will. All the testator's real estate becomes vested in the executors, who hold the same as trustees for the persons beneficially entitled under the will or otherwise, and such persons can only acquire a title to the estate through the executors, after payment of all charges and liabilities to which the same is subject. Executors are not obliged to act, neither is it necessary that all the executors should act, one alone is competent to prove a will and carry out its provisions. In small estates, probate and letters of administration may be obtained through an Inland Revenue Office.

ADMINISTRATORS —If an executor has not been appointed in the will, or if the executor be dead, or does not wish to act, the residuary legatee nearest of kin to the deceased, or a legatee under the will, is entitled to act and administer the will, and is called administrator.

WHERE TO FIND A PROVED WILL.

To find a will proved before Jan. 1, 1858, the date on which the Court of Probate Act, 1857 (20 & 21 Vict c 77), came into operation, it is best to search first—if the testator was a man of substance—the index to the wills proved in the Prerogative Court of Canterbury, which is kept at Somerset House. Failing this, the will is probably to be found in the registry of the district

in which it was proved. The wills proved prior to 1858 were all distributed among the district registries when these institutions came into existence. This is the only broad rule which can be laid down to guide a searcher. To find a will proved since 1858 is a far simpler task. It must have been proved either at the Principal Registry at Somerset House, or a District Registry. In the former case the original will itself is carefully preserved at Somerset House, the copy of which probate has been granted is in the hands of the executors who proved the will, and another copy for Parliament is bound up in a folio volume of wills made by testators of that initial and date, the indices to these volumes fill a room of considerable size at Somerset House, where the indices may be examined and any will read on payment of a search fee of one shilling. In the latter case, the original will, proved in the District Registry, is there kept, and may be seen or a *copy* obtained, but a copy is sent to and filed at Somerset House, where also it may be seen. A general index of grants, both probate and administrations, is prepared and printed annually in lexicographical form, and may be seen at either the Principal or a District Registry. This index is usually ready by about June or July of the following year. The reader may not copy any part of the will except the names and addresses of the executors and the date and private number of the will. If he desires a copy, he can order one to be made, for which he will pay according to the length of the will, at the rate of sixpence a folio (ninety words) for an ordinary copy, and ninepence a folio for a certified copy, which, with a shilling stamp impressed thereon, can be produced and read in any court of law. The 40 District Probate Registries established by the Act of 1857 are at —Bangor, Birmingham, Blandford, Bodmin, Bristol, Bury St. Edmunds, Canterbury, Carlisle, Carmarthen, Chester, Chichester, Derby, Durham, Exeter, Gloucester, Hereford, Ipswich, Lancaster, Leicester, Lewes, Litchfield, Lincoln, Liverpool, Llandaff, Manchester, Newcastle-upon-Tyne, Northampton, Norwich, Nottingham, Oxford, Peterborough, St. Asaph, Salisbury, Shrewsbury, Taunton, Wakefield, Wells, Winchester, Worcester, York.

SAFE CUSTODY OF WILLS.

There is a depository for the safe custody of the Wills of *living persons* at Somerset House. A will may be deposited through the Registrar of a District Registry, who will transmit the will to London in a registered letter on receiving a fee of 10*s.* for the deposit, of 2*s.* 6*d.* for entering a minute thereof, and 2*s.* for filing the affidavit which is required. A will once deposited will not be given up to anybody, but must remain in the registry until the testator dies, unless he goes to the registry with the original minute of deposit and other proof of his identity, and destroys his will in the presence of the Registrar. Any will appointing the Public Trustee as Executor may be deposited with him for safe custody. (*See* PUBLIC TRUSTEE, *post.*)

PROBATE OF WILLS.

OBTAINING PROBATE OR ADMINISTRATION WITHOUT THE AID OF A SOLICITOR.

The entrance to the office for personal applications is in the south-east corner of the Quadrangle of Somerset House, Strand, Room 44.

The applicant should bring the registrar's certificate of the death of the deceased, or an official certificate of burial, and the will, if there be one, and full details of the property and debts of the deceased.

If there be no will or no executor be appointed, or the executor will not act, two sureties must also attend and enter into a bond for the faithful administration of the estate, unless the whole personal estate does not exceed £50, or the husband is the applicant, when one surety only will be required.

In no case can any correspondence be entered into, nor can an interview be given to any agent. The business of the department can be transacted only with the applicant in person.

Application may be made at a District Probate Registry instead of at Somerset House.

Where the whole real and personal estate, without the deduction of debts or funeral expenses, does not exceed £500, application may be made at one of the Inland Revenue Offices in the suburbs and many principal towns throughout the country.

Where the deceased has left no will, and the whole personal estate does not exceed £100, and the widow resides at more than three miles from any Probate Registry, application may be made to the Registrar of the County Court.

Scotland.—"Confirmation" is the Scottish equivalent of Probate. That is obtained in the Sheriff Court of the County in which the deceased was domiciled at the date of his death or where he had no fixed domicile or died abroad, in the commissariat of Edinburgh. Executors are either "nominate" or "dative." An Executor nominate is one nominated by the deceased in his will. An Executor dative is one appointed by the Court (1) in the case of intestacy or (2) where the deceased had failed to name an executor in his will. In the former case the deceased's next-of-kin are all entitled to be declared executors dative. An inventory of the deceased's estate and a schedule of debts, together with an affidavit, must be given up. If the deceased had personal property in England or Ireland it is shown in the inventory, and then the confirmation is produced in the principal Court of Probate in England or Ireland. It is then sealed in such Courts and has the effect of probate or letters of administration in England or Ireland. In estates under £500 confirmation is obtained at reduced fees.

SCOTS LAW OF WILLS.

The only formalities required by the Law of Scotland as regards due execution of a will are for purposes of authentication. A will must be in writing (except that a person may leave a legacy verbally if the amount of that legacy does not exceed 100 Scots (£8 6*s.* 8*d.* sterling). A will may be either (1) *holograph*, i.e., written by the testator himself, in which case no witnesses are necessary; (2) *tested*, which means that it is signed in presence of two witnesses. It is not necessary that these witnesses should sign in presence of one another, or even that they should see the testator signing so long as the testator acknowledges his signature to the witnesses. If the testator cannot write, his will may be authenticated by a notary and two witnesses. A parish minister may act as a notary for the purpose of subscribing a will in his own parish. Wills are registered for execution

purposes in the Books of the County in which the deceased died domiciled, and in the Books of Council and Session, H M General Register House, Edinburgh, for preservation The original deed may be inspected in the General Register House on payment of a small fee. A certified official copy may be obtained from either register on payment of stamp duties and writing fees

TRUST FUNDS AND INVESTMENTS.

By the *Trustee Act*, 1925 (which came into force on Jan 1, 1926), a trustee may invest trust funds in (*a*) any parliamentary stocks or Government securities of the United Kingdom, (*b*) on real or heritable securities of the United Kingdom, (*c*) in stock of the Bank of England or Ireland, (*d*) in India 7, 5½, 4½, 3½, 3 and 2½ per cent. stock or other stock issued by the Secretary of State for India charged on Indian revenue; (*e*) in securities the interest of which is guaranteed by Parliament, (*f*) in Consolidated Stock of the Metropolitan Board of Works, or of the London County Council, or Debenture Stock of the Receiver of Police, or Metropolitan Water Stock; (*g*) in Debenture, Guaranteed or Preference Stock of any railway in the United Kingdom incorporated by special Act, and having paid a dividend of not less than 3 per cent. on its Ordinary Stock for 10 years; (*h*) in United Kingdom Railway Stock when the railway is leased in perpetuity to any railway such as that mentioned in (*g*) *supra*; (*i*) in Debenture Stock in Indian Railways; (*j*) in "B" annuities of the Eastern Bengal, East Indian, the Scinde, Punjaub and Delhi, Great Indian Peninsula and Madras Railways, and in Deferred Annuities in the register of holders of Class D Annuities comprised in the register Class C of the East Indian Railway Company, (*k*) in the stock of any Indian railway upon which a fixed or minimum dividend is guaranteed by the Indian Government, or upon the capital of which the interest is so guaranteed; (*l*) in the Debenture or Preference Stock of any Water Company supplying water for profit, and incorporated by special Act or Royal Charter, which has paid a dividend of not less than 5 per cent on Ordinary Stock for 10 years; (*m*) in the nominal or Inscribed Stock of any Municipal Borough in the United Kingdom having a population of more than 50,000, or of any County Council; (*n*) in the Nominal or Inscribed Stock of any commissions supplying water by statute, and having power to levy rates over an area embracing not fewer than 50,000 persons, provided the rates for 10 years have not exceeded 80 per cent. of the amount authorised to be levied; (*o*) in Stocks authorised under the Colonial Stock Act, 1900; (*p*) in local bonds issued under the Housing (Additional Powers) Act, 1919; (*q*) in any Stock or Securities issued in respect of any Government loan in Northern Ireland, (*r*) in Stocks, &c, authorised for the investment of cash under the control of the Court. All such investments may be varied. As regards railway investments the L. & N.E Ry., the S. Ry., the L.M. & S. Ry, and the G W Ry., are to be treated as if they were a company which had in each of the ten years before amalgamation paid a dividend of not less than 3 per cent. on its Ordinary Stock. All the Stocks above mentioned may be purchased, although they are redeemable, and the price exceeds the redemption value; but as to those mentioned in paragraphs (*g*), (*i*), (*k*), (*l*), (*m*), (*o*), (*p*) and (*q*), *supra*, if any of them is liable to be redeemed at par or at some other fixed rate, a trustee may not purchase (*a*) at a price exceeding 15 per cent. above par or such other fixed rate; nor (*b*) if the stock is liable to be so redeemed as aforesaid within 15 years of the date of purchase at a price exceeding its redemption value §§ 3 to 11 of the same Act contain various important provisions as to the rights of trustees in the matter of investing trust monies.

As to the investments permitted by *The Rules of the Supreme Court*, 1888, *see* "WHITAKER" for 1927, p 254, where *The Trusts Amendment Act*, 1884 (*Scotland only*), *The Colonial Stock Act*, 1900, and *The Housing (Additional Powers) Act*, 1919, are also noted

THE PUBLIC TRUSTEE.

This is a Government Office (opened in 1908) by means of which the State acts as Executor and as Trustee under a Will, or as Trustee under a Settlement, whether new or old, and in other capacities of a like nature. The public demand for the services of the Public Trustee is well maintained The value of the trusts accepted up to March 31, 1928, was £272 642,510.

The facts of any trust, new or old, in which it is desired that the Public Trustee should act may be brought to his notice by letter or by personal interview Upon his assenting to act, his appointment is effected in the same simple way as in that of a private trustee, or he can be appointed by an Order of the Court He can act solely or jointly with others

In the case of a Will about to be made, all that the testator need say is, "I appoint the Public Trustee executor and trustee of this my Will"; or the appointment may be a joint one with friends or relations In the case of a Will already made, the appointment of the Public Trustee can be effected by means of a codicil. Executors who have obtained probate can transfer their duties to him under an Order of the Court He can also act as Administrator with, or without, the Will annexed

The Public Trustee being a permanent trustee, the expense of fresh appointments is saved His integrity is guaranteed by the State, while the public demand for his services should ensure a valuable experience and skill in the execution of his office, and a wide knowledge in the work of investment

As regards investments, the Public Trustee, like a private trustee, is bound by such powers of investment as may be given him in the Will or trust instrument under which he acts or under the general law. *See Trust Funds ante* The statutory rules require that strict secrecy shall be observed in respect of all matters dealt with in the Department. Accounts of every trust, in simple form, are furnished to the beneficiaries as required.

The Public Trustee Act provides that the fees to be charged shall be arranged from time to time so as to defray the expenses of the Department and no more A profit is not intended.

An interview with the Public Trustee or with any of his senior officers can be arranged at any time.

A pamphlet giving full particulars and details of the fees can be obtained free of cost upon application to the Office of the Public Trustee, Kingsway, W.C. 2 (*tel.*, Holborn 4,300), or at any Post Office.

A branch office has been opened in Northern Assurance Buildings, Albert Square, Manchester.

Preliminary Note.—The succession to the property of a person dying Intestate on or after January 1, 1926, is regulated by The Administration of Estates Act, 1925, which repealed the old law and established one new Code applicable both to Real Estate (land, houses, &c.) and Personal Estate (leaseholds, goods and chattels, money, investments, &c.). The Act abolished the ancient rule of Primogeniture (inheritance by eldest son), the rights of dower (widow's third) and of curtesy (husband's life interest), and all special customs (*e.g.* gavelkind and Borough English). As regards Personal Estate Parents were placed on an equal footing, a mother regained her ancient preference over an intestate child's brothers and sisters, relatives of the whole blood obtained priority over those of the half blood; and relatives more remote than first cousins were excluded from the distribution. "The widow's £500" under the Intestates Estates Act, 1890, was increased to £1,000 and given also to a husband; whilst the widow or husband in addition now takes all the "personal chattels."

TABLE OF EXAMPLES.

Important.—The Notes at the foot form part of the Table.

In each instance it is supposed there are no nearer relations than those named.

If the Intestate leaves	*The Estate is distributed as follows*
1. Widow (or husband), and children	One half to widow (or husband) for life, and then to children equally. Other half to children equally at once
2. Widow (or husband), and father and mother	Widow (or husband) for life, and then to father and mother equally
3. Widow (or husband), and either father or mother, not both	Widow (or husband) for life, and then to father or mother absolutely
4. Widow (or husband), and brothers or sisters of whole blood	Widow (or husband) for life, and then to brothers and sisters equally.
5. Widow (or husband), and brothers or sisters of half blood	Widow (or husband) for life, and then to brothers and sisters equally.
6. Widow (or husband) and nephews or nieces	Widow (or husband) for life, and then to nephews and nieces *per stirpes* (See Note D.)
7. Widow (or husband), and grandparents	Widow (or husband) for life, and then to grandparents equally
8. Widow (or husband), and uncles or aunts	Widow (or husband) for life, and then to uncles and aunts equally
9 Widow (or husband) but none of above relations or descendants	All to widow (or husband)
10. Children, and grandchildren (issue of deceased child)	Amongst children in equal shares, the grandchildren taking equally their deceased parent's share.
11. Father and mother	Father and mother equally.
12 Father or mother, not both	Father or mother.
13. Brothers or sisters of whole blood, and of half blood	Brothers and sisters of whole blood equally.
14. Brothers or sisters, and nephews or nieces (children of deceased brother or sister)	Amongst brothers and sisters in equal shares, the children of deceased brother or sister taking equally their deceased parent's share.
15. Brothers or sisters, and grandparent	Brothers and sisters equally.
16. Grandparents, paternal or maternal	Grandparents equally.
17. Grandparent, and uncles or aunts	Grandparent.
18. Uncles or aunts of whole blood, and of half blood	Uncles and aunts of whole blood equally.
19. Uncles or aunts, and deceased uncle's or aunt's children	Amongst uncles and aunts in equal shares, the children of deceased uncle or aunt taking equally their deceased parent's share.
20. Uncles or aunts, and nephews or nieces	Nephews and nieces *per stirpes*.
21. Cousins, *i.e.* deceased uncle's or aunt's children or grandchildren	Cousins *per stirpes*.
22. Any other relation than those named in preceding examples (*e.g. Great* grandparents) and no widow or husband	The Crown.

NOTE A.—By Section 46 of the Administration of Estates Act, 1925, a surviving husband or wife takes absolutely (i) the "personal chattels"; and (ii) £1,000 free of death duties and expenses. The "residue" is then distributed as indicated in the above Table.

"Personal chattels" are:—Articles of household use or ornament, &c. (not used for business purposes).

NOTE B.—The life interest of a husband or wife may be redeemed by payment to him or her of a capital sum so as to permit immediate distribution of the whole estate.

NOTE C.—In ascertaining the persons entitled to take, in every case regard must be had to the operation of "the statutory trusts" enumerated in the Act, that is to say: The child or other relative must have attained or attain the age of twenty-one or have married or marry under that age.

NOTE D.—Taking *per stirpes* is taking by descent or representation. Thus, in Example 6 nephews and nieces take amongst them the share which their deceased parent would have taken if he or she had survived the Intestate.

I.—MOVABLES.

In each instance it is supposed there are no nearer relations than those named.

By the Intestate Husband's Estate (Scotland) Act, 1911, the widow of a man dying intestate and without issue is entitled to the whole estate both heritable and movable if under £500 in value; if over that amount she takes £500 out of the heritable and movable estate rateably before any division is made, and after that the share in the remainder to which she was entitled before the passing of the Act

If the Intestate die, leaving	*His representatives take in the proportions following* —
Widow only	Half to widow, half to next of kin, or if none, then to the Crown.
Husband only	Half to husband, half to wife's next of kin
Widow or husband, and child or children by one or more marriages	One-third to widow or husband, one-third to children surviving deceased *equally*; one-third to surviving children *per capita** and issue of predeceasing children *per stirpes*.*
Widow and father	Half to widow, half to father.
Widow and mother, no father	Half to widow, one-half to mother
Widow, brothers or sisters	Half to widow, half equally amongst brothers and sisters whether of the whole or half blood consanguinean If a deceased brother or sister has left issue, such issue take amongst them their deceased parent's share.
Widow, mother, nephews or nieces	Half to widow, one-half to mother.
Father and mother	Whole to father
Father, mother, brothers and sisters	Half to father, half to brothers and sisters equally.
Father and mother and their grandchildren	Half to father; half to grandchildren equally *per stirpes*.*
Father, brothers and sisters	One-half to father, one-half equally amongst brothers and sisters.
Mother, brothers and sisters	Mother one-half, brothers and sisters one-half equally.
Mother, but no other kin	Whole to mother
Child, children or grandchildren by deceased children	Amongst children in equal shares, the grandchildren by deceased children taking amongst them their deceased parent's share
Brothers or sisters and nephews or nieces	Amongst brothers or sisters in equal shares, the children of deceased brothers or sisters taking amongst them their deceased parent's share.
Brother or sister and grandfather	All to brother or sister.
Brother or sister and uncles or aunts	All to brother or sister.
Grandfather, no nearer relation	All to grandfather.
Father's father and mother's mother	All to father's father
Grandmother, uncles and aunts	All to uncle and aunts, if paternal.
Great-grandfather, uncles and aunts	All to uncles and aunts, if paternal; if not, then to paternal great-grandfather.
Uncles and aunts	All equally.
Uncle and deceased uncle's child	All to uncle.
Uncle by mother's side, and deceased uncle or aunt's child	Child of deceased paternal uncle or aunt takes to exclusion of maternal uncle.
Aunts, nephew and niece	Nephew and niece
Cousins	Equally *per capita*.*
Nephew by brother, and nephew by half-sister	All to nephew by brother.

NOTE A.—Illegitimate children do not succeed to their father or mother as heirs in intestacy.

NOTE B.—In Scotland, a lease on intestacy and in the absence of any destination descends to the heir-at-law.

NOTE C.—When a person dies intestate leaving heritable estate as well as movables, the heir to the heritage, if he is also one of the next-of-kin, is not entitled to any of the movables if he takes the heritage. He may, however, "collate" the heritage, *i.e.*, share it with the other next-of-kin and thus get an equal share of the mixed estate.

* *Per capita* means by the head; *per stirpes* means inheriting through a parent deceased. Movables taken *per capita* divide into as many shares as there are children. Where representatives of a deceased parent take *per stirpes* they take equally amongst them the share that would have fallen to the deceased had he or she survived.

II.—HERITAGE.

Table of Succession to heritable property in Scotland on intestacy and in the absence of any destination in the property writs, other than "to heirs and successors."

In each instance it is supposed there are no nearer relations than those named.

If Intestate die leaving	*Heritage would descend to*—
(1) Wife only, no blood relations.	One-third to wife for life; rest to Crown as *ultimus hæres*
(2) Wife and child or children, and children of a deceased child...	One-third to wife for life Fee to eldest son or his heir male. If no son then to daughters equally The eldest son of a deceased daughter taking his mother's place
(3) Wife and father	One-third to wife for life, rest to father
(4) Wife and mother	One-third to wife for life Fee to nearest heir male.
(5) Wife, brother, or sister, and children of a deceased brother or sister	One-third to wife for life To immediate younger brother and his heir male, if none, then to immediate elder brother.
(6) Wife, mother, nephews and nieces	One-third to wife for life, rest to nephew (eldest) or niece equally if brother left no son. See No 2.
(7) Wife, mother, brother, sisters and nieces (children of deceased brothers and sisters).	One-third to wife for life, rest to younger brother and his heirs. If the only heirs are nieces they will take equally. If no younger brother then to immediate elder brother and his heirs in the same way. If sisters but no brothers the sisters take equally, and if the sisters have predeceased leaving only daughters they succeed equally.
(8) No wife or child or issue of a deceased child	To brother as in (5) whom failing to lineal ancestor paternal and his heirs.
(9) Children by one or more wives and the issue of deceased children	All to eldest son or his issue. If no male issue then to female issue as in (2)
(10) Husband and child or children	Liferent of whole to husband. Fee to eldest son.
(11) Mother, but no wife, child or issue of a child, father, brother, sister, nephew or niece or more distant descendants of father	Nearest paternal collateral (uncle or his heirs). If none, then to grandfather and his heirs.
(12) Mother and brothers and sisters.	All to younger brother whom failing to immediate elder brother.
(13) Mother and sisters	All to sisters equally.
(14) Father and brothers and sisters	Fee as in (5).
(15) Child and grandchild by deceased child	(*See* No 2.) "Rest to eldest son or his issue," under head, "Wife and child," etc
(16) Brother and grandfather .	All to brother
(17) Brother's grandson, and brother or sister's daughter	All to great-nephew, if grandson of brother (conforming to Nos 2 and 7) All to brother's daughter, if child of eldest brother.
(18) Brother and two aunts	Brother, all.
(19) Brother and wife	One-third to wife for life; rest to brother.
(20) Grandfather (no nearer)	All to grandfather.
(21) Father's father and mother's mother	All to father's father.
(22) Grandmother and uncle, or aunt on father's side (no nearer)	All to uncle or aunt.
(23) Uncle and deceased uncle's child	If deceased uncle was younger brother, then to child. If both brothers older than intestate, then to the younger of them or his heir male
(24) Uncle by mother's side, and deceased uncle's or aunt's child	Child of deceased uncle on father's side, or (if none) child of deceased aunt on father's side.
(25) Two aunts, nephew and niece, children of deceased brother	Nephew.
(26) Uncle or aunt's children, and brother's grandchildren through a son	Brother's grandson, or if granddaughters between then equally (conforming to Nos 2 and 7).
(27) Nephew by brother, and nephew by half-sister.	Nephew by brother.
(28) Nephew by deceased brother, and nephews and nieces by deceased sister	All to eldest nephew, son of deceased brother.

NOTE.—In Scotland succession to heritage on intestacy NEVER ascends to the mother and her relations. Even the mother's own estate, after vesting in her son or daughter, never ascends to the maternal line again.

SOLICITORS' CHARGES.

These are now usually regulated in conveyancing and non-contentious business by the Solicitors' Remuneration Act, 1881, and the Scale thereunder, but the Act allows an option to a solicitor of declining to adopt it. It chiefly relates to sales, purchases and mortgages, and is based upon the value of the property or amount of the money involved. Besides this, it is legal for a client to make a bargain beforehand for a fixed sum. The amount coming to the solicitor, whether under Scale or agreement, is intended to cover the services of himself and his clerks, while it is, of course, exclusive of actual outlay for stamps, &c. On purchase or mortgage money exceeding £300 and not exceeding £1,000, the Scale charge for each party's solicitor is 1½ per cent., this does not apply to sales by auction. Where a negotiation fee is chargeable, in addition, by the vendor's, purchaser's, or mortgagee's (not mortgagor's) solicitor, the Scale charge on sums exceeding £300 and not exceeding £3,000 is 1 per cent. It should be noted that if the solicitor *negotiates* the purchase or mortgage, he is entitled to an additional fee of substantial amount under the Scale referred to. *Charges are now subject to an increase of 33⅓ per cent.*

Scotland.—Solicitors' fees for Conveyancing and General business are regulated by a joint table approved by the different societies of Law Agents (Solicitors). Fees for litigation are regulated by the Court of Session. The tables of fees are published in The "Parliament House Book" and in "The Scottish Law Directory." When a solicitor sues for payment of a professional account it is remitted to the Auditor of the Court for taxation of his charges.

MEDICAL FEES

The following are the charges usually made by *General Practitioners*:—

General Practitioners.	Rental (or Patient's House). £10 to £25	£25 to £50.	£50 to £100
Ordinary Visit	5s. to 7s. 6d.	5s. to 10s. 6d.	7s. 6d. to 15s.
Night Visit	Double an ordinary visit		
Mileage beyond two miles from Home	2s. 6d.	3s.	4s.
Detention per ½ hour	5s. to 7s. 6d.	5s. to 10s. 6d.	7s. 6d. to 15s.
Letters of Advice	Same charge as for an ordinary visit.		
Attendee on servants	5s.	5s.	5s. to 7s. 6d.
Midwifery	2½ Gs.	2½ to 4½ Gs.	4½ to 7½ Gs.
Administring Chl'frm	15s.	2½ Gs.	3 Gs.
Consultants.			
Advice or Visit alone	3 Gs.	3 Gs.	3 Gs.
Advice or Visit with another Practitioner	2½ Gs.	2½ to 3 Gs.	2½ to 3 Gs.
Mileage beyond two miles from Home	2s.	2s.	2s.

Special visits—*i.e.*, of which due notice has not been given before the practitioner starts on his daily round, are charged at the rate of a visit and a half. Patients calling upon the doctor are charged at the same rate as if visited by him.

When the ordinary medical attendant is called upon to meet another in consultation, he is entitled to charge double his ordinary fee. When he himself is called in in consultation he is entitled to the minimum fee.

When more members of one family are ill at the same time, half a fee is charged for each beyond the first.

In midwifery cases the fee generally covers all charges for visits, &c., if all goes well; but if the illness be protracted, or if any special operation has to be performed, there is an extra charge.

If attendance on servants is paid for by employer, or if *he* send for the doctor, the charge is the same as to himself.

Certificates of health are to be charged for same as visits, except where special investigation is needed, as in certificates for lunacy, insurance offices, &c., when the charge may be from half a guinea to two guineas.

Vaccination is usually charged for according to the number of visits required.

Medical bills are commonly rendered once or twice a year.

STOCKBROKERS' CHARGES

The Rules and Regulations drawn up by the London Stock Exchange "Committee for General Purposes" are very voluminous and technical. The customary scale of brokerage is 5s. per £100 on British (with some exceptions) or Foreign Government or American dollar stocks, and 10s. per £100 on British Railway registered stocks. On shares not exceeding 1s. the brokerage is 1/32d. per share; not exceeding 30s., 3d. per share, not exceeding 40s., 4½d., not exceeding 60s., 6d. per share, and so on. There are *minimum* charges of 10s. on less than £100 and £1 on over £100.

ACCOUNTANTS' CHARGES

The following scale of fees is generally applicable, but for special work fees are usually a matter of negotiation:—

Company Audits.—Fee fixed by Shareholders in General Meeting.

Preparing Balance Sheets, Investigating Accounts, &c.—Principals' time, per day of seven hours, 5 to 10 Gs. Managing Clerks (if Chartered or Incorporated Accountants), 3 to 5 Gs.; (not Chartered or Incorporated Accountants), 1½ to 2½ Gs.; other Clerks, 1 G. and upwards. If at a distance from the office or outside the United Kingdom, hotel and travelling expenses will be charged.

Receivers, Liquidators and Trustees in Bankruptcy.—Usually by percentage on realisation of assets and dividends paid.

Voluntary Liquidators.—Usually fixed by the Company in General Meeting.

ARCHITECTS

Fees on New Works.—For taking the Client's instructions, preparing sketch design, making approximate estimate of cost by cubic measurement, or otherwise, preparing drawings and specifications for the purpose of estimates, obtaining tenders, advising on tenders and in preparation of contract, selecting and instructing of consultants, furnishing to the Contractor one copy of the drawings and specification and such other details as are necessary for the proper carrying out of the works, general supervision as above defined, issuing certificates for payment, and passing and certifying accounts, a percentage on the total cost of all executed works as follows:—

(*a*) If the contract or order exceeds £2,000 the percentage is to be 6 per cent.

(*b*) If the contract or order does not exceed £2,000 the percentage is to be 10 per cent. in the case of works costing £100 graduated to 6 per cent. in the case of works costing £2,000 as the special character of such works may render appropriate.

Alterations and Additions.—A percentage not exceeding twice the amount due for new works of the same cost.

Fittings, Decorations, &c.—In works in which designs for fittings, appointments, decorations, or complex detail or construction are main features, special fees may be charged according to the circumstances, and also for designs for furniture.

Omitted Works—In addition to the percentage on the total cost of executed works, the Architect is to be paid in respect of all works included in the tender or order, but not executed, two-thirds of the charge which would have been due upon them had they been carried out.

Partial Service.—If the project or part of it be abandoned, or if the services of the Architect cease or are dispensed with before a contract is entered into or order given, the charges in respect of the works abandoned or for which the Architect was employed (as the case may be) are as follows:—

(*a*) For making approximate estimate of cost by cubic measurement, or otherwise, one-fourth of the percentage on the estimated cost of such works.

(*b*) For making approximate estimate of cost by cubic measurement, or otherwise, and preparing drawings and particulars sufficient to enable quantities to be prepared or a tender obtained, two-thirds of the percentage on the estimated cost of such works

Instalments.—On a contract being entered into or order given for the works the Architect shall be entitled to an instalment of two-thirds of the charge calculated on the total amount of the contract or order, and no part of such payment shall be reclaimable from the Architect in the event of the subsequent abandonment of the works. The remainder of the Architect's remuneration shall be payable by instalments from time to time as the work proceeds.

Work Executed with Old Materials, &c.—In all cases where work is executed wholly or in part with old materials, or where material, labour or carriage is provided by the Client, the percentage shall be calculated as if the works had been executed throughout by a Contractor, and with new material.

Services Not Included in Percentage.—The foregoing percentages do not cover the following services, for which, and for any other services not covered by any payment herein provided for, additional charges may be made in accordance with the amount of work involved:—

Advising as to the selection and suitability of site. Negotiations relating to the site or building. Surveying the site or building and taking levels, and making surveys, measurements, and plans of existing buildings.

The preparation of further sketch designs necessitated by a material alteration in, or addition to, the Client's instructions, or altering the working drawings and specification in consequence thereof prior to the commencement of the works. Altering drawings, or preparing new drawings, and other services involved in consequence of variations or additions desired by the Client after the commencement of the works. Making extra drawings for the Client's or Contractors' use, and making drawings for and negotiations with ground landlords, adjoining owners, public authorities, or others, and making applications for licences and consents

Making arrangements in respect of party walls and rights of light and other easements, reservations or restrictions. Services in connection with litigation or arbitration Services consequent upon or resulting from the death or bankruptcy of Contractors or the failure or neglect of Contractors from any cause whatever to carry out the works in accordance with the contract or order or consequent upon the fraud or negligence of the Clerk of Works Services in connection with fire, flood, or tempest during the execution of the works, and services in connection with the planning of grounds or gardens.

Housing Schemes and Laying Out Estates.—The fees are those approved by the Ministry of Health, the Board of Agriculture and Fisheries, and the Scottish Board of Health.

Approval of Lessee's Plans - For approving plans submitted by a lessee and for inspecting the work during its progress so far as may be necessary to ensure the conditions being fulfilled, and certifying for lease when required, the charge is as follows —

For each £100 or part of £100 of the total cost up to £500, 2½ per cent. (minimum fee, £3 3s).

For each £100 or part of £100 from £500 to £5,000, 1½ per cent

For each £100 or part of £100 above £5,000, 1 guinea per cent

Litigation and Arbitration.—For qualifying to give evidence, settling proofs, conferences with Solicitors and Counsel, attendances in Court or before Arbitrators or other tribunals, and for other services in connection with litigation and arbitration the charges are based upon the time occupied and the professional standing of the Architect.

Land Surveying and Levelling -- For surveying and making a plan of a town, village, street or road, estate or grounds, or any part thereof, for taking levels, setting out streets or roads, and for other services in connection with land not otherwise specifically provided for, the charges are by time in accordance with Clause 21.

Sanitary Surveys.- For inspecting, reporting and advising on the sanitary condition of premises, the charge is by time in accordance with Clause 21, the minimum fee being £3 3s., in addition to the cost of assistance and appliances

Expenses.—The above-mentioned fees are, in all cases, exclusive of the cost of copies of documents, lithography, travelling and hotel expenses, and all other disbursements, which are to be charged in addition.

QUANTITY SURVEYORS.

I.—Architectural Work.

Note—In cases where any of the materials used in construction are supplied by the building owner the percentage charge is based upon the estimated or actual value thereof.

Lump Sum Contracts.

(*a*) Taking out and preparing Bills of Quantities:—2½ per cent. upon the estimated cost of the work up to £5,000; 2 per cent. above £5,000.

(*b*) Pricing out estimates.—½ per cent.

(*c*) Measuring and making up account of variations upon contracts including pricing:—2½ per cent. upon the amount of the gross additions, and 1½ per cent. upon the amount of the gross omissions

(*d*) Preparing approximate estimates:—½ per cent. upon the estimated cost.

(*e*) Surveying work in progress, taking particulars, and reporting for Interim Certificates:—½ per cent. upon the amount of the valuation.

(*f*) Taking particulars on site and writing specifications for works of alterations or repair, including supervision if required.—7½ per cent on the amount expended or alternatively a charge based upon the time involved

Schedule Contracts

(*a*) Preparing, pricing and agreeing a schedule of prices —½ per cent upon the cost of the work

(*b*) Measuring, bringing to account and valuing work done —2½ per cent upon the gross amount of the account.

II.—ENGINEERING WORK.

Lump Sum and Schedule Contracts

Percentage charges half those for architectural work but the same scale in respect of charges based upon time.

III.—LITIGATION AND ARBITRATION

For qualifying to give evidence, settling proofs, conferences with solicitors and counsel, attendance in courts or before arbitrators or other tribunals, and for other services in connexion, the charge is based upon the time involved, with a minimum of 5 guineas per day.

The above charges are exclusive of the cost of printing, lithography, and fair copies of accounts, and in all cases travelling and other out-of-pocket expenses are payable in addition to the fees.

CONSULTING ENGINEERS.

On *Constructional Work* the payment is usually an agreed fee or a commission (which includes the necessary drawings, &c.) of 5 per cent. on the cost of the works where the contract exceeds £5,000 and 7½ to 10 per cent. where the amount does not exceed £5,000.

For *Quantities and Accounts* (the services which in architectural work would not be covered by the Architect's fee but would be Quantity Surveyor's work) the usual charge is 1½ to 2 per cent. where the amount exceeds £5,000 and 2 to 2½ per cent. on amounts below £5,000.

AUCTIONEERS, SURVEYORS AND ESTATE AGENTS.

1. Sales by Auction.

Freehold, Leasehold, and Copyhold Properties, including the preparation of particulars, and advising as to reserves. On the first £300, 5 per cent.; on the next £4,700, 2½ per cent.; on the residue, 1½ per cent.

In addition to the above charges:—On amounts paid by the purchaser for *Chattels, Fixtures, Fittings, Trade Stocks*, and other *Movable Effects, Timber*, and *Tenant-right* under the conditions of sale, in addition to the purchase-money of the property:—5 per cent. on £500, and 2½ per cent. on residue, to include inventory and valuation.

Sale before Auction

After issue of advertisements, the same scale as by auction.

Non-Sale.

Charge equivalent to one-fourth of the commission which would have been earned on a sale up to £5,000 calculated on the reserve price, to include valuation for reserves; on larger amounts by arrangement.

Sale after Auction

In the event of the property being sold within three months after the auction, the charges for non-sale would merge into the ordinary commission then payable.

Furniture, Trade Stocks, and Chattels, on the Vendor's Premises.—5 per cent. on the amount realised, exclusive of preparation of catalogues.

Plant and Machinery.—5 per cent on the amount realised, exclusive of preparation of catalogues

Live and Dead Farming Stock (except Horses and Pedigree Cattle) —2½ per cent on live stock, and 5 per cent on dead stock, on the amount realised

Horses and Pedigree Cattle.—5 per cent on the amount realised

On Lots referred to in the last four paragraphs, reserved or bought in by or on behalf of the vendor. —One half the commission on sale, calculated on the amount of reserve or buying-in price

2. Private Treaty Sales.

Freehold and Copyhold Estates and Houses, and Ground Leases.—On the first £300, 5 per cent; on the next £4,700, 2½ per cent., on the residue, 1½ per cent., and a commission, in addition, on the amount paid for *Chattels, Fixtures, Fittings, Furniture, Trade Stocks*, and other *Movable Effects, Timber, and Tenant-right*, of 5 per cent. up to £500, and 2½ per cent. on the residue, to include inventory and valuation

NOTE.—*In Sales by Auction and Private Treaty Sales* —Where two Agents are co-operating at the request of the owner, the commission shall be at the rate of a scale and a quarter.

3. Purchases.

Freehold, Copyhold, or Leasehold Property —One-half of the scale for sale by private treaty, calculated upon the amount of the purchase-money, but including inspection, advising as to value, and negotiating or bidding. If no purchase is effected, the usual scale for valuation should be charged: one guinea per cent on first £1,000; half a guinea on next £9,000; and a quarter of a guinea per cent. beyond on the value of the property. Minimum fee, £5 5s

4. Lettings.

Business Premises, Unfurnished Houses, Flats, &c., or on Disposing of all Leases (other than Ground Leases) by assignment or otherwise.—If the annual value be £100 or less 5 per cent. on one year's rent, where the term is for one year or less, and 7½ per cent. on one year's rent where the term is for more than one year If the annual value be over £100 the above scale shall apply to the first £100 and on the excess rental over that amount, where the term is for three years or less, 5 per cent. on one year's rent; where the term is for more than three years, 7½ per cent. on one year's rent, in the case of *leases requiring the lessee to repair the demised premises* the commission is 10 per cent. on one year's rent, whatever the term. Upon the premium or consideration (in all cases), 5 per cent. up to £1,000, and 2½ per cent. on the residue; and the commission on any sum obtained for fixtures, furniture, or effects of any kind, of 5 per cent up to £500, and 2½ per cent. on the residue In the case of a progressive rent the commission is based on the average rent receivable. When a property, which an agent has been instructed to let or sell, is let by him, and the tenant afterwards purchases, the commission for selling, less the commission already paid on the letting, will then become payable.

For negotiating the Renting of Unfurnished Houses or Flats, excluding Survey or Valuation. —Half the commission payable for a letting.

On Letting Furnished Houses or Flats in Town or Country, or Shootings, including Collection of Rent —5 per cent. on the first year's rental, and 2½ per cent for the remainder of the term.

For negotiating the Renting of Furnished Houses or Flats, excluding Survey or Valuation. —Half the commission payable for a letting.

For Making or Checking Inventories of Furniture and Effects.—A minimum fee of two guineas per day, exclusive of expenses

On Letting Land on Building Lease —One year's ground rent on first £50, three quarters ditto on next £50, half ditto on next £900, quarter ditto on residue.

5. Collections or Receiverships.

10 per cent upon gross rental of weekly property; 5 per cent upon gross rental of other property or tithes; 7½ per cent. upon the gross rental for the management and collection of rents on agricultural estates, 2½ to 5 per cent. on ground rents, according to the amount of the rents and the number of collections.

6. Laying Out or Development of Estates

For Road Construction, 5 per cent. upon the outlay, exclusive of expenses

7. Valuations.

1. *Valuation of Freehold, Copyhold, or Leasehold Properties.*—A guinea per cent on the first £1,000; half a guinea per cent on the next £9,000, and a quarter of a guinea per cent beyond on the value of the property, subject to a minimum fee of five guineas.

2 *Of Property taken under Compulsory Powers.*—The charge is on Ryde's Scale The fee is exclusive of five guineas per day for attendances. Plans and disbursements extra.

3 *Valuing for Annual Rental.*—(*a*) *Agricultural Property*—7½ guineas per cent. up to £250, 5 guineas per cent. on the next £250, and 2½ guineas per cent. beyond. (*b*) *Business and Residential Property*—5 guineas per cent up to £300, and 2½ guineas per cent. beyond. Minimum fee 5 guineas

4. *Valuation of Furniture, Fixtures, and Effects* —5 per cent up to £500, and 2½ per cent on the residue.

5 *Valuation of Plant, Machinery, and Trade Stocks* —5 per cent on first £100, and 2½ per cent. on the residue.

6 *Valuation of Live and Dead Farming Stock* —5 guineas per cent. on first £100, and 2½ guineas per cent. on the residue. *Valuation of Tenant-Right* —5 guineas per cent on first £100, 2½ guineas per cent. on next £900 and 1½ guineas per cent on residue *For Settling Dilapidations.*—5 guineas per cent. on the amount of the settlement.

7 *Valuation of Hotel and Public House Fixture, Fittings, and Contents* —5 guineas per cent on the amount of the valuation as settled

8 *Valuation for Probate and Estate Duty Purposes*—(*a*) *Freehold, Copyhold, and Leasehold Property* —One guinea per cent on the first £1,000, half a guinea per cent. on the next £4,000, and one quarter-guinea per cent. on the remainder. Minimum fee, £5 5s. on each property.

(*b*) *Of Furniture and Effects* - 5 guineas per cent on the first £100, and 2½ guineas per cent. on the next £400, and 1½ guineas per cent. of the remainder of the amount of valuation, to include inventory. Minimum fee, £5 5s.

9 *Valuations for Rating purposes and Assessment Appeals.*—Graduated scale based on Gross Assessment, ranging from 5 guineas for £100 to 30 guineas for a gross assessment of £2,000, after which 1 guinea is added for every additional £100 up to £5,000; above £5,000 a charge of 1½ per cent. Additional charges are made for attendances before Assessment Committees or Quarter Sessions

10 *Preparing Specification of Dilapidations and settling the amount if required.* 5 guineas per cent. on the amount. Minimum fee, £5 5s.

11. *Marking, Valuation and Sale of Timber and Underwood.*—5 guineas per cent. on amount realised. When valuing only, 5 guineas per cent. on first £500, and 2½ guineas per cent. on the residue.

Where one Valuer acts between both parties the minimum charge shall be scale and a half, divisible between both parties.

THE COST OF THE GREAT WAR.

The Bankers' Trust Company of New York issued the following estimate in 1924 :—

Nation	Total Expenditure £
British Empire	13,577,900,000
Great Britain	11,076,000,000
Canada-Nfld.	762,700,000
Australia	476,700,000
New Zealand	234,400,000
South Africa	159,000,000
India	687,100,000
Other Parts	182,000,000
Belgium	411,800,000
France	7,962,200,000
Greece	115,100,000
Italy	4,432,700,000
Japan	419,100,000
Portugal	235,300,000
Rumania	308,800,000
Russia	5,312,700,000
Serbia	119,000,000
United States	8,105,000,000
Total, Allies	£40,963,600,000

Nation	Total Expenditure £
Austria-Hungary	4,068,400,000
Bulgaria	262,000,000
Germany	10,341,100,000
Turkey	451,800,000
Total	£15,122,300,000
Grand Total	£56,086,900,000

Relative Cost of the Great War

A table was also published showing the relative cost of the Great War to certain of the Nations which took part therein :—

Nation	Per Capita. $	National Wealth. Per cent
Great Britain	524·85	34·49
France	280·20	19·36
Italy	124·59	20·59
Russia	44·01	13·11
U.S.A	176·91	8·67
Austria-Hungary	108·76	18·13
Germany	292 57	24·71

The Royal Navy.

THE BOARD OF ADMIRALTY, Whitehall, S.W. 1.

First Lord of the Admiralty, Rt Hon William Clive Bridgeman, M P . . . . . (*with house*) £4,500
Naval Secretary, Rear-Adm E J A Fullerton, C B, D S O., M A £1,974
Sec. to Naval Secretary, Paym -Com A F Cooper, O B E

SHIPS OF THE ROYAL NAVY (Oct. 31, 1928).

(Including the Royal Australian, New Zealand, and Canadian Navies.)

NOTE.—Under the *Washington Treaty* of 1922 Great Britain, the United States, France, Italy and Japan agreed not to exceed a defined tonnage in replacement of obsolescent ships and fixed the maximum displacement of capital ships at 35,000 tons and limited their armament to the 16-in gun. Under the Pact the British Empire retains 22 capital ships with a total displacement of 580,540 tons.

POST-JUTLAND TYPES

Battleships.

Completed		Tons	Main Armament
1927	Rodney, Nelson	35,000	9 × 16in

Battle Cruiser.

—			
1920	Hood	41,000	8 × 15in.

Cruisers.

"*A*" Type. 10,000 8 × 8in.
(Maximum under Washington Pact.)

1927	Berwick, Cornwall Cumberland.		
1928	Kent, Suffolk		
1929	London, Devonshire.		
1929-30	Sussex, Shropshire.		
1930	Dorsetshire, Norfolk.		
	"*B*" Type.	8,400	6 × 8in.
1930	York.		
1930-31	Exeter		
—	Two to be laid down in 1929.		
1919-25	Hawkins, Frobisher, Effingham	9,500	7 × 7·5in
1925	Emerald, Enterprise ..	7,500	7 × 6in
1918-22	Danae, Dauntless, Delhi, Despatch, Dragon, Durban	4,650	6 × 6in.
	Lent to New Zealand Diomede, Dunedin.		
1918-22	Cairo, Calcutta, Capetown, Carlisle, Colombo	4,190	5 × 6in.

Destroyers.

1928	Amazon, Ambuscade, and 6 other (37 knots)	1,532-1,173	4 × 4·7in.

Submarines.

* From official sources

Almanacks.—The earliest printed Almanack (by Regiomontanus), was issued from Walther's press at Nuremberg in 1472. It was mainly astronomical with slight reference to astrology and medicine. It was followed six years later by one by Zanler John Stoffler, of Tubingen, published tables of feasts, eclipses, etc , in the year 1499, the astronomical source of these being the Alphonsine Tables (1252), the only established guide. The first almanack known to have been printed in England was the Shepheard's Kalendar, by Richard Pynson in 1497, but they were not in general use until the middle of the sixteenth century, one by Leonard Digges, which is mainly a collection of precepts for foretelling weather, and telling characters and fortunes by the stars being an example of those of that time. Almanacks were common on the continent before the end of the fifteenth century, and in France almanack makers were in 1579 forbidden by decree to prophesy, concerning either the State or individuals, but in England such almanack making was encouraged, and under the patronage of th Stationer's Company astrology flourished Lilly, Dee, Partridge, Wing, Moore are names associated with almanacks that combined physic with astrology. The first issue of the British *Nautical Almanac* is for the year 1767, *Whitaker's Almanack* was first published for the year 1869.

ESTABLISHMENT OF THE ARMY.

All Ranks.	1928 9.
Regimental Troops (exclusive of India)	189,052
do. do (Indian Establishment)	60,044
Colonial and Native Indian	2,778
Army Reserve	109,000
Supplementary, do.	22,085
Militia	—
Channel Islands Militia	1,326
Malta and Bermuda, do.	1,423
Territorial Army	183,500
O.T.C. (Officers and Permanent Staff)	1,245
Total	520,453

The corresponding total for 1927-8 was 512,801.

THE MILITIA.

In 1907 the "Old Constitutional Force" known as the "Militia" was transformed into the "Special Reserve," but the following Militia units were retained.—The Bermuda Militia Artillery, the Channel Islands Militia, and the Malta Militia. In 1921 the terms "Special Reserve (and Extra Reserve) Battalions" were abolished, and "Militia" restored, but no appointments are at present made to the force.

Militia in the War.—At the outbreak of the Great War all units were embodied, the majority being included in Defence Schemes. One or two units served abroad, but, generally speaking, the units were employed as training and reinforcing centres for the Armies in the field.

THE TERRITORIAL ARMY.

In 1907 the "Yeomanry" and the "Volunteers" were transferred into the Territorial Force, which included English, Welsh, and Scottish Cavalry; Royal Horse, Royal Field, and Royal Garrison Artillery; Royal Engineers; Infantry, Royal Army Service Corps and Royal Army Medical Corps. In 1921 the title was changed to "Territorial Army"

Territorials in the War—The strength of the Territorial Force in July, 1914, was about 265,000. During the Great War 310 new units were formed, and there passed through the ranks of the force about 50,000 officers and 1,000,000 other ranks. The Territorial Force suffered total battle casualties of 27,000 officers and nearly 600,000 other ranks, of which some 6,600 officers and 106,000 other ranks were killed. Among the war honours gained by officers and men of the Territorial Force were 70 Victoria Crosses.

THE KING'S PRIZE.

The King's Prize at Bisley, 1928, was won by Lance-Corporal Arthur C. Hale, late King Edward's School O.T.C., Birmingham, with a score of 283. In 1927 the winner was Capt. C. H. Vernon, late R.A M.C., with a score of 292.

OFFICIAL END OF THE WAR.

The *Official Termination of the War*, when all Treaties of Peace had been ratified by the respective Governments, was Aug. 31, 1921.

THE METEOROLOGICAL OFFICE.

The control is vested in a Director and Committee appointed by the Air Council. The *General Committee* of the Royal Society is an Advisory Committee for geophysical subjects. The work of the Office includes:—The collection and discussion of meteorological observations from oceans and land areas all over the world, the maintenance of a number of stations for daily telegraphic reports upon which gale warnings and forecasts are based; the maintenance of observatories for the study of weather, with which are associated other geophysical subjects; and the maintenance of stations in various parts of the country for the supply of meteorological information and other requirements of aircraft. The responsibility for the work of the *British Rainfall Organisation* was transferred to the Meteorological Office in July, 1919.

Chairman of Meteorological Committee, The Under Secretary of State for Air.

Director of Meteorological Office, G. C. Simpson, C.B., C.B.E., LL.D., D.Sc., F.R.S. £1,200

Assistant Directors, R. G. K. Lempfert, C.B.E., M.A., A.inst.P.; Lt.-Col. E. Gold, D.S.O., F.R.S., F. J. W. Whipple, M.A., Sc.D., A.inst.P.

Superintendents, E. G. Bilham, D.Sc (*Instruments*); Capt. L. A. Brooke Smith, R.D., R.N.R. (*Marine*); C. E. P. Brooks, D.Sc. (*General Climatology*), D. Brunt, M.A. (*Actg*); R. Corless, O.B.E., M.A. (*British Climatology and British Rainfall Organisation*); J. S. Dines, M.A. (*Forecast*); Capt. F. Entwistle, D.Sc (*Aviation*); Comm. L. G. Garbett, R.N. (*Navy*); M. A. RELIGIONS AND LANGUAGES OF THE BRITISH ISLES.

The inhabitants of Great Britain and Ireland are almost entirely Christians, the exceptions being about 300,000 Jews and a small number of non-Christian immigrants. In England the Church of England (with an Episcopal form of Government), and in Scotland the Church of Scotland (with a Presbyterian form of Government), are the "Established Religions." The Church was disestablished in Ireland in 1869, and in Wales in 1920. There has been no religious census since 1851, but many of the religious bodies publish estimates of membership, the *Church of England* having 2,518,674 communicants in England at Easter 1925, the *Roman Catholic Church* claiming 2,055,060 members in England and Wales, 606,650 in Scotland (1927), and 3,242,670 in Ireland (1911). The language of the people is English, with a large proportion of Welsh-speaking people in Wales, many of whom are bi-lingual. Attempts are being made to revive the Gaelic language in the Irish Free State. Gaelic is still spoken in the Highlands and Islands of Scotland, there being 10,314 persons speaking Gaelic only, and 151,159 speaking Gaelic and English at the Census of 1921.

THE CHURCH ASSEMBLY.

Clergy Pensions (Amendment) Measure, 1928 (Aug. 3 1928)
Tithe (Administration of Trusts) Measure, 1928 (Aug. 3, 1928)

THE CHURCH ASSEMBLY (or "National Assembly of the Church of England") was established in 1920, "to deliberate on all matters concerning the Church of England and to make provision in respect thereof." The Assembly consists of three Houses, composed of Bishops, Clergy, and Laity respectively. The first two Houses consist of the Convocations of Canterbury and York, of which the respective Upper Houses form the *House of Bishops*, and the respective Lower Houses the *House of Clergy*, the *House of Laity* comprises representatives of the Laity of the Provinces of Canterbury and York, elected every five years by the Lay members of the Diocesan Conferences, who consist mainly of representatives elected, either directly or indirectly, by members of the Church of England on a roll prepared in each parish.

The *Church Assembly* is free to discuss any proposal concerning the Church of England, and to make provision in respect of such matters, but where this includes Parliamentary sanction for any alteration contemplated, this authority is to be sought in the manner prescribed by the *Church of England Assembly (Powers) Act*, 1919, often referred to as the "Enabling Act." It is specially provided that any innovation touching doctrinal formulæ, or the services or ceremonies of the Church, or the administration of the Sacraments or sacred rites thereof, must be debated and voted upon by each of the three Houses sitting separately, and must then be either accepted or rejected by the Assembly in the terms in which it is finally proposed by the House of Bishops. It is further laid down that the Assembly or any of the three Houses may debate and formulate its judgment by resolution upon any matter concerning the Church, or otherwise of religious or public interest, but the Assembly may not issue any statement purporting to define the doctrine of the Church on any question of theology. None of the powers belonging to the Convocations of Canterbury and York is to be diminished or derogated by the Assembly, which is also prohibited from exercising any power or performing any function distinctively belonging to the Bishops by right of their episcopal office.

Parochial affairs are managed by Parochial Church Meetings of parishioners who are members of the Church of England and by Church Councils elected by such meetings.

General Statistics.—The number of baptisms in 1926 was 466,913, the Easter communicants in the various English Dioceses numbered 2,510,037. The total gross income of 12,906 incumbents was £6,402,605. including £200,041 contributed as Easter offerings. The stipends of the assistant clergy were £1,039,813 The amount of voluntary parochial contributions in the 40 dioceses of England was £7,110,061, and the total from all sources £9,818,205

Central Board of Finance.—Receipts in 1927 amounted to £133,484, of which sum Diocesan contributions amounted to £95,977. Below are the principal items of expenditure:—

Training. Ex-Service and civilian	£4,561
Religious education	33,634
Special purposes	450
Missionary Council	5,092
Investment of Gifts to Capital	6,000
Clergy Pensions	50,000
Overseas Fund	7,531
Sponsor's Scheme	4,763
General Administration: Convocations, Church Assembly, Central Board, Organisation, &c., committees	23,215
*Total expenditure	£134,745
Total receipts	133,484

OFFICERS OF THE ASSEMBLY.

Chairman, The Archbishop of Canterbury.
Vice-Chairman, The Archbishop of York.
Treasurer, Col Sir R Williams, Bart.
Secretary, Sir Philip W. Baker-Wilbraham, Bart.
Assistant Secretary, Guy H. Guillum Scott.
Financial Secretary and Secretary to Legal Board, Canon F. Partridge.
Secretary Central Advisory Council of Training for the Ministry, Rev. Frank Woolnough
Sec. to Miss. Council, Canon Garfield H. Williams.

ST PATRICK'S NATIONAL CATHEDRAL, DUBLIN.

Dean and Ordinary, Very Rev. Hugh Jackson Lawlor, D.D., Litt.D.

GENERAL SYNOD,

Consisting of House of Bishops (13) and House of Representatives (viz., 208 clerical and 416 lay).

Honorary Secretaries, Ven. C. K. Irwin, B.D., Very Rev. H. B. Kennedy, B.D., J. A. Maconchy and Major E. H. C. Wellesley

Secretary to the REPRESENTATIVE CHURCH BODY (INCORPORATED 1870), A. F. Maude, 52 St. Stephen's Green E., Dublin, *Asst Sec* Rev. J. H. Yates, B.D.

Chief Accountant—George B. Butler.

By the Act of Union, 1800, the Church of Ireland was united with the Church of England, the Sovereign, as one of its members, being supreme governor on earth. By the Act of 1869 this union was severed, and on Jan. 1, 1871, the Church of Ireland resumed her independent position. The Act of 1869 not only disestablished the Irish Church, but also took away her endowments, nothing being left but the right to the life services of the Annuitant Bishops and Clergy (which were commuted for a capital sum), the right to claim churches in use for divine service, the right to buy the See and Glebe Houses (with garden and curtilage), and £500,000 in lieu of private endowments.

The supreme governing body of the Church of Ireland is the GENERAL SYNOD, which meets annually.

Subject to the GENERAL SYNOD are 20 *Diocesan Synods*, which are assisted by smaller elected bodies called Diocesan Councils.

The Bishop of the Diocese is chosen by the clerical and lay members of the *Diocesan Synod*. The Primate is chosen by the House of Bishops from amongst their own number

The incumbent of the Parish is appointed by a *Board of Nomination*, consisting of 7 persons, viz.—The Bishop, 3 diocesan nominators (2 clerical and 1 lay) appointed by the Diocesan Synod, and 3 parochial nominators (lay) appointed by the registered vestrymen of the parish.

The financial trustees of the Church are the REPRESENTATIVE BODY, composed of the Archbishops and Bishops, 13 clergymen and 26 laymen, chosen by the Diocesan Synods, with 13 co opted members (clerical or lay). This body holds the property of the Church, and administers its funds, subject to the General Synod.

The first property it held was the capital sum £7,581,075, representing the life annuities of the Bishops and Clergy paid over as commutation money by the Church Commissioners, and also £500,000 compensation for private endowments. The commutation capital on Dec. 31, 1927, was only £37,749, charged with annuities to 12 annuitants. The funds, however, in the custody of the Representative Body amounted in all to £10,317,137, made up of *Commutation* £37,749 *Private Endowments* £342,470, *Parochial Sustentation* £6,961,643, *Episcopal Sustentation* £572,089, *General Synod Funds* £684,850, and *Miscellaneous purposes* £1,718,336.

Since 1869 members of the Church have paid in to the Representative Body a total sum of £10,054,754. The interest of the Diocesan and Parochial Sustentation and other Funds is approximately £353,538. The total amount of *assessment* for stipend paid by parishes, 1927, was £208,406, and the total amount paid for *stipends* under Diocesan Schemes was £338,597.

THE CHURCH OF SCOTLAND.

THE CHURCH OF SCOTLAND is Presbyterian in constitution, and is governed by Kirk Sessions, Presbyteries, Synods, and the General Assembly, which consists of both clerical and lay representatives from each of the Presbyteries, and also from the Universities and lay representatives from the Royal Burghs. It is presided over by a Moderator (chosen annually by the Assembly), to whom His Majesty the King has granted precedence in Scotland, during his term of office, next after the Lord Chancellor of Great Britain. The Sovereign is represented by a Lord High Commissioner (appointed each year by the Crown), who receives the sum of £2,000 towards his expenses. The country, for Church purposes, is divided into 16 Synods and 84 Presbyteries, and there are about 1,800 ministers and licentiates engaged in ministerial and other work. The number of communicants on the roll (Dec 31, 1927) was 759,797. The sum of £742,691 16s. 1d was (apart from Seat Rents levied by Church Authority and amounting to £73,538 1s. 1d.), but including legacies, amounted to £26,389 17s 4d., raised in 1927 for church and missionary purposes. Within the last 80 years considerably over 500 chapels, at a cost for stipends and supplementary endowments of over £2,450,000, have been endowed and erected into parishes *quoad sacra*. The parish churches number 1,470. There are in addition 245 churches and mission stations, in all of which worship is regularly conducted.

Until 1560 the Church of Scotland was Roman Catholic, but in that year the Scots Parliament abolished the jurisdiction of the Pope, proscribed the Mass, and ratified a Confession of Faith drawn up by John Knox and other divines. In it all essential articles of the ancient creeds of the Church were adhered to. Ceremonies were declared to be temporary in their nature, and should be altered when they began to foster superstition. Presbytery was settled in 1590. The restoration of the rights of the Bishops, civil and ecclesiastical, was, however, sanctioned by the General Assembly of 1610, and three Scottish Bishops were in that year consecrated in London. Further innovations by King James VI. alarmed the people, and the attempt of Charles I. to impose on the Church a Book of Canons and a Liturgy was met by the *National Covenant* and the restoration of Presbyterian forms, which culminated in the *Westminster Confession of Faith* in 1646. At the Restoration the Church again became Episcopal, but in 1690 the Scottish Parliament re-established Presbyterianism. By the Treaty of Union between England and Scotland (ratified by the English Parliament 6 Anne c. 11.) the Church of Scotland was secured in its Presbyterian form of government, and the very first official act of a sovereign of the British Empire on his *accession* is to take an oath to maintain inviolably this settlement. In 1921 Parliament passed the *Church of Scotland Act*, 1921, to declare the lawfulness of certain articles declaratory of the constitution of the Church of Scotland. The articles have been framed with a view to facilitating union among Presbyterian Churches in Scotland. A committee, appointed by the Secretary for Scotland (under the Presidency of Viscount Haldane), enquired into the question of endowments, following upon which the Church of Scotland (Property and Endowments Bill) was introduced and was passed into law (15 and 16 Geo. V. c. 33) in 1925. The primary purpose of this legislative measure was to transfer to and vest in the Church of Scotland General Trustees, incorporated under the Church of Scotland (General Trustees) Order Confirmation Act 1921, the whole properties and endowments belonging to the Church for behoof the latter.

LORD HIGH COMMISSIONER, The Earl Stair, D.S.O., Holyrood Palace, Edinburgh.

MODERATOR (1928), Right Rev. J. Montgomery Campbell, D.D.,

Principal Clerk, Rev. J. T. Cox, D.D.

Depute Clerk, Rev. Duncan Cameron, B.D.

Procurator, William Chree, K.C., LL.D.

Agent of the Church, and Chairman of General Trustees, J. A. S. Millar, M.V.O., W.S., 20 Castle St., Edinburgh.

Parliamentary Solicitor, A. H. Speus, London.

OTHER PRESBYTERIAN CHURCHES.

(1) *The United Free Church of Scotland*, by rearrangement of the Synods and Presbyteries, has 12 Synods and 63 Presbyteries, and 2 Continental Presbyteries. The Supreme Court is the General Assembly, which meets the third week of May every year at the same time as that of the Established Church and of the remanent Free Church of Scotland. In the year ending Dec. 31, 1927, there were 1,441 congregations and 46 preaching stations. The total membership was 536,380, and there were 2,031 Sunday Schools, with 185,617 scholars and 25,180 teachers. In 15 Foreign Mission Fields there are 434 European Mission Agents (and in addition 180 missionaries' wives, many of whom are doing mission work in the various fields) and 5,340 native pastors, evangelists, and teachers, including in both cases those of the Women's Foreign Mission. The amount raised on the field in 1927 was £309,354. The income of the Church at the close of last financial year 1927 amounted to £1,543,752. — *Moderator* (1928-9), Rev. J. Harry Miller, C.B.E., D.D.—*Offices*, 121 George Street, Edinburgh; and 232 St. Vincent Street, Glasgow.

(2) *The Presbyterian Church in Ireland* —The largest of the Presbyterian churches in Ireland consists of 35 presbyteries, 585 ministers, 560 congregations, with 120,161 communicants, 94,042 families, 7,964 Sabbath-school teachers, and 100,345 scholars. During the 12 months ended Dec. 31, 1927, this branch contributed by congregational effort £370,030 for religious, charitable, and missionary purposes. The total income for the period for all purposes was £467,953.—*Moderator*, Rt. Rev. Thomas A. Smyth, M.A., LL.B. *General Secretary*, Rev. W. J. Lowe, D.D., Church House, Belfast. *Junior General Secretary*, Rev. W. A. Watson, M.A., B.D.

(3) *The Presbyterian Church of England* has 14 presbyteries, 352 congregations, 6 preaching stations, and 84,764 members. It has a Theological College (Westminster College, Cambridge), and supports 68 missionaries abroad, including 34 women. In 1927 the amount raised for all purposes was £408,737.—*Moderator* (1928-9), Rev. Prof. Carnegie Simpson, D.D. *Gen. Sec.*, Rev. W. Lewis Robertson, M.A. *Fin. Sec.*, Percy Graham. *Church Offices*: 15 Russell Square, W.C. 1. *Publications Office*: 21 Warwick Lane, Paternoster Row, E.C. 4.

UNDER the general designation of METHODISTS are included all those religious bodies which owe their existence, directly or indirectly, to the efforts of the Revds John and Charles Wesley. The most numerous and influential of them are—

WESLEYAN METHODISTS

1. *Wesleyan Methodists*, the original body founded in 1739 by these two brothers. The first *Conference*, consisting of six clergymen and four laymen, was held in 1744. Since then the growth of Methodism has been great, its present adherents being given as 32,000,000. The latest statistics of Methodism throughout the world (1927) are Ministers, 59,824; local preachers, 95,081, members and probationers, 11,869,388; Sunday schools, 79,372, officers and teachers, 1,023,673, scholars, 10,086,907; churches and other preaching places, 105,596. The conference is now composed in its Representative Session of 300 ministers and 300 laymen, with a ministerial president and secretary at its head, elected year by year. The Wesleyans are governed primarily by the Conference, secondarily by the Synods, which are semi-annual meetings of the ministers and selected laymen in each district, over which a chairman is appointed by the Conference, and thirdly by quarterly meetings of the ministers and lay officers of each circuit. The authority of both these last meetings is subordinate to the Conference, which has the supreme legislative and judicial power in Methodism.—*Pres. Designate* (1929), Rev William Frederick Lofthouse, M.A., D.D., Endcliffe Cottage, Friary Road, Handsworth, Birmingham; *Sec of the Conf*, Rev. Robert Bond, 107 Palace Road, Tulse Hill, London, S.W. 2.

THE PRIMITIVE METHODISTS.

2 *The Primitive Methodists*, who sprang up in Staffordshire, in 1810, under the leadership of Hugh Bourne and William Clowes. Owing to the excesses attending certain outdoor services called "camp meetings," the Wesleyan Conference prohibited the continuance of the practice. Bourne and Clowes refused to comply with this decision, and were in consequence expelled. They and their sympathisers banded together in a new body, with enlarged powers for the laity. Next to the Wesleyans they are the most numerous and the most democratic of all the denominations which have arisen out of the Methodist movement.—*Pres. Designate* (1929), Rev James H. Saxton, 56 Kingsley Road, Northampton. *Gen. Sec. of the Church*, W. Musson Kelley, St. Osyth, Lowther Hill, Forest Hill, London, S.E. 23.

THE UNITED METHODIST CHURCH.

3. *The United Methodist Church* was formed by the Union in 1907 of three denominations of Methodists which hitherto had been separate from and independent of each other. These were:—

The Methodist New Connexion, which owed its origin in 1797 to the Rev. Alexander Kilham, one of the early itinerating Wesleyan preachers. He demanded that the members of the societies, and not the Conference, should be constituted the source of all power in Methodism; and that the Conference should consist of lay as well as ministerial members, all of whom should be elected by the members of the various societies as their delegates. He was expelled by the Conference, and at once founded a new community.

The Bible Christians, founded in 1815 by Wm. O'Bryan, a Wesleyan lay preacher in Cornwall. They existed mainly in the West of England.

The United Methodist Free Churches, which was itself an amalgamation of three different secessions—the Protestant Methodists, formed in 1828; the Wesleyan Methodist Association, which sprang out of a controversy in 1834, concerning the need for a trained ministry; and the Wesleyan Reform Association, founded in 1849, during a great agitation. A strong opposition to the leading Wesleyan officials was organised, which found expression in Conference debates, but more strongly in anonymous and bitter pamphlets, which were widely circulated. On suspicion of being the authors and circulators of these pamphlets three ministers were expelled. They found so many sympathisers that over 100,000 members seceded to found a new denomination.

An Act of Parliament was secured in 1907 to authorise the union of these three denominations into one, to be called the United Methodist Church, and to provide for the government of the Church by a Conference consisting of an equal number of ministers and laymen, elected by districts. The act of union took place in London on September 17, 1907, when the first united Conference was held. About 700 delegates were present. A deed was adopted and signed, declaring the terms of union, defining the constitution and doctrinal tenets, and containing provisions for government and discipline.—*President* (1928 29), Rev. C. Stedeford, 13 Silverbirch Road, Erdington, Birmingham; *Pres. Designate* (1929–30), Rev. R. H. B. Shapland, St. Paul's Square, Burton-on-Trent; *Sec.*, J. Duckworth, J.P., The Grange, Birch, Heywood, Lancs.

INDEPENDENT METHODISTS.

4. *Independent Methodists*. This body is Congregational in its organisation, with an unpaid Ministry. Its first Conference was held in 1805.

WESLEYAN REFORM UNION.

5. This Union is Methodist in doctrine, Congregational in government, with, if any church desires it, a paid ministry. It is the remnant of the original reformers who seceded from Wesleyan Methodism in 1849. The adherents are mainly in the Midland counties. *Pres. Elect* (1929), Rev. S. J. Smith, "Elim," Upper Hayden Road, High Wycombe, Bucks; *Gen. Sec.*, Rev. G. A. Metcalfe, Wesleyan Reform Book Room, 25 Change Alley, Sheffield.

RE-UNION

A scheme for the re-union of the Wesleyan Methodists, the Primitive Methodists and the United Methodist Churches has been approved by all three Conferences. The Wesleyan Methodists have referred it to the Provincial Synods for further consideration and approval. If the scheme be adopted, as seems probable, an Enabling Bill in Parliament will be necessary. It is anticipated that the first United Conference will meet in 1933.

The Statistics relate to Great Britain and Ireland only and are for the year 1928.

	Ministers	Lay Preachers.	Members	Chapels.	Sunday Scholars.
Wesleyan Methodists	2,784	19,680	550,070	9,020	826,894

Wesleyan Reform Union	26	472	10,875	222	24,982

THE CALVINISTIC METHODIST (PRESBYTERIAN) CHURCH OF WALES.

The CALVINISTIC METHODIST OR PRESBYTERIAN CHURCH OF WALES is the only Church of purely Welsh origin, and embraces a very large section of the Welsh-speaking population. Its form of government being Presbyterian, it is in federation with the Presbyterian Church of England, the United Free Church of Scotland, and the Presbyterian Church of Ireland. It is also a constituent of the Pan-Presbyterian Council or Alliance. It has foreign missions in Assam, India, and in Brittany. Churches in Assam, 1,399, communicants, 78,988; adherents (including communicants), 84,058.

In 1927 the body numbered—churches, 1,504, chapels and other buildings for Sunday-school branches, 1,756; ministers and preachers, 1,148, elders, 7,263, communicants, 189,132; on probation, 1,369; Sunday-school teachers and officers, 23,773; teachers and scholars, 179,532; adherents (including communicants), 308,144. Contributions in aid of the Ministry in 1927, £203,198. For various religious purposes (including the ministry), £461,596.

One of the features of the Welsh churches is the Sunday-school, which is attended by adults as well as children, the vernacular is the language used generally in these schools. The English branch of the Church has 379 chapels and preaching stations, with 35,498 communicants. All the rest are Welsh.

Moderator (*South Wales*) *Synod*, Rev. Peter Hughes Griffith, London; (*North Wales*) Lord Clwyd.

Moderator of General Assembly, Rev. E. O. Dines, M.A., B.Sc., Bangor.

Statistical Secretaries, Rev. J. Pritchard, M.A., B.D., Llanberis, and Mr. J. J. Jeremy, Carmarthen.

THE INDEPENDENTS

The INDEPENDENTS, or CONGREGATIONALISTS, are the most ancient community of Dissenters. In 1831 the majority of their churches were formed into the Congregational Union of England and Wales, incorporated in 1902, and in 1920 nine districts were formed, each under a Moderator. There are 51 county and other Associations in the British Isles, with 4,754 churches and preaching stations; the number of ministers in the British Isles is 2,916. *Chairman of the Congregational Union of England and Wales*, 1928-29 (*Joint Chairmen*), Rev. Bertram Smith and Francis Wrigley, B.A. *Secretary*, Rev. Sidney M. Berry, D.D. *Office and Publication Department*, 22, Memorial Hall, Farringdon St., E.C 4.

The *Countess of Huntingdon's Connexion*, with 37 chapels and mission stations, is governed by nine trustees assisted by an annual conference of ministers and delegates. *Secretary*, E. Dolby Shelton. *Offices*, 4x, Holborn Hall, Gray's Inn Road, W.C. 1.

AND THE BAPTISTS.

The BAPTISTS are, in all respects but one, similar to the Congregationalists; they have the same form of Church government, and differ but in one point of practice—viz., the Baptism by immersion of believers only. Like the Congregationalists, they are for the most part grouped in associations of churches, and the majority of these belong to the Baptist Union, which was formed in 1813. In the British Isles there were, in 1927, 4,203 chapels and 2,102 pastors. The members numbered 415,083, Sunday-school teachers 60,048, and Sunday scholars 509,468. In the United States the "members" alone number 8,347,331. *President of the Baptist Union*, 1928-29, A. R. Doggart, J.P. *Secretary*, Rev. M. E. Aubrey. *Office*, The Baptist Church House, 4, Southampton Row, London, W.C. 1.

The *Strict and Particular Baptists* have about 600 places of worship in England and Wales, and over 20,000 members, with two Foreign mission fields.

MINOR RELIGIOUS DENOMINATIONS.

The chief of the Minor Religious Denominations is the General Assembly of **Unitarian and Free Christian Churches**, with about 350 ministers, 345 chapels and other places of worship. *Gen. Sec.*, Rev. Mortimer Rowe, B.A., Essex Hall, Essex Street, W.C. 2. The **Brethren** number about 80,000, of whom five-eighths belong to the "Open" body. The **Society of Friends (Quakers)** consists of 19,044 members and has 390 places of worship in Great Britain, with 25 places of worship in Ireland and 2,197 members. *Central Offices* (*Great Britain*), Friends House, Euston Rd., N.W. 1; (*Ireland*), 6 Eustace Street, Dublin. The **Churches of Christ** have 24,277 members and 186 churches in the British Isles, with 159 Sunday Schools, 1,739 teachers, and 16,821 scholars. The **Church of Christ, Scientist**, has in the British Isles 193 branches of The *First Church of Christ, Scientist*, in Boston, Mass., U.S.A (*Offices*, Talbot House, Arundel Street, Strand, W.C. 2). The **Moravian Church** (*Offices*, 32 Fetter Lane, E.C.) has in the U.K. 41 congregations and preaching stations, with 3,511 communicants. The **Catholic Apostolic Church** has above 80 churches, including a fine Gothic building in Gordon Square, W.C.; the New Church (**Swedenborgian**), 75 societies with about 6,700 registered members; the Latter-Day Saints (**Mormons**) have 82 churches. The **Free Church of England** (otherwise called The Reformed Episcopal Church) combines two churches, the Free Church founded in 1844 and the Reformed Church founded (in New York) in 1873. *Presiding Bishop*, Rt. Rev. R. Brook Lander, D.D., Sutton Lodge, Sutton, Surrey; *Gen. Sec.*, Rev. A. V. Bland, D.D., Rydal Mount, Morecambe. **The Old Roman Catholic Church**: *Archbishop in Gt. Britain*, Most Rev. Bernard Mary Williams, Madam's Wood, Painswick, Stroud, Glos. **The Seventh Day Adventists** (*Hdqrs.*, Stanborough Park, Watford, Herts) have 67 organized churches, 32 companies, and 4,628 members in the British Isles. The **Greeks** (*Exarch of Western and Northern Europe*, Metropolitan of Thyateira, Archbishop Germanos, 20, Newton Road, Bayswater, W. 2) have St. Sophia's Cathedral (Moscow Road, W. 2) and churches in Manchester, Liverpool, and Cardiff. The **Armenians** have a church in London (S. Sarkis, Iverna Gardens) and in Manchester (St. Trinity, Upper Brook Street), the **French, Dutch, Swedes, and Swiss** in London, Norwich, and Canterbury; and there is a mosque for **Moslems** in Melrose Road, Southfields.

The Jews. — Among the inhabitants of the United Kingdom are about 300,000 **Jews**, mainly in London and other large towns, who possess 300 synagogues, with about 200 ministers and readers. *Chief Rabbi*, Very Rev. Dr. J. H. Hertz. Chief Rabbi's Office, 4, St. James's Place, Aldgate, E.C. 3. Their number throughout the world is computed at 15,000,000.

In *England* and *Wales* there are 4 Archiepiscopal and 24 Episcopal Sees; in *Scotland* 2 Archiepiscopal and 4 Episcopal Sees; in *Ireland* 4 Archiepiscopal and 24 Episcopal Sees. In the *British Empire* there are 40 Archiepiscopal and 122 Episcopal Sees, with 53 Vicariates and 26 Prefectures.

The *Catholic Directory* of 1927 estimates the Catholic population of England and Wales (1926) at 2,055,860, Scotland 606,650, Ireland (Census figures 1911) 3,242,670. The figures for India (1928) are 2,856,237, Ceylon (1921) 385,507, Canada (1921) 3,383,663, Australian Commonwealth (1921) 1,172,661, New Zealand (1921) 165,577, and Union of South Africa 165,630, the total for the British Empire being 15,289,660; and the Catholic population of the world is estimated at 334,664,791.

ST. PAUL'S CATHEDRAL, City of London, E.C. 4. (1675-1710) cost £747,660. The cross on the dome is 365 ft. above the ground level, the inner cupola 218 ft. above the floor. "Great Paul," in S.W. tower, weighs 17 tons. Organ by Father Smith (enlarged by Willis) in case carved by Grinling Gibbons (who also carved the choir stalls). Nave and transepts free; Fees to the following parts (on week-days only): Library, whispering gallery, and stone gallery, 6*d*.; golden gallery, 1*s*; crypt, 6*d*.; ball, 1*s*; total, 3*s*. Service on Sundays at 8, *10.30, *3.15, and *7. Weekdays at 8, *10, 1.15, *4. (*Services are choral). To the S. are remains of the Chapter House and Cloisters of "Old St Paul's," destroyed by the Fire of London in 1666.

WESTMINSTER ABBEY, S.W. 1 (built A.D. 1050-1760). — Open on week-days at 8 a.m. Admission to Royal Chapels by fee of 6*d*., except on Mondays (open free); wax effigies, 6*d*. Norman undercroft, 3*d*. Transepts open on Sundays for service only, and Nave only between services. Holy Communion at 8; Morning Prayer and Holy Communion at 10.15. Evening Prayer at 3. Litany and Sermon at 6.30. Daily—Holy Communion at 8 a.m., School Service at 9.30; choral services at 10 and 3. Chapel of Henry VII., Chapter House, and Cloisters, King Edward the Confessor's shrine, A.D. 1269, tombs of kings (Edward I., Edward III., Henry V., Mary, Queen of Scots, Queen Elizabeth), and many other monuments and objects of interest, especially the grave of "An Unknown Warrior" at the W. end of Nave (1920), and Poets' Corner. The Coronation Chair encloses the "Stone of Scone," brought from Scotland by Edward I. in 1297. The Chapel of the Pyx is open on Tuesday and Saturday.

SOUTHWARK CATHEDRAL, south side of the Thames, near London Bridge, S.E. 1.—Mainly 13th century. Known as St. Mary Overie previous to 1540. Open 7.30 a.m. to 6 p.m., free. Sunday services, 7.30, 8, and 11 a.m. (choral) and 6.30 p.m. (choral). Week-days 7.30, 8 and 5 p.m. (choral). The tomb of John Gower (1330-1408) is between the Bunyan and Chaucer memorial windows, in the N. aisle, the altar screen (erected 1520) has been restored, the tomb of Bishop Andrewes (died 1625) is near screen. The Early English Lady Chapel (behind the choir) is the scene of the Consistory Courts of the reign of Mary (Gardiner and Bonner), and is still used for this purpose.

ALL HALLOWS, Barking-by-the-Tower, E.C. 3—15th century church, containing a very fine series of brass effigies, Jacobean pulpit with Sussex ironwork and font cover ascribed to Grinling Gibbons; crypt of earlier church rediscovered in 1926.

ALL SAINTS, Margaret Street, W. 1. Built by Butterfield in 1859. Anglo-Catholic and noted for its music.

BOW CHURCH (ST MARY-LE-BOW), Cheapside, E.C. 2.—Rebuilt by Wren with beautiful steeple (222 ft.) 11th century crypt and church open daily (except M.) 10 a.m. to 5 p.m. Since 17th century anyone born within sound of the bells of Bow Church has been designated a "Cockney." The 11th century church was built on stone arches or "bows."

CHRIST CHURCH, GREYFRIARS, E.C. 1.—Rebuilt by Wren. The organ (repaired 1921) is by Renatus Harris, and the marble font is attributed to Grinling Gibbons. Until removal to Horsham (1902) the boys of Christ's Hospital (Blue Coat School), the site of which is now occupied by the G.P.O., attended services at Christ Church and the galleries contain seats with raised benches for the "Grecians." Blue Coat School boys still attend annually on St. Matthew's Day (Sept. 21). "Spital Sermon" is preached at Christ Church at Easter.

CHRIST CHURCH, Victoria Street, Westminster, S.W. 1.—*Vicar*, Rev. P. T. R. R. Kirk, M.A.

GUARDS' CHAPEL, Wellington Barracks (Birdcage Walk, St. James's Pk., S.W. 1).—Chapel redecorated in 1878. Open to visitors on week days, 10 to 1 and 2 to 4 (Mondays and Saturdays, 10 to 12). Parade service on Sundays at 11 a.m. (tickets of admission can be obtained on application to the Chaplain, R.M. Chapel, Wellington Barracks); Holy Communion, 8 a.m.; evening service at 6.30 p.m. (no tickets required for these services).

HOLY TRINITY, Minories, Aldgate, E. 1 —(Dismantled and now a Sunday school) Contains a mural monument with the arms of the Earls of Dartmouth and of a member of that family (Legge) in which the arms of George Washington are quartered with those of the Legges

MARYLEBONE CHAPEL, High Street, Marylebone, W. 1.—The former Parish Church of the village of Marylebone (now replaced by St Mary'lebone Church), was rebuilt in early 18th century In the churchyard lie Allan Ramsay (poet), Hoyle (whist), Ferguson (astronomer), Charles Wesley (hymn writer) and his son Samuel Wesley (musician)

ST. ALBAN, Brooke Street, Holborn, E.C. 1.—A brick building by Butterfield (1858). Anglo-Catholic and noted for its music; organ by Willis. *Vicar*, Rev. H. Ross. Services on Sundays Holy Eucharist at 7 and 8; choral at 9.30; solemn, with sermon, at 11, matins, 10.30; litany, baptisms, and churchings at 2 15; children's service and catechising, 3, evensong at 6.30; frequent mission services. Open daily, 6.45 a.m. to 9 p.m.

ST. ANDREW BY THE WARDROBE, Queen Victoria Street, E.C 4 (near the site of the King's Wardrobe). Rebuilt by Wren.

ST. ANDREW UNDERSHAFT, St. Mary Axe, Leadenhall Street, E.C 3 —An early 16th century church, contains a monument of Stow, the London antiquary, and a memorial of Holbein The organ is by Renatus Harris, the rival of Father Smith

ST. ANNE'S, Wardour Street, Soho, W. 1 —Built in 17th century and noted for its music. Monument of William Hazlitt in the churchyard.

ST. BARTHOLOMEW'S Priory Church, Smithfield, E C. 1, the oldest church in London (A.D. 1123) — *Rector*, Rev. W. F. C. Sandwith, M.A. Fine old Norman building, with tomb of the first prior, Rahere N. transept restored and reopened in June, 1893 Crypt, Lady Chapel and Cloisters opened 1905 1928. Open free daily (Sundays for service only, 8.45; 11.0; 6.30).

ST. BENET, Paul's Wharf, Upper Thames Street, E C 4 - Rebuilt by Wren, 1683; Inigo Jones, 1573–1652, and his father and mother, were buried in former church. St Benet is the Metropolitan Welch Church.

ST. BRIDE'S CHURCH, Fleet Street, E.C. 4.—Rebuilt by Wren, with beautiful spire (226 ft.). Samuel Richardson, the novelist, is buried in the nave. In the old church Lovelace, Sackville and Wynkyn de Worde were buried, and Samuel Pepys was baptized.

ST. CLEMENT DANES, Strand W.C. 2.—Rebuilt by Wren on site of earlier church assigned to the Danish settlers. The traditional burial place of Harold Harefoot (King Harold I., *see* p. 102) son of Canute. The organ is by Father Smith; the bells are those celebrated in the familiar nursery rhyme "Oranges and Lemons," and the air is among those played on the chimes (since 1920). Owing to the historical association of this church with the kingdom of Denmark, Danish ceremonies are now and then performed there. Dr. Johnson's pew in gallery and monument outside E. end.

ST. CLEMENT'S, Clement's Lane, Lombard Street, E.C. 3 — Rebuilt by Wren, contains handsome carvings on pulpit and font, and some chained books.

ST. DUNSTAN'S IN THE EAST, Idol Lane, Lower Thames Street, E C. 3.--Rebuilt by Wren with fine tower and spire; rest of church rebuilt, 1817–1821; contains many monuments.

ST. EDMUND, KING AND MARTYR, Lombard Street, E C. 3.—Rebuilt by Wren, with altar at north end, organ by Renatus Harris. Restored and re-opened 1919, after damage by Air Raid, July 7, 1917.

ST ETHELBURGA'S, Bishopsgate, E.C 2. (14th and 15th century)—On April 19, 1607, Henry Hudson (the navigator who gave his name to Hudson's Bay and to the Hudson River), his son John, and his ten sailors took communion in St. Ethelburga's, "purposing to goe to sea foure days after."

ST GEORGE'S, Hanover Square, W 1 (18th century, famous for fashionable marriages).—"George Eliot," Mr. Asquith, and Theodore Roosevelt were among those married here

ST. GEORGE'S, Southwark, S.E —(Rebuilt 1736) contains the tombs of Bishop Bonner (1497–1569) and Edward Cocker (1631–1675), the author of Cocker's "Arithmetik." (The expression, "according to Cocker," refers to this book.)

ST GILES'S, Cripplegate, E.C 2 (14th century). —Contains the graves of John Milton, John Foxe, and Sir Martin Frobisher, the Elizabethan seaman, who attempted to discover a north-west passage to Cathay, and commanded the *Primrose* as vice-admiral to Drake in his expedition to the West Indies

ST HELEN'S, Bishopsgate, E.C 2.—The "Westminster Abbey of the City" from its numerous monuments; building dates from 13th century Contains a Shakespeare memorial window presented by Mr William Prentice, an American. In St Helen's Place the foundations of an earlier church were uncovered during rebuilding operations in 1922

ST. JAMES'S GARLICKHITHE, Garlick Hill, E.C 4, has four stained glass windows, one of which was seriously damaged by a bomb by a German air raider on June 13, 1917. It is proposed that the window should not be completely replaced, and that year by year on the anniversary of the outrage the congregation should assemble for a service of thanksgiving for merciful preservation from sudden and violent death. The "Bomb" Sermon will be a modern counterpart of the "Lion" Sermon (*see* St. Katherine Cree, *below*).

ST. JAMES'S, Piccadilly, W. 1.—Built by Wren with font and wood carvings by Grinling Gibbons. Lord Chesterfield and Lord Chatham were baptized in St. James's.

ST. JOHN'S, St. John's Square, Clerkenwell, E C. 1 —Built in early 18th century, includes part of the ancient priory of St. John (12th century crypt).

ST. KATHERINE CREE, Leadenhall Street, E C. 3. Rebuilt in early 17th century and ascribed to Inigo Jones. Contains a catherine wheel E. window, an organ by Father Smith, Archbishop Laud's prayer book and bible, and a monument of Sir Nicholas Throgmorton. The "Lion" sermon is preached here annually before the Lord Mayor and Corporation of London to commemorate the escape of a Lord Mayor (Sir John Gayer) from a lion in Algeria (Oct. 16, 1630)

ST. MAGNUS THE MARTYR, Lower Thames Street, E.C. 3.—Rebuilt by Wren, with steeple (185 feet) and lantern of great beauty, contains the tomb of Miles Coverdale (1488–1568), translator of the Bible, who was rector of St Magnus (1564–1566) and Bishop of Exeter (1551–1557).

ST. MARGARET, Lothbury, E.C. 2.—Rebuilt by Wren, contains Grinling Gibbons carvings (font, chancel screen, and pulpit).

ST. MARGARET'S, Westminster, S.W. 1.—Founded 11th or 12th century; buildings date from 15th century, with frequent "restorations." The parish church of the Dominions beyond the Seas

ST. MARGARET PATTENS, Rood Lane, Eastcheap, E.C. 3.—Rebuilt by Wren, with a leaden spire, contains two canopied pews and other curious survivals and relics

ST. MARY, Aldermanbury, E.C. 2.—Rebuilt by Wren, contains the tomb of Judge Jeffreys and a marble monument to Lieutenant John Smith, "drowned off Staten Island in 1782." John Heminge and Henry Condell (Shakespeare's editors) were buried in the older church

ST. MARY WOOLNOTH (above the City and South London Tube Station), King William Street and Lombard Street, E.C. 3.—Built by Hawksmoor early 18th century, organ by Father Smith, contains a memorial to Sir Wm Phipps, Governor of Massachusetts, who died in London in 1695

ST. MICHAEL PATERNOSTER ROYAL, College Hill, Upper Thames Street, E.C. 4.—Rebuilt after the Fire by Strong (a pupil of Wren's), contains the tomb of "Dick Whittington (*see* p. 561) and a Grinling Gibbons altarpiece

ST. OLAVE, Hart Street, Mark Lane, E.C. 3.—A 15th century church, which survived the Fire of London, contains the tombs of Samuel Pepys and his wife, and a monument of John Watts, "President of the Council of New York"; also a memorial (formerly in All Hallows Stanning) to Monkhouse Davison and Abram Newman, the exporters of the chests of tea which were thrown into Boston Harbour, Dec. 16, 1773. On Trinity Monday the Master and Brethren of Trinity House (*q.v.*) attend service here.

ST. PAUL'S, Covent Garden, W.C. 2.—Built by Inigo Jones. The tombstones round the exterior of the church record the burial places of Samuel Butler (Hudibras), Sir Peter Lely (Painter), Wycherley (Dramatist), Grinling Gibbons (Wood Carver), Dr. Arne ("Rule, Britannia"), and Macklin (Actor).

ST. PETER'S, Cornhill, E.C. 3.—Rebuilt by Wren, contains a carved choir screen also ascribed to him. The organ is by Father Smith.

ST. SEPULCHRE, Holborn, E.C. 1.—Part of this church escaped the Fire (*see* footnote, col. 2). The organ is by Renatus Harris, in a case attributed to Grinling Gibbons. Memorials in the church to Roger Ascham (Queen Elizabeth's tutor) and Capt John Smith, "sometime Governour of Virginia and Admirall of New England," who would have been put to death but for the intercession of Pocohontas. (Princess Pocohontas is buried in Gravesend, *see* p. 385).

ST. STEPHEN'S, Coleman Street, E.C. 2.—The Rev. John Davenport, who, with other refugees, landed at Boston in 1637, and founded the colony of New Haven, Connecticut, in the following year, was vicar of this church from 1624 to 1633. The colony was composed in part of former residents of this parish. The tablet in the church to Davenport's memory was erected by one of his American descendants.

ST. STEPHEN'S, Walbrook, E.C. 4.—Rebuilt by Wren (and considered, with Bow Church, *q.v.*, and St. Bride's, *q.v.*, one of his greatest successes), contains the tomb of Sir John Vanbrugh (architect and dramatist), and a painting by Benjamin West.

SAVOY CHAPEL, Savoy Street, Strand, W.C.: (re-built about 1505, on site of 13th century Savoy Palace, restored after disastrous fire in 1864). Graves of Gavin Douglas and George Wither, and memorials of D'Oyly Carte, Laurence Irving. Sunday services at 11 15 and 6.

ST SWITHIN'S CHURCH, St Swithin's Lane, E.C. 4 (rebuilt by Wren after the Fire of London, but since modernised).—Contains embedded in its external (S.) wall *London Stone*, the miliarium from which in Roman times the miles (*millia passuum*) were measured. This stone is mentioned in King Henry VI., Pt. II.

THE TEMPLE CHURCH, south side of Fleet Street, E.C. 4.—The largest of the five remaining round churches in England, the other four being the Churches of the Holy Sepulchre at Cambridge, Northampton, Little Maplestead (Essex), and Ludlow. The Norman church, restored 1840–1845, is open to the public on week-days, 10.30 a.m. to 4 p.m., Saturdays excepted. Organ by Father Smith. Church service (famous music) on Sunday at 11 a.m. and 3 p.m. For admission, application should be made (before Saturday) to the Under Treasurer, Middle Temple, or Inner Temple, E.C. 4. Service is discontinued in Aug. and Sept. *Master of the Temple*, Rev. W. H. Draper, M.A.

WREN'S CHURCHES.—Many of the *Churches in the City of London were destroyed by the Fire of London (Sept. 2–6, 1666). Fifty of these were rebuilt by Wren during the rebuilding of St. Paul's Cathedral, and many of them contain wood carvings attributed to Grinling Gibbons. The total cost of the fifty churches was £263,786 10*s.* 4½*d.*, the most expensive being St. Mary-le-Bow, £15,460 6*s.* 8½*d.* (£7,388 8*s.* 7½*d.* for "Bow Tower"), and the cheapest, St. Vedast-Foster (£1,853 15*s.* 6*d.*).

Church of Scotland.

SCOTTISH NATIONAL CHURCH, Crown Court, Russell Street, Covent Garden, W.C. 2. Sundays 11.15 and 6.30. *Minister*, Rev. J. Moffett, B.A., 2, Taviton Street, W.C. 1.

ST. COLUMBA'S, Pont Street, Belgrave Square, S.W. 1. Sundays 11 and 6.30.

Congregational.

BRIXTON INDEPENDENT CHURCH, 364 Brixton Road, S.W. 9.—Rev. B. Snell, M.A. Sundays, 11 and 6.45; Thursdays at 8 p.m.

CITY TEMPLE, Holborn Viaduct, E.C. 1. Sundays, 11 and 7.—Rev F. W. Norwood, D.D.

CHRIST CHURCH, Westminster Bridge Road, S.E. 1.—*Pastor*, Rev. William C. Poole, Ph.D. (*Pastor Emeritus*, Rev. F. B. Meyer, D.D.). Opened on July 4, 1876, the centenary of American Independence. The Lincoln Tower and Spire, 200 feet high, shows the Stars and Stripes wrought into the stone, and the British lion and the American eagle at the angles of the tower. The cost was largely defrayed by Americans, in gratitude for Dr. Newman Hall's sympathy with the Union during the American Civil War. Sunday services, 11 and 7.

* The City Churches now standing which survived the Fire of London are:—All Hallows, Barking-by-the-Tower; St. Andrew Undershaft; St. Bartholomew the Great; St. Ethelburga, Bishopsgate; St. Giles, Cripplegate; St. Helen, Bishopsgate; St. Katherine Cree; and St. Olave Hart Street. Of St. Sepulchre, Holborn, only the south porch and the tower remain; of All Hallows, Staining, only the tower; St. Andrew, Holborn, escaped the Fire, but it was in a ruinous condition at the time and was reconstructed by Wren, the old tower being refaced with Portland stone in 1704.

FELLOWSHIP GUILD SERVICES, instituted by Miss Maude Royden and Dr Percy Dearmer at Kensington Town Hall in March, 1920, and removed in June, 1921, to Guildhouse, Eccleston Square, S.W. 1. Sundays, Music and address, 3.30, and service and sermon, 6 30.

HARECOURT CONGREGATIONAL CHURCH, St Paul's Road, Canonbury, N. 1.—Founded about 1648 in Hare Court, Aldersgate, and removed in 1857 to Canonbury. John Bunyan died at the House of a Deacon of Harecourt *Pastor*, Rev Robert Anderson. Sundays, 11 and 6 30; Wednesdays, 8.0 p.m

THE KING'S WEIGH HOUSE, Duke Street, Grosvenor Square, W. 1.—Rev. W. E. Orchard, D.D. Sundays, 11 a m. and 7 p m Thurs 7 30 p.m.

PILGRIM FATHERS' MEMORIAL CHURCH, New Kent Road, S.E. 1.—The oldest Congregational Church in London (A.D. 1616), was enlarged by American subscribers in 1856.—Sunday Services at 11 and 6 45; Tuesdays at 8. The Church, with the Memorial Chapel, may be seen at any time.

UNION CHAPEL, Islington.—Sundays, 11 a m. and 7 p.m., Wed., 8 p.m. *Minister*, Rev. J. P. Stephens, M.A.

WESTMINSTER CONGREGATIONAL CHURCH, Buckingham Gate, S.W 1.—Sundays, 11 and 7.

WHITEFIELD'S CENTRAL MISSION (London Congregational Union), Tottenham Court Road, W. 1.—Founded by the Rev George Whitefield, M A., in 1756 Institutional Church founded by Rev. C. Silvester Horne, M A., M.P., in 1903. *Superintendent Minister*, Rev. A. D. Belden, B D *Organizing Sec.*, Harry E. Gaze. Sunday Services, 11 and 7. Men's Meetings, 3 15 Thursday Service, 7 p m. Institute and Clubs for young people open daily.

Baptist.

BLOOMSBURY BAPTIST CHURCH, Shaftesbury Avenue, W.C. 2.—Sundays, 11 and 7; Thursdays, 8 p.m.

METROPOLITAN TABERNACLE, Newington, S E 11 (Mr. Spurgeon's, 1861-1892)—Sunday, 11 and 6.30; Thursday, 7.30 *Pastor*, Rev. H Tydeman Chilvers.

WESTBOURNE PARK, Porchester Rd, Bayswater, W. 2—*Pastor*, Rev. S. W. Hughes, D.D. Sundays, 11 a.m. and 6.30 p.m. Wednesdays, 7 30 p.m

Wesleyan.

WESLEY'S CHAPEL, City Road, E.C. 1. "The Cathedral of Wesleyan Methodism." Contains many relics of John and Charles Wesley and other great founders of Methodism. As the "Mother Church of Methodism" visitors attend from all parts of the world.—Sunday morning at 11; evening at 6 30. John Wesley's tomb in graveyard behind chapel. In front is Wesley's House and Museum. *Minister*, Rev. George H. McNeal, M.A., 49 City Road, E.C. 1. Opposite Wesley's Chapel is *Bunhill Fields Burial Ground*, City Road, the burial place of Dr. John Owen (1683), John Bunyan (1688), Daniel Defoe (1731), Dr. Watts (1748), William Blake (1828), and Susannah Wesley (1742). To the west of the cemetery is the *Friends' Burial Ground*, with the grave of George Fox, founder of the Society of Friends.

CENTRAL HALL, Westminster, S.W. 1.—Sunday Services, 11 a m. and 7 p.m. *Sunday Preacher*, Rev. Insdale T. Young, D.D

KINGSWAY HALL, Kingsway and Great Queen Street, W.C. 2.—Sundays at 11, 3.30, and 7.

Roman Catholic.

WESTMINSTER CATHEDRAL, Ashley Place, Westminster, S.W 1 (close to Victoria Station), built 1895-1903 from the designs of J. F. Bentley (the campanile is 283 feet high).—*Sundays*: Low Masses, 6, 6.30, 7, 7 30, 8, 8.30, 9 (with short Sermon), Capitular High Mass, 10.30; Low Mass with Sermon, 12; Solemn Vespers and Benediction, 3 15, Compline, Sermon and Benediction, 7 *Week-days* Low Masses, 7, 7.30, 8, 8 30, 9, Capitular High Mass, 10 30; Vespers, Compline and Benediction, 3 15, Matins and Lauds, 6, Sermon and Benediction, 8 15. *Holidays of Obligation* Low Masses, 6, 6.30, 7, 7 30, 8, 8 30, 9, Capitular High Mass, 10.30; Low Mass, 12; Solemn Vespers, Compline and Benediction, 3.15; Devotions, Sermon and Benediction, 8 15. Church open 6 30 a m. to 9.30 p.m Cardinals Wiseman and Manning buried in crypt Campanile open to public, admission 6*d*.
